Final rule of the Department of Environmental Conservation amends regulations under 18 AAC 76.010, .030, .060, .080, .252, .255, and .990 regarding the clean water and drinking water revolving loan funds. The rule updates provisions to comply with federal requirements, allows financing terms for up to 30 years, and revises the finance rates to reflect fluctuations in the municipal bond market. The rule also revises definitions and clarifies requirements for loan eligibility, applications, accounting, and contract terms. The rule is effective Sept. 10, 2017. AIR
Air Quality Standards
Illinois AIR

Proposed rule of the Pollution Control Board amends regulations under 35 IAC 243.101, .105, .108, and .120 and repeals regulations under 35 IAC 243, Table A, to incorporate national ambient air quality standards (NAAQS) under 40 CFR 50, as of June 16, 2017. The rule implements the 2012 primary annual NAAQS for particulate matter (PM-2.5) and modifies requirements for handling monitoring data influenced by exceptional events. The rule also incorporates an updated equation used for calculating compliance with the PM-2.5 NAAQS. In addition, the rule incorporates the updated list of designated reference and equivalent methods, which includes a designated federal equivalent method for nitrogen dioxide in ambient air. Finally, the rule deletes the schedule for submission for data influenced by exceptional events for use in initial area designations. A concurrent notice includes a schedule for the rulemaking and announces an extension of the deadline for final action on the proposal. A hearing is scheduled for Sept. 21, 2017, in Chicago and Springfield via videoconference. Comments are due Sept. 25, 2017. Feds Must Support Nuclear Power for National Security, Perry Says

Posted October 12, 2017, 02:43 P.M. ET

By Rebecca Kern

The commercial nuclear power industry needs a federal boost for national security reasons to prevent the U.S. from falling behind global competitors such as Russia and China, Energy Secretary Rick Perry told lawmakers today.

"If we're going to continue to be a leader in nuclear energy in the world, we're going to have to support this industry in this country," Perry said during testimony at an Oct. 12 House Energy and Commerce Committee hearing.

"The question is do we have a national security interest in the nuclear industry, and I think the answer is yes," he said.

"If we lose our supply chain, if we lose our intellectual chain of supply of bright scientists," Perry testified, "then we're going to lose our role as a leader when it comes to nuclear energy in the world, and that in turn is going to affect our ability to address the weapons side of it."

Perry was on the defensive during the hearing, which focused heavily on the Energy Department's recent proposal directing the Federal Energy Regulatory Commission to take action to prop up certain coal and nuclear plants that are having difficulty competing in wholesale energy markets.

An unusual set of energy industry bedfellows, including renewable, gas and oil industry groups, as well as large industrial manufacturers and free-market think tanks, oppose the plan. FERC has set an expedited three-week public comment deadline of Oct. 23.

Members from both sides of the aisle questioned Perry about the intention behind the proposal, which he called"a way to kick-start a national discussion about resiliency and about reliability of the grid."

The proposal would allow generators with a 90-day supply of fuel on-site—which would include coal and nuclear facilities—to recover their operating costs at "a fair rate of return." Coal and nuclear plants now get paid a wholesale energy market rate set by historically low prices of natural gas. This is making it difficult for nuclear and coal plants to cover their operating costs and leading some

utilities to close plants due to difficulty competing economically.

FERC, as an independent agency, has the authority to choose how to address the market challenges identified in the proposal. It can do so by a rule or other action, regulators and legal experts told Bloomberg BNA.

House Republicans Push Bills to Promote Oil and Gas

Posted October 12, 2017, 04:12 P.M. ET

By Alan Kovski

Republicans in the House are lining up more oil and gas legislation, including a bill on offshore drilling, and a rewrite of the law on national monuments, all with solid opposition from Democrats.

The survival of some of the measures may hinge on whether they can be added to must-pass legislation such as an omnibus appropriations bill or tagged onto budget measures needing only simple majority votes in the Senate for passage.

Two draft bills under discussion in the House Natural Resources Committee would encourage a broadening and acceleration of offshore oil and gas drilling and a shift of more authority to states for the permitting of onshore drilling on federal lands. Spokesmen for Senate Energy and Natural Resources Committee Democrats suggested there would be no support among Democrats for either one.

Another bill would establish restrictions and public input requirements for presidential use of the Antiquities Act to create national monuments.

Rep. Rob Bishop (R-Utah), chairman of the House Natural Resources Committee, is lining the bills up for action by the full House. The first step is to go beyond the discussion-draft stage by introducing formal versions, which Bishop hopes to do within a month, committee spokeswoman Molly Block said.

Looking for Offshore Energy

Bishop's committee Oct. 11 debated a discussion draft, the Accessing Strategic Resources Offshore Act, that would establish a sharing of government revenues with Southeastern coastal states and Alaska from offshore oil and gas development. It also would allow the Interior secretary to add lease sales in areas excluded from the existing five-year leasing plan.

"Lease sales would be entirely at the discretion of the secretary, who would be free to ignore the five year plan altogether," Rep. Alan Lowenthal (D-Calif.), said. "This would never be acceptable to the people of California and many other states."

The bill also would limit a president's ability to put areas off limits to leasing and block use of the Obama administration's Arctic Rule, which added extra layers of regulatory protections for the difficult operating environment amid the icebergs and short drilling season off the Arctic coasts of Alaska.

Democrats have been defending the Arctic Rule since it was published in July 2016. The rigors of the Arctic environment, where an oil leak beneath sea ice might be unreachable for months, require

extra protections, the Democrats have said.

Rep. Paul Gosar (R-Ariz.) suggested the revenue sharing could boost support for Atlantic offshore drilling, where many people worry about the risks to the environment and tourism. A South Carolina Republican state senator from a coastal district, Stephen Goldfinch, testified that new revenues especially would be appreciated in South Carolina towns like Conway and Andrews, where the poverty rate is 50 percent.

But Goldfinch avoided endorsing or opposing the bill and said his constituents seemed evenly divided on the idea of offshore drilling.

Eric Milito, the director of Upstream and Industry Operations for the American Petroleum Institute, expressed support for the bill during the hearing, but his industry association did not offer any opinion on whether it could get through Congress. The National Ocean Industries Association did not respond to a request for comment.

Bigger State Roles in Onshore

The House Natural Resources Committee will debate a discussion draft focused on onshore oil and gas Oct. 13. That draft bill, Opportunities for the Nation and States to Harness Onshore Resources Act, would allow states to take over permitting and permit enforcement for oil and gas on federal lands.

The legislation also would eliminate the need for a Bureau of Land Management permit or National Environmental Policy Act (NEPA) reviews on non-federal land where the federal government has an ownership stake in the subsurface mineral rights. It also would bar federal regulation of hydraulic fracturing where states regulate fracking, and it would bar federal regulation of fracking on tribal lands without a tribe's consent.

Shifting permitting to states might void the application of NEPA and the Endangered Species Act, which impose requirements on federal rather than state agencies. Such a maneuver would have trouble finding support among House or Senate Democrats.

If either bill were to go to the Senate as stand-alone legislation it would have an uncertain future. A cloture vote to end debate would require 60 votes. Republicans have 52 senators, and not all of them are sure to support the bills.

Both bills can contribute to federal revenues, however, making it possible for them to be included in budget reconciliation legislation requiring only a simple majority. The House passed a fiscal year 2018 budget resolution Oct. 5 that reserved for the House Natural Resources Committee a provision for finding $5 billion in savings. Oil and gas leasing revenues are possible candidates for such savings.

Antiquities Act Rewrite

The Natural Resources Committee also has been an arena for argument over the Antiquities Act, used by presidents to declare national monuments, as President Barack Obama did in December with the Bears Ears National Monument in Utah.

The National Monument Creation and Protection Act (H.R. 3990), written to heavily amend the antiquities law, was approved by the committee Oct. 11 on a 23-17 vote. No Democrat supported the bill.

Proposed by Bishop, the measure would add stricter language in the act by specifying its purpose is to protect an "object or objects of antiquity." The existing act uses somewhat looser language, which the last three presidents before Donald Trump have used to protect millions of acres of onshore or offshore terrain.

The bill also would require more public engagement, including county and state approvals for monuments of 10,000 acres or more. Environmental activists have opposed such ideas as state legislative approval, saying it would prevent new monuments from being created.

Philip Morris Joins Growing Group of Carbon-Pricing Corporations

Posted October 12, 2017, 10:53 A.M. ET

By Christopher Martin and Emily Chasan

Philip Morris International Inc., the maker of Marlboro cigarettes, now uses an internal cost of carbon emissions in its business decisions, joining a group of almost 1,400 companies that agreed to consider how greenhouse gas emissions will affect their industries, according to a statement Oct. 12 from environment group CDP.

That's up from 150 companies in 2014.

Carbon markets from California to China and Europe are placing a price on the greenhouse gas as governments confront the growing threat of climate change. Businesses are responding by setting their own price and using it to determine the best course of action should their industry have to pay a carbon tax of some kind.

"Companies have accepted that there will be a carbon price one way or the other—carbon is no longer going to be a free ride," said Paula DiPerna, an adviser to CDP. "It's certainly become more of an investor focus. It's part of investors' lexicon of questions when they interrogate companies about environmental, social and governance issues."

The four-year effort by CDP to get global corporate leaders to measure the impact of carbon prices has been led by U.S. companies, which grew to 238 this year from 210 last year, including agriculture giant Cargill Inc. and cereal maker Kellogg Co. The biggest growth came from companies in Mexico, up 69 percent this year to 44, and China, which rose 40 percent to 102 now using an internal carbon price.

Philip Morris, which began using an internal carbon price in its decisions last year, adopted emission reduction goals of the Paris Climate Agreement and is using a mix of renewable energy and efficiency upgrades to meet it targets, Corey Henry, a spokesman, said in an emailed response to questions. The company set a price of $17 a ton.

It's used "to help us prioritize our GHG emission-reduction projects according to those most effective at reducing CO2," Henry said.

Dakota Access Boosts Drillers but Won't Be a Bakken Game-Changer

Posted October 12, 2017, 9:17 A.M. ET

By Meenal Vamburkar

Once hailed as the spur for a North American "energy renaissance," the $3.8 billion Dakota Access pipeline has limited driller costs in its first four months in operation.

Just don't expect it to live up to its pre-approval hype.

That's the conclusion of analysts who say North Dakota's Bakken shale play will continue to lag the drilling surge in Texas and Oklahoma, pipeline or no pipeline. The conduit's use has dropped the break-even cost of drilling in the Bakken to around $52 a barrel from $55, as drillers abandon costlier rail shipments, said Erika Coombs, an analyst at BTU Analytics LLC. But that compares with about $46 on average in Texas's Permian play and $41 in Colorado's DJ basin, she said.

Is the Dakota Access "a game-changer?" Coombs said in a telephone interview. "The short answer: For the basin as a whole, not really." It helps, she said, "but it's not enough to attract capital away from the Permian or Scoop/Stack."

First proposed in 2014, the 1,172-mile (1,886-kilometer) pipeline is designed to ship as much as 570,000 barrels of crude. However, its construction has faced major opposition from Native American tribes and environmental activists over the last year, including a legal suit that's ongoing in federal court.

A judge ruled Oct. 11 that use of the conduit, in operation since June 1, could continue while its environmental impact is reviewed as a result of that suit.

Lawyers for Energy Transfer Partners LP, which operates the line, had argued it would be expensive to purge or plug the conduit while the U.S. Army Corps of Engineers conducted a supplemental review into aspects of the project, including its impact on the hunting and fishing rights of Native American tribes.

There's a "serious possibility" that the corps will be able to back its prior conclusions for approving the pipeline's route, U.S. District Judge James E. Boasberg ruled Oct. 11. But he urged the Corps not to treat his decision "as an exercise in filing out the proper paperwork" but to give serious considerations to errors that were made and identified. A follow-up court conference has been set by Boasberg for Oct. 18.

U.S. Justice Department spokesman Mark Abueg declined to comment on the court's decision. Vicki Granado, a spokeswoman for Energy Transfer, didn't immediately respond to request for comment.

The ruling is a win "for all major interstate infrastructure projects currently under construction or consideration," said Craig Stevens, a spokesman for the GAIN Coalition, a group that promotes more infrastructure development.

When newly inaugurated President Donald Trump advocated green-lighting the Dakota Access in January, it was hailed as "a new beginning" for North America's "energy renaissance," in a statement by Ron Ness, president of the North Dakota Petroleum Council. "As Bakken crude is finally compensated for its true value, state tax coffers, mineral owners and workers will reap the rewards," he said at the time.

And it has helped. In July, just a month after the conduit began operating, rail transported just 10 percent of Williston Basin output, down from 32 percent a year ago, according to the North Dakota Pipeline Authority. The pipeline runs from North Dakota to Illinois, where flows can be diverted to the Midwest and, eventually, make their way to the heart of the U.S. energy market, the U.S. Gulf Coast.

But even with cheaper transport, and smoother access to major markets, the Bakken remains disadvantaged, both in terms of location and overall cost.

Named for Henry Bakken, a North Dakota farmer whose land hosted the first well in the region in the early 1950s, the Bakken is expected to produce an average of 1.1 million barrels a day of oil this year and next, a figure lower than the 1.2 million barrels produced in 2015, according to the Energy Information Administration. At the same time, Permian production is expected to reach 2.9 million barrels a day by the end of next year, the EIA said in July.

The Bakken's lack of growth "really is from the competition with the Permian basin and the Oklahoma Anadarko basin," said Lynn Helms, director of the North Dakota's Department of Mineral Resources, in a September webcast. One big problem, according to Helms, is that skilled, experienced workers left for other plays when the oil rout hit.

"It's been difficult if not impossible to get them to move back to North Dakota," he said.

The pipeline has opened new markets for Bakken drillers, which offers new promise for their product, said Ryan Saxton, manager of oil transportation in North America at Genscape Inc., an energy data provider. But, he added,"that's not going to get you back to the hey-day of the Bakken."

China's Top Coal Region to Cut Pollution by 40 Percent

Posted October 12, 2017, 9:07 A.M. ET

By Feifei Shen

China's second-largest coal producing region is planning to cut pollution by two fifths over the autumn and winter seasons, Xinhua News Agency reported.

The reduction in China's northern province of Shanxi seeks to reduce the concentration of PM2.5 particles and sulfur dioxide from October to March 2018, Xinhua reported Oct. 11, citing the provincial environmental protection bureau.

In order to meet the target, authorities will take measures involving the closure of small highly-polluting firms, production cuts in heavy industry, and a ban on burning low-quality coal. One million households will also be pushed to shift toward electric or gas heating systems from traditional coal. Coal burning has also been prohibited completely in parts of six major cities, Xinhua said.

Shanxi is joining other regions in northern China to make greater efforts to curb smog during the winter, when pollution usually accumulates from home heating and weather conditions. Recurrent air pollution has been a persistent problem despite several years of government campaign to control

it to avoid social unrest.

Harsher measures to reduce pollution could challenge the province as it seeks to maintain economic growth at the same time. Shanxi's economy grew by 4.5 percent last year from the previous year, lagging behind the nation's 6.7 percent as a whole.

China also plans to plans to cut average PM2.5 concentrations in Beijing and surrounding areas by more than 15 percent, the environmental ministry said in August. Authorities will require emission licenses in the region for power, steel, cement, copper, zinc, lead and aluminum producers by the end of the year.

The Shandong provincial government has offered 600 million yuan ($91 million) in subsidies for people switching to electric and gas heating systems in six cities that affect the Beijing-Tianjin-Hebei region, Xinhua said.

China Mulls Storage Salve for $4 Billion Renewables Headache

Posted October 12, 2017, 9:33 A.M. ET

By Feifei Shen

China is considering a prescription for nearly $4 billion worth of wasted electricity production looming over its push into clean energy.

The world's biggest investor in renewables plans an aggressive expansion into energy storage with an eye to making the technology widespread by 2025, according to a statement posted on the website of the National Development and Reform Commission Oct. 11.

In recent years, China's booming renewables sector has helped drive down the cost of solar panels and wind turbines globally. A push by the nation into storage may accelerate an expected drop in battery costs caused by increased global investment in their use for electric vehicles and grid use.

China will kick start the storage business with several pilot projects including lithium-ion battery storage systems of about 100 megawatts in size, along with other technologies such as supercritical compressed air and flywheel energy storage systems, according to the NDRC.

Storage is seen as critical to overcoming curtailment, a situation that arises when grid access is constrained, particularly for wind- and solar-generated electricity. China's renewable plants suffer from the world's most severe curtailment, according to a Bloomberg New Energy Finance report published in September.

Curtailment Cost

The phenomenon carries a heavy cost. Renewable energy generators in China experienced losses of 25.5 billion yuan ($3.87 billion) in 2016 because of the curtailment of wind and solar energy, representing 49.7 terawatt-hours of wasted wind and 3.28 terawatt-hours of squandered solar, BNEF estimated.

"The curtailment issue is tough and won't see significant improvement by 2020," said Tian Miao, a

Beijing-based senior analyst at Sun Hung Kai Financial Ltd. “Storage will help make a better use of renewables but it needs long-term progress.”

Along with the pilot projects, China is also encouraging companies to create innovative financing models and to participate in overseas projects to improve domestic manufacturing technology, the nation’s top economic planning agency said. Overseas storage projects would involve vanadium redox battery storage plants and lead carbon capacitors.

China’s total installed renewable power capacity surpassed 600 gigawatts as of the end of June, according to data from the National Energy Administration. The rate of curtailment, or idle rate, stood at 13.6 percent for wind turbines in the first half and 6.7 percent for photovoltaics, NEA data showed.

Along with supporting storage technology aimed at helping to absorb more renewable energy, China will also study the setting of prices for electricity coming from storage systems, the NDRC said.

Storage Needs

China’s move is “the first step in the right direction,” said I-Chun Hsiao, a BNEF analyst based in Tokyo, who added that the nation is keen to develop all kinds of technology.

Excluding capacity from pumped hydro power, China had 243 megawatts of storage at the end of 2016, up 72 percent from a year earlier, the China Energy Storage Alliance said in May. Lithium-ion batteries hold the biggest share, followed by lead-acid batteries and redox-flow batteries, the alliance said.

Global electricity storage capacity should triple by 2030 if countries were to double their share of clean energy such as solar and wind, according to the International Renewable Energy Agency.

With growing demand for storage from stationary and mobile applications, the total stock of storage in energy terms will need to grow to as much as 15.72 terawatt-hours by 2030 from an estimated 4.67 terawatt-hours this year, the Abu Dhabi-based agency said in a report last week.

Brazil Experiments With Floating Solar Panels Above Dams

Posted October 12, 2017, 6:57 A.M. ET

By Michael Kepp

Floating solar panels on the reservoirs above two state-owned dams will showcase technology that could eventually help Brazil diversify its energy sector as the country grapples with severe droughts.

Brazil’s nationwide drought is now in its fifth year and has hampered hydropower generation, which accounts for 70 percent of the country’s electricity.

Subsidiaries of Eletrobras, the federal electricity holding company, recently contracted for floating solar systems on the reservoirs above two dams in drought–stricken areas. The grid of modular solar panels mounted on a floating array will allow dam operators to generate electricity even while reducing the flow of water through dam turbines when reservoir levels are low.

"Although France, England, and Japan were the first countries to install such systems, Brazil is the first country to build them on dam reservoirs," Orestes Goncalves Jr., managing partner of floating solar company Ciel & Terre's Brazilian office, told Bloomberg BNA. "And when Chesf and Eletronorte [the Eletrobras subsidiaries] confirm the viability of these floating systems here, they will encourage private Brazilian companies to install them."

Chesf expects its 1 megawatt, 12.5-million-real ($4-million) floating solar system to start operation by the end of the year at the 1,050-megawatt Sobradinho dam in northeast Bahia state.

Eletronorte is building a 57-million-real ($18-million), 5-megawatt floating solar project on the reservoir of the 250-megawatt Balbina dam in the western Amazon state of Amazonas, with operations expected to begin by next July. A smaller-scale pilot solar project had already been tested at the Balbina dam.

Because of drought, the Sobradinho dam is generating electricity at 16 percent of its installed capacity, Jose Bione, the manager in charge of the floating solar system at Chesf, told Bloomberg BNA.

The Balbino dam is functioning at 80 percent of its capacity, but that was at 40 percent from the end of 2015 until this May, Davidson Pereira Campos, manager of Eletronorte's innovation, technology and energy department, told Bloomberg BNA.

Eyes on Private Dams

"The private sector, which has 16 dams in the northeast ... will probably wait to see if floating systems at Sobradinho and Balbina are viable before waging capital on similar investments," Bione said.

Brazil's Votorantim Group, one of Latin America's largest industrial conglomerates, is studying using floating solar projects on the reservoirs of some of its 33 dams nationwide, which mainly supply electricity to steel mills, aluminum smelters, and pulp and paper plants, the company told Bloomberg BNA.

Braskem, Latin America's largest petrochemical producer, is also evaluating installing floating solar systems on small, natural lagoons on its Brazilian properties, mainly to provide electricity for its administrative offices, Robson Casali, who is in charge of Braskem's energy-related business, told Bloomberg BNA.

In addition to the dam-based projects, in August, a consortium led by France's Ciel & Terre installed a 304-kilowatt floating solar system on a rainwater accumulation pond in the north-central state of Goais.

The consortium includes Canadian Solar, the biggest solar panel maker in Brazil, and WEG Energy S.A., which manufacturers devices to transform the direct current from the floating solar panels to alternating current.

Future Energy Auctions

While floating systems are more expensive than land-based solar power, the water cools the panels, which can make them more efficient.

If the government confirms the viability and efficiency of these floating solar systems, it could allow developers to sell their future power at energy auctions, analysts and industry advocates said.

At these auctions, energy developers offer future power to electricity distributors at the lowest prices below a government-set ceiling, and they sign 20- to 30-year contracts with the first distributors that agree to buy the electricity.

"If the government finds that floating solar systems are structurally operative and maintainable during the 20- to 30-year duration of a supply contract, it will allow developers to sell future solar power from such systems at energy auctions," Helena Chung, a Bloomberg New Energy Finance analyst in Brazil, told Bloomberg BNA.

U.K. Eyes Cap on 'Rip-Off' Power, Gas Prices

Posted October 12, 2017, 11:47 A.M. ET

By Alex Morales

The U.K. government published its plans to cap domestic power and gas prices to protect millions of households from what it calls "rip-off" charges at the hands of the biggest utilities.

The new law will empower the energy regulator, Ofgem, to introduce the cap for those on Standard Variable Tariffs, the default rate consumers revert to once fixed-term contracts expire. The Department for Business, Energy and Industrial Strategy estimates there are 18 million such accounts.

"Our broken energy market has to change—it has to offer fairer prices for millions of loyal customers who have been paying hundreds of pounds too much," Prime Minister Theresa May said in a statement. The draft legislation "is a vital step towards fixing that."

May is delivering on a Conservative Party election pledge that was shared by the Labour opposition, meaning the legislation is unlikely to be obstructed in Parliament. Legislators from both parties want to fast-track the bill and the business department is seeking to build cross-party consensus on how the cap operates.

The draft bill requires Ofgem to consult on and impose the cap "as soon as practicable" after the legislation is passed, BEIS said Oct. 12, without being specific about the timing. The cap will be a temporary measure effective until end-2020, after which Ofgem will decide whether it should be extended on an annual basis until its expiry in 2023.

"It's likely to take at least a year before a full consultation process on a market-wide cap can be concluded and implemented," Ryan Thomson, a partner at energy consultants Baringa Partners, said by email. "Any potential benefits to consumers may not be felt until 2019."

Fast-track implementation is opposed by the utilities, which say they need to make a fair margin on the prices they charge in order to invest for the future. They also point to the mounting cost of meeting government targets for renewables, energy efficiency, installing smart meters and subsidizing poorer households.

"It is disappointing that the government has chosen to proceed with this crude and counter-

productive legislation," said Sam Hall, a senior research fellow at the think tank Bright Blue. "A price cap risks harming investment in new power generation and reducing competition in the market."

Centrica's Tumble

May's announcement to Conservative supporters last week that she'd legislate for the cap sent shares of Centrica Plc, the owner of British Gas, tumbling to a 14-year low. The U.K.'s "Big Six" utilities also include Electricite de France SA, SSE Plc, Innogy SE's Npower unit, Iberdrola SA's ScottishPower business and EON SE.

The government move follows a probe by the Competition and Markets Association that found customers overpay on their energy bills by 1.4 billion pounds ($1.8 billion) a year.

The energy market "does not operate in the interests of the majority of consumers," the business department said. "While we are in favor of free markets, we will always take action to fix them when they're broken."

Ofgem said on Oct. 11 it is extending a safeguard tariff to 1 million more vulnerable households, with a further 2 million set to benefit by "winter next year." The price cap already applies to 4 million customers.

Danish Company Dong Turns Trash into Energy

Posted October 12, 2017, 8:02 A.M. ET

By Jess Shankleman

The U.K. might soon be powering its lights with energy that comes from the trash. A Danish energy company is working on new machines that sort household trash from recycling, while rapidly breaking down organic materials like food to create power from biogas produced by the process.

Dong Energy A/S, which runs hundreds of wind turbines in the North Sea, says its plant 30 kilometers (19 miles) outside of Manchester is one of the first to use enzymes on an entire waste stream and then combine it with recycling sorting technology. That would be particularly helpful in cities where space is at a premium and small apartments often have room for only one trash bin.

The process "is a useful option for local authorities and waste companies that have not yet rolled out separate food waste collections," said Charlotte Morton, chief executive of the Anaerobic Digestion & Bioresources Association.

Dong, which is changing its name to Oersted, says its "Renescience" plant in Northwich will be finished at the end of this year at a cost of 600 million krone ($95 million). It will help deal with Britain's mountains of waste, about a quarter of which goes to landfill dumps, where it releases the potent greenhouse gas methane as it rots.

"If everything goes well, this is going to be a big showcase that people will come to from all over the world to see," Thomas Dalsgaard, executive vice president of thermal power and bioenergy at

Dong, said in an interview at the plant.

The Renescience process starts with a giant claw that crunches into a mountain of trash and it ends with seven different types of material—from plastics to metals and biogas, that can be used to create electricity, recycled or sold on to a scrap yard. Nothing goes to landfill.

Renescience enzymes, like those found in washing powder, clean trash for 12-hours in tanks 50 meters (164 feet) long, speeding up the decomposition process and taking organic materials to an anaerobic digestion plant where it's used to create electricity.

Anything that's left is sorted through a series of ballistic separators, conveyor belts, magnets and shredders to give the finished clean and reusable products. While some leftovers from the process are currently incinerated, Dalsgaard said that will stop by 2020.

"You can be lazy and have a good conscience with Renescience, and you can also solve an issue about space and we can solve whatever residuals would be from household sourcing," he said.

In fact, he reckons Renescience is better than home sorting because any waste food, like ketchup at the bottom of a plastic bottle is turned into electricity rather than washed away.

If the technology proves a success, Dong has plans to develop a series of plants across the U.K., Europe and the world, including Malaysia. Britain was the ideal place to start because filling landfills with mountains trash are getting more expensive.

Crucially, the biogas that drives the engines can create a steady flow of power to back up intermittent electricity generated by wind and solar. That could provide an alternative to plans for costly new nuclear power stations like the once being built at Hinkley Point.

"We would argue that offshore wind in a country like this is very close to being baseload, so combined with decentralized generation in multiple sites and storage, it could be a cost effective alternative to nuclear," he said.

Australia to Fund Companies to Scale Back Energy Use This Summer

Posted October 12, 2017, 03:20 P.M. ET

By Murray Griffin

Australia will pay 10 large industrial energy users and small businesses to reduce energy use at times of extreme peak demand under a pilot program that has received A$35.7 million ($27.9 million) in government grants.

The Demand Response pilot project includes a diverse range of energy users that adds up to a commitment to cut energy demand by 200 megawatts by 2020 when requested. Federal funding for the program will total A$28.6 million ($22.4 million), with the remaining grant money provided by the New South Wales government as extra support for projects in that state, the two governments announced Oct. 11.

The new project aims to help the expansion of country's relatively small demand management

industry.

"Demand response will not only ease the strain on the electricity grid and prevent blackouts. These projects will also put money back into the pockets of Australian businesses and households, helping to reduce their energy costs and emissions," said Ivor Frischknecht, chief executive officer of federal authority Australian Renewable Energy Agency.

Years of policy reversals on energy and climate policy have raised fears of blackouts on extremely hot days in the impending Australian summer, as the grid struggles to supply sufficient electricity to millions of air-conditioned homes and nonresidential buildings.

Consequently, the government wants at least 143 megawatts of the total demand reduction capacity to be on-call ahead of this summer.

Ready to Participate

With one exception, the 10 project grants will go to intermediaries such electricity companies that will in turn invite their customers to participate. Energy company AGL Energy Ltd., for example, will provide 20 megawatts of demand response in New South Wales under the program, with 17 megawatts coming from commercial and industrial customers and 3 megawatts from residential customers.

"We expect the residential component of this program will grow to over 10,000 customers during the three-year project, and we will be providing a number of innovative energy solutions to our residential NSW customers who sign up to this project," an AGL spokesperson told Bloomberg BNA by email Oct. 12.

Meanwhile, EnergyAustralia said it will provide 50 megawatts of demand reduction capacity, with 40 megawatts to be secured in time for the summer, which starts Dec. 1.

Intercast & Forge, Australia's largest foundry, will receive A$323,654 ($253,300) to participate directly.

Energy users that sign up to the program will be paid a participation fee, irrespective of whether they're called on to reduce demand during an extreme peak period.

They will receive an additional payment if they are actually requested to scale back demand.

Aussie Green Energy Bank Warns Funds at Risk If Targets Scrapped

Posted October 12, 2017, 03:43 P.M. ET

By Perry Williams

Australia's government-owned green bank said investments in renewable energy generation will drop if the nation doesn't extend into the next decade clean energy targets and the financial incentives to meet them.

Clean Energy Finance Corp., which invested nearly A$2.1 billion ($1.6 billion) in the year to June in renewable and power storage projects, will be forced to cut funding if the country's existing subsidies program that expires in 2020 isn't replaced, according to Ian Learnmonth, the lender's

chief executive officer. Outside investments from developers will fall as well if the government of Prime Minister Malcolm Turnbull fails to set clear targets, he said.

"You are going to need a greater price signal than just the wholesale power price," Learnmonth said in an interview. "Developers would be cautious. You would see a downturn in investment if there is no guidance over the coming 12-18 months."

Extending clean energy targets beyond 2020 has become a lightning rod within the divided coalition government as it tries to balance competing energy sources amid spiraling power prices. A decline in renewables costs has boosted speculation Turnbull may refrain from setting new clean energy targets as he seeks to avoid further political infighting that has plagued his government.

CEFC, which has access to a A$10 billion fund, more than doubled investments in the year ending in June across 35 developments in solar, wind, energy storage and efficiency projects. It spent A$837 million in 2015-16 and A$484 million in the year before.

The government body has commissioned consultant Jacobs to calculate the impact of different policy outcomes on pricing forecasts for clean energy and a report is due in November. The results of that modeling will help the CEFC determine how much it might invest in a project, Learmonth said.

While cost declines have put the price of solar and wind power in line with thermal generation, according to Learmonth, prices fail to reflect the storage capacity needed to ensure the power grid can call on renewables when required. The cost of solar in Australia has dropped by more than half since the start of the decade and batteries will fall 60 percent by 2020, Energy Minister Josh Frydenberg said Oct. 9 at a conference in Sydney.

Subject: Today on Climate Beat

September 25, 2017

Today on Climate Beat . . .

. . . we checked in on biofuels, reporting that EPA is poised to soon issue the final version of its renewable fuel standard (RFS) rule for the 2018 compliance year following the White House Office of Management & Budget's quick five-day review of the rule, putting the agency to track to easily meet a Nov. 30 statutory deadline for issuing the final RFS rule.

Speaking of the White House, it has begun an inter-agency review of draft final EPA rules to delay implementation of Obama-era methane limits for new oil and gas equipment, after the agency's initial stay was scrapped in court as unlawful.

And our daily news roundup looked at EPA chief Scott Pruitt's schedule going back to April, which showed dozens of meetings with industry groups and mostly Republican elected officials.

EPA ELIMINATES NEW-CHEMICAL BACKLOG, ANNOUNCES IMPROVEMENTS TO NEW CHEMICAL SAFETY REVIEWS

Administrator Pruitt Strengthens TSCA New Chemical Review Program to Ensure Safety, Transparency and Continuous Improvements

WASHINGTON (August 7, 2017) – Following through with Administrator Pruitt's commitment to eliminating the backlog of new chemical cases that were stuck in EPA's review processes upon his confirmation, Administrator Pruitt is reporting that the backlog is eliminated.

"EPA has a tremendous responsibility to review new chemicals intended to enter the U.S. market for safety," said EPA Administrator Scott Pruitt. "EPA can either be a roadblock to new products, or it can be supporter of innovation and ever-improving chemical safety. I am happy to report that the backlog of new chemical reviews is eliminated. With the ongoing commitment of the staff working on TSCA reviews, and input from stakeholders, our goal is to ensure a new chemicals program that is both protective of human health and the environment, while also being supportive of bringing new chemicals to market."

The Toxic Substances Control Act (TSCA), amended by the 2016 Lautenberg Chemical Safety Act, ensures that EPA must make an affirmative safety determination before a new chemical can come to market. EPA can request more information from chemical companies if it needs more information to make a safety determination.

When Administrator Pruitt was confirmed, over 600 new chemicals were 'stuck' in the EPA review process. The current caseload is back at the baseline and now in line with the typical active workload. Administrator Pruitt committed to being a partner in the regulatory process, and ensuring safety for health and the environment, while also seeking ways to allow new chemicals to enter the market quickly, once EPA is assured that the chemical is not likely to present unreasonable risk for the intended and reasonably foreseen uses.

In addition to announcing the elimination of the backlog, EPA Administrator Pruitt is committing the Agency to a more predictable and transparent process for making safety determinations through a commitment to following operating principles; continuously improving; and, increasing the transparency in the decision-making for new chemical safety determinations.

"Not only do I support reducing the backlogs that have built up at this Agency, I also encourage continuous improvement and increased transparency," said EPA Administrator Scott Pruitt.

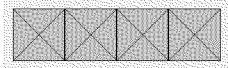
Additional Details of New Measures to Strengthen EPA's New Chemicals Review

EPA is committing to the following operating principles in its review of new chemicals:

- Where the intended uses in premanufacture notices (PMNs) or other Section 5 notices (such as low volume exemption (LVE) requests) raise risk concerns, EPA will work with submitters, and, if the submitters submit timely amended PMNs addressing those concerns, EPA will generally make determinations based on those amended submissions.
- Where EPA has concerns with reasonably foreseen uses, but not with the intended uses as described in a PMN or LVE application, as a general matter, those concerns can be addressed through significant new use rules.
- As described in the risk evaluation rule EPA Administrator Scott Pruitt signed on June 22, 2017, identification of reasonably foreseen conditions of use will be fact-specific. It is reasonable to foresee a condition of use, for example, where facts suggest the activity is not only possible, but, over time under proper conditions, probable.
- The purpose of testing in a Section 5 order is to reduce uncertainty in regard to risk. Specifically, it is to address risk concerns that gave rise to a finding of "may present unreasonable risk" or another Section 5 finding other than "not likely to present unreasonable risk." In addition, consistent with the statute, any request for testing by EPA will be structured to reduce and replace animal testing as appropriate.

EPA supports continued improvement of EPA's TSCA new chemicals program, including:

- Redeploying staff to increase the number of Full-Time Equivalent (FTE) staff working on new chemicals.
- Initiating a LEAN exercise to streamline work processes around new chemicals review.
- Institutionalizing a voluntary pre-submission consultation process so that submitters have a clear understanding of what information will be most useful for EPA's review of their new chemical submission, and of what they can expect from EPA during the review process. While such engagement prior to submission is an additional up-front time and resource commitment by submitters and EPA, it should more than pay for itself with faster, better-informed EPA reviews.



EPA needs to be more transparent in how it makes decisions on new chemicals under TSCA:

- In Fall 2017, EPA's Office of Pollution Prevention and Toxics (OPPT) intends to release, for public comment and stakeholder engagement, draft documents that will provide the public with more certainty and clarity regarding how EPA makes new chemical determinations and what external information will help facilitate these determinations.
- EPA will facilitate a public dialogue on the Agency's goal of continued improvement in the new chemicals review program.
- EPA will continue posting weekly web updates of program statistics, so that manufacturers and the public can determine the disposition of cases as quickly as possible.

Driving the Day

Good Saturday morning. A JUICY SPOTTED FOR PRESIDENT TRUMP: Senate Majority Leader Mitch McConnell (R-Ky.) dining last night at Ocean Prime in D.C. with Attorney General Jeff Sessions. Needless to say, the two men -- who served in the Senate together for 20 years -- have recently found themselves at odds with President Donald Trump.

HIGHLIGHTS FROM THE PRESIDENT, from a pool spray yesterday at his golf club in New Jersey ...

-- ON TRADE: He will hold a press conference Monday in Washington, and will announce a trade investigation into China. ***More here from Andrew Restuccia*** http://politi.co/2uPjmvj

-- ON VENEZUELA: He said he is not ruling out military action in Venezuela. **REALITY CHECK FROM SEN. BEN SASSE (R-NEB.) --** "No. Congress obviously isn't authorizing war in Venezuela. Nicolas Maduro is a horrible human being, but Congress doesn't vote to spill Nebraskans' blood based on who the Executive lashes out at today." ... **@nancyayoussef:** "Overheard at the Pentagon, in what can only be described as in a whiny voice: 'I don't wanna go to war with Venezuela!'"

-- ON NORTH KOREA: Asked about a "bad solution" for the U.S. in North Korea, Trump declined to get into specifics. **Q:** "What would be a bad solution, sir?" **TRUMP:** "I think you know the answer to that." **Q:** "Mr. President, when you say bad solution, are you talking about war? Is the U.S. going to go to war?" **TRUMP:** "I think you know the answer to that."

@CNN: "Blitzer: I don't recall seeing you this emotional, possibly outraged Panetta: 'I'm concerned ... This is not a game'". http://bit.ly/2hThv7f

-- ON JOHN KELLY: He is happy with John Kelly, right now. "[I] think that General Kelly has brought a tremendous -- he's brought something very special to the office of chief -- I call him 'chief.' He's a respected man. He's a four-star from the Marines, and he carries himself like a four-star from the Marines. And he's my friend, which is very important." ***11 min. video of the pool spray*** http://bit.ly/2vrGsvk

CHECKING IN -- "If the U.S. is going to war in North Korea, nobody told the U.S. military, " by Defense News' David B. Larter: "[W]hile the rhetoric is nearing a fever pitch in D.C., out in the Pacific you'd never know the world was on the brink of nuclear war. In Yokosuka, Japan, the U.S. Navy's forward-deployed ready aircraft carrier USS Ronald Reagan sits peacefully pier-side, along with the U.S. 7th Fleet command ship Blue Ridge. On the Korean Peninsula, the State Department has not advised American citizens to leave the country and U.S. military family members are not being evacuated. No Marines are being loaded on amphibious ships; no sailors have been recalled off leave to prepare for emergency operations; and no ballistic missile defense ships have been sortied to North Korea, the waters off Japan or to Guam, three sources said." http://bit.ly/2wS8VIF

HENRY KISSINGER pens a WSJ op-ed: **"How to Resolve the North Korea Crisis:** An understanding between the U.S. and Beijing is the essential prerequisite. Tokyo and Seoul also have key roles to play." http://on.wsj.com/2vPoCn0

-- "How U.S. Military Actions Could Play Out in North Korea," by NYT's Michael Shear and Michael R. Gordon: http://nyti.ms/2vOOyiB

CHINA REACTS -- "Xi calls for calm after Trump says U.S. is 'locked and loaded,'" by AP's Eric Talmadge in Seoul and Jonathan Lemire in Bedminster, N.J.: "Chinese President Xi Jinping made a plea for cool-headedness over escalating tensions between the U.S. and North Korea in a phone conversation with U.S. President Donald Trump on Saturday, urging both sides to avoid words or actions that could worsen the situation. ... State-run China Central Television quoted Xi as telling Trump the "relevant parties must maintain restraint and avoid words and deeds that would exacerbate the tension on the Korean Peninsula." http://bit.ly/2uPIYb9

KELLY MAKES HIS PRESENCE FELT -- "Kelly considers further shuffling of West Wing staff, officials say," by Josh Dawsey, Eliana Johnson and Ben White: "White House chief of staff John Kelly spent this week in Bedminster, N.J., pondering changes in the West Wing, according to four White House officials. Kelly summoned aides to President Donald Trump's golf club there to ask about their portfolios and make suggestions on how to make the West Wing communicate better and get more done, while giving people clear responsibilities and then holding them accountable. The role of chief strategist Steve Bannon has come under particular scrutiny in several

conversations, particularly because he has a large staff, including an outside public relations expert, but no specific duties.

"In a number of daily meetings, Kelly generated a list of concerns, including aides without clear portfolios, decisions that aren't made with proper vetting and internal fights -- particularly a sustained campaign against national security adviser H.R. McMaster. He has met with top aides, including the president's son-in-law Jared Kushner, about making changes, the four officials say. In some of the encounters, he has suggested that people should be more concerned with the president's agenda and less concerned with their own.

"Kelly ... has also raised concerns about the administration's communications, personnel practices and political operations, these officials said. He has said there have been too many internal fights over appointments, and that they need to speed up. He has been vague about exactly what he wants, telling aides he is still studying the White House, but has made clear 'that the place will be different soon,' one senior administration official said." http://politi.co/2hTCjeQ

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)**: If you know only one fact about rising drug costs, know this one: drug makers set prices for prescription drugs. To help manage nearly double-digit price increases, employers, unions and government programs use PBMs to negotiate lower net prices to help curb costs for employers and patients. Learn more at affordableprescriptiondrugs.org ******

KNOWING MIKE PENCE -- "Mike Pence and the art of staying clean," by Darren Samuelsohn and Matt Nussbaum: "Vice President Mike Pence has so far avoided being dragged into the muck of the Russia probes that have engulfed President Donald Trump, his top aides and his family members. It's no accident. Unlike his boss, Pence's Twitter feed is silent about a 'Russia hoax' and 'witch hunts.' He's denied having knowledge of critical discrepancies in Michael Flynn's story - gaps that have landed the former national security adviser in prosecutors' crosshairs. And he's taken pains to note he wasn't even part of the Trump ticket at a controversial June 2016 meeting where a Kremlin-linked lawyer offered dirt on Hillary Clinton in a meeting with Donald Trump Jr., Jared Kushner and Paul Manafort.

"The Vice President's office has also instituted strict rules against speaking to the press, and any staffers have to clear it with Pence's new chief of staff, Nick Ayers, his communications director or press secretary before talking to reporters. And unlike in the West Wing, where staffers have taken to slinging arrows and airing unattributed grievances through the media, the rules have held firm in Pence's orbit, where infighting is rare. While Pence has become known for his aw-shucks persona, the former Indiana governor and longtime congressman is also a cunning politician who has developed a playbook for staying clean over his decades in the spotlight.

"Ryan Streeter, who served as Pence's deputy chief of staff when he was governor, said Pence has a way of creating 'barriers' between himself and wrongdoing, or even

the appearance of wrongdoing. Streeter said Pence used to tell staffers: 'If there's a line you don't want to cross, you don't even walk up to it -- you stop three feet in front of it.'" http://politi.co/2fAzONX

CNN'S MANU RAJU -- "GOP-led Senate panel wants White House responses on Kushner's security clearance": "The Senate Judiciary Committee is calling on the White House to provide new details about President Trump's son-in-law Jared Kushner's security clearance application, including whether he could be trusted with sensitive information after he initially failed to disclose meetings with Russian officials.

"The committee, led by Republican Chairman Chuck Grassley of Iowa , sent a letter in June to the White House and the FBI asking for a detailed list of questions about Kushner's security clearance form, which he has had to amend multiple times because of his initial failure to disclose meetings with foreign officials. In response, Kushner's outside attorney sent the panel a letter, but the White House has not yet responded to the panel's queries despite a July 6 deadline set by a bipartisan group of senators. ...

"'The committee is appreciative of the response we have gotten so far from Mr. Kushner's attorney,' Hartmann said. 'But the committee still does expect the White House to reply to its questions about Mr. Kushner's security clearance, and to provide answers to the requested questions of the SF-86,' referring to the questionnaire applicants fill out for security clearances." http://cnn.it/2fAhqVf

MEANWHILE ... -- JERUSALEM POST: "WHITE HOUSE AIDES TO VISIT REGION: MIDEAST PEACE 'DIFFICULT, BUT POSSIBLE'": "The White House official said the president is optimistic that a peace agreement can be reached," by Michael Wilner: "U.S. President Donald Trump will send three envoys to the region in the coming days, hoping that talks which ended a crisis on the Temple Mount last month have provided an opportunity for broader dialogue on the Israeli-Palestinian conflict.

"Two of his aides leading the peace effort -- Jason Greenblatt and Jared Kushner -- will be joined on this trip by Dina Powell, a national security adviser. They will meet with leadership from Saudi Arabia, the United Arab Emirates, Qatar, Jordan, Egypt, Israel and the Palestinian Authority, and report back to the president, a White House official said.

"Trump 'believes that the restoration of calm and the stabilized situation in Jerusalem after the recent crisis on the Temple Mount/Haram al Sharif has created an opportunity to continue discussions and the pursuit of peace that began early in his administration,' the official said. 'While the regional talks will play an important role, the president reaffirms that peace between Israelis and Palestinians can only be negotiated directly between the two parties and that the United States will continue working closely with the parties to make progress towards that goal.' The official said that National Security Adviser H. R. McMaster and Secretary of State Rex Tillerson are actively consulting with the delegation. A Palestinian official said on Thursday that the U.S. team

is expected in roughly two weeks." http://bit.ly/2vOBuK1

NYT's CARL HULSE -- WHAT RICHARD BURR IS THINKING -- "Senator Richard Burr, the initially reluctant but now determined leader of the Senate Intelligence Committee inquiry into Russian interference in the 2016 election, said the investigation had expanded beyond its original scope based on new evidence, but he hoped to complete it this year to allow Congress to take steps to prevent future efforts at tampering by Moscow.

"'What continues this investigation are the names of individuals that we didn't know at the time, the documents that we weren't aware of, the communications, the cables, the emails, the phone logs of individuals that we wouldn't have thought then that we needed to interview or to look at their records,' said Mr. Burr, the North Carolina Republican who is chairman of the intelligence panel. Mr. Burr said he remained 'hopeful that we can bring finality to this by the end of the year, but I also can't anticipate anything new that might come up that we don't know today that would extend it by a month or two months. So I am conscious of the fact that I need to do this expeditiously, but I need to do it thoroughly and I won't do anything to cut it short.' ... Mr. Burr said that the emergence of new information pushed the inquiry in new directions." http://nyti.ms/2uPw0Kw ... ***The podcast*** http://nyti.ms/2uykd8p

FOGGY BOTTOM WATCH -- "Interest in U.S. diplomatic corps tumbles in early months of Trump," by Daniel Lippman and Nahal Toosi: "Interest in joining the State Department's elite ranks of Foreign Service officers has tumbled in the early months of the Trump administration, triggering worries among former officials about the long-run risks to U.S. diplomatic power. This June, the number of Americans who took the Foreign Service exam to start the process of joining the prestigious State Department ranks fell 26 percent from the same month a year earlier to 2,730, according to data obtained by POLITICO. The June tally marked the lowest number of test-takers in nearly a decade. ...

"Top grad schools for international affairs that typically funnel graduates to the State Department also report a drop-off in interest. Information sessions for students who wanted to learn more about life as a Foreign Service officer at one leading university regularly drew at least 20 to 25 people. At one recent session, only three people showed up, according to a career services official at that university." http://politi.co/2vOW6SA

THE AGENDA -- "5 things Trump did this week while you weren't looking: Washington may be quiet, but the Trump administration isn't slowing down," by Danny Vinik: "1. Interior relaxes Obama-era Sage Grouse rules ... 2. EPA eases the approval process for new chemicals ... 3. DOJ switches sides in Ohio voting case ... 4. The fiduciary standard gets punted ... 5. The nuclear waste storage fight warms up." http://politi.co/2vsFJKE

POWER PLAYBOOKER -- "Silicon Valley Now Has Its Own Populist Pundit," by

Nellie Bowles on the cover of the NYT Sunday Styles section from Menlo Park, California (print headline **"He's Pushing Buttons In Silicon Valley"**): "It's not easy being the first and only Fox News host in Silicon Valley. But Steve Hilton, a tech entrepreneur who was once chief adviser to former Prime Minister David Cameron of Britain, added that role to his résumé in June.

"Now every week, Mr. Hilton flies from the home he shares with his high-profile tech executive wife, Rachel Whetstone, in Silicon Valley's billionaire enclave of Atherton, Calif., to Fox's studios in Los Angeles to host 'The Next Revolution With Steve Hilton.' Fox News markets the Sunday night program as exploring 'the impact of the populist movement.' ... Mr. Hilton is unfazed. 'I certainly have experienced a degree of curiosity, yes,' he said." http://nyti.ms/2hUKTKs

THE JUICE ...

-- WE'VE NEVER SEEN THIS BEFORE: Rep. Brian Fitzpatrick (R-Pa.) is raffling off tickets to an upcoming town hall. "Registration does not guarantee a ticket. Registered names will be randomly drawn by the Bucks County Courier Times and selected individuals will be contacted to RSVP and receive further details. Ticketed names and addresses will be checked at the door. This event is for PA-08 residents only." http://bit.ly/2vwAoAe

-- ALEX ISENSTADT reports that "America First Action, a White House-sanctioned outside group, will spend between $150,00 and $200,000 on digital advertising in support of [GOP Sen. Luther] Strange, the group announced. The move comes just days after Trump announced his endorsement of Strange in a tweet, saying that he 'has done a great job representing the people of the Great State of Alabama.'" http://politi.co/2vwgQvI

-- CAROLINE KENNEDY has joined the board of directors of Boeing. Non-employee directors make roughly $300,000 per year. Kennedy was most recently ambassador to Japan.

Playbook Reads

PHOTO DU JOUR: President Donald Trump speaks to the press alongside Secretary of State Rex Tillerson and Ambassador to the United Nations Nikki Haley on Aug. 11 at Trump National Golf Club in Bedminster, N.J | Jim Watson/AFP/Getty Images

2020 WATCH - "2 years before the caucuses, Democratic upstarts are trying to make a name in Iowa," by Des Moines Register's Jason Noble: "Who is Eric Swalwell? Who is Jason Kander? Who is Tim Ryan? And what the heck are they all doing in Iowa? Those questions have been echoing through Democratic conversations in the state for

the better part of a year now, and they rang out again here in northern Iowa on Friday night, when Swalwell and Kander headlined the Iowa Democratic Wing Ding fundraiser. Despite a new president just seven months on the job and Iowa's first-in-the-nation caucuses still more than two years away, the state has seen a profusion of visits from would-be, could-be national Democratic leaders. But for the most part, the visitors haven't come from the senators-and-governors set one might expect to see trying out on a presidential proving ground. Rather, the Democrats showing up in Iowa these days skew younger, with less political experience and lower national profiles but plenty of ambition. ...

"Swalwell, who was born in Sac City but raised in California, visited Iowa last fall and again in February on trips that took him through Iowa City, Des Moines and Davenport. He attended an event in Council Bluffs on Thursday night before Friday's Wing Ding, and is sticking around for a Progress Iowa fundraiser on Saturday and the Iowa State Fair on Sunday. ... Kander ... was in Iowa for political events last December and again in June. ... Tim Ryan ... [in] June ... met Des Moines Democrats at Cooney's Tavern in Beaverdale, and he's scheduled to return to the state in September as a headliner at the Polk County Steak Fry. ... Joining Ryan on the Steak Fry stage will be U.S. Reps. Seth Moulton, of Massachusetts, and Cheri Bustos, of Illinois." http://dmreg.co/2w0i7xg

SPEAKING OF 2020 -- "Megadonor Steyer vows to only back candidates that support abortion rights," by Gabe Debenedetti in Atlanta: "Democratic mega-donor Tom Steyer said on Saturday that he and his NextGen America group do not intend to work on behalf of anti-abortion politicians, jumping into the Democratic Party's ongoing debate on the topic. 'We're pro-choice,' the hedge fund manager-turned-activist told POLITICO on the sidelines of the progressive Netroots Nation conference here. Asked if his group would help candidates or sitting lawmakers who don't support abortion rights, he said, 'We do not work for a single candidate who is not pro-choice. I think people like to have litmus tests. We are explicitly pro-choice. We work a lot with Planned Parenthood, we work a lot with NARAL. We are absolutely committed to it.'" http://politi.co/2uPN1V8

--SPOTTED: Tom Steyer and Tom Perriello having drinks Friday night at the hotel bar in the Hyatt Regency Atlanta, where Netroots Nation is taking place ... Sen. Elizabeth Warren (D-Mass.) taking selfies at DCA this morning (including with a woman with a "she persisted" tattoo) before boarding a flight to Atlanta for Netroots Nation

SCOOP - "Manchin Emerges as Possible Pick for Energy Department," by Bloomberg's Kevin Cirilli, Jen Jacobs, and Steven T. Dennis: "Some White House and Republican officials are exploring the idea of putting West Virginia Democratic Senator Joe Manchin in charge of the Energy Department, according to four people familiar with the discussions, a move that could boost President Donald Trump's stalled legislative agenda. If Manchin were offered and accepted the position, that would allow West Virginia's Governor Jim Justice -- a newly minted Republican -- to appoint a GOP successor and bring the party a vote closer in the Senate to being able to repeal Obamacare. The idea is in the early stages of consideration, and it's unclear whether it

has support within the administration ... A spokesman for Manchin declined to say whether the senator would take the Energy secretary job -- currently held by former Texas Governor Rick Perry -- if offered." https://bloom.bg/2uyOr6Q

-- SOME CONTEXT: Yes, Republicans would love Manchin to join the Trump administration. It would make it much easier for Trump and McConnell to get their agenda passed. Heck, throw in Democratic Sen. Heidi Heitkamp of North Dakota and then Republicans would be really happy. But remember: Trump met with both lawmakers during the transition and talk of appointing them, or in fact any Democrat, to his cabinet went nowhere. For the record: Manchin hasn't sent any signals that he's interested in joining the Trump administration.

KEEPING THEM HONEST -- NYT A1, " Scott Pruitt Is Carrying Out His E.P.A. Agenda in Secret, Critics Say," by Coral Davenport and Eric Lipton: "When career employees of the Environmental Protection Agency are summoned to a meeting with the agency's administrator, Scott Pruitt, at agency headquarters, they no longer can count on easy access to the floor where his office is, according to interviews with employees of the federal agency. Doors to the floor are now frequently locked, and employees have to have an escort to gain entrance. Some employees say they are also told to leave behind their cellphones when they meet with Mr. Pruitt, and are sometimes told not to take notes.

"Mr. Pruitt ... often makes important phone calls from other offices rather than use the phone in his office, and he is accompanied, even at E.P.A. headquarters, by armed guards, the first head of the agency to ever request round-the-clock security. A former Oklahoma attorney general who built his career suing the E.P.A., and whose LinkedIn profile still describes him as 'a leading advocate against the EPA's activist agenda,' Mr. Pruitt has made it clear that he sees his mission to be dismantling the agency's policies - and even portions of the institution itself." http://nyti.ms/2vNZbCA

TRUMP'S WASHINGTON -- "Pentagon's empty posts cause uncertainty for defense contractors," by Reuters' Mike Stone: "U.S. President Donald Trump's failure to fill dozens of senior-level positions at the Pentagon is making it difficult for defense contractors to forecast business. Defense company officials, speaking on conference calls after their just-reported quarterly earnings, did not blame Trump directly, but said the lack of appointments to key positions at the Pentagon had slowed contract awards and created uncertainty. ... The Department of Defense said it has 42 unfilled top-level posts that require Senate confirmation, including general counsel, inspector general and other important roles like secretary of the Army and undersecretary of the Navy.

"The Pentagon referred a request for comment on its unfilled posts to the White House. A White House official said: 'Democrat obstruction has played a key role in jamming up the president's agenda.' Of the 42 open positions that require Senate confirmation, 29 have no nominee identified, while 13 have nominees awaiting confirmation." http://reut.rs/2vw3jV5

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)**: Pharmacy benefit managers negotiate the lowest net price for prescriptions on behalf of employers and other health care purchasers; however, the list price - the important starting point for those negotiations -- continues to rise, at a rate of nearly ten percent in 2016 alone. Increased competition, faster reviews of generics and biosimilars and ending anti-competitive practices can also bring down the cost of medications for patients. Learn more at affordableprescriptiondrugs.org ******

NYT SUNDAY STYLE COVER STORY -- JACOB BERNSTEIN: "Trump Tower, a Home for Celebrities and Charlatans" (print headline: **"Towering Egos"**): "Hillary Clinton slept here. The year was 2000. Mrs. Clinton was in the middle of her first political campaign, running to be New York's junior senator.

"Steven Spielberg, an enthusiastic donor to Mrs. Clinton who had the use of a pied-à-terre in Trump Tower purchased for him by Universal Pictures, barely stayed at the place, despite its views of Central Park, and offered it to the candidate as a crash pad on grueling campaign days. Donald J. Trump and Mrs. Clinton were on good terms back then. He donated money to her candidacy and called her 'tough and smart.' Moreover, Mr. Trump was skilled in the art of spinning his associations with celebrities into publicity. This was particularly true at Trump Tower. Johnny Carson, Liberace and Paul Anka had condominiums there in the 1980s, and Michael Jackson rented one in the 1990s. In 2000, Bruce Willis closed on a place too." http://nyti.ms/2hTg9cF

FOR YOUR RADAR -- "March of white supremacists at University of Virginia ends in skirmishes," by WaPo's Joe Helm: http://wapo.st/2uxRGzy

MEDIAWATCH -- "Uproar Over Omarosa Manigault-Newman at Black Journalists Convention," by NYT's Yamiche Alcindor in New Orleans: "The appearance of Omarosa Manigault-Newman, a White House aide, caused an uproar at a National Association of Black Journalists convention on Friday after she refused to answer some questions about President Trump's recent remarks encouraging the police to be rougher while arresting criminal suspects. ... It was moderated by a longtime journalist, Ed Gordon, a host at Bounce TV. The event began cordially, but within minutes, it devolved into a shouting match between Ms. Manigault-Newman and Mr. Gordon. ... It became a 25-minute argument during which Ms. Manigault-Newman called Mr. Gordon 'aggressive,' with Mr. Gordon pointedly asking what effect Ms. Manigault-Newman had made on the president." http://nyti.ms/2vZPnVA

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)** : The high prices that drug makers set for prescription drugs can put financial strain on patients, employers, unions and others who provide health care coverage to more than 50 percent of Americans. Pharmacy benefit managers negotiate the lowest net price for prescriptions on behalf of employers, unions and government programs. But, as list prices - the starting point for those negotiations -- continue their nearly double-digit increases, the effects ripple throughout the system. The key to ensuring greater access and affordability lies in fostering greater competition. Facilitating faster reviews of generics and biosimilars, identifying off-patent drugs with little or no generic competition, and ending anti-competitive practices that keep safe, effective alternatives out of the market are also key to abating rising drug costs for patients. Learn more at affordableprescriptiondrugs.org ******

Subject: Playbook Power Briefing, presented by BP: KEVIN BRADY dishes on tax reform in a Playbook Interview -- JOB GROWTH rebounds after hurricanes -- BANNON meets with NRCC chiefs -- MICHAEL KRUSE on 'the mystery' of Trump's mom

View online version | Add politicoplaybook@politico.com to your address book.

Today's Playbook Power Briefing presented by BP

By JAKE SHERMAN (sherman@politico.com; @JakeSherman), ANNA PALMER (anna@politico.com; @apalmerdc), DANIEL LIPPMAN (daniel@politico.com; @dlippman) and ZACH MONTELLARO (zmontellaro@politico.com; @ZachMontellaro)

Good FRIDAY afternoon. BREAKING NEWS -- HOUSE WAYS AND MEANS CHAIRMAN KEVIN BRADY told us in a completely packed Playbook Interview this afternoon (nearly 300 people!) at the Newseum that he has asked the Congressional Budget Office for the updated budgetary impact of including a repeal of the individual mandate in health care reform in the tax package. **WHAT'S THAT MEAN?** Gutting health-care reform could become part of the tax reform process. That's a serious shift.

-- Q: Is a repeal of the individual mandate on the table? **BRADY:** "The president feels very strongly about including this at some step before the final process and he's told me that twice by phone and once in person ... and members have as well. ... There are pros and cons to this, importing health care into a tax reform debate has consequences. ... No decisions have been made, we're listening to the members and certainly the president as well."

-- OTHER FUN BITES. BRADY held up a postcard to show how Americans will file taxes under his plan. **Q:** "Will we really use just that postcard for our taxes?" **BRADY:** "No." ... There will be another worksheet.

-- ON TRUMP'S INVOLVEMENT ... BRADY: "He calls regularly, more often now, just weighing in on these decisions." ... **Q:** What about concerns of business taxes going up? **Q:** What role will the president play going forward? **BRADY:** "It's been positive in a big way ... he's using Twitter to make the case as well. He's been all in on the rollout ... He's going to stay engaged, his cabinet is staying engaged while he's traveling."

-- ON FLOOR PROCESS -- Q: Will there be any amendments from the floor? **BRADY:** "No. ... The work will be done in the committee and before we take it to the Rules committee and later in conference."

-- ON THE MIDTERMS -- Q: Is there pressure on House Republicans to pass the bill? **BRADY:** "We've not delivered on our promise on health care repeal. It's critical to deliver on tax reform ... This is the challenge of the lifetime ... At the end of the day, we

achieve this ... we've delivered on our promise."

BRADY says markup will end by Thursday.

GOOD JOB NUMBERS -- "Job growth rebounds after September hurricanes," by Ian Kullgren: "The Labor Department reported 261,000 new jobs in October, a sharp turnaround from September, when Hurricanes Harvey and Irma prompted a monthly gain of just 18,000 jobs. The numbers, while short of Wall Street expectations, are good news for a White House eager to generate positive press amid this week's indictments in special counsel Robert Mueller's Russia probe and New York City's worst terrorist attack since Sept. 11, 2001.

"Friday's jobs numbers represent the largest single-month gain of President Donald Trump's presidency -- the biggest jump since July 2016. But economists cautioned that the gains represented no significant growth in the economy. Rather, they are a return to the status quo after severe weather disrupted September's job creation." http://politi.co/2iXmsx2

AUDIBLE -- "Trump to stay in the Philippines extra day to attend East Asia Summit," by Louis Nelson and Andrew Restuccia: "President Donald Trump announced Friday morning that he will extend his trip to Asia, adding an extra day in the Philippines to attend the East Asia Summit. ... Trump's attendance at the East Asia Summit will add a 13th day to the trip that began Friday with his departure from the White House. While in Asia, Trump is also expected to attend an Asia-Pacific Economic Cooperation meeting in Vietnam and a meeting of the Association of Southeast Asian Nations in the Philippines." http://politi.co/2iWpAcr

BULLETIN -- AP at 1:04 p.m.: "MOGADISHU, Somalia (AP) - U.S. military carries out 1st airstrikes against Islamic State group fighters in Somalia."

THE NEXT FED CHAIR'S CHALLENGE -- "Trump's risky economic handoff: The president's pick to lead the Federal Reserve must gingerly guide the U.S. through the back end of an economic expansion," by Victoria Guida: "When Janet Yellen gives the reins of the Federal Reserve to Jerome Powell, it will be among the riskiest handoffs in history -- navigating the U.S. through a likely economic slump in the coming years. It has been a decade since the start of the last recession, and the economy is experiencing steady growth, with the stock market soaring to record highs. But with the expansion in its eighth year -- already the third-longest in U.S. history -- the Fed will have to make tough calls about how quickly to raise interest rates to head off inflation, and when to stop.

"Those decisions will fall to Powell, President Donald Trump's choice for Fed chair, if he is confirmed by the Senate. 'I'd put the odds of a recession over the next four years at better than 50 percent, which means he's likely to face a recession at some point during his tenure,' said Gus Faucher, chief economist at PNC." http://politi.co/2zam0iO

PLAYING NICE? -- "Bannon meets with House GOP campaign strategists," by Alex Isenstadt and Elena Schneider: "[NRCC] Chairman Steve Stivers (R-Ohio) and John Rogers, the organization's executive director, went to the Capitol Hill townhouse that serves as a base of operations for Bannon and his Breitbart News website. According to two people familiar with the meeting, which stretched on for nearly 40 minutes, Bannon pledged to Stivers and Rogers that his focus wasn't on toppling establishment-oriented House incumbents in the 2018 midterm elections but rather on waging an all-out war against Senate Majority Leader Mitch McConnell. Bannon has launched a national effort to target Senate GOP incumbents and other McConnell-aligned Republican candidates." http://politi.co/2j0HavJ

LOTS ON THE PRESIDENT'S MIND THIS MORNING -- @realDonaldTrump at 6:51 a.m.: "My Twitter account was taken down for 11 minutes by a rogue employee. I guess the word must finally be getting out-and having an impact." ... **at 6:57 a.m.:** "Everybody is asking why the Justice Department (and FBI) isn't looking into all of the dishonesty going on with Crooked Hillary & the Dems.." ... **at 7:03 a.m.:** "...New Donna B book says she paid for and stole the Dem Primary. What about the deleted E-mails, Uranium, Podesta, the Server, plus, plus..." ...

... **at 7:11 a.m.:** "....People are angry. At some point the Justice Department, and the FBI, must do what is right and proper. The American public deserves it!" ... **at 7:48 a.m.:** "The real story on Collusion is in Donna B's new book. Crooked Hillary bought the DNC & then stole the Democratic Primary from Crazy Bernie!" ... **at 7:55 a.m.:** "Pocahontas just stated that the Democrats, lead by the legendary Crooked Hillary Clinton, rigged the Primaries! Lets go FBI & Justice Dept." ...

... at 8:03 a.m.: "ISIS just claimed the Degenerate Animal who killed, and so badly wounded, the wonderful people on the West Side, was 'their soldier.' ....." ... **at 8:11 a.m.:** "...Based on that, the Military has hit ISIS 'much harder' over the last two days. They will pay a big price for every attack on us!" ... **at 10:28 a.m.:** "Bernie Sanders supporters have every right to be apoplectic of the complete theft of the Dem primary by Crooked Hillary!" ... **at 10:29 a.m.:** "Bernie Sanders supporters have every right to be apoplectic of the complete theft of the Dem primary by Crooked Hillary!"

... at 10:45 a.m.: "Just took off for ceremony @ Pearl Harbor. Will then be heading to Japan, SKorea, China, Vietnam & the Philippines. Will never let you down!" ... **at 12:09 p.m.:** "The rigged Dem Primary, one of the biggest political stories in years, got ZERO coverage on Fake News Network TV last night. Disgraceful!" ... **at 12:22 p.m.**, with a Fox News screenshot: "JOBS, JOBS, JOBS!" ... **at 12:54 p.m.:** "The decision on Sergeant Bergdahl is a complete and total disgrace to our Country and to our Military."

IMAGINE THAT -- @mkraju: "Trump last week: 'I have one of the great memories of all time.' Trump today on Papadopoulos meeting: 'I don't remember much about it.'" http://bit.ly/2iXZzcM

****** **A message from BP: We support more than 120,000 jobs across the U.S.**

See how this impacts your community. ******

VALLEY TALK -- "Former Twitter Employee Says Fake Russian Accounts Were Not Taken Seriously," by Bloomberg's Selina Wang: "In early 2015, a Twitter employee discovered a vast amount of Twitter accounts with IP addresses in Russia or Ukraine. The employee, Leslie Miley, said most of these accounts were inactive or fake but were not deleted at the time. Miley, who was the company's engineering manager of product safety and security at the time, said efforts to root out spam and manipulation on the platform were slowed down by the company's growth team, which focused on increasing users and revenue. 'Anything we would do that would slow down signups, delete accounts, or remove accounts had to go through the growth team,' Miley said. 'They were more concerned with growth numbers than fake and compromised accounts.'" https://bloom.bg/2zcNzZ7

-- "Jenna Abrams, Russia's Clown Troll Princess, Duped the Mainstream Media and the World," by The Daily Beast's Ben Collins and Joseph Cox: "Jenna Abrams had a lot of enemies on Twitter but she was a very good friend to viral content writers across the world. Her opinions about everything from manspreading on the subway to Rachel Dolezal to ballistic missiles still linger on news sites all over the web. ... Congressional investigators working with social media companies have since confirmed that Abrams wasn't who she said she was. Her account was the creation of employees at the Internet Research Agency, or the Russian government-funded 'troll farm,' in St. Petersburg. ...

"But Abrams got very real attention from almost any national news outlet you can think of, according to a Daily Beast analysis of her online footprint. Abrams, who at one point boasted nearly 70,000 Twitter followers, was featured in articles written by Bustle, U.S. News and World Report, USA Today, several local Fox affiliates, InfoWars, BET, Yahoo Sports, Sky News, IJR, Breitbart, The Washington Post, Mashable, New York Daily News, Quartz, Dallas News, France24, HuffPost, The Daily Caller, The Telegraph, CNN, the BBC, Gizmodo, The Independent, The Daily Dot, The Observer, Business Insider, The National Post, Refinery29, The Times of India, BuzzFeed, The Daily Mail, The New York Times, and, of course, Russia Today and Sputnik." http://thebea.st/2zclRf0

TICK TOCK -- "Inside story: How Russians hacked the Democrats' emails," by AP's Raphael Satter, Jeff Donn and Chad Day: "It was just before noon in Moscow on March 10, 2016, when the first volley of malicious messages hit the Hillary Clinton campaign. The first 29 phishing emails were almost all misfires. Addressed to people who worked for Clinton during her first presidential run, the messages bounced back untouched. Except one. Within nine days, some of the campaign's most consequential secrets would be in the hackers' hands, part of a massive operation aimed at vacuuming up millions of messages from thousands of inboxes across the world.

"An Associated Press investigation into the digital break-ins that disrupted the U.S. presidential contest has sketched out an anatomy of the hack that led to months of damaging disclosures about the Democratic Party's nominee. It wasn't just a few aides

that the hackers went after; it was an all-out blitz across the Democratic Party. They tried to compromise Clinton's inner circle and more than 130 party employees, supporters and contractors." http://bit.ly/2hBiGFW

****** **A message from BP: Our largest oil and gas pipeline network spans 4,700 miles across America - enough to stretch from Chicago to London.** *Watch this short video for more on our U.S. footprint.* ******

CIRCULAR FIRING SQUAD -- "Liberal group calls Virginia Democrat 'racist' for opposing sanctuary cities," by McClatchy's Alex Roarty: "'Let's be really clear: If Ralph Northam wins next Tuesday, it won't be because he publicly backtracked on his commitment to protecting immigrant families, but in spite of it,' said Charles Chamberlain, executive director of Democracy for America, a grassroots progressive activist based in Vermont. Chamberlain went on to say the Northam campaign was running 'the same old, broken, and racist playbook that lost Democrats over 1000 elected offices since 2008.'

"The statement, issued Thursday night, drew a swift and strong rebuke from many Democrats and liberals, including its founder, Howard Dean, who blasted the statement as 'incredibly stupid' and one that 'discredits' the group. But it highlighted the pressure now facing many Democratic candidates, who must choose between adopting a politically controversial position -- support for sanctuary cities -- or risking the wrath of the party's increasingly vocal liberal faction." http://bit.ly/2iZsyNr

AFTERNOON READ -- MICHAEL KRUSE in **POLITICO MAGAZINE: "The Mystery of Mary Trump:** Donald Trump reveres his father but almost never talks about his mother. Why not?": "The mothers of presidents often have been a kind of super-influencer. From Barbara Bush, the powerful matriarch of the two-time first family; to Virginia Kelley, who all but singlehandedly launched Bill Clinton from the Arkansas boondocks to Washington and the West Wing; to Ann Dunham, the anthropologist who steered Barack Obama from Hawaii to Indonesia to the Ivy League and the White House -- the sway these women had over their sons was incontrovertible. And their sons celebrated by them throughout their political careers. Dunham died at 52, more than a decade before her son was sworn in as the 44th president, but in books by Obama and his biographers, she has been cast as an almost elemental force. 'For all the ups and downs of our lives,' Obama once told an interviewer about his mother, 'there was never a moment where I didn't feel as if I was special.'

"Trump's mother, who died in 2000, had in some ways been fading from view for many years before her son on Inauguration Day placed his hand on the Bible he got from her. But to discount her role in the creation of the Trump persona is to disregard decades of study about family dynamics. Trump might not agree, but most psychologists agree: Your mother helps make you who you are. Who, then, was Mary Trump? ... [In 1990], according to Vanity Fair, Mary Trump asked Ivana Trump, her soon-to-be-ex-daughter-in-law, a pointed question. 'What kind of son have I created?'" http://politi.co/2iYavXS

WAR REPORT -- "Bowe Bergdahl's Sentence: No Prison Time," by NPR's Merrit Kennedy: "A military judge has ruled that Army Sgt. Bowe Bergdahl, who has pleaded guilty to charges of desertion and misbehavior before the enemy, should serve no prison time. During a sentencing hearing Friday, Bergdahl was dishonorably discharged and will lose his rank and forfeit his pay, NPR's Frank Morris reported from the court in Fort Bragg, N.C." http://n.pr/2Aj3ULQ

-- "BuzzFeed News Investigation Leads To U.S. Admission It Caused Civilian Deaths In Mosul," by BuzzFeed's Mike Giglio: "The U.S.-led coalition fighting ISIS has admitted responsibility for the deaths of 36 civilians in three military strikes in Mosul after they were detailed in a BuzzFeed News investigation. But the coalition has not issued condolence payments to the families of the victims for the loss of life and property, and, if its current policy continues, it likely never will. Despite estimates by one prominent monitoring group that coalition strikes against ISIS have killed at least 5,600 civilians in Iraq and Syria over the last three years -- and the coalition's own admissions that it has killed at least 786 -- it has offered condolence payments in just two cases, a spokesperson for the coalition said." http://bzfd.it/2iYheRy

MEDIAWATCH -- "CNN Plans to Offer Subscriptions for Digital News Next Year," by WSJ's Ben Mullin: "After investing in digital verticals focused on business and politics and acquiring an online-video startup, CNN is gearing up for another big step: It plans to launch tiered subscription offerings for its digital news business as early as the second quarter of next year. A proposed premium offering will give subscribers access to special content on topic-specific verticals such as CNN Money and CNN Politics, built around network personalities. A second option will provide additional, though less specialized, content across all of CNN's sites. Pricing hasn't been finalized." http://on.wsj.com/2zco9uC

MORE SUNDAY SHOWS -- CNN's "State of the Union": House Majority Leader Nancy Pelosi ... Panel: Jen Psaki, Michael Caputo, Reps. Barbara Lee (D-Calif.) and Charlie Dent (R-Penn.)

-- More "Fox News Sunday": House Speaker Paul Ryan

ENGAGED -- Philip de Vellis, co-founder of the Democratic media firm Beacon Media and alum of Putnam Partners, Murphy Putnam and Sherrod Brown, proposed to **Lisa Lambert,** a correspondent at Reuters, where she has covered financial regulation, the Detroit bankruptcy and the municipal bond market. The two natives of LA "met at Coffy Café in Columbia Heights and struck up a conversation. Phil proposed at Georgetown Waterfront Park with a beautiful nighttime view of the Key Bridge." ***Pic*** http://politi.co/2zaO9su

OUT AND ABOUT -- SPOTTED: Vicki Reggie Kennedy, former Rep. Patrick Kennedy (D-RI), Sens. Jeanne Shaheen (D-N.H.), Rob Portman (R-Ohio), and Sheldon Whitehouse (D-RI), and moderator Carl Hulse at an Edward M. Kennedy Institute

bipartisan symposium yesterday in Russell on mental health, addiction, and the national opioid crisis.

-- SPOTTED: Henry Kissinger, David Miliband, Meryl Streep, and Tom Brokaw last night at the International Rescue Committee's annual Rescue Dinner (which raised almost $20 million) at the New York Hilton Midtown. Michael Bloomberg received the organization's Freedom Award.

-- SPOTTED last night at the annual gala of the National Democratic Institute at the Fairmont Hotel: Sen. Chris Murphy (D-Conn.) whose keynote touched on "fake news," Madeleine Albright, Kathleen Matthews, Mickey Kantor, Maurice Tempelsman (who was the longtime companion for Jacqueline Kennedy Onassis), Jack and Susanna Quinn.

EMBASSY PARTY CIRCUIT -- U.K. Ambassador Kim Darroch hosted a reception last night to mark the 100th anniversary of the Balfour Declaration at the British Embassy. **SPOTTED:** Israeli Amb. Ron Dermer and his wife Rhoda, Supreme Court Associate Justice Stephen Breyer and Joanna Breyer, Victoria Coates, Sheldon and Miriam Adelson, Mandy Grunwald, Rep. Eliot Engel (D-N.Y.), Norm Ornstein, Norm Coleman, Cliff May, Ken Weinstein and Amy Kauffman, Shmuley Boteach, Michael Froman, William Daroff, Jeffrey Goldberg, Ann Lewis, Ruth Marcus, Bill Knapp, David Weinberg, Rob Satloff, Stuart Rothenberg, Jennifer Rubin. (h/t Jewish Insider)

TRANSITIONS -- Matt Wolking has started as Sen. Bill Cassidy's (D-Penn.) communications director today. He most recently was senior comms adviser and press secretary for Sen. Marco Rubio (R-Fla.) and also is an alum of the Benghazi committee and former Speaker John Boehner. ... **Chris Hayden** has started at Senate Majority PAC as communications director. He was previously communications director for the Center for American Progress Action Fund and Jason Kander's campaign.

... John Monsif is joining McDonald's as director of U.S. government relations in the company's D.C. office. He previously worked for First Focus and was a former chief of staff to Reps. John Delaney (D-Md.) and Louise Slaughter (D-N.Y.). ... **Amy Surber** recently started as legislative director for Rep. Jim Banks (R-Ind.). She previously was a legislative assistant for Rep. Ken Calvert (R-Calif.).

Leading the News

Northeast States Hit the Brakes on Carbon Emissions From Cars

By *Gerald B. Silverman* and *Adrianne Appel*

Cars and trucks are the next target of Northeastern states, as they look beyond power plants to address climate change.

Trump's EPA Swears Off Settling Lawsuits with Environmentalists

By Jennifer A. Dlouhy

The Trump administration moved Oct. 16 to curb settlements with environmentalists, instead vowing to fight cases designed to force the Environmental Protection Agency to take action.

New York Objects to Energy Regulator's OK of Millennium Pipeline

By *Gerald B. Silverman*

Millennium Pipeline Co.'s proposed 7.8-mile natural gas line in New York hit another bump in the road today when the state asked the Federal Energy Regulatory Commission to stay its approval of a waiver for the project and rehear the case.

Today's News

EPA Says Higher Radiation Levels Pose 'No Harmful Health Effect'

By Ari Natter

In the event of a dirty bomb or a nuclear meltdown, emergency responders can safely tolerate radiation levels equivalent to thousands of chest X-rays, the Environmental Protection Agency said in new guidelines that ease off on established safety levels.

Energy Regulator Wants New Look at Pipeline Approval Policy

By *Rebecca Kern*

The lone Democratic member of the Federal Energy Regulatory Commission wants FERC to re-assesses how it approves new natural gas pipeline projects in the light of growing environmental concerns presented to the commission.

Louisiana Oil Platform Blast Leaves One Missing, Seven Injured

By *Meenal Vamburkar* and *Bruce Rolfsen*

One worker was missing and seven were injured after an explosion late Oct. 15 on an oil platform in Louisiana's Lake Pontchartrain.

As Puerto Rico Talks Solar, More Fossil-Fuel Power's

Starting Up

By *Naureen S. Malik*

While Puerto Rico's governor talks about using solar panels and batteries to rebuild a grid destroyed by Hurricane Maria, the island's importing more fossil fuel-powered generators to get the lights back on.

California Requires Disclosure of Cleaning Product Chemicals

By *Carolyn Whetzel*

California edged out New York in becoming the first state to require manufacturers to disclose potentially harmful chemicals in air fresheners, detergents, and other cleaning products.

Slowing Demand Growth to Push Big Oil from Cars to Chemicals

By *Javier Blas*

Global oil demand growth will slow to a crawl and gasoline use will peak within the next decade, prompting the world's biggest energy companies to accelerate the shift to natural gas and chemicals, according to consultant Wood Mackenzie Ltd.

Arctic Oil Promise Keeps Norway's Disappointed Wildcatters Going

By *Mikael Holter*

It's been a bad year for oil explorers in Norway's Arctic: a record campaign in the Barents Sea yielded little; the most exciting well in years proved to be a flop; and Norwegians grew increasingly skeptical about the industry that made them rich.

Greenpeace Fells Logger's Suit Over 'Forest Destroyer' Tag

By *Edvard Pettersson*

Greenpeace International won the first round against a Canadian logging company that blamed name-calling by the environmental group for driving away its customers.

Swedish Miner LKAB Pilots Ground Testing for Mine Stability

By *Marcus Hoy*

Swedish mining company Luossavaara-Kiirunavaara AB is reviewing the findings from a four-month trial to determine if fracking-like techniques can help prevent seismic vibrations that cause the ground to sink.

U.K. North Sea Oil Faces Quickening Decline If No Brexit Deal

By Rakteem Katakey and Angelina Rascouet

The U.K. oil and gas industry faces a faster decline if Prime Minister Theresa May

fails to agree to a trade deal with the European Union, as restrictions on the movement of workers and equipment would increase costs.

Asian Development Bank to Double Pacific Nations' Climate Loans

By Anindya Upadhyay

The Asian Development Bank plans to double financing for climate projects among Pacific developing nations to more than $500 million by 2020.

Practitioner Insights

Practitioner Insights: Courts Weigh Scope of Clean Water Act

There is a tug of war underway over the scope of the Clean Water Act: While the Trump Administration attempts to narrow the reach of the Act through regulatory action, some states and citizen suit actions continue to take an expansive view of the Act. Cynthia Taub of Steptoe & Johnson explores the issues in depth.

Friday Night Wrapup

Green Investors Seek More Data from Companies, More Frequently

By *Emily Chasan*

Annual sustainability reports just aren't cutting it as investors pump more money into ethical investment funds.

Korean Company Planning $4.5 Billion Solar Project in Chile

By *Vanessa Dezem*

The South Korean energy company *Andes Green Energy* is planning a $4.5 billion solar project in northern Chile that will combine conventional photovoltaic panels and thermal technology that will generate electricity at night.

Brazil Issues $2.3 Million in Fines for Poaching Amazon Turtles

By *Michael Kepp*

Brazil issued 18 fines totaling 7.2 million reais ($2.3 million) for poaching endangered Amazon river turtles and their eggs, according to IBAMA, the enforcement arm of the Environment Ministry.

Subject: BREAKING NEWS: Sessions: DOJ reviewing policies on media subpoenas

The Justice Department is considering making changes to its policies on subpoenaing news organizations as part of its crackdown on government leaks, Attorney General Jeff Sessions said Friday.

At a news conference, Sessions said the Justice Department is cracking down on leaks coming out of the government.

Much of that effort involves investigating and prosecuting leak suspects, he said, but another aspect is "reviewing policies affecting media subpoenas." That review, he said, came at the suggestion of FBI agents, career investigators and prosecutors who have weighed in on the leak problem.

"We respect the important role that the press plays, and we'll give them respect, but it is not unlimited," Sessions said. "They cannot place lives at risk with impunity. We must balance the press's role with protecting our national security and the lives of those who serve in the intelligence community, the armed forces and all law-abiding Americans."

Subject: POLITICO's Morning Score: House FEC report analysis: 37 incumbents outraised in Q3 — Bannon hits up GOP mega-donors exasperated with McConnell — A trio of new polls shows Virginia governor's race tightening

By Elena Schneider | 10/18/2017 10:00 AM EDT

With Kevin Robillard, Zach Montellaro and Daniel Strauss

The following newsletter is an abridged version of Campaign Pro's Morning Score. For an earlier morning read on exponentially more races - and for a more comprehensive aggregation of the day's most important campaign news - sign up for Campaign Pro today. (http://www.politicopro.com/proinfo)

MONEY TALK - "House FEC report analysis: 37 incumbents outraised in Q3," by Campaign Pro's Elena Schneider: "More than three dozen House incumbents - mostly Republicans - trailed opponents in third-quarter fundraising, and a handful are already behind 2018 opponents in terms of cash in the bank, heralding potentially difficult campaigns next year. That's the headline finding in POLITICO's analysis of House campaign finance reports from the third quarter, which were due with the FEC on Sunday. The House landscape also features a glut of self-funders pouring hundreds of thousands of dollars into campaigns around the country. See our full House third-quarter fundraising chart here." Here are some highlights: Incumbents outraised by challengers; Republican incumbents outraised by primary challenger, self-funders; Incumbents with less cash on hand than challengers; and Battleground incumbents who raised less than $250,000. **Full story.**

BANNON WATCH - "Bannon hits up GOP mega-donors exasperated with McConnell," by POLITICO's Alex Isenstadt: "Former White House chief strategist Steve Bannon flew to Atlanta last week to huddle with Republican mega-donor Bernie Marcus - and to hear him vent. A Home Depot co-founder who's been one of the most prolific givers to Senate Republicans, Marcus fumed to Bannon for hours about the lack of return on his investment. In the last six months alone, Marcus has funneled $2 million to a super PAC aligned with Senate Majority Leader Mitch McConnell and tens of thousands more to the National Republican Senatorial Committee - only to watch the Senate fail again and again. Over the last several weeks, Bannon has crisscrossed the country meeting with dozens of the party's biggest contributors - all in the hopes of capitalizing on their anger at McConnell. The populist bomb-thrower wants donors to bankroll primary challenges against Republican incumbents, or short of that, to close their wallets to McConnell-aligned causes." **Full story.**

- "Bannon's army includes candidates backed by the GOP establishment," by POLITICO's Annie Karni: "Matt Rosendale, the Montana state auditor running for Senate, recently received the endorsement du jour in Republican politics: Steve Bannon plucked him for the slate of candidates he is backing as part of his war on the GOP establishment. ... But Bannon's interest in Rosendale - as well as many of the other candidates on his dance card - also has some Washington GOP power brokers confused by his definition of 'anti-establishment.'" **Full story.**

NEW VIRGINIA NUMBERS - TIGHTENING RACE - A trio of new polls has Democrat Ralph Northam and Republican Ed Gillespie in a dead heat. The first, from the Wason Center at Christopher Newport University, has Northam up 48 percent to 44 percent. Libertarian Cliff Hyra is at 3 percent. The Wason Center notes that this is the first time that Northam's lead is within the margin of error. The poll was in the field from Oct. 9-13, with a margin of error of 4.2 percent. A Monmouth University poll has Gillespie up 48 percent to 47 percent, which Hyra pulling in three percent. That poll was in the field from Oct. 12-16 and has a margin of error of 4.9 percent, and the pollsters note that neither candidate has had more than a five-point lead in this poll. The final poll, from Roanoke College, gives Northam a six-point lead, 50 percent to 44 percent, with Hyra pulling in 2 percent. It was being surveyed from Oct. 8-13 with a MoE of 4 percent.

- MORE POLLING DATA - Fox News poll finds Moore, Jones tied in Alabama: "A new Fox News poll shows a tied Alabama Senate race between U.S. Attorney Doug Jones and former Alabama Supreme Court Judge Roy Moore. This is the first survey of the special election that has shown anything other than a Moore lead. The Fox News survey, released this evening, showed the Democrat Jones and the Republican Moore tied at 42 percent in the race to succeed Sen. Luther Strange and Attorney General Jeff Sessions." **Full story.**

Days until the 2017 election: 20.

Days until the 2018 election: 384.

MONEY IN YOUR EARS - POLITICO's new Money podcast brings you to the intersection of Washington and Wall Street with the most influential minds on the economy. Every Wednesday, Ben White will help you understand the economic and financial policies that move markets. While money never sleeps, you have to - so let Ben keep you up to speed and turn dollars into sense. The first POLITICO Money podcast, premiering with our launch sponsor, Morgan Stanley, features Treasury Secretary Steven Mnuchin. Click HERE to subscribe.

TAX REFORM PRESSURE - Americans for Prosperity expands ad campaign to 11 more states: Americans for Prosperity, which had already spent $4.5 million pressuring three Democratic senators on tax reform, is expanding its ad buy to 11 additional states with digital ads running on YouTube, Facebook and other platforms. The ads are now targeting Sens. Bob Casey (D-Pa.), Bob Corker (R-Tenn.), Heidi Heitkamp (D-N.D.), Joe Manchin (D-W.Va.), John McCain (R-Ariz.), Lisa Murkowski (R-Alaska), Bill Nelson (D-Fla.), Jon Tester (D-Mont.), Susan Collins (R-Maine), Jerry Moran (R-Kan.) and Dean Heller (R-Nev.). The group isn't revealing the size of the buy.

- Club for Growth goes after McCaskill: The Club for Growth is spending $600,000 on two 15-second ads pressuring Democratic Sen. Claire McCaskill on tax reform, saying she "opposes the Trump tax cuts." Both spots began airing on Tuesday in the St. Louis media market. **Watch the ads here and here.**

- AAN launches ads during CNN debate: The American Action Network will air national TV ads during CNN's tax reform debate between Texas Republican Sen. Ted Cruz and Vermont independent Sen. Bernie Sanders, urging support for the GOP tax reform plan. **Watch the ad here.**

KICKING OFF - Wisconsin Gov. Scott Walker starts campaign with digital ads: Wisconsin GOP Gov. Scott Walker is kicking off his reelection campaign with a 60-second digital ad. "There's more to be done," Walker says in the ad. "Investing in training for our workers. Helping people create jobs. Making our schools even better. At the end of each day, after all of the miles and conversations, I can't wait for the alarm to ring to see what opportunities tomorrow will bring. Are you with me?" The ad campaign will push both the 60-second video as well as shorter 15-second and 6-second versions on Facebook and YouTube. Walker will have a formal launch event soon. **Watch the ad here.**

FEC REPORT - Conservative watchdog files complaint against Perez after POLITICO report: DNC Chairman Tom Perez may have violated campaign finance law when he transferred funds from his campaign account to pay off the debt of his former rivals for DNC chair, says a new complaint to the Federal Election Commission from the conservative watchdog group Foundation for Accountability and Civic Trust. The complaint alleges that Perez, acting as an agent of the DNC, transferred non-federal funds from his account to other accounts - a possible legal violation, FOX News reports. The transfers were first reported by POLITICO earlier this year. DNC spokesman Michael Tyler told FOX that FACT's complaint is "completely without merit."

- Stephen Spaulding, strategy chief at Common Cause, gave Campaign Pro his two cents on how the FEC might handle the complaint: "The matter is likely to turn on whether Mr. Perez was acting on behalf of the DNC, and exactly who donated what to whom. ... Given the dismal state of affairs right now at the agency, I wouldn't expect the Commissioners to take action anytime soon given how many important matters from years ago are still unresolved," Spaulding said.

LAST NIGHT IN ARIZONA - "Steve Bannon in attendance for Kelli Ward Senate fundraiser," via The Associated Press. Full story.

- How's this for a contrast: The Arizona Democratic Party notes that while Ward was rallying with talk show host Laura Ingraham, Flake was at a fundraiser hosted by Senate Majority Leader Mitch McConnell.

- Former Ward aides prebut rally: Two former Ward staffers, Dustin Stockton and Jennifer Lawrence, both of whom are also former staffers for Breitbart, issued a press release on Tuesday afternoon apologizing for "helping legitimize the candidacy of Kelli Ward." "Even Jeff Flake

was a solid conservative as a member of the House before he betrayed his base in pursuit of his ambition in the Senate," Lawrence said in a statement. "We have a responsibility to our fellow America First activists to prevent another heartbreak at the hands of a politician's blind ambition. We're going to make sure that Arizona gets Senators that will make America First activists proud. Stay tuned."

CONSULTING MERGER - Axiom Strategies merges with Revolvis: Per a press release announcing the merger: "Axiom Strategies, the largest Republican political consulting firm in the country, announced a completed merger with Revolvis, a full-service political consulting firm with a strong west coast presence. As part of the merger Revolvis Principal Duane Dichiara and Justin Matheson will join Axiom Strategies. The deal will increase Axiom's west coast presence to four offices: San Diego, San Francisco, Sacramento and Seattle. Stephen Puetz, the former Chief of Staff to San Diego Mayor Kevin Faulconer and a Revolvis alum rejoined Axiom this summer."

GETTING THE NOD - "Run for Something backs dozens of progressive candidates," via Edward-Isaac Dovere: "Run for Something, the organizing and empowerment group urging young progressives to run for local office, added 37 more endorsements today, bringing its total to 121 candidates backed for the 2017 and 2018 election cycles. While other groups have focused on getting Democratic candidates ready for statewide runs or House races, Run for Something works with candidates, many of them first-timers, for state legislatures on down. Some of the endorsed candidates in the latest round are running for county clerk and library committee seats." **Full story.**

TIMES A'CHANGIN' - Early and mail voting topped 40 percent in 2016: "More than two out of every five voters cast their ballots using a method other than a voting machine on Election Day 2016, according to the findings in a new U.S. Election Assistance Commission white paper. In total, 57.2 million Americans cast a ballot early, by mail or absentee in 2016. Of those, 24.1 million were early votes. For comparison, 24.9 million people voted using a method other than showing up on Election Day in 2004." **Full story.**

WEB WARS - Senate Leadership Fund attacks Manchin: Senate Leadership Fund is up with a digital ad attacking Manchin for renovations to the Governor's Mansion in the first year of his governorship, which included the addition of 12 flatscreens and a hot tub. **Watch the ad here.**

- American Bridge imagines Stewart-Gillespie conversation: American Bridge is launching a digital ad campaign pushing an imagined text conversation between Gillespie and Prince William County Board of Supervisors Chair Corey Stewart, who has so far declined to endorse him. **Watch the ad here.**

NAME CHANGE - Americans for Responsible Solutions rebrands as Giffords: Former Rep. Gabby Giffords and Capt. Mark Kelly announced a rebrand for their group to Giffords, per a statement from the organization. ARS PAC is now Giffords PAC.

CODA - QUOTE OF THE DAY: "I personally as a Republican in the past few weeks have wondered, is the republic safer if Democrats take over the House in 2018. I raised that issue with

the leading Republican in D.C. last week, and the remarkable thing is he had been thinking exactly the same thing. This is a president that needs a greater check on his power than Republicans in Congress have offered." - Former Rep. David Jolly said on MSNBC.

Leading the News

EPA
EPA's Pruitt Denies He's an Ally of Polluters, Vows to Get Tough
Scott Pruitt, the head of the Environmental Protection Agency, vowed that he will get tough on corporate polluters, dismissing critics who cast him as too cozy with industry.

Energy
Fossil Fuels Get Boost as Agencies Scrutinize Their Rules
Natural gas permitting is likely to be streamlined and air pollution and appliance efficiency regulations will get extra scrutiny as federal agencies seek ways to ease burdens on domestic energy production.

Regulatory Policy
Waiting Game Begins as EPA Nominees Sail Through Committee
President Donald Trump's picks to staff the EPA and the nation's nuclear regulator sailed through a Senate committee, but they face a longer road to getting a confirmation vote.

Water Infrastructure
Interior Department Says No to Aiding California Water Tunnels
California can't count on the Trump administration to advance its $17.1 billion plan to re-engineer the state's key water conveyance system.

News

Air Pollution
No Changes to Toxic Air Pollution Rule for Wastewater Treatment
Standards for the amount of hazardous air pollution allowed to come from wastewater

treatment plants will stay the same, the EPA said in a final rule.

Biodiversity
Fire Rages Across Brazil National Park; Arson Suspected
A fire has burned through about a quarter Brazil's Chapada dos Veadeiros National Park, and as of Oct. 25 had not been brought under control, the government said.

Chemicals
Home Depot Is Removing Formaldehyde as Part of Push to Go Green
Home Depot Inc. is eliminating substances like formaldehyde and lead in several categories, making it the latest retailer to accede to demands for greener products.

Chemicals
U.K. Chemical Companies Face Brexit Uncertainty, Green Watchdog Warns
U.K. chemical companies fear the government's lack of clarity about their future regulatory framework could significantly damage the country's second-biggest manufacturing industry after it leaves the European Union, according to the British Parliament's green watchdog.

Chemicals
Workplace Chemical Exposure Limits Now in EPA's Hands
Regulators at the Environmental Protection Agency can accomplish what their counterparts at the Occupational Safety and Health Administration largely have not: They can limit worker exposure to a host of hazardous chemicals.

Climate Change
Coal Producer Peabody Can Look to Future Without Paying for Past
Peabody Energy Corp. is off the hook for now for liabilities related to its role in climate change.

Climate Policy
NRG Backs Carbon Tax Amid Bid to Sell Clean-Energy Operations
Just because NRG Energy Inc., the owner of almost 9 gigawatts of coal-fired power, is working to sell its renewables businesses doesn't mean it's giving up on clean energy.

Endangered Species
Ringleader Admits Shipping Ivory, Rhino Horn, Coral to China
A basement in historic Concord, Mass., was the staging ground for a wildlife smuggling ring that shipped $700,000 of ivory, coral, and rhinoceros antiquities from the U.S. to China, the leader of the ring has admitted to a federal judge.

Energy
European Coal-Power Addicts Dwarf Those Planning Exits
Europe still has a long way to go to curb its addiction to coal power when viewed through the lens of capacity, according to Bloomberg New Energy Finance.

Energy
Forget the Grid of the Future, Puerto Ricans Just Want Power Back
A month after Hurricane Maria devastated the island, power lines still lay slack along roads, utility poles are snapped clean in half, and most Puerto Ricans remain in the dark.

Energy
Nuclear Industry Pushes IRS for Decommissioning Fund Rule Change
Nuclear energy industry advocates urged the IRS to allow power plants shutting down to use

tax-favored funds to pay for storing spent fuel whether or not the expenditures are tax deductible.

Listen to the Playbook Audio Briefing

Driving the Day

Good Tuesday morning. PRESIDENT DONALD TRUMP is headed to Texas at 8:30 a.m. to survey the devastation in the wake of Hurricane Harvey. **THE PLAN:** Trump will arrive in Corpus Christi, receive a briefing, and then head to Austin for a tour of the Emergency Operations Center and a meeting with the state's leaders.

-- UNDER THE DOME: D.C. IS BEGINNING TO TURN ITS ATTENTION to the likelihood that it will have to pass a massive emergency spending bill to help rebuild Houston. It will take a while for Texas and the federal government to fully assess its needs. But President Trump yesterday promised "rapid action from Congress," not to mention his vow that the water-logged state will be "up and running very, very quickly," something that emergency managers and Texas officials have pushed back on.

A FEW PATHS THE LEGISLATING CAN TAKE, per insiders we've spoken to: Congress can provide an initial down payment by passing the first installment of cash for Texas. That would give lawmakers the opportunity to show they're on top of the situation, while leaving open the possibility that they'd have to pass a second -- and larger -- bill. This has upsides and downsides. Upside: it shows immediate action. Downside: Congress would have to act twice. It's hard enough for the institution to do something once.

Another option is to attach a disaster relief bill to a government funding measure. Upside: As long as the bill didn't include funding for the border wall, this would help ease the passage of a bill to fund the government and could stop a September shutdown. Downside: Any time Congress lops one measure onto another something could go wrong.

-- THE REALITY, via Julie Turkewitz in Houston, Richard Perez-Pena in New York and Jack Healy in San Antonio with Dave Montgomery in Austin, Dave Philipps in San Antonio, John Schwartz in New Orleans and Henry Fountain in New York, on A1 of the the NYT: "Local, state and federal officials conceded that the scale of the crisis was so vast that they were nowhere near being able to measure it, much less fully address it. Across a region that is home to millions of people and includes Houston, the nation's fourth-largest city, no one has a clear idea how many people are missing, how many evacuated, how many hunkered down or were trapped in their waterlogged homes, or how many inundated houses and vehicles are beyond saving." http://nyti.ms/2wFm5MD

-- L.A. TIMES: "By Monday evening, the death toll had risen to nine. Officials in Harris County, which includes Houston, reported at least six 'potentially storm-related' fatalities. A 60-year-old woman died Monday in Porter, a small community north of Houston, when a large oak fell on her mobile home. Another person died in the small coastal town of Rockport, near where Harvey made landfall. A 52-year-old homeless man was found in La Marque, a small city near Galveston." http://lat.ms/2gldb0n

HOUSTON POLICE CHIEF ART ACEVEDO to the AP: "We know in these kind of events that, sadly, the death toll goes up historically. I'm really worried about how many bodies we're going to find."

PULLING BACK THE LENS -- "Bracing for Harvey's return, worry renews: Is worst to come?," by AP's Michael Graczyk and David Phillip in Houston: "The disaster is unfolding on an epic scale, with the nation's fourth-largest city mostly paralyzed by the storm that has parked itself over the Gulf Coast. With nearly 2 more feet of rain expected on top of the 30-plus inches in some places, authorities worried the worst might be yet to come. The Houston metro area covers about 10,000 square miles, an area slightly bigger than New Jersey. It's crisscrossed by about 1,700 miles of channels, creeks and bayous that drain into the Gulf of Mexico, about 50 miles to the southeast from downtown.

"The storm is generating an amount of rain that would normally be seen only once in more than 1,000 years, said Edmond Russo, a deputy district engineer for the Army Corps of Engineers, which was concerned that floodwater would spill around a pair of 70-year-old reservoir dams that protect downtown Houston." http://bit.ly/2vo9i1v

-- UNBELIEVABLE STATS in today's **HOUSTON CHRONICLE:** "Tropical Storm Harvey was producing 1 to 2 inches of rain per hour Tuesday morning, which would ultimately worsen the city's flooding problem, according to the National Weather Service." ... "The amount of water expected to hit Fort Bend County by late Tuesday could reach levels seen only about once every 800 years."

-- WHAT YOU'LL HEAR A LOT ABOUT IN THE COMING DAYS: "Storm water starts rising in neighborhoods near Addicks and Barker dams," by the Houston Chronicle's John Harden and Lindsay Ellis: "The U.S. Army Corps of Engineers began releasing water from the Addicks and Barker reservoirs early Monday morning, hours

before officials planned to release rainfall from the two dams, according to the Harris County Flood Control District.

"The flood control district reported almost an hour later that storm water has started rising in the neighborhoods adjacent to Addicks and Barker. Heavy rainfall forced reservoir officials to begin releasing water from the dams sooner than previously planned. Col. Lars N. Zetterstrom with the U.S. Army Corps of Engineers had announced late Sunday afternoon that rising levels in the two reservoirs would force authorities to release water from both dams. The rising tides within the dams are forcing the water to swell and spill upstream into neighboring communities that sit against the dams." http://bit.ly/2wFpNpJ

That's why America's banks created innovative ways-like mobile banking and remote deposit-for you to safely access your money 24/7. And we're just getting started. Learn more: http://politi.co/2w4RZRG ******

MATT NUSSBAUM: "Trumpian branding meets national tragedy": "President Donald Trump has deployed his knack for marketing as Hurricane Harvey has ravaged Texas, calling the storm 'epic,' 'historic,' and the 'biggest ever.' 'Even experts have said they've never seen one like this!' Trump declared on Twitter. But Trump's showmanship is about to collide with the devastation on the ground as he heads to Texas on Tuesday, and while natural disasters usually call for a certain presidential demeanor, Trump's response so far has been distinctly his own." http://politi.co/2vAp7hi

THIS COULD BE A PROBLEM -- "Texas Republican vows to fight for flood insurance overhaul," by Zach Warmbrodt: "As his state's largest city is pounded by extreme rain, Rep. Jeb Hensarling is digging in his heels on a conservative vision for overhauling the heavily indebted National Flood Insurance Program, which protects millions from the risk of financial calamity. The Texas Republican, who as chairman of the House Financial Services Committee is spearheading efforts to revamp the program before it expires next month, will call on his colleagues to pass his proposal as soon as they return from recess.

"His committee has drafted legislation that would renew the program for five years but also shrink its footprint, make coverage more expensive for policyholders, and ease the pathway for private companies to sell their own flood insurance policies. Opponents say the changes would make coverage less accessible for many homeowners. ... In an interview Monday, as the devastation in Houston began to bring the policy issues to the fore, Hensarling said he was 'pressing on the accelerator' - not the brake. 'It's more urgent than ever we get this bill done,' he said.

"His characteristic steadfastness puts him at odds with other lawmakers, aides and

lobbyists who suggested Congress was more likely to advance a less ambitious flood insurance package, including potentially a short-term extension bill without significant reforms. 'Hurricane Harvey makes a rapid reauthorization of the NFIP - in its current form - more likely,' a House Republican leadership aide said. 'Considering the ongoing disaster in Texas and the fact we are not even halfway through hurricane season, I think there will be immense public and political pressure to get this finished.'" http://politi.co/2wOgJzn

-- HENSARLING HAS STRUGGLED for years with changes to the flood insurance program.

NORTH KOREA, UNCOWED -- WAPO'S ANNA FIFIELD in **TOKYO:** "North Korea launched a ballistic missile Tuesday morning that flew over the northern Japanese island of Hokkaido, the most brazen provocation of Kim Jong Un's five-year-long rule and one that elicited strong condemnation from U.S. allies Japan and South Korea.

"The launch poses a further challenge , in particular, to President Trump, who has made North Korea a favorite rhetorical target. Trump said earlier this month that he would make Kim 'truly regret' harming the United States or its allies. In Japan, the prime minister was visibly agitated by North Korea's actions. 'A missile launch across Japan is an outrageous act that poses an unprecedented, grave and serious threat, and significantly undermines the peace and security of the region,' Shinzo Abe said after an emergency national security council meeting. ...

"In Seoul, President Moon Jae-in, a liberal who has promoted engagement with Pyongyang, ordered an 'overwhelming show of force' in response to the missile launch. South Korea's military aircraft dropped eight bombs on a shooting range on the southern side of the border with North Korea." http://wapo.st/2wepm4p

THE BIG PICTURE, NYT A18 -- "Two Bankers Are Selling Trump's Tax Plan. Is Congress Buying?" by Julie Hirschfeld Davis and Kate Kelly: "Gary D. Cohn and Steven Mnuchin have spent months behind closed doors with Republican congressional leaders sketching the contours of an elaborate and politically difficult tax overhaul that is President Trump's top priority. ... Already, their ambitions have drifted from the president's original mark: A 15 percent corporate tax rate proposed in April is now likely to move to the 20 to 25 percent range, say two people familiar with the officials' recent thinking. And a proposed 35 percent ceiling on the highest personal income tax rate could be shelved altogether, leaving the current 39.6 percent cap intact.

"For Mr. Cohn and Mr. Mnuchin, quiet competitors since their days as new partners at Goldman Sachs more than two decades ago, the task is a consequential test of whether real-world experience in finance has equipped them to carry out a delicate political negotiation, and whether two Jewish New Yorkers who have been lavish supporters of Democrats can succeed in Mr. Trump's Washington. 'Goldman has thrived by hiring strong individuals with very different backgrounds and putting them together on a team,' Lloyd Blankfein, the chief executive of Goldman Sachs, said in an email. 'Gary and

Steven are both steeped in that tradition from their years working side by side on the trading floor -- not a bad training ground for the pressure cooker that is Washington.' ...

"In a meeting with a group of Senate Democrats this year, according to people who were present, Mr. Cohn jokingly dismissed concerns about the wisdom and cost of repealing the estate tax, remarking, 'Only morons pay the estate tax.' A source close to Mr. Cohn denied that he had used the word, saying he had been referring to 'rich people with really bad tax planning.'" http://nyti.ms/2iEVQjO

TRUMP V. HIS CABINET -- "Trump rejected China steel offer his officials backed," by FT's Demetri Sevastopulo and Shawn Donnan: "Donald Trump last month rejected a Chinese proposal to cut steel overcapacity despite it being endorsed by some of his top advisers, as he urged them instead to find ways to impose tariffs on imports from China. One week after the July G20 summit in Hamburg -- where Mr. Trump criticised China for flooding the world market with cheap steel -- Beijing proposed cutting steel overcapacity by 150m tonnes by 2022. But Mr. Trump twice rejected the deal, according to several people familiar with the internal debate. ... Wilbur Ross, U.S. commerce secretary, endorsed the deal and brought it to Mr. Trump, but the president rejected the proposal. Mr. Ross, a long-time friend of the president, floated the deal again the following week during the two-day meetings with Chinese vice-premier Wang Yang, but Mr. Trump once again refused to accept it." http://on.ft.com/2xu5bhQ

DEPT. OF BARK NO BITE -- "Trump unusually silent after aides challenge him," by Josh Dawsey, Ben White and Eliana Johnson: "President Donald Trump is not happy with Secretary of State Rex Tillerson and Gary Cohn, director of the National Economic Council, for publicly criticizing his response to violence in Charlottesville, Virginia. But it appears there is little he is planning to do about it, according to people who have spoken to him. The unusually direct challenges from a Cabinet secretary and senior administration official seemed to make little more than a surface ripple in the swirling melodrama of the Trump White House, even as the president fumed privately about it. ... Cohn told associates that he hadn't heard a word from the president about his supposed anger - and that he didn't regret one bit having made his comments." http://politi.co/2vFswL1

-- BUT, BUT, BUT ... "Trump Punishes Longtime Aide After Angry Phoenix Speech, Sources Say," by Bloomberg's Jen Jacobs and Kevin Cirilli: "Donald Trump was in a bad mood before he emerged for a confrontational speech in Arizona last week. TV and social media coverage showed that the site of his campaign rally, the Phoenix Convention Center, was less than full. Backstage, waiting in a room with a television monitor, Trump was displeased, one person familiar with the incident said: TV optics and crowd sizes are extremely important to the president.

"As his surrogates warmed up the audience, the expanse of shiny concrete eventually filled in with cheering Trump fans. But it was too late for a longtime Trump aide, George Gigicos, the former White House director of advance who had organized the event as a contractor to the [RNC]. Trump later had his top security aide, Keith

Schiller, inform Gigicos that he'd never manage a Trump rally again, according to three people familiar with the matter." https://bloom.bg/2vo1Fb9

REVOLVING DOOR -- "Another RNC data guru heads for the exits," by Alex Isenstadt: "The [RNC] is losing its fifth staffer in just over a month. Conor Maguire, who has been working at the committee since 2011, is expected to depart in the next few weeks, according to two senior Republicans familiar with the move. Maguire, who served as director of external support, joins a wave of aides who have exited the committee's data department amid a change in leadership among its top ranks." http://politi.co/2vnVBiO

IN FOGGY BOTTOM -- "Tillerson moves to ditch special envoys," by CNN's Elise Labott, Nicole Gaouette and Jeremy Herb: "Secretary of State Rex Tillerson is moving to eliminate or downgrade special envoy positions at the State Department, including the representative for climate change, a step that is sure to ignite vociferous opposition from some members of Congress. In a letter obtained by CNN and written to Senator Bob Corker, the Tennessee Republican who heads the foreign relations committee, Tillerson said he would end or transfer as many as three dozen special envoy positions. ... Special envoys for Syria, Sudan and South Sudan, and the Arctic will be eliminated." http://cnn.it/2wdQ39q

BANNON VS. TRUMP -- "Bannon wages war against Trump-backed candidate in Alabama," by Alex Isenstadt: "Just-departed White House chief strategist Steve Bannon is breaking from President Donald Trump in the closely watched Alabama Senate special election. During a closed-door meeting with powerful conservatives in Washington last week, Bannon declared that he's supporting former state Supreme Court Justice Roy Moore over Trump-endorsed incumbent Sen. Luther Strange, according to two people who were present. ... Appearing before a meeting of the secretive Conservative Action Project, Bannon made it clear that he supported Moore, a favorite among evangelicals, but was careful not to cast it as a break with the president. Rather, he said, it was an act of opposition toward Senate Majority Leader Mitch McConnell (R-Ky.), who is supporting Strange and has made the race a top political priority." http://politi.co/2wee68i

-- THIS WILL NOT be a fight that McConnell will shy away from. He and his allies have gone up against Bannon in primaries before -- and won.

IT'S BEGINNING ... -- "The 2020 campaign just kicked off in a New Hampshire strip mall," by Isaac Dovere in Manchester, New Hampshire: "Just like that, the 2020 retail campaigning for president began right here in a strip-mall campaign headquarters Monday, when Los Angeles Mayor Eric Garcetti showed up for what he called 'the most important race in the country.' He was talking about the Manchester mayor's election. Joyce Craig, the Democratic candidate, invited him to join her for an afternoon that also included a speech to the Manchester Young Democrats and a fundraiser. Garcetti worked the crowds, introduced himself as 'Eric,' and took a bumper sticker and put it on the back of the black SUV he was driving around in. ... On Tuesday, Rep. John Delaney

(D-Md.), the only one to have already officially announced, will be here for a two-day trip, trying to get attention for his long-shot bid.

"On Labor Day, both Sen. Bernie Sanders (I-Vt.) and Jason Kander, the Democrat who narrowly lost his U.S. Senate bid in Missouri last year, will be back. And on Thursday, Sanders -- who was in Indiana and Michigan last week 00 will be in Iowa, along with Sen. Amy Klobuchar of Minnesota. Sen. Jeff Merkley of Oregon will be there in October. Former Vice President Joe Biden, who made his own teasing stop here in Manchester at the end of April, is headed to South Carolina in September." http://politi.co/2vFtqas

COMING ATTRACTIONS -- "Senate chairman eyes Sessions testimony this fall," By Seung Min Kim and Elana Schor: "Senate Judiciary Chairman Chuck Grassley is preparing for testimony by Attorney General Jeff Sessions as soon as next month - a high-stakes appearance for Sessions, who's likely to face tough questions over the ongoing investigation into President Donald Trump's ties to Russia. Grassley (R-Iowa) wrote to Sessions on Monday that 'unfortunately we still do not have a confirmed date' for the committee's usual Department of Justice oversight hearing. Staff-level discussions have zeroed in on Sept. 19, Sept. 27, or Oct. 3 as open dates for Sessions' testimony, Grassley wrote, asking Sessions to reply no later than Wednesday." http://politi.co/2wY4orF

THE JUICE ...

-- TWO FUN SPOTTEDS: IVANKA TRUMP last night at a table with five other women at Barcelona Wine Bar on 14th Street ("half price wine night") ... Huma Abedin lunching at Sunset Beach in Shelter Island on Monday with her son Jordan and other friends.

-- HOT JOB: The Des Moines Register is hiring for a new politics editor who will oversee their coverage of the 2020 caucus cycle (as well as the 2018 gubernatorial race and the 2020 general election). http://bit.ly/2wF0i7H

-- HILLARY FALL BOOK TOUR CITIES: 3 STOPS IN CANADA! D.C.; Toronto; Broward, Florida; Davis, California; Montreal, Canada; Ann Arbor, Michigan; Chicago; NYC; Milwaukee; Atlanta; Boston; Philadelphia; Seattle; Portland; and Vancouver. http://bit.ly/2iELyjH

-- MICHAEL SCHERER is joining the Washington Post as national political reporter. He has been Time's Washington bureau chief since 2013. http://wapo.st/2vF6N6b

THE NEVER-ENDING RUSSIA STORY ...

-- WAPO'S ROS HELDERMAN, CAROL LEONNIG and **TOM HAMBURGER:** "A top executive from Donald Trump's real estate company emailed Russian President Vladimir Putin's personal spokesman during the U.S. presidential campaign last year to ask for help advancing a stalled Trump Tower development project in Moscow, according to documents submitted to Congress on Monday. The request came in a mid-January 2016 email from Michael Cohen, one of Trump's closest business advisers, who asked longtime Putin lieutenant Dmitry Peskov for assistance in reviving a deal that Cohen suggested was languishing.

"'Over the past few months I have been working with a company based in Russia regarding the development of a Trump Tower-Moscow project in Moscow City,' Cohen wrote to Peskov, according to a person familiar with the email. 'Without getting into lengthy specifics, the communication between our two sides has stalled. As this project is too important, I am hereby requesting your assistance. I respectfully request someone, preferably you, contact me so that I might discuss the specifics as well as arranging meetings with the appropriate individuals. I thank you in advance for your assistance and look forward to hearing from you soon,' Cohen wrote. Cohen's email marks the most direct outreach documented by a top Trump aide to a similarly senior member of Putin's government." http://wapo.st/2wOFETi

-- NYT'S MATT APUZZO and **MAGGIE HABERMAN: "Trump Associate Boasted That Moscow Business Deal 'Will Get Donald Elected'"** : "The associate, Felix Sater ... predicted that building a Trump Tower in Moscow would highlight Mr. Trump's savvy negotiating skills and be a political boon to his candidacy. 'Our boy can become president of the USA and we can engineer it,' Mr. Sater wrote in an email. 'I will get all of Putins team to buy in on this, I will manage this process.' ...

"Mr. Sater said he was eager to show video clips to his Russian contacts of instances of Mr. Trump speaking glowingly about Russia, and said he would arrange for Mr. Putin to praise Mr. Trump's business acumen. ... Mr. Sater said it would be 'pretty cool to get a USA President elected' and said he desired to be the ambassador to the Bahamas. 'That my friend is the home run I want out of this,' he wrote." http://nyti.ms/2iEZg68

FOR THE PRESIDENT -- "Mueller Team Asking If Trump Tried to Hide Purpose of Trump Tower Meeting," by NBC News' Julia Ainsley and Tom Winter: "Federal investigators working for Special Counsel Robert Mueller are keenly focused on President Donald Trump's role in crafting a response to a published article about a meeting between Russians and his son Donald Jr., three sources familiar with the matter told NBC News. The sources told NBC News that prosecutors want to know what Trump knew about the meeting and whether he sought to conceal its purpose." http://nbcnews.to/2vnrk3Z

ISAAC DOVERE'S "OFF MESSAGE": "How Detroit's Mayor Became Unbeatable,"

in Detroit: "Something weird is happening in Motor City: Government is working. And the guy in charge is about to get re-elected in a landslide because of it. Detroit used to look like how America ends. Abandoned skyscrapers downtown. An 18-story abandoned train station looming at the edge of the skyline like a Roman ruin. Collapsing car factories, block after block of grass growing high over lots where the houses had burned or been abandoned. Bankrupt, with the governor putting a city manager in charge, looking at selling off its art museum's collection to pay the bills-all while the glass towers of General Motors' of-course named Renaissance Center stuck up high above neighborhoods where it wasn't safe to drink the water.

"'I was appalled at so many things,' Mayor Mike Duggan told me in an interview for POLITICO's Off Message podcast, recorded in his office. 'That the buses just weren't running and people stood out on the corners in the winter for hours at a time. That every vacant building in the city was covered with graffiti and nobody cared. The lack of anybody caring was heartbreaking.'" ***BONUS: The previously unreported showdown he, Mitch Landrieu and Bill de Blasio had with John Podesta at Clinton campaign headquarters last year over what they warned was an economic message too long and complicated to work.*** http://politi.co/2wemsg1 ... ***Listen to the full podcast*** http://apple.co/2e2dLvm

JOHN BOLTON in NR, "How to Get Out of the Iran Nuclear Deal": "Although candidate Donald Trump repeatedly criticized Barack Obama's Iran nuclear agreement, his administration has twice decided to remain in the deal. ... Many outside the administration wondered how this was possible: Was Trump in control, or were his advisers? Defining a compelling rationale to exit Obama's failed nuclear deal and elaborating a game plan to do so are quite easy. In fact, Steve Bannon asked me in late July to draw up just such a game plan for the president - the option he didn't have - which I did. ... I offer the Iran nonpaper now as a public service, since staff changes at the White House have made presenting it to President Trump impossible. Although he was once kind enough to tell me 'come in and see me any time,' those days are now over." http://bit.ly/2wOLKmH

-- **Foreign Policy's Dan DeLuce** : "A source involved in the Iran policy discussions at the White House confirmed that Bolton was in and out of the Oval Office for at least several weeks. At one point, he was even offered the possibility of serving as deputy national security advisor, with the idea that he might eventually get to replace H.R. McMaster. The source said Bolton declined, preferring to wait until he was offered the top job." http://atfp.co/2wew5eZ

****** **A message from the American Bankers Association:** America's banks play a critical role in generating economic growth while delivering safety and convenience for customers. The two million women and men who work for America's banks safeguard $12.9 trillion in deposits and originate $2.4 trillion in home loans. They provide $331 billion in loans to small businesses and $175 billion in loans to farmers and ranchers. Banks' fraud protection measures stop at least $11 billion in attempted fraud each year. And thousands of banker volunteers deliver financial literacy lessons annually to millions

of young Americans to help them become financially successful adults. Find out more at www.aba.com/AmericasBanks, #AmericasBanks ******

SPENCER ACKERMAN in **THE DAILY BEAST -- "Paul Manafort Teamed Up With Obama's Lawyer to Help Putin Ally:** As the examination of pro-Kremlin influence-peddling continues, Democrats are coming under scrutiny, too": "It wasn't just Republicans. When Paul Manafort needed a powerful D.C. law firm to bless an alarming act by his clients in Kiev's pro-Kremlin regime in Kiev, Donald Trump's future campaign chairman turned to attorneys with significant ties to Barack Obama's administration.

"In exchange, a team led by Obama's former White House counsel Greg Craig at the firm of Skadden Arps produced a report that whitewashed the pro-Putin government of Viktor Yanukovych for jailing Yanukovych's anti-Kremlin predecessor. Manafort consulted for Yanukovych's Party of Regions. And they did it all for roughly $13,000-a conspicuously small amount for top lawyers at a prestigious law firm. (Prosecutors in Ukraine have reportedly alleged a million dollars more in secret payments.)" http://thebea.st/2vzJQSx

MIKE STEEL in the **CHARLOTTE OBSERVER -- "Dean Smith statue in the U.S. Capitol? He beats who's there now":** "The furor over removing Confederate memorials offers North Carolina an opportunity to tell a new, more positive story about our state and our values. One modest proposition: We should replace North Carolina's statue of a Confederate veteran in the U.S. Capitol with a new statue of the late, legendary college basketball coach Dean Smith." http://bit.ly/2vo0YP5

BUSINESS BURST -- "At Whole Foods, Amazon Takes Rare Lead in Cutting Prices,"by WSJ's Laura Stevens and Heather Haddon: "Amazon.com on Monday put itself in the unusual position of being a first-mover on price cuts when it slashed the sticker price on more than 100 items at Whole Foods Market many by more than 30%. Amazon typically relies on algorithms that scrape competitors' prices before automatically matching or narrowly undercutting them on its website. It focuses on items that are most popular on the site and that drive traffic, according to former executives in Amazon's retail divisions. That gives the retail giant a reputation for having the lowest prices, part of its strategy of driving more shopper traffic." http://on.wsj.com/2vFM69X

VALLEY TALK -- MARK ZUCKERBERG posts on Facebook: "Priscilla and I are so happy to welcome our daughter August! We wrote her a letter about the world we hope she grows up in, and also hoping she doesn't grow up too fast." ***With the letter and a pic of the whole family*** http://bit.ly/2vzP7cL

MEDIAWATCH -- Paul Farhi (@farhip): "Pres/CEO of @Newseum, Jeff Herbst, suddenly steps down. Interim head will Jan Neuharth, chair/CEO of Freedom Forum, Newseum says."

REMEMBERING MICHAEL CROMARTIE - Christianity Today's Kate Shellnut: "Cromartie, a Washington networker who helped rebrand America's image of Christian political engagement, has died of cancer at age 67. The news of his death was reported Monday on Twitter and confirmed by colleagues at the Ethics and Public Policy Center, the DC-based conservative think tank where he served for more than 30 years. Cromartie brought Christian thought leaders and secular journalists under the same roof at the Faith Angle Forum, held every year since 1999. ... In a political arena often dominated by competition, power grabs, and culture war debates, Cromartie stuck out by offering a friendlier, humbler approach." ***With remembrances by Michael Gerson, Russell Moore, Michael Wear, John Stonestreet, Pete Wehner*** http://bit.ly/2qlyRti ... ***2013 profile*** http://bit.ly/2weDEIW ...***Friends' memories of Michael on his Facebook page*** http://bit.ly/2x00u19

TRANSITIONS -- Julian Castro, former HUD secretary and San Antonio mayor, is joining the faculty of the LBJ School at UT Austin as the dean's distinguished fellow and fellow of the Davila chair in international trade policy. ... **Maggie Hollander** has joined MSNBC as a media relations manager. Hollander was previously an international communications manager at Viacom. ... **George Selim** has been named SVP of programs at the ADL. He's the former DHS director of the office for community partnerships.

OBAMA ALUMNI -- MICHAEL GOTTLIEB, partner at Boies Schiller Flexner and former W.H. associate counsel, has been named to National Law Journal's D.C. Rising Stars list - what he says is his biggest win: "I am proud to have helped James Alefantis, owner of Comet Ping Pong, fight back against fake news attacks falsely claiming that Comet was running a child sex ring. We helped Comet restore its business, and obtained an apology and retraction from leading conspiracy theorist Infowars." ***For NLJ subscribers*** http://bit.ly/2xtBq0r

WELCOME TO THE WORLD - Ryan Brevard, adviser at the Institute of International Education, and girlfriend **Bri Fett** recently welcomed Magnolia Marie Brevard. ***Pic*** http://politi.co/2xGfK0v

WEEKEND WEDDINGS - Hayley Andrews, director of government affairs and policy at the Charles Group and travel blogger at Navigate Abroad (http://bit.ly/2tjP2ff), on Saturday married **Eugene Gelfgat,** a lieutenant in the Army. Their small wedding was at Meadowlark Botanical Gardens in Vienna, Va. The couple met as GW students on a Birthright Israel trip in 2010. ***Pic*** http://bit.ly/2vnE9v9

-- Scott Rausch, legislative director for Rep. Alex Mooney (R-W.Va.), on Saturday married **Patricia Simpson,** director of career programs at the Leadership Institute. "The couple met at a birthday party at the home of Brent Gardner, chief government affairs officer at AFP, the day Scott moved to D.C. to begin his job as a lobbyist at the NRA." ***Pic*** http://bit.ly/2xFhdUv

BIRTHWEEK (was Sunday): Ashley Koerber of Fox News

BIRTHDAY OF THE DAY: Robert Rubin, former U.S. treasury secretary and co-chair emeritus of the Council on Foreign Relations, celebrating at Daniel in New York. **A fun fact about Bob:** "A fun fact is how I found out who Jimmy Buffett is. When I was at Treasury, I told the Republican House majority leader that Warren Buffett was opposed to cutting capital gains taxes-as was I. (And I still am.) He responded that Warren Buffett might be opposed, but *Jimmy* Buffett is in favor. I started to say, 'Why should I care about Warren Buffett's son?' but I didn't. Later, someone told me that Jimmy Buffett is a famous singer, so I called Alan Greenspan to see if he had heard of this Jimmy Buffett character. He said it was probably Warren's son. I later told President Clinton about my exchange with the majority leader. The President laughed at me for not knowing who Jimmy Buffett is, and I told him that Greenspan also thought he was Warren's son. President Clinton said that for some reason this didn't surprise him." Read his Playbook Plus Q&A: http://politi.co/2vFATX0

BIRTHDAYS: Supreme Court Justice Neil Gorsuch ... Gary Shapiro, president and CEO of Consumer Technology Association ... former Treasury Secretary Jack Lew ... Sen. John McCain (R-Ariz.) ... TRUMP'S EPA: Agency at a crossroads -- Complete coverage

September 1, 2017

Latest News

Environmentalists Say Texas Facility Fire Backs Need For Obama RMP Rule

Environmentalists say the fire at a Texas chemical facility caused by Hurricane Harvey backs the need for the Obama-era rule strengthening EPA's facility accident prevention program with new requirements for hazard analysis and streamlined release of facility data, though an industry source says the existing rule is adequate.

EPA May Face Bigger Hurricane Burden From Smaller, Unregulated Facilities

EPA has mobilized emergency response program personnel to coordinate with other government agencies to respond to damage from Hurricane Harvey across southeast Texas, including shoring up Superfund sites and assessing industrial facilities, but one industry source believes the larger burden for the agency will be managing toxic releases from smaller, unregulated facilities.

Harvey's Toll May Complicate Administration's Push For EPA Budget Cuts

Hurricane Harvey's environmental and human toll could complicate efforts by the Trump administration and Republican lawmakers to cut EPA's budget just as the House nears floor consideration of legislation that would trim the agency's budget and likely hundreds of senior agency staffers are poised for imminent exit under planned early departure programs, Hill aides and former EPA officials say.

SAB Faces Bias Concerns Over Biomass Panel Chair's Work For Industry

A member of EPA's Science Advisory Board (SAB) is raising concerns that EPA allowed University of Illinois professor Madhu Khanna to chair the board's panel seeking to advise the agency on how to estimate carbon emissions from biomass, despite her paid work for an industry group that promotes the fuel as a carbon-neutral energy source.

Industries Fight 'Wild West' Of Uneven EPA Adherence To Court Decisions

Groups representing major industry sectors are urging a federal appeals court to scrap an Obama-era rule that allows EPA to opt against applying one federal

appellate court's ruling on Clean Air Act (CAA) issues in another circuit, with industry warning that the rule creates a legal "wild, wild west" spurring major uncertainty for companies.

Judge Scraps Stay Of Royalty Rule, Boosting Suits Over EPA, DOI Rules

A federal judge has backed states' and environmentalists' claim that the Trump administration cannot use the Administrative Procedure Act (APA) to delay an Obama-era rule boosting royalty rates for fossil fuel extraction on federal land that has already taken effect, potentially boosting other suits targeting similar delays of methane emissions from some oil and gas sites and EPA limits on power plant effluent.

Daily Feed

Waxman favors vehicle rules over ethanol for curbing GHGs

A better mechanism to reduce GHGs than corn ethanol would be to force automakers "to meet their commitments to rapidly increase fuel efficiency" as agreed under a sweeping deal between auto companies and the Obama administration, the former Democratic lawmaker says.

Bodine's interim EPA post prompts criticism

The enforcement nominee will begin work before the Senate votes on her nomination, a common practice in past administrations but one which environmentalists say violates the "spirit" of a recent Supreme Court ruling.

Five states press ATSDR for national health study on PFCs

Five state health departments are urging the federal government to launch a national study on the health effects of exposure to perfluorinated chemicals in drinking water.

Ewire: EPA downplays possible toxic risks from Arkema fire

EPA says "there are no concentrations of concern for toxic materials reported at this time."

ExxonMobil appeals $20 million citizen suit penalty

Environmentalists say the district court ruling imposing a massive penalty for Exxon's alleged Clean Air Act violations is an important test of Clean Air Act citizen suits.

Subject: POLITICO's Morning Energy, presented by Chevron: Fallout spreads from Zinke's Alaska arm-twist — Energy and Water title clears House — Inhofe shrugs at red team-blue team climate debate

By Anthony Adragna | 07/28/2017 10:00 AM EDT

With help from Esther Whieldon, Ben Lefebvre and Eric Wolff

ALASKA-SIZED FALLOUT FROM ZINKE CALL: Swift pushback continues after Interior Secretary Ryan Zinke threatened repercussions for Alaska's energy priorities in light of Sen. Lisa Murkowski's vote against taking up Obamacare earlier this week. Two House Democratic ranking members - Energy and Commerce's Frank Pallone and Natural Resources' Raul Grijalva - sent requests for investigations into Zinke's actions to GAO and Interior's inspector general. In addition, the Western Values Project filed a FOIA request for all records related to Zinke's calls with Murkowski and Alaska Sen. Dan Sullivan, promising to sue for them if they don't get the response within statutory limits.

The White House didn't deny the phone calls occurred with Press Secretary Sarah Huckabee Sanders instead declining to "speak about conversations between Cabinet members and other individuals." But as POLITICO's Elana Schor and Ben Lefebvre report , Sullivan urged his senior senator and the Trump administration return to harmony. "From my perspective, the sooner we can get back to that kind of cooperation between the administration and the chairman of the [energy] committee, the better for Alaska and the better for the country," he told reporters. "I'm not telling Sen. Murkowski anything. I work super closely with Sen. Murkowski, but that's my statement."

Murkowski responds: In an interview with the Alaska Dispatch News' Erica Martinson (who broke the story), Murkowski confirmed she had a "difficult conversation" with President Donald Trump before the vote and spoke with Zinke, who "shared with me that the president was not pleased" afterwards. But she said she didn't feel pressured at all and didn't feel like her Interior priorities were at risk. "I certainly hope that those in the administration will continue to work with all of us - all of the Alaska delegation - on priorities that are not only important to Alaska, they're important to the country," she said.

Some Republicans said Zinke's pressure wasn't unusual: Sen. Lindsey Graham said lawmakers feel pressure from the administration all the time. "It won't matter one bit," he told reporters. "I think she's going to do what she likes. If you're in the Senate you get threatened all the time by everybody." And House Natural Resources Chairman Rob Bishop agreed: "That is not unprecedented, [he] has a right to do that," he told reporters in the Capitol. As Pro's Esther Whieldon reports, Bishop said former Interior Secretary Sally Jewell would call him "complaining about some things that we were doing."

Why this could backfire: Murkowski chairs the Senate Energy and Natural Resources Committee, which controls among other things how quickly Zinke may get personnel in place, and also holds the gavel of the Appropriations subcommittee that oversees Interior's funding.

Also, she's tough as nails and unlikely to be intimidated by anyone. She proved it early this morning, when she joined Sens. Susan Collins and John McCain to help Democrats defeat the last-ditch, slimmed-down Obamacare repeal bill, killing the effort for now.

TGIF EVERYBODY! I'm your host Anthony Adragna, and I am officially off to Scotland for my honeymoon today. See you in two weeks! In the meantime, a merry band of very talented energy Pros will fill in for me! Be nice! Theodore M. Pomeroy had the shortest tenure as House speaker (at just a day), but your end-of-the-week trivia is who was our shortest president? Send your tips, energy gossip and comments to Alex Guillén, who returns to the ME captain's chair on Monday, at aguillen@politico.com. Or follow us on Twitter @alexcguillen, @AnthonyAdragna, @Morning_Energy, and @POLITICOPro.

ENERGY AND WATER TITLE CLEARS HOUSE: It will almost certainly be substantially reshaped by the Senate - if not ignored altogether - but House lawmakers passed $789 billion mini-spending package, H.R. 3219 (115), that included energy and water infrastructure funding, Pro Budget and Appropriations Brief's Sarah Ferris reports . The $37.6 billion energy and water title includes funding for Yucca Mountain and a rider protecting the Trump administration's withdrawal of the Waters of the U.S. regulation from legal challenges, while zeroing out DOE's ARPA-E program and blocking any new loan guarantees. Senate appropriators cleared their own $38.4 billion energy spending package on July 20 with large differences compared to the House version.

The House package came together as centrist Republicans told leadership they would not back a massive 12-bill spending package sought by others in the caucus, POLITICO's Rachael Bade reports. It comes as moderate GOPers are increasingly banding together to undermine leadership as they take from the Freedom Caucus' playbook.

YOUR MOVE, MR. PRESIDENT: The Senate passed a package of sanctions on Russia, Iran, and North Korea by an overwhelming 98-2 margin Thursday, sending it to Trump's desk, POLITICO's Elana Schor reports. The White House has worked hard to avoid taking a clear position on the bill, H.R. 3364 (115) , with communications director Anthony Scaramucci telling CNN on Thursday that Trump "may sign the sanctions exactly the way they are, or he may veto the sanctions and negotiate an even tougher deal against the Russians." But Congress has shown they can easily override a veto if Trump elects that path. Remember the sanctions only kick in for energy projects in which a Russian company owns 33 percent or a controlling stake.

A former member of Congress with detailed knowledge of the legislation pointed our colleague Daniel Lippman to a provision of the legislation that the ex-member thinks hasn't gotten enough attention: "A lot of the coverage is about what the bill forces the president to do with the sanctions but what a lot of people are missing is that there is a key discretionary provision [in Section 232] that basically allows the president to avoid meddling in the energy affairs in our European and NATO allies. He can decide to allow to not to punish and not meddle in the affairs of Europe's energy policy ... [and] he actually has discretion to do absolutely nothing. It is not all mandatory language but it does have some discretionary language. And that could be a key provision."

WHERE DO WE GO FROM HERE? White House, Treasury and congressional leaders issued a statement on tax reform Thursday, acknowledging that they were giving up on plans for a border adjustment tax. But the lack of additional details in their six-paragraph statement suggests the GOP's dream of achieving tax reform may be years from completion, POLITICO's Nancy Cook and Aaron Lorenzo report. But Edison Electric Institute President Tom Kuhn applauded the statement and said his organization would work "to find tax reform solutions that will benefit all customers and encourage much-needed investment in critical energy infrastructure by helping to keep the cost of capital as low as possible."

OIL AND GAS INDUSTRY WANTS FULL COURT REVIEW OF METHANE STAY: EPA's stay of the Obama-era methane rule may be headed to the full D.C. Circuit Court of Appeals. EPA had not filed any petition as of the midnight deadline to decide whether and how to appeal the early July ruling striking down Administrator Scott Pruitt's 90-day stay of the methane rule for new oil and gas wells. The court agreed not to order EPA to immediately resume enforcing the regulation, but the judges gave EPA limited time to seek an appeal. While EPA did not file anything on Thursday, a coalition of industry groups did, requesting an *en banc* review by all 11 judges at the D.C. Circuit. It typically takes the court months even to decide whether to grant *en banc* review, long past the point at which Pruitt's 90-day stay would expire, but the court may speed things up under the circumstances. It's unclear whether the rule will take effect in the meantime, but the three-judge panel indicated it wasn't comfortable letting EPA keep it on hold indefinitely after Pruitt's action was found to be unlawful. The groups argued that the stay should remain in place in the meantime.

INHOFE NOT WILD ABOUT RED-BLUE CLIMATE DEBATE: EPA Administrator Scott Pruitt didn't discuss his plans to hold a red team-blue team public debate on the scientific consensus on climate change with him, but one of his normal allies, Sen. Jim Inhofe, thinks it isn't useful. "I don't think there's anything to be accomplished," he told ME.

HE'S GOING HOME: Energy Secretary Rick Perry will be in Waller, Texas, at 11 a.m. local time today to tour Daikin Texas Technology Park, which manufactures air conditioning equipment. He'll deliver remarks to employees and then hold a brief media availability.

Another unusual tweet: After their press shop blasted out a link to Perry's odd op-ed on Obamacare reform, DOE's official Twitter account tweeted: "In the fight between @SecretaryPerry and climate scientists - He's winning."

** **A message from Chevron**: When an endangered butterfly was found near a Chevron refinery, we protected the habitat and still plant the only thing they eat-buckwheat. Watch the video: http://bit.ly/2vFizh5 **

ICAHN GETS BEAT IN RFS CREDITS MARKET: Carl Icahn's CVR Refining lost $19 million in the second quarter of 2017, and it laid the blame for the loss on spending $106 million on credits needed to comply with the Renewable Fuel Standard, according to its income statement released Thursday. Reuters had reported that Icahn had been holding fewer credits than needed on the expectation that RIN prices would drop, a move that worked in the first part of the year. But prices have jumped from roughly 34 cents a credit to 80 cents a credit, and CVR

took it on the chin. "As I've said many, many times before, RINs continue to be an egregious tax on independent refiners and small retailers," CVR CEO Jack Lipinski said on the earnings call. "RINs prices have been extremely volatile this year, which only proves the fact that RINs market is manipulated...EPA continues to ignore this."

FRACKING RULE'S DAY IN COURT: The Trump administration may be having a hard time convincing appeals court judges to suspend the court case brought by the state of Wyoming over the BLM fracking rule. Lawyers for the administration said in court Thursday in Denver that suspension would help Interior as it works to rescind the rule, which went into place in 2015 but got caught up in a legal battle over BLM's jurisdiction before it took effect. Judges for the U.S. Court of Appeals for the 10th Circuit hearing the argument didn't seem too impressed, however, saying they were wary of ceding court process to another branch of government.

CORTEZ MASTO TO ZINKE: HANDS OFF: Nevada Democratic Sen. Catherine Cortez Masto released a video urging Zinke not to alter the boundaries of two national monuments - Gold Butte and Basin and Range - as he prepares to tour the sites next week. "Secretary Zinke, the people of Nevada have spoken," the first-term senator said. "They don't want their national monuments rescinded."

Zinke's still in New Mexico today where he'll go on a hike with local veterans and then host meetings with the Mescalero Apache, Fort Sill Tribe, and Friends of Organ Mountains Desert Peaks. All are closed press. Then, on Saturday, he'll go for a hike and horseback ride with Democratic Sens. (and outspoken public lands advocates) Tom Udall and Martin Heinrich.

MAIL CALL! OUR ADVICE ON ADVISORY PANELS: Three senior Senate EPW Republicans - John Barrasso, Shelley Moore Capito and Mike Rounds - sent a letter to Pruitt Thursday urging him to revamp past Clean Air Scientific Advisory Committee "practices to make them compliant with the statute." They write the scientific advisory panel has never detailed adverse social, economic, or energy effects stemming from the agency's National Ambient Air Quality Standards program because it has never requested that information. "CASAC must be constituted of experts who can provide independent counsel to you in all of the above areas," the senators wrote.

SECOND TIME'S THE CHARM? The American Fuel & Petrochemical Manufacturers is still worried about sanctions possibly being placed on Venezuela's crude oil exports. The trade association sent a second letter to the White House today asking it to consider the economic impact sanctions of Venezuela's heavy crude would have on U.S. refiners. The White House said earlier this week it would sanction more individuals in President Maduro's regime, but left sanctions on the South American country's oil on the table for the future. "AFPM supports the Administration's goal of bringing stability to Venezuela, but urges you to carefully consider the impact sectoral sanctions will have on U.S. businesses and consumers," the association wrote in its latest letter.

CONSERVATIVES BACK ANTI-SCC BILL: A group of 20 conservative organizations voiced support in a letter Thursday for Transparency and Honesty in Energy Regulations Act, which would halt the use of the social cost of carbon and similar figures in federal regulatory

proceedings. "The problems [with these figures] are too large to ignore, especially since they are being used to justify regulations that make energy more expensive for American families and businesses," the letter, signed by groups including the American Energy Alliance, Competitive Enterprise Institute and Heartland Institute, states.

MORE PRESSURE AGAINST GARRETT: Four senior House Democrats - Steny Hoyer, Gwen Moore, Maxine Waters and Denny Heck - sent a letter Thursday to Senate Banking Chairman Mike Crapo asking him to join their calls against the nomination of former Rep. Scott Garrett to lead the Export-Import Bank.

MORE THAN 2K WIND MEGAWATTS INSTALLED THIS YEAR: The American Wind Energy Association in a new report said 357 megawatts in new wind projects were brought online the second quarter of this year, bringing the annual total to 2,357 megawatts. There are now 84,405 megawatts of installed wind capacity in the US and another 25,819 megawatts under construction or in advanced development. Power purchase agreements with utilities continued to dominate the scene with more than 1,697 megawatts in new contracts in the second quarter.

SPOTTED: At a Chemistry Caucus event on non-traditional careers in chemistry in the Capitol Visitor Center yesterday, according to a PI tipster: Non-traditional chemists including Rep. John Moolenaar (R-Mich.), Tracy Caldwell Dyson of NASA, Dana Sedin of New Belgium Brewing Company and Bill Provine of Delaware Innovation Space; Tom Connelly of the American Chemical Society; and Rep. Dan Lipinski (D-Ill.) (h/t POLITICO Influence).

Summaries

ENDANGERED SPECIES
Alaska/Marine Mammals Incidental Take
ENDANGERED SPECIES

Notice of the National Marine Fisheries Service announces the receipt of a request from the National Park Service for authorization to take marine mammals incidental to glaucous-winged gull and climate monitoring research activities in Glacier Bay National Park in Alaska. The authorization would allow the take of harbor seals by Level B harassment during ground and vessel surveys at four study sites up to five times per year and during weather station installation, maintenance, and operation at one of the sites up to four additional times per year. The authorization would be valid from March 1, 2018, to Feb. 28, 2019. The authorization also specifies mitigation, monitoring, and reporting requirements. Comments are due Jan. 2, 2018. Contact: Jonathan Molineaux; NMFS, Office of Protected Resources; 301-427-8401; ITP.molineaux@noaa.gov

82 FR 56953 (12/01/2017)

Regulatory Update

ENDANGERED SPECIES
Coastal California Gnatcatcher Incidental Take Permit
ENDANGERED SPECIES

Notice of the U.S. Fish and Wildlife Service announces the receipt of an application from Orange County Waste & Recycling for a five-year incidental take permit for the threatened coastal California gnatcatcher in connection with the construction, operation, and maintenance of the Olinda Alpha Landfill projects, in Brea, Calif. The agency has made a preliminary determination that the action qualifies as a low-effect habitat conservation plan and is categorically excluded from requirements to prepare an environmental assessment or an environmental impact statement. Comments are due Jan. 2, 2018. Contact: Karen Goebel; USFWS, Carlsbad Fish and Wildlife Office; 760-431-9440

82 FR 56990 (12/01/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Antimicrobial Drugs Advisory Committee Meeting
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces a meeting of the Antimicrobial Drugs Advisory Committee. The agenda includes discussion of a new drug application (NDA 210693) for Ciprofloxacin dispersion for inhalation, sponsored by Aradigm Corp., of Hayward, Calif. The proposed indication is for the treatment of noncystic fibrosis bronchiectasis patients with chronic lung infections with Pseudomonas aeruginosa. The meeting is scheduled for Jan. 11, 2018, in Hyattsville, Md. Comments are due Jan. 10, 2018. Contact: Lauren Tesh; FDA, Center for Drug Evaluation; 301-796-9001; AMDAC@fda.hhs.gov

82 FR 56975 (12/01/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Atlantic Hurricanes/Streamlined Environmental Assessment Procedures
GENERAL ENVIRONMENT AND SAFETY

Notice of the Federal Emergency Management Agency, in consultation with the Department of Homeland Security, announces a determination that exigent circumstances exist for the use of streamlined procedures for activities in areas impacted by hurricanes Harvey, Irma, Maria, and Nate that require an environmental assessment. FEMA may provide a three-day comment period for actions involving group housing sites and certain interim and/or temporary facilities, and a 14-day comment period for all other actions. FEMA also may favor electronic media for public notifications, focus EA level analysis and documentation on the "no action" and "proposed action" alternatives, and discuss resource areas in detail only if it determines that there is a potential impact to the resources. Contact: Katherine Zeringue; FEMA; 202-212-2282; Katherine.zeringue@fema.dhs.gov. Citations: 40 CFR 1501.7, 1508.9

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Hawaii/Lalamilo Wind Farm Repowering Project
GENERAL ENVIRONMENT AND SAFETY

Notice of the U.S. Fish and Wildlife Service announces the receipt of an application from Lalamilo Wind Co. and the associated draft environmental assessment and habitat conservation plan for a 20-year incidental take permit for the Hawaiian hoary bat and petrel in Kamuela, Hawaii. The applicant requests authorization for the incidental take that may occur as a result of the operation of the Lalamilo Wind Farm Repowering Project that would provide electricity to eight existing water wells in the Lalamilo-Parker well system. Comments are due Jan. 16, 2018. Contact: Michelle Bogardus; USFWS; 808-792-9400; lalamilohcp_ea@fws.gov

82 FR 56987 (12/01/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Withdrawal of Approval of Abbreviated New Drug Applications
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces the withdrawal of approval for 68 abbreviated new drug applications (ANDAs) held by multiple applicants. The applicants have requested the withdrawals because the drug products are no longer marketed. The withdrawals are effective Jan. 2, 2018. Contact: Trang Tran; FDA, Center for Drug Evaluation and Research; 240-402-7945. Citations: 21 CFR 314.150

Regulatory Update

HAZARDOUS WASTE CLEANUP
Massachusetts/Hatheway & Patterson Superfund Site
HAZARDOUS WASTE CLEANUP

Direct final rule of the EPA deletes the Hatheway & Patterson Superfund Site in Foxborough and

Mansfield counties in Massachusetts from the National Priorities List. The agency and the Massachusetts Department of Environmental Protection have determined that all appropriate response actions under CERCLA have been completed. This deletion does not preclude future actions under Superfund. The rule is effective Jan. 30, 2018, unless adverse comments are received by Jan. 2, 2018. Contact: Kimberly White; EPA Region 1, Office of Site Remediation and Restoration; 617-918-1752; white.kimberly@epa.gov. Citations 40 CFR 300, Appendix B

82 FR 56890 (12/01/2017)

Regulatory Update

HAZARDOUS WASTE CLEANUP
Massachusetts/Hatheway & Patterson Superfund Site
HAZARDOUS WASTE CLEANUP

Proposed rule of the EPA would delete the Hatheway & Patterson Superfund Site in Foxborough and Mansfield counties in Massachusetts from the National Priorities List. The agency and the Massachusetts Department of Environmental Protection have determined that all appropriate response actions under CERCLA have been completed. This deletion does not preclude future actions under Superfund. A concurrent direct final rule adopts the changes, effective Jan. 30, 2018. Comments are due Jan. 2, 2018. Contact: Kimberly White; EPA Region 1, Office of Site Remediation and Restoration; 617-918-1752; white.kimberly@epa.gov. Citations 40 CFR 300, Appendix B

TRUMP'S EPA: Agency at a crossroads -- Complete coverage

August 17, 2017

Latest News

EPA Elevates Role Of Industry-Sought Criteria In Vehicle GHG Rule Review

EPA is elevating the importance of industry-sought criteria, including consumer acceptance, affordability and economic impacts, in its reconsideration of greenhouse gas standards for light-duty vehicles in the years leading up to 2025, according to recently released documents from a meeting the agency hosted with automakers earlier this summer.

Public Interest Groups Defend Standing In Suit Over Trump's '2-1' Rule Order

Public interest groups are fighting the Department of Justice's (DOJ) novel claim that showing harm to the groups' ability to comment on regulatory repeals is not enough to give them standing to sue over President Donald Trump's executive order (EO) directing agencies to identify two rules to repeal for every new rule they issue, countering that DOJ's argument would limit citizens' ability to challenge a host of constitutional violations.

Methane NSPS Delay Faces Same High Bar As Vacated Effort, EPA Critics Say

EPA's proposal to delay implementation of Obama-era methane rules for new oil and gas facilities for two years faces the same legal problems as the agency's earlier 90-day pause that was vacated by an appellate court, according to formal comments from former agency officials, environmentalists and legal experts.

Firefighters Seek To Block Industry Tool Said To Ease RMP Compliance

Washington state firefighters are urging Democratic senators to halt development of a novel dispersion modeling approach for assessing risks from toxic gas releases, arguing the federal agency and industry collaboration underestimates risks to the public in filings with EPA and other agencies, though an industry group says the method is based on sound science and may still be revised.

EPA Faces Test Over West Virginia Bid To Expand Use Of Novel WQS Method

West Virginia officials are asking EPA to approve a new law that would, if approved,

allow a state for the first time to use a novel method for estimating water flow when calculating water quality standards for non-carcinogens, a plan that is already drawing strong criticism from environmentalists who say it would ease protections.

Daily Feed

Trump draws backlash for repealing strict flood standards

Some of the strongest criticisms came from the conservative R Street Institute, where officials charged that the repeal will result in increased cost to taxpayers as they are forced to subsidize construction in vulnerable areas.

CSAPR supporters oppose industry bid to delay suit

Defenders of EPA's emissions trading rule are opposing industry's proposed four-month briefing delay, saying power companies are seeking to stay the litigation even though deadlines for such motions have long passed.

Quote-unquote: speaking of NEPA deadlines, deregulation and enforcement

Today's quotes cover the administration's new two-year NEPA deadline, the 2-for-1 order, reworking CWA provisions and more.

Ebell calls for EPA to shutter regions, overhaul science policy

The former head of Trump's EPA transition team details an aggressive agenda for EPA reform that would close every regional office and shift enforcement authority to program offices.

Ewire: Universities launch major new study on PFCs

As states grapple with growing concerns over contamination from perflourinated chemicals, researchers are creating a new center to study potential exposure pathways, develop better detection tools and other efforts.

Another critique of Pruitt's 'red team' climate science review

“Debating climate science should not be a cage match," says a prominent climate scientist.

Subject: POLITICO's Morning Transportation, presented by the Embassy of the United Arab Emirates: WH officials, senators to talk infrastructure today — NTSB prods FAA on balloon safety — PreCheck service provider takes aim at Senate bill

By Brianna Gurciullo | 10/18/2017 10:00 AM EDT

With help from Stephanie Beasley and Lauren Gardner

LET'S TALK: Republicans on the Senate Commerce Committee will sit down today with a quartet of White House officials to talk infrastructure. Those are Reed Cordish, an assistant to the president in the White House Office of Innovation; Jeremy Katz, the deputy director of the National Economic Council; DJ Gribbin, the special assistant to the president for infrastructure policy; and Joe Lai, a special assistant to the president in the Office of Legislative Affairs. A White House spokeswoman said the meeting on Capitol Hill "is a follow-up from previous discussions between the administration and Republicans on the Commerce Committee."

I'll show you my ideas if you show me yours: Commerce Chairman John Thune (R-S.D.) told reporters Tuesday that he wants "to find out a little bit more about what their thinking is and to give them an opportunity to hear from our members about what their priorities are." The White House hasn't revealed much more about its infrastructure plan since May, when it published a set of "principles" with President Donald Trump's fiscal 2018 budget proposal.

The pressure is on: Republicans have said that an infrastructure package will come after an attempt to overhaul the tax code. Thune on Tuesday said he hopes Congress will turn to an infrastructure bill in time for the 2018 elections. "If we can get a result on tax reform, get a budget done, confirm some judges, hopefully set up a debate about infrastructure perhaps for next year, I think we'll be in a good place," he said.

IT'S WEDNESDAY: Thanks for tuning in to POLITICO's Morning Transportation - your daily tipsheet on all things trains, planes, automobiles and ports - where your host just wants to be outside. Hit me with tips, feedback and lyrics: bgurciullo@politico.com or @brigurciullo.

"Wish I was back on the bayou / Rollin' with some Cajun Queen / Wishin' I were a fast freight train / Just a chooglin' on down to New Orleans."

GET LISTENING: Follow MT's playlist on Spotify. What better way to start your day than with songs (picked by us and readers) that are all about flying, driving, commuting and sailing?

MONEY IN YOUR EARS: POLITICO's new Money podcast brings you to the intersection of Washington and Wall Street with the most influential minds on the economy. Every Wednesday, Ben White will help you understand the economic and financial policies that move markets. While money never sleeps, you have to - so let Ben keep you up to speed and turn dollars into sense. The first POLITICO Money podcast, premiering with our launch sponsor, Morgan Stanley, features Treasury Secretary Steven Mnuchin. Click HERE to subscribe.

NTSB PRODS FAA ON BALLOONS: A hot air balloon pilot's poor decision-making, coupled with lax regulations and his medical history, led to a fatal 2016 crash in Texas that killed him and 15 passengers, the NTSB determined Tuesday. The board called on the FAA to throw out balloon operators' exemption from medical certification requirements and review how it conducts oversight of smaller balloon companies, which it found largely escape regulators' scrutiny. The combination of the pilot's medical conditions, like ADHD and depression, and the cocktail of prescription and over-the-counter drugs in his system - including diazepam, an opiate and enough of an allergy medication to produce an "impairing effect" akin to a drunk driver - "likely affected the pilot's ability to make safe decisions," NTSB found.

Fighting words: Chairman Robert Sumwalt had some harsh words for the FAA after a Friday email it sent lauding an industry-backed voluntary standards program for balloon operators. "They are abdicating their responsibility to provide oversight," he said. While Sumwalt said voluntary programs can be a good thing, he noted the pilot in question likely wouldn't have participated in the one established by the Balloon Federation of America, since he wasn't a member and didn't go to its events.

Not the first time: NTSB alerted FAA in 2014 that it considered its lax regulation of the balloon industry problematic, but Administrator Michael Huerta responded that the agency believed the risk to be low, given the tiny amount of ballooning domestically and pilots' understanding of the risks involved. "I think that the FAA has the responsibility to provide oversight. That's what the regulator does," Sumwalt said after the meeting. "And from what I've seen, it appears that they're just saying, 'Oh, the BFA is going to take care of that, so therefore we can keep doing what we're not doing.'"

For your radar: The Senate included a requirement for balloon operators to have second-class medical certificates in its long-term FAA bill (S. 1405 (115)), which is still pending. When asked whether he thinks Congress or the FAA will act first on the issue, Sumwalt said: "Well, this accident happened 14-and-a-half months ago. And what has the FAA done to this point? Have we seen any notion at all that they're going to move forward with a requirement for a medical? We've not seen that. I think that speaks for itself." (FAA has 90 days to respond to NTSB's recommendations.)

'CAUSE BABY, NOW WE'VE GOT BAD BLOOD: MorphoTrust USA is warning senators against passing a TSA reauthorization bill (S. 1872 (115)) that would expand the number of private companies the agency partners with for PreCheck marketing and vetting, citing the potential for it to lower security standards. The Senate bill encourages TSA to allow companies to vet applicants through means other than fingerprinting. As Steph reports, MorphoTrust, which has been the sole PreCheck service provider since the program's inception, is pushing lawmakers to abandon the language by arguing that no commercial technology is equivalent to the FBI's fingerprint-based database.

Let's play catch up: MT readers may recall that MorphoTrust filed a federal complaint against TSA last year when the agency opened the bidding process for PreCheck contracts. TSA eventually withdrew its request for applications because of cybersecurity concerns. However, the

agency's current contract with MorphoTrust expires next year, and the agency says it plans to begin soliciting new applications soon.

** **A message from the Embassy of the United Arab Emirates**: It was the largest commercial aviation order in history - UAE airlines bought $120 billion in US-made Boeing aircraft. That's hundreds of thousands of jobs for Americans. The UAE-US commercial aviation relationship is a win-win deal. http://politi.co/2yFCemS **

BETTER LUCK NEXT WEEK: The Senate Appropriations Committee has moved all markups of its fiscal 2018 DHS spending bill to next week. The subcommittee markup had been scheduled for Tuesday of this week and the full committee markup had been set for Thursday. As Steph reports, the change of plans "was due to uncertainty about when Senate Republicans might take up a budget resolution and will also allow more time to consider a supplemental appropriations bill, the committee press office said in a release." Plus, Senate Appropriations Chairman Thad Cochran (R-Miss.) just came back to Washington amid ongoing health problems.

Wish list: On Tuesday, Sen. Jon Tester (D-Mont.) said he was concerned that Democrats still hadn't seen the text of the bill. "I don't know what they're funding. I don't know what they're not funding. I don't know," he said. He said one of his biggest priorities will be to ensure TSA retains funding for airport security programs like VIPR, which has been targeted for cuts by the Trump administration. Sen. Tammy Baldwin (D-Wis.) also plans to offer an amendment that would provide funding for the Coast Guard to construct a second polar icebreaker that could be used to patrol the Great Lakes region.

SPEAKING OF POSTPONEMENTS: The Senate Environment and Public Works Committee postponed a meeting during which it was planning to vote on Paul Trombino's nomination to be FHWA administrator. The committee didn't give a reason for the postponement or a new date for the meeting, which was supposed to be this morning.

TRAVEL BAN 3.0 STOPPED COLD: A federal judge has halted parts of Trump's new travel ban. In granting a temporary restraining order, the judge in Hawaii found that the policy seemed to be violating immigration law, POLITICO's Josh Gerstein reports. The new restrictions would have gone into effect today.

PEKOSKE'S PRIORITIES: Freshly-minted TSA Administrator David Pekoske told an ACI-NA security conference Tuesday that his top priorities include increasing enrollment in PreCheck and Global Entry and securing public transportation areas, Steph reports. Recent incidents like the Las Vegas shooting have highlighted the risks associated with mass gatherings at places like airports, Pekoske told the audience. "In my ideal world, somewhere downstream, we won't have hundreds of people queued up to go through a security checkpoint," he said.

A look ahead: Pekoske emphasized the need for TSA to have procedures in place to help it deal with evolving threats and to start thinking more strategically. Specifically, Pekoske said he would like to increase TSA's focus on developing new technologies like automated screening lanes and maximizing use of existing technologies through partnerships with airlines and airports. His comments on TSA's need for innovation were reminiscent of former TSA head

Peter Neffenger, whom Pekoske name checked in his speech. "I'm a big fan of Peter Neffenger's," he said. "When I was I offered this position the first person I called was Peter." The Hill's Melanie Zanona spotted the two chatting at the event.

SELF-DRIVING CARS IN NYC: General Motors is looking to test self-driving Chevrolet Bolts in a 5-square-mile area of lower Manhattan beginning in 2018, POLITICO New York's Dana Rubinstein reports. "New York City is one of the most densely populated places in the world and provides new opportunities to expose our software to unusual situations, which means we can improve our software at a much faster rate," Kyle Vogt, the CEO of GM's Cruise Automation, said in a statement.

I'm walkin' here: Cornell University professor Bart Selman observed that pedestrian-heavy Manhattan could present a challenge: "pedestrians 'bullying' self-driving cars." He said: "Pedestrians don't step in front of human-operated cars because they are not sure the driver will stop - but self-driving cars will not have a choice but to stop."

FACE TIME: Kirstjen Nielsen, Trump's nominee to be DHS chief, was on the Hill on Tuesday and met up with Senate Homeland Security Chairman Ron Johnson (R-Wis.). They spoke about countering terrorism, security along U.S. borders, cybersecurity and hurricane response, according to a release from the panel.

ON THIS DAY... The Senate cleared the conference report for the first-ever DOT spending bill on Oct. 18, 1967, the Eno Center for Transportation's Jeff Davis writes.

TWEET DU JOUR: Rep. Mario Diaz-Balart (R-Fla.) tweeted Tuesday: "Welcomed @SecElaineChao this morning at @iflymia [Miami International Airport] for a working lunch with local #transportation leaders. #SFL."

SLICE OF PI: Our friends at POLITICO Influence report: "The Minnesota conglomerate 3M has added Gregory Cohen as an outside lobbyist working on 'research and deployment of innovative transportation safety technologies,' according to a disclosure filing. While 3M spent $760,000 on lobbying in the second quarter, Cohen is one of only a handful of outside lobbyists the firm employs. The others: Baker Donelson and Schumacher Partners International."

THE AUTOBAHN:

- "Smartphones are killing Americans, but nobody's counting." Bloomberg.

- "CSX chief vows to win back lost business after service woes." The Wall Street Journal.

- "NAFTA talks hit impasse as U.S. slams trading partners." POLITICO.

- "Travel industry ramps up effort to promote Caribbean tourism." The Associated Press.

- "City fires 2 aviation officers involved in dragging man off United flight." The Chicago Tribune.

- "Airline delays and cancelations rise due to hurricane." The Associated Press.

- "Trump's attack on Bombardier comes back to bite him." POLITICO Europe.

- "In London, black cabs win a battle against Uber. But is the war over?" The Washington Post.

- "Uber's top EU lobbyist to depart." POLITICO Europe.

THE COUNTDOWN: DOT appropriations run out in 52 days. The FAA reauthorization expires in 165 days. Highway and transit policy is up for renewal in 1,079 days.

**** A message from the Embassy of the United Arab Emirates**: UAE international airlines Emirates Airline and Etihad Airways are major Boeing customers. Emirates is the world's largest operator of Boeing 777s. And Etihad is responsible for nearly 20 percent of all Boeing 787-10s that are currently on order. Emirates and Etihad now serve 11 US gateway cities from Dubai and Abu Dhabi respectively with more than 260 weekly flights.

The growth of the UAE's aviation industry is the most visible sign of the UAE's overall economic success - a model of stability, growth and diversity in the Middle East. No country has benefitted more from this success than the US. Since 2009, the UAE has been the US's largest export market in the Middle East and North Africa. In 2016, the US had a $19 billion trade surplus with the UAE, America's third largest trade surplus globally. http://politi.co/2yFCemS **

Subject: POLITICO's Morning Energy, presented by Chevron: Zinke's mixing politics with business draws scrutiny — Report: Perry took charter flight last week — Federal judge reinstates parts of methane waste rule

By Anthony Adragna | 10/05/2017 10:00 AM EDT

With help from Ben Lefebvre and Darius Dixon

Morning Energy will not publish on Monday Oct. 9. Our next Morning Energy newsletter will publish on Tuesday Oct. 10. Please continue to follow PRO Energy issues here.

MIXING PUBLIC LANDS AND POLITICS: Over the course of his first months in office, Interior Secretary Ryan Zinke has met with big donors or political groups more than a half-dozen times while on official travel, raising questions about the appropriateness of those habits even if they don't cross any legal red lines, Pro's Ben Lefebvre and Esther Whieldon report . GOP donors shelled out up to $5,000 per couple for a photo with him during a nearly two-hour Virgin Islands Republican Party fundraiser during a stop on an official trip related to the Interior Department's role overseeing the U.S. territory. Tickets for the fundraiser, which was attended by local party members and elected officials, ranged from $75 per person to as much as $5,000 per couple.

Though ethics watchdogs said Zinke's appearance was legal, they said attending a fundraiser during his first month as secretary is not in line with past administrations' conduct. "It happens on occasion with other Cabinet secretaries, perhaps even a little more often as you get near the election, but it is not a very common practice for Cabinet members to be hopping around from campaign event to campaign event like we're seeing with Zinke," said Craig Holman, government affairs specialist for government watchdog Public Citizen. An Interior spokeswoman said Zinke always follows the law but declined to answer specific questions about his appearance at the Virgin Islands fundraiser, nor would say if he planned to continue raising funds.

Zinke's not alone: Obama administration officials had their own struggles mixing official business with politics. A watchdog group requested a probe of whether then-Secretary Ken Salazar had violated the Hatch Act while taking an Obama re-election campaign RV tour of Colorado. The Office of Special Counsel found HHS Secretary Kathleen Sebelius violated the Hatch Act in 2012, saying she had made "extemporaneous partisan remarks" in North Carolina. Former Interior chief Sally Jewell said she thought Zinke was within his rights, noting she once appeared at a fundraiser for Democratic Sen. Maria Cantwell that she paid her own way to. "If he had legitimate business while he's on the island, to do a political thing on the side I don't think that is that unusual," Jewell said.

But some see Zinke's activity as trying to maintain political contacts so can keep his options available for what to do after he leaves the Trump administration. "I think he's definitely got political aspirations, that that's one of the reasons why he is where he is at right now," said Land Tawney, executive director of Backcountry Hunters and Anglers. "You don't go from being a

Montana legislator to a first-term congressman to [Interior] secretary without having ambition." He's widely seen an attractive candidate for Montana's open-seat governor's race in 2020.

Quotes that keep coming back to ME: "Put another way, just because something is legal doesn't make it right," OMB director Mick Mulvaney wrote last week. "So much of what happens around here is based on appearances. If it just appears wrong, don't do it," Senate Energy Chairman Lisa Murkowski told reporters last week.

REPORT: PERRY TOOK CHARTER TOO - LAST WEEK: Energy Secretary Rick Perry took a chartered flight last week from Hazleton Regional Airport in Pennsylvania to the Greater Portsmouth Regional Airport in Ohio one day before HHS Secretary Tom Price resigned last week, Reuters reports, citing "PMH Aviation, the company that runs the Portsmouth airport." Information about the cost of the flight were not available and the agency did not respond to requests for comment. PMH declined to confirm the flight when contacted by ME Wednesday night. But FlightAware has details of a Sept. 28 trip that appears to match Perry's itinerary that day; his tour of a uranium facility started at 8:30 the following morning. After the tour, Perry tweeted that he was headed to the Cincinnati/Northern Kentucky International Airport.

SPEAKING OF TRAVEL: The Western Values Project told ME it plans to file a complaint in federal court today complaining Interior has not responded to FOIA requests it filed in June asking the extent that Zinke's wife has accompanied him on official work business. Lola Zinke has accompanied her husband on some official trips, either ceremonial events to which she had been officially invited or on trips on which she has paid her way, Interior spokeswoman Heather Swift told ME. And CNN reports Interior's inspector general expanded its existing probe on Zinke's non-commercial travel to also include a summer visit to the Vegas Golden Knights hockey team.

WELCOME TO THURSDAY EVERYBODY! I'm your host Anthony Adragna, and DOE's Diane Meck was first up to identify Rep. Sala Burton as the lawmaker Nancy Pelosi replaced in Congress. For today: How many - and which - current members of Congress replaced their spouses in their seats? Send your tips, energy gossip and comments to aadragna@politico.com, or follow us on Twitter @AnthonyAdragna, @Morning_Energy, and @POLITICOPro.

"I DID NOT SIGN UP TO GO BLOW UP THE MARKETS": Recently minted FERC Commissioner Robert Powelson didn't hold back Wednesday making it clear that he's not going to be a rubber stamp on the Energy Department's grid pricing proposal, and warned against politicizing FERC. According to SNL , the audience gathered for a meeting of the Organization of PJM States broke into a standing ovation when the former longtime Pennsylvania regulator declared, "We will not destroy the marketplace." Powelson, a Republican, reportedly said he wouldn't support a rule that undoes the power markets FERC oversees. "When that happens, we're done. I'm done; I don't need this job," he said, according to SNL. "FERC does not do politics. We don't do energy politics," he also said. "I did not sign up to go blow up the markets."

Something to keep in mind: Organization of PJM States includes state regulators spanning Illinois to New Jersey and down to North Carolina, and its meetings include not only officials from PJM, the nation's largest power market, but consumer counsels from those states and plenty

of power companies. PJM is also the market that would be the most affected by DOE's proposed rule. This is Powelson's crowd.

We need lots of information: Late Wednesday, FERC posted 53 questions and other requests for information as it dives into DOE controversial resiliency pricing proposal, Pro's Darius Dixon reports. The six-page document splits those questions into categories looking for feedback on rates, the 90-day on-site fuel requirement envisioned by DOE, and how pricing changes would be implemented, among other issues.

METHANE RULE LIVES - FOR NOW: A federal court in California ruled Wednesday that BLM unlawfully postponed key compliance dates for a methane waste rule in June, effectively putting the rule back on the books for now. Pro's Alex Guillén reports . Magistrate Judge Elizabeth Laporte said the agency was too late to delay components of the regulation because its effective date had already passed and therefore should have gone through a round of notice-and-comment rulemaking before suspending any part of the rule. Her decision came the same day Interior proposed an 18-month delay of the methane waste rule as it works to rewrite it. BLM will accept comments on that proposal for 30 days.

** **A message from Chevron**: When an endangered butterfly was found near a Chevron refinery, we protected the habitat and still plant the only thing they eat-buckwheat. Watch the video: http://politi.co/2fVfOTm **

EPA STRATEGIC PLAN DROPS CLIMATE FOCUS: EPA's priorities for the next four years would no longer make reference to climate change or rules to reduce carbon emissions under a draft strategic plan, Pro's Alex Guillén reports. The document, which went out to EPA employees Wednesday, instead defines the agency's "core mission" as ensuring clean air, water and land, calls for more "cooperative federalism" and touts the "rule of law and process." Accompanying graphic that went to employees here.

DEMOCRATS OFFERING CLIMATE METRIC BILL: Led by Sen. Michael Bennet, eight Senate Democrats today are introducing a bill - the Transparent Pollution Accounting Act - that would standardize the metric used across the federal government to quantify the cost of climate pollution. The Trump administration suspended use of the existing social cost of carbon earlier this year, prompting the need for a codified value, the Democrats argue.

WATCH THAT WRAP UP TODAY: Murkowski wants to have Kevin McIntyre, Trump's pick to chair FERC, and Rich Glick, who serves as general counsel to energy committee Democrats, onto the commission before the chamber adjourns for the Columbus Day recess, Pro's Darius Dixon reports.

Barrasso: Baran's renom needs a big offset: If Democrats want to secure a full five-year term for Nuclear Regulatory Commission member Jeff Baran, they're going to have to agree to "a fairly significant, robust [nomination] package for me to agree to allow him through," Sen. John Barrasso told ME. Democrats have insisted that Baran, a former aide to ex-Rep. Henry Waxman who has been on the commission since 2014, get a new term alongside the confirmations of GOP commission nominees Annie Caputo and David Wright, who were approved by EPW in July.

Barrasso's comments suggest that Democratic support for Caputo and Wright likely isn't enough to get him to go along with Baran, especially considering his frustration with objections to EPA enforcement nominee Susan Bodine. Still, there's not much to hang over the Democrats in the near term: It's a Republican administration with plenty of EPA nominees they don't like, and Baran's seat doesn't expire until June.

ADMINISTRATION SENDS OVER DISASTER FUNDING REQUEST: Officials formally sent over a request for nearly $30 billion in disaster relief Wednesday that included $12.8 billion for FEMA's disaster relief fund, $16 billion for the National Flood Insurance Program and $576.5 million for the forest service's firefighting fund, Pro Budget and Appropriations Brief's Sarah Ferris reports. That came as San Juan's mayor blasted Trump on Wednesday as the "miscommunicator in chief" and called his visit to the island "insulting."

Murkowski's focused on immediate relief: Murkowski expressed concern about the "slow" federal response to Hurricane Maria and said building a more resilient Puerto Rican grid was secondary to getting the lights back on. "When you think about the extent of a disaster like this, we all want to say, 'Okay, let's improve, let's improve the grid here, let's build the Puerto Rican grid of the future,' but first and foremost-we've just gotta try and clean up," she told reporters. An aide said Murkowski planned to visit the island with other lawmakers next week but that those details are still being finalized.

PHMSA, NOAA PICKS ADVANCE: The Senate Commerce Committee advanced the nominations of Howard Elliott to run PHMSA and Timothy Gallaudet to be No. 2 at NOAA by voice vote Wednesday. Add them to the ever-increasing backlog of nominees waiting for a Senate floor vote.

DEMOCRATS SEEK PROBE OF PRUITT'S SPENDING: Two senior House Transportation Democrats - Peter DeFazio and Grace Napolitano - asked EPA's inspector general in a letter to probe "wasteful" spending by Pruitt on round-the-clock security and a $25,000 soundproof phone booth. "This culture, which is reflected in travel and lifestyle choices from the president on down, seems to embolden senior, politically appointed officials of the Trump administration to undertake lavish spending of taxpayer dollars for their sole and personal benefit, and not for the benefit of the Americans paying the tab," they write.

Udall considering private plane rider: Sen. Tom Udall, top Democrat on Appropriations subcommittee responsible for EPA spending, told ME he was "exploring" some sort of rider barring officials from private plane travel. "What I end up seeing is there's some very wasteful things going on," he said.

SENIOR E&C MEMBER MURPHY TO RETIRE: Rep. Tim Murphy, who chairs the Energy and Commerce Subcommittee on Oversight, announced late Wednesday he'll retire at the end of his current term, POLITICO's Rachael Bade, Elena Schneider and John Bresnahan report. The staunchly pro-life Murphy allegedly suggested a mistress get an abortion.

MINE SAFETY PICK ACKNOWLEDGES FAULTS: David Zatezalo, Trump's mine safety

pick, told a Senate panel Wednesday he was "not proud of the fact" the coal company Rhino Resources he used to run got notices of safety violations, Pro Labor's Ian Kullgren reports. He also said he'd have no trouble working with career staff that issued the notices in 2010 and 2011.

ZINKE HEADS TO FLORIDA: Today, the Interior secretary will get a briefing on "infrastructure upgrades and Everglades restoration at Lake Okeechobee." He'll also visit National Park Service sites Friday impacted by recent hurricanes.

CONSERVATIVES FOR CLEAN ENERGY: Hundreds are expected to gather today at the Hyatt Regency for the Conservative Clean Energy Summit. Multiple lawmakers are expected to address the gathering, including Sens. Mike Rounds, Rob Portman and Lindsey Graham, as well as Rep. Scott W. Taylor. More information here .

Milestone for House climate caucus: There are now 60 members of the House Climate Solutions Caucus with the additions of Reps. Pete Aguilar and Mimi Walters.

PERRY AIDE ADDS MORE CLIENTS: Jeff Miller, a former adviser to Energy Secretary Rick Perry during his second presidential run, has signed three new clients - including Pacific Gas and Electric, the massive California utility. Miller reported lobbying DOE in the second quarter on behalf of six clients, including AECOM, Lucid Motors (as a subcontractor to Hobart Hallaway & Quayle), the Nuclear Energy Institute, Occidental Petroleum, Southern Company and Valero Energy. He's signed 15 clients since he started lobbying in Washington this year and Perry became DOE chief (h/t POLITICO Influence).

END OF A (SHORT) ERA: The Rogue EPA Twitter account is going on hiatus, it announced Wednesday. "We started this account to be sure the public knew what was happening at EPA. Now, the world sees...It may be time to take a step back and let others carry the torch for a while. Those of us at the helm, here, are tired," a couple of tweets said.

Cities Chafe at Clean Water Rules for L.A.'s Concrete River

Posted September 25, 2017, 02:09 P.M. ET

By Amena H. Saiyid

The L.A. River may be the perfect setting for Hollywood-style car chases, but it's not your typical river and shouldn't be treated like one under the law, a group of Southern California municipalities say.

They want the federal government to exclude the concrete-lined Los Angeles River and its paved tributaries from Clean Water Act requirements under an upcoming regulation, a move they say could save them from spending billions of dollars on stormwater controls.

City officials from the San Gabriel Valley Council of Governments say the river and its tributaries shouldn't be subject to the Trump administration's upcoming rewrite of the "Waters of the U.S." rule, which defines the scope of federal protections for wetlands and certain isolated or ephemeral waters. They argue they aren't "relatively permanent" flowing waters due to the seasonality of storms, don't support fish or vegetation, and aren't freely accessible to the public.

Sheila Kuehl, member of the Los Angeles County Board of Supervisors, however, said she opposes efforts to exclude the river from Clean Water Act protections.

"While we might save some money in the short run by reducing the important protections of the Clean Water Act, we would certainly pay later in increased medical costs for Angelenos sickened by polluted waterways, as well as a loss of tourism dollars as fewer people flocked to LA's famous beaches, lakes and rivers," she told Bloomberg BNA Sept. 25 by email.

"LA County deserves clean healthy ecosystems," she wrote. "I will not support any request to exclude a portion of the LA River and its paved tributaries simply in order to avoid our obligations under the Clean Water Act. "

Environmentalists say they will sue to block such a redesignation and want to ensure the law's

requirements apply. Waterways or wetlands classified as waters of the U.S. are subject to Clean Water Act programs and permitting requirements, including those for stormwater.

$6 Billion Price Tag

That means any of the 88 municipalities in Los Angeles County that discharge stormwater to the L.A. River must get a permit. Compliance with this permit means about $6 billion in spending on infrastructure for the San Gabriel Valley Council of Governments to capture stormwater.

It also means monitoring for more than 500 pollutants, constructing recharge basins under parks and parking lots, and installing other green infrastructure methods—such as permeable pavements, rain barrels, and strategically planted vegetation and wetlands—to capture stormwater runoff.

The officials made their pitch to exclude the L.A. channel at a Sept. 19 listening session with the Environmental Protection Agency and the U.S. Army Corps of Engineers, which have started rewriting the Obama-era 2015 Clean Water Rule.

In 2010, the EPA designated the 51-mile stretch of the mostly concrete-lined Los Angeles River a traditional navigable water on par with the Potomac, Colorado, and Mississippi rivers. That designation triggered the Clean Water Act protections for the river. The river often acts as a drainage ditch for stormwater, a major source of pollution in urban waterways, especially in Los Angeles.

Los Angeles County has been defending its stormwater permit from challenges by environmental groups, including the Natural Resources Defense Council, since 2008 on grounds that the controls within the permit aren't preventing toxic pollutants, debris, and other chemicals from entering its waterways.

The currently stayed 2015 water rule (RIN:2040-AF30), which the Trump administration vowed to rescind and rewrite, excluded stormwater collection systems on dry land, but was silent on their status when flood control channels are an integral part of a waterbody like the Los Angeles River.

Scalia-Inspired Rewrite Underway

The agencies under President Donald Trump's directive are rewriting the rule, using as its basis the late U.S. Supreme Court Justice Antonin Scalia's 2006 plurality opinion in Rapanos v. United States.

That opinion said waters with relatively permanent flow should be considered jurisdictional "as opposed to ordinarily dry channels through which water occasionally or intermittently flows," such as dry arroyos in Phoenix and the Los Angeles River, according to these city officials.

The EPA and the Corps have indicated they are considering three options for defining waters with "relatively permanent" flows. These would include streams that:

- flow continuously,

- flow continuously along with those that flow at least three months a year; or

- flow continuously along with those that can be considered such, based on their flow, frequency, or connectivity to physical, biological, and chemical features.

"We would like the EPA to critically look at any and all cement sections of all rivers and tributaries in the Los Angeles area and reconsider WOTUS jurisdiction in light of some of the arguments we have made," Eric Wolf, senior management analyst for the San Gabriel Valley Council of Governments, told Bloomberg BNA in a Sept. 21 email following the public forum.

The storm drains underlying the cities, including South Pasadena, that make up the San Gabriel Valley Council empty into boxed channels that lead into the concrete-lined Los Angeles River, where the flow is controlled by the Los Angeles Flood Control District.

"It makes no sense to apply water quality objectives to an engineered channel," Diana Mahmud, South Pasadena's council member and chair of the San Gabriel Valley Council of Government's water policy committee, told the EPA and the Corps.

Wolf said the river still will be protected under California law. The Golden State also is in the process of revising its definition of what waters would be protected under state law just in case the rewritten WOTUS rule doesn't protect them.

While aware of the cities' requests, the board of supervisors for Los Angeles County—which includes the cities that fall within the San Gabriel Valley Council of Governments— hasn't taken a position, county spokesman Kerjon Lee told Bloomberg BNA.

"This comment and all other comments received during these webinars are informing the thinking of the Army and the EPA as we work to develop a proposed rule for public comment," an EPA spokeswoman told Bloomberg BNA.

Water Status Mired in Debate

The agency added that it was typical for the agency to receive requests to reconsider the jurisdictional status of waters.

However, Lowell Rothschild, a Clean Water Act attorney in the Austin offices of Bracewell LLP, told Bloomberg BNA that the jurisdictional status of the Los Angeles River and its tributaries has dogged the EPA.

"The question is what would the eventual rule look like and how would the Los Angeles River fare under it," Rothschild told Bloomberg BNA in a Sept. 21 telephone interview.

He said the Scalia opinion would restrict jurisdictional reach based on flow. To the extent the Trump administration proposes a rule based on flow, it's very possible a river like the Los Angeles River—and possibly other water bodies that flow intermittently in the arid West—could be viewed as nonjurisdictional, Rothschild said.

"Clearly, the president would prefer a rule that excludes waters like the Los Angeles River that flow intermittently," he said

WOTUS Can't Overturn Designation

Unlike Rothschild, Sean Hecht, an environmental law professor with University of California-Los Angeles, said the 2010 designation of the L.A. River cannot be overturned by the water rule for several reasons.

A redesignation, he said, would require a rulemaking other than a WOTUS rule rewrite, just as it did in 2010. More importantly, a redesignation of the L.A. River wouldn't change the fact that municipal stormwater will still be regulated under a federal permit because it is being discharged into the Pacific Ocean, which is jurisdictional because it in fact supports navigation, he said.

Hecht also dismissed the cities' claim about the river's seasonal flows, saying the EPA's own analysis showed that there are year-round flows.

The NRDC would oppose any attempt to exclude the L.A. River from Clean Water Act protections, Steve Fleischli, the council's water program director, told Bloomberg BNA.

Fleischli said the cities are trying to skirt their obligations to meet stormwater requirements.

"We will take legal action if [the cities] roll back protections for the river," Fleischli said.

Exxon Touts New Methane Efforts As EPA Pushes Rule Delay

Posted September 25, 2017, 12:48 P.M. ET

By Abby Smith

ExxonMobil Corp. announced new efforts to reduce methane emissions from its facilities, even as the EPA seeks to delay Obama-era pollution limits for new drilling operations in the oil and natural gas sector.

Some environmentalists are hailing ExxonMobil's new program as "real leadership" in a landscape where the Trump administration is working to broadly roll back federal requirements on the oil and gas industry to reduce methane emissions.

The oil and gas giant today announced an "enhanced" program for detection and repair of methane leaks at natural gas facilities operated by its subsidiary XTO Energy Inc. The program includes a commitment to phase out within three years high-emitting devices. It also includes a commitment to personnel training and research initiatives.

"At a time when others are trying to claw back basic protections and make excuses for inaction, this kind of company responsiveness to local community, investor, and advocate concerns is refreshing," Mark Brownstein, vice president in the climate and energy program of the Environmental Defense Fund, said in a statement.

Exxon's announcement comes after the Environmental Protection Agency Sept. 22 sent to the White House its final versions of rules to delay—for at least two years—key requirements of Obama-era methane limits. Many industry trade groups, including the American Petroleum Institute, which represents ExxonMobil, strongly support the delay.

Water Monitoring Workload Rises with Pesticides, Contaminants

Posted September 25, 2017, 12:06 P.M. ET

By Tiffany Stecker

A decade ago, the U.S. Geological Survey tested the nation's streams and aquifers for 83 different pesticides. Today, that number has nearly tripled: 225 pesticides and their byproducts.

Twenty years ago, the environmental research arm of the U.S. government didn't test for pharmaceuticals in water. Today it's a relatively common practice. So is testing for cyanobacteria, a blue-green algae that forms as a result of excessive nitrogen and phosphorus in the water.

These "emerging contaminants" have stressed the workload of USGS's National Water Quality Assessment Program (NAWQA), which collects trend data over decades on contaminants in the nation's streams and wells, as resources remain stagnant.

NAWQA's budget has wavered between $55 million and $65 million since 2008. USGS's overall spending has hovered above the $1 billion mark since that year, and the recently passed appropriations bill in the House would keep funding relatively level, further challenging the service's ability to track trends even as new analytical techniques sharpen monitoring efforts.

Program 'Hasn't Grown in Years'

On the ground, however, scientists said the program's growing demands—and more sophisticated, expensive technology—are putting pressure on scientists and the USGS.

"The program [budget] hasn't grown in years," Jeffrey Fischer, a supervisory hydrologist with USGS's New Jersey Water Science Center, told Bloomberg BNA about his region's work. But NAWQA's analytical needs have grown by leaps and bounds.

USGS is not a regulatory agency, but its science has guided major environmental decisions in the last decade. The agency was among the first to discover traces of methyl tert-butyl ether (MTBE)—a gasoline additive to increase octane and a weak carcinogen—in groundwater nationwide. It also sounded the alarm in 2011 over coal tar-based sealcoat, a viscous liquid used in asphalt that contributes significantly to polycyclic aromatic hydrocarbon (PAH) contamination.

Advanced tracking techniques, like methods that can differentiate the source of mercury deposits from a coal-fired power plant or metal mining, are being deployed. Optical sensors can correlate different wavelengths of light with the levels of dissolved nitrates or algal pigments. The cost is expected to come down eventually, but at this point the purchase and installation of these sensors can run close to $100,000 per site.

Today, USGS is detecting contaminants, or "constituents," at tiny concentrations. Scientists are not looking for the presence of contaminants alone, but are looking at how those contaminants travel and how long they last in groundwater.

Identifying contaminants at smaller concentrations means scientists are finding more and more compounds in the water.

"We're detecting all these compounds no one knew existed," Fischer said. "Parts per million doesn't mean anything to anyone anymore; it's parts per billion, parts per trillion."

As a result of more sensitive methods of detection, USGS is adding more contaminants to its "schedules," the list of a type of pollutants the agency tests for in streams and wells that undergo the same type of testing.

With inflation, "flat funding translates to a cut," Tim Williams, deputy executive director for the Water Environment Federation, told Bloomberg BNA. "If the program is not adequately funded, you run the risk of not having a true national monitoring program."

Wells Closed

On a drizzly September afternoon, Fischer and three other USGS scientists set up a makeshift tent and rudimentary testing equipment to collect samples of groundwater from a 40-foot well near the college town of Glassboro, N.J. When the well was drilled more than 20 years ago, the brick homes and well-manicured lawns in the surrounding areas were rapidly replacing farmers' fields.

The site is in a coastal plain geologic formation that covers the southern half of New Jersey. It's part of a network of 30 wells to help USGS track how the rural-to-suburban revolution here affects the water underneath. Today, scientists still find traces of the pesticides sprayed on the vegetables from farmland in the groundwater.

The additional demands have led to the program cutting back on its sampling of wells. In New Jersey, the scientists stopped testing a network of five wells several years ago to accommodate the resource shortfall.

"It does limit your ability somewhat" to analyze trends over time, Fischer said.

Hot-Button Pesticides Hard to Test

Lisa Nowell, a Sacramento, Calif.-based USGS research chemist who studies pesticides in streams, said her field of study is constantly evolving.

"Pesticide use changes," Nowell told Bloomberg BNA. New pesticides are registered every year, others are taken off the market, and economic and scientific advances dictate how much farmers will use.

The methods for analyzing them also are complicated. Scientists like broad-spectrum methods that can detect several different pesticides in one sample, but some of the most common and hot-button chemicals—like glyphosate, the main ingredient in Monsanto Co.'s Roundup herbicide—are not easily detected in these broad-spectrum tests.

The process to decide which contaminants should be a priority starts with a USGS working group. The group decides which emerging chemicals of products should be of interest to the scientific agency. From there, the scientists whittle down the number based on substances that were previously included in USGS studies or have been identified by other agencies or organizations as being of concern to health or present in the environment.

Limited Resources

One of the issues with NAWQA, Williams added, is it was never authorized by Congress, meaning there's never any guarantee that it will receive a set level of appropriations year after year until the authorization expires.

Williams spent years climbing the Capitol's steps to convince lawmakers that USGS's water programs needed more funding.

"Everybody in Congress…was very supportive of the program, but it was always a challenge to increase funding because of other priorities and what they would characterize as limited resources," he said.

Partnerships With States

As a result, much of USGS's work on the ground is partially funded by states and other organizations. The New Jersey Department of Environmental Protection funds a portion of the New Jersey work through USGS's cooperative program. In exchange, the state uses USGS's monitoring network for testing water and works with USGS on studies.

These cooperative agreements in state USGS offices have helped the agency survive. But as landscapes change and chemicals come and go, the scientists' are acutely aware of the need to maintain the continuity of the program.

Fischer looks around at the community near Glassboro, where crop pesticides have been replaced by household fertilizers and weedkillers.

"If you see a nice green lawn," he said. "There's probably fertilizers and pesticides around."

"That's why we're here," his colleague, hydrologist Eric Jacobsen, added.

Ameren to Add $1 Billion of Wind Farms in the Midwest by 2020

Posted September 25, 2017, 01:34 P.M. ET

By Brian Eckhouse

Ameren Corp., the St. Louis-based utility holding company, is planning to add about $1 billion of new wind-power plants by 2020 as part of a broader plan to reduce carbon emissions.

At least 700 megawatts of wind farms will be built in Missouri and neighboring states with U.S.-made turbines, Ameren said in a Sept. 25 statement.

The move comes as the company shifts away from coal-fired power plants and falling prices make wind more competitive.

"Because of significant advancement in technology, harnessing wind is less expensive than other forms of new generation," Michael Moehn, president of Ameren Missouri, said in the statement.

Wind-turbine prices in the U.S. have fallen to $830,000 a megawatt, below the global average of almost $1 million, according to Bloomberg New Energy Finance. Because the company expects to complete the projects by 2020, they will probably qualify for a federal tax credit for wind power, Alex Morgan, a New York-based analyst at BNEF, said in an email Sept. 25.

Ameren Missouri, which is targeting a 35 percent reduction in carbon emissions from 2005 levels by 2030, also plans to add 100 megawatts of solar power over the next 10 years, with 50 megawatts expected online by 2025. The company announced in May plans to build as much as 1 megawatt of solar capacity at St. Louis Lambert International Airport that's expected to be complete in 2018.

It plans to retire more than half of its coal-fired generating capacity, including the Meramec Energy Center in St. Louis County by the end of 2022.

U.S., Mexico on Verge of New Colorado River Water Pact

Posted September 25, 2017, 7:02 A.M. ET

By Tripp Baltz

An agreement amending the longstanding treaty between the U.S. and Mexico on management of the Colorado River will continue the practice of water shortage sharing, but also fund new conservation and environmental programs, and aim to reduce the risk of ruinous drought.

The two nations are tentatively scheduled to execute the agreement—Minute 323, an amendment to a 1944 water treaty—on Sept. 26 in Mexico's Ciudad Juarez. Minute 323 will govern water flows in the Colorado River and other water management issues by extending an existing binational agreement, Minute 319, which was set to expire at the end of 2017.

The deal shows how both countries consider water important enough to set it apart from tensions that have flared during President Donald Trump's administration over immigration and building a border wall, Stephen Mumme, professor of political science at Colorado State University, told Bloomberg BNA Sept. 22.

Both sides were interested in continuing Minute 319, which describes the operation of the river system as a partnership between the two countries. The newly negotiated Minute 323 specifically defines reservoir management strategies so Mexico shares in river shortages and surpluses through 2026.

Conservation Funding

In return, Minute 323 will authorize $31.5 million in U.S. funding—slightly more than half of it from the Bureau of Reclamation—for pilot water programs in Mexico that would generate some 229,100 acre-feet of conservation. About 70,000 acre-feet of the conserved amount is designated for environmental purposes in Mexico, about 50,000 acre-feet will benefit the Colorado River system, and 27,275 acre-feet each will be assigned to four U.S. partner agencies.

The average U.S. household uses about one-half an acre foot of water per year.

The agreement also will allow Mexico to continue to store water in Lake Mead, the storage reservoir for the three Lower Colorado River Basin states of Arizona, California and Nevada, according to the Imperial Irrigation District, one of the four domestic water districts involved in the negotiations.

It also will provide for a potentially larger drought response partnership with water users through the Colorado River basin states drought contingency plan and Mexico's binational water scarcity contingency plan, the district said.

Conservation, Environmental Programs

Additional components of the deal include binational cooperative conservation projects,

environmental programs, salinity management efforts and the opportunity for additional conservation and desalination projects in Mexico, the district said.

The two national governments are expected to make the signed agreement public Sept. 27. Until then an embargo by the State Department precludes the U.S. Section of the International Boundary and Water Commission from providing additional details, Lori Kuczmanski, spokeswoman for the section, told Bloomberg BNA.

She said the commission, the agency that applies the boundary and water treaties of the U.S. and Mexico and settles disputes that arise in their application, was working to get all domestic approvals signed. "We're very, very close," she said.

U.S. Partner Agencies

In addition to the Imperial Irrigation District, the three other partnering U.S. water agencies are the Southern Nevada Water Authority, the Metropolitan Water District of Southern California, and the Central Arizona Water Conservation District. The IID Board approved its domestic agreements to Minute 323 Sept. 12.

The Colorado River Board of California adopted a resolution Sept. 13 affirming the primary elements of Minute 323 and acknowledging the need for continued board participation in its implementation.

Food Safety Activists Oppose Spraying Washington Oyster Beds

Posted September 25, 2017, 02:43 P.M. ET

By Paul Shukovsky

Shellfish growers in Washington's Willapa Bay and nearby Gray's Harbor are facing opposition from food activists and environmentalists over their proposal to spray a pesticide on tideflats to prevent losing up to 80 percent of their harvest. The growers are seeking a permit to spray imidacloprid, a neonicotinoid, on tideflats to control oyster pests called burrowing shrimp, which disrupt the muddy habitat and cause oysters to sink and suffocate. Use of the pesticide in Willapa Bay—where a mix of salt marsh, muddy tidelands, and freshwater wetlands provide habitat for over 200 bird species—stokes concerns among environmentalists that the chemical will kill a variety of insects and crustaceans that the birds and fish, such as salmon, rely upon for sustenance. The bay is the source of some 25 percent of the nation's oysters.

"This neurotoxin will kill all the invertebrates that it touches," Center for Food Safety staff attorney Amy van Saun told Bloomberg BNA Sept. 21. "We think there needs to be an option for the oyster growers that doesn't involve a neurotoxin, especially on food that we are going to be eating."

The center and other environmental and conservation organizations plan to submit comments on a draft supplemental environmental impact statement now under consideration by the Washington State Department of Ecology. Agency spokeswoman Jessica Payne said the document could lead to the issuance of a permit to spray by the end of the year.

The state so far has not proposed any action or decided whether it will issue a state waste discharge permit under the National Pollution Discharge Elimination System to allow the spraying, Payne told Bloomberg BNA Sept. 21.

Breaks Down Rapidly

The growers assert they will be using very small amounts of the pesticide, which then breaks down rapidly. "The amount of imidacloprid the growers will be using is not potent enough to kill burrowing shrimp or most non-target species," said Amalia Walton, an attorney with the Seattle office of Miller Nash Graham & Dunn, who represents some 20 growers. The treatment works by immobilizing the ghost shrimp in their burrows, which eventually collapse, smothering the shrimp, she said in a Sept. 21 email.

The "amount of imidacloprid used breaks down in as little as 24 hours, and oysters would only be planted on the beds long after the compound has dissipated," Walton said. Most individual beds would be treated only once every four or five years, she said.

This is the second time the growers have sought to use imidacloprid. An environmental analysis in 2015 led the Department of Ecology to issue a permit to spray, but the growers asked to withdraw the permit after there was widespread negative media coverage and "very notable chefs in the Seattle area said they would not serve oysters out of the Willapa Bay area," Payne said.

Head of Pesticide Trade Group to Step Down

Posted September 25, 2017, 03:52 P.M. ET

By Tiffany Stecker

The CEO of the largest trade association for pesticides is stepping down next year.

Jay Vroom, who helmed CropLife America for nearly 30 years, announced his retirement at the organization's annual meeting Sept. 25. His last day will be near the end of 2018, CLA spokeswoman Genevieve O'Sullivan told Bloomberg BNA.

"I cannot begin to express in words all the pride and gratitude I have for the many friends, co-workers and professional allies I have had the privilege to work with at CLA and in my earlier career," Vroom told attendees at the meeting in Dana Point, Calif.

CropLife's board of directors includes representatives from Monsanto Co, Dow AgroSciences LLC, BASF, and other major pesticide manufacturers.

Vroom began his career at CLA in 1988. He has represented the organization through five farm bills, the 1996 Food Quality Protection Act that required health-based standards for pesticides in food, and the more recent application of the Endangered Species Act to the pesticide registration process.

He said he plans to stay involved in agricultural issues after retirement and to spend time on his farm in Illinois.

Funding Tesla Ticks Off Automakers Needing Electric Car Credits

Posted September 25, 2017, 7:16 A.M. ET

By John Lippert and Ryan Beene

Tesla Inc. has generated nearly $1 billion in revenue the last five years from an unlikely source:

Rival automakers. Needless to say, the other companies aren't happy.

California requires that automakers sell electric and other non-polluting vehicles in proportion to their market share. If the manufacturers don't sell enough of them, they have to purchase credits from competitors to make up the difference. Tesla, which exclusively sells battery-powered models, sold $302.3 million in regulatory credits last year alone.

"It really makes them mad that Tesla got so much of a boost out of being the only purely electric car manufacturer out there," Mary Nichols, the chair of the California Air Resources Board, said in an interview Sept. 22 at Bloomberg's headquarters in New York. "In effect, they helped to finance this upstart company which now has all the glamour."

China and the European Union -- two of the world's biggest auto markets -- are considering mandates and credit systems similar to California's. For all the flack the state has taken from traditional carmakers for how its benefited Tesla, Chief Executive Officer Elon Musk has also been a critic.

Musk, 46, last year said the Air Resources Board was being "incredibly weak" and called its standards "pathetically low." Rules should be tougher and the credits should be worth more, according to the CEO.

"Nobody's happy," Nichols said. "That's my mantra."

German Coal May Be Another Loser as Merkel Pushed Toward Greens

Posted September 25, 2017, 8:19 A.M. ET

By Brian Parkin and Mathew Carr

Coal's future in Europe's biggest economy may take center stage when German Chancellor Angela Merkel tries to form a new government after losing support in national elections.

Voters weary with Germany's so-called Grand Coalition between Merkel's Christian Democratic-bloc and the Social Democratic Party cast their ballots elsewhere. While Merkel still came out atop Sunday's poll, her potential partners in a new government narrowed to the Green Party and Free Democrats, both of which have different outlooks for coal.

"What's sure is that campaign pledges on climate protection and a faster phase-out of coal power are not negotiable," said Oliver Krischer, the deputy parliamentary chairman for the Green Party, in a phone interview on Sept. 22.

The Greens were the main force behind the introduction of clean power subsidies the last time they were in the national government from 1998 to 2005. On Sept. 24 they won 9 percent of the vote and could return to power by joining forces with Merkel's bloc and the FDP. Social Democrats have ruled themselves out of government after their worst result since 1949.

Still, energy and environment policy differences will make negotiations for a coalition government

"difficult," according to a Barclays research note on Sept. 22, which cited opposition among Merkel's supporters to shuttering coal plants. The FDP campaigned on economic competitiveness being paramount in energy policy.

High Hurdles

"Very high policy hurdles separate us from the Greens -- not just on energy," said Frank Schaeffler, who's seeking a return to parliament for the Free Democrats as a finance spokesman, in an interview late Sept 24. "The divisions are not insurmountable but each party has its red lines -- the challenge will be to see just how robust those lines really are."

Both the Greens and the FDP expect invitations to enter exploratory coalition talks with Merkel, in a process that could take weeks or months before a new government emerges.

The Greens want to shape climate policy in government "but not at any price," Krischer said.

Hard coal and lignite plants generated about 40 percent of all Germany's power last year and about a third of all its carbon dioxide pollution. During the election campaign, Merkel eschewed any talk on a phase-out date for coal.

The Greens campaigned to end coal power by 2030 -- a step already envisaged by city states like Berlin. They also want to shut 20 of the most polluting coal plants by 2020 to help the nation meet its carbon dioxide reduction targets.

Efforts to cut emissions have faltered in Germany, despite the highest rate of renewable energy use in Europe. Persistent coal use means Germany is set to reduce carbon dioxide as much as 31 percent by 2020 rather than the 40 percent it targeted, according to Berlin-based environmental think tank Agora Energiewende.

"We will find ways to achieve our 40 percent target by 2020 -- that I can promise you," said Merkel in a Sept. 14 campaign speech that suggested a willingness to cap coal's future in Germany.

India's Modi Starts $2.5 Billion Plan to Grow Electricity Access

Posted September 25, 2017, 02:17 P.M. ET

By Rajesh Kumar Singh

India's Prime Minister Narendra Modi unveiled a 163.2 billion-rupees ($2.5 billion) program to ensure electricity for all households.

The program will help poor people get electricity connections at no cost, Modi said, adding that his government is making efforts to provide power to about 3,000 unelectrified villages. Power Minister R. K. Singh said the nation will aim to complete electrification of all households ahead of a March 2019 deadline.

The announcement comes amid concerns over a slowing economy, which has led the government to consider measures to boost growth. Modi came to power in 2014 with popular promises such as job creation and electricity for all and will be tested on the pledges in 2019, when he faces re-

election.

"Power for all is a very ambitious plan and the prime minister knows the political gains it can bring if he can pull it off," said Sandeep Shastri, a political analyst and a pro vice chancellor at Jain University in Bengaluru. "So, when he announces schemes to connect all households, beyond a shadow of doubt he has the 2019 elections in mind."

Nearly 304 million Indians don't have access to electricity, accounting for about a quarter of the global population living without power, according to NITI Aayog, a government think-tank. Several of these are in rural areas, where state power retailers are reluctant to supply electricity as returns fall below the investment made in infrastructure.

Dubai Introduces Incentives to Spur Electric Vehicle Market

Posted September 25, 2017, 01:39 P.M. ET

By Matthew Kalman

Electric-car drivers in Dubai will enjoy free parking, recharging, vehicle registration, and toll exemptions until the end of 2019, the Dubai Supreme Council of Energy announced.

The incentives are designed "to encourage the public use of electric vehicles in Dubai to help protect the environment," said Mohammed Al Tayer, vice chairman of the energy council and managing director/chief executive officer of the Dubai Electricity and Water Authority.

The move is part of the Dubai Green Mobility initiative to motivate organizations to use more hybrid and electric vehicles to help reduce carbon emissions in ground transportation, which is the second-largest greenhouse gas emitter in Dubai, according to Al Tayer.

Additions to Government Fleet

At least 10 percent of the new cars that Dubai's government institutions buy between 2016 and 2020 will be electric or hybrid, helping to raise the proportion of such vehicles to 2 percent by 2020 and 10 percent by 2030.

"This supports the Dubai Clean Energy Strategy 2050 for Dubai to have the lowest carbon footprint in the world by 2050, and the Dubai Carbon Abatement Strategy to cut carbon emissions by 16 percent by 2021," Al Tayer added.

Abu Dabi currently has 100 public electric vehicle charging stations, with 100 more planned in 2018. Electric or hybrid cars are distributed by Tesla, BMW, Renault, and Toyota. The sector grew by 30 percent from 2014 to 2016, Al Tayer said. The incentives could save the average driver commuting daily to Dubai's business district, charging and parking for free and using the Salik toll gates more than 10,000 dirhams (about $2,722) each year, said Nabeel Alzaka, co-founder and CEO of Surface Mobility Consultants in Dubai.

"There is an appetite for electric vehicles, particularly now that car manufacturers are becoming a

little bit more inventive," Alzaka said by phone Sept. 24, noting that some electric models, like the BMW i8 now in service with the Dubai police, matched in looks and performance the high-end supercars popular in the Emirates.

"These cars are as fast as Lamborghinis and Ferraris. They are as glitzy and as glamorous," he said. "The car manufacturers are heading toward providing those fast supercars the Dubai market will want. Will that ever eradicate Ferraris and Lamborghinis? I don't think so. People will still want to have the gas-guzzlers and the sound of the engines but I think you'll find people will swap their petrol cars for a nice, shiny, sparkling electric vehicle."

Electronic System to Boost EPA's Lagging Pesticide Import Checks

The EPA is only inspecting a fraction of a percent of pesticide shipments sent to U.S. ports, a new agency report finds.

Regulatory Policy

Deregulation Spurs GDP Growth, White House Economists Say

Deregulation will stimulate the growth of gross domestic product in the U.S., the White House Council of Economic Advisers concluded in a report released Oct. 2, though several public-interest groups are dubious.

Renewable Energy

Trump Isn't Acting on Verbal Attacks Against Wind, Dong Says

President Donald Trump's threats against wind energy have so far proven empty, according to an industry giant that expects to grow in the U.S.

Toxic Substances

EPA Chemical Analysis Reforms on Target, Advisers, Utility, Say

The EPA's initial plans to examine chemicals used as fertilizers will appropriately examine a range of health problems the nutrients may cause, says Bill Stowe, the head of an Iowa water utility.

Toxic Substances

Global Summit Warns Against Mercury Use in Small-Scale Mining

The first global meeting of countries devoted to stamping out mercury in the environment ended with incremental progress, but left unanswered questions about how to tackle one of the largest contributors to global mercury poisoning—artisanal and small-scale gold mining.

Trade Policy

Reconsider Waste Import Ban, U.S. Urges China

China's move to ban certain kinds of solid waste by the end of 2017 could increase uncertainty for the multibillion dollar U.S. waste industry, Trump administration officials said during an Oct. 3 World Trade Organization meeting.

Trade Policy

Suniva Seeks 'Buy American' Mandate for Federal Solar Purchases

The U.S. government should purchase power from only American-made solar panels at military bases or in other projects, solar manufacturer Suniva Inc. told a trade panel, adding a new wrinkle to its bid for protection from imports.

Water Infrastructure

Improved Desalination Technology Seeks to Quench World's Thirst

Desalination, long rebuffed as a costly energy guzzler with a heavy carbon footprint, could become a cheaper, cleaner, more energy-efficient solution to the global water crisis—provided initial cost barriers can be overcome.

Water Pollution

Costly Coal Ash Cleanup Order at Gallatin Spurs TVA Appeal

The estimated $2 billion it could cost the Tennessee Valley Authority to dig up and move coal ash from its Gallatin, Tenn., site, as required by a federal court, has prompted the power authority to challenge a court order.

Practitioner Insights

Energy

Practitioner Insights: Leading by Example—Energy Reporting in Italy

The European Commission's 2012 Energy Efficiency Directive failed to deliver on its bold vision. This is evident even as its 2020 due date remains more than two years away.

Daily Environment Report for EPA

To: Jackson, Ryan[jackson.ryan@epa.gov]
From: InsideEPA/climate
Sent: Wed 10/25/2017 9:19:24 PM
Subject: Today on Climate Beat

October 25, 2017

Today on Climate Beat . . .

. . . we went to court, where three California municipalities are urging a federal district judge to send their climate change nuisance cases filed against a host of fossil fuel producers back to state court where they were originally filed, arguing that the companies have mischaracterized the suit as seeking broad limits on greenhouse gases and fossil fuel use.

Staying with that same case, coal mining firm Peabody Energy has successfully persuaded a federal bankruptcy judge to block the climate change nuisance claims, due to its recent bankruptcy agreement that the judge found discharges such claims.

And our daily news roundup looked at a claim by one energy professor that EPA chief Scott Pruitt's call to end wind and solar tax credits is "out of bounds" given that the topic is outside the purview of EPA and other energy sectors receive preferential tax and regulatory treatment.

Subject: Federal Insider: Survey says veterans strongly back legalizing medical marijuana

Survey says veterans strongly back legalizing medical marijuana

By Joe Davidson

A worker tends to cannabis plants at a medical marijuana plantation in Israel in 2012. (Baz Ratner/Reuters)

ADVERTISEMENT

Veterans tend to be an older, more conservative group, but that doesn't stop them from advocating for a radical change in direction from the nation's outdated policies on marijuana.

The American Legion, represents many conservative veterans, but that doesn't stop it from taking progressive positions on certain key issues.

A survey released Thursday by the American Legion, the nation's largest wartime veterans' service organization, indicates near-unanimous support among veterans for research on medical marijuana, with an overwhelming majority supporting legalization of the drug for medical purposes.

[Finally, a degree in marijuana: But it's not for stoners or slackers.]

The Legion adopted a resolution last year calling on the Drug Enforcement Administration to reclassify marijuana from its current illicit status to a

By the way, the Legion allowed women members from its beginning in 1919, not a common practice then, according to Joseph M. Ambrose, the organization's spokesman. They could vote for the organization's national commander before they could vote for the president of the nation.

"People ask 'aren't you a law and order group'. Why yes we are," said Verna Jones, the Legion's seventh director, addressing conference with members of Congress. "But we're also a group that takes care of veterans. And when it comes to medical marijuana, the key finding from the survey of 802 people, 51% veterans and 28% their caregivers, is that a majority favor medical research on it and four-fifths support legalizing medical marijuana.

The Legion made it clear, however, that its support of marijuana ends where support for medical cannabis, and research on medical cannabis is high across veterans and caregivers, all age ranges, gender, political leanings and geography," said the memo that The American Legion's VOTE advocacy created based on the survey results, its statement said.

But some of the responses were surprising. This is one of the few times a major veterans organization has released findings from a survey it conducted. Typically, such groups only release information that supports their policy positions. The most important limitations are that the sample was limited to a list of landline phones, and thus excluded veterans who rely only on cellphones. Also, the survey was not impervious to human bias in those asking survey questions. But even with those limitations, the Legion's survey is the most comprehensive look at veterans' views on medical marijuana to date.

The Legion has long opposed the legalization of marijuana, arguing that it has the potential to be addictive and that it is a gateway drug to harder substances. But when Trump proposed drug testing for people in the military, the Legion rebuffed him, saying: "Any requirement that disqualifies an able-bodied person from serving in the American military solely based upon a positive test for marijuana, and not any other illegal substance, is unfair," said Rep. Mark Takano (D-Calif.), the ranking Democrat on the House Veterans' Affairs Committee. The American Legion's resolution on the reclassification of marijuana is directed at the military and not, notably, the president or congressional action.

- After the August white supremacist violence in Charlottesville, the Legion said it could support those who display the Confederate flag "by very according to the Survey.
  - There is a broad support for medical cannabis across categories, including those who identify as conservative, moderate or liberal.
  - Geography: "The support for research and legalization is spread across the country, in states where medical cannabis is currently legal and in states where it is not."
  - Political orientation: Among veterans and caregivers federally legalized medical marijuana is supported by about 9 in 10 self-identified liberals, almost as many conservatives and 7 in 10 independents.

ADVERTISEMENT

- Age: While support for medical cannabis research and legalization drops the older veterans and their caregivers become, it remains strong even among senior citizens. Among those 60 and older, more than three-quarters favored medical marijuana. All in the 18 to 30 age group agreed.

It's worth noting that 60 percent of those surveyed were 60 or older. That's one reason for the finding that "the majority of veterans surveyed that are using cannabis are over the age of 60," according to the memo.

"It is also clear from the survey that veterans are accessing cannabis to assist them in states with and without medical marijuana programs," Five Corners added.

Veterans and their caregivers are not alone in favoring a more sensible approach to medical marijuana. A Yahoo News/Marist poll found 84 percent supported it in March, including majorities of Americans of all ages. The lowest level was 65 percent among those ages 69 and older.

The Legion is making progress in its quest to change Uncle Sam's old ways. Last week, all 10 Democrats on the House Committee on Veterans' Affairs urged VA to research the impact of medical marijuana on chronic pain and post-traumatic stress disorder among veterans.

So far, however, the Department of Veterans Affairs has not changed its policy. VA Secretary David Shulkin, however, has indicated a willingness to examine medical marijuana when federal law allows.

"There may be some evidence that this (medical marijuana) is beginning to be helpful," Shulkin said when asked about it in May, the last time he commented on it. "And we're interested in looking at that and learning from that. But until the time that federal law changes, we are not able to be able to prescribe medical marijuana for conditions that may be helpful."

Driving the Day

Happy Friday! FIRST IN PLAYBOOK -- SOMETHING PRESIDENT TRUMP WILL LIKE. The conservative House Freedom Caucus will file a petition today to try to force Speaker Paul Ryan to bring up a so-called "clean Obamacare repeal" bill. The legislation passed the House and Senate in the past -- it repeals Obamacare after a two-year transition period. (It failed the Senate this year.) If the discharge petition -- which will get filed during today's pro-forma session -- gets 218 signatures, it will force a floor vote. The Freedom Caucus and conservative outside groups will try to ramp up lots of pressure to force people to sign on. Expect Trump -- itchy for victory, and frustrated with Republican leaders on health care -- to weigh in. He's close with some members of the Freedom Caucus.

US WEEKLY: SPICER WANTS ON SNL -- "An insider reveals in the new issue of Us Weekly that the New York-born political aide 'is angling' to appear on Saturday Night Live. 'He is asking people about getting on - it was his idea!' ... But now he's ready to get in on the joke. 'He asked someone he knows that is close to a cast member to help him,' explains the insider. 'Yes, he criticized SNL before, but he's changed his tune. He wants to make a cameo!'" http://usm.ag/2uMOMCl

WHAT PRESIDENT TRUMP SAID YESTERDAY ...

-- HERE'S WHEN WE MAY ASK HIM IF MCCONNELL SHOULD STEP DOWN: "If he doesn't get repeal and replace done, if he doesn't get taxes done -- meaning cuts and reform -- and if he doesn't get a very easy one to get done, infrastructure -- if he doesn't get them done, then you can ask me that question." ***Note from us: None of this is easy. Especially not with the artificial deadlines the administration has put on***

him.

-- OPIOID CRISIS IS A NATIONAL EMERGENCY: "It is a serious problem, the likes of which we have never had. You know, when I was growing up they had the LSD and they had certain generations of drugs. There's never been anything like what's happened to this country over the last four or five years."

-- HE'S CLOSE TO A DECISION ON TROOP LEVELS IN AFGHANISTAN: "It's a very big decision for me. I took over a mess, and we're going to make it a lot less messy. But that has been a place -- 17 years -- our longest war, I read in one of your columns. And, frankly, it's going to be a decision that's going to be made very soon."

-- BANNING TRANSGENDER SOLDIERS WAS A "FAVOR" TO THE PENTAGON: "As you know, it's been a very complicated issue for the military. It's been a very confusing issue for the military. And I think I'm doing the military a great favor."

-- THANK YOU TO PUTIN FOR EXPELLING U.S. DIPLOMATS: "I want to thank him because we're trying to cut down on payroll. And as far as I'm concerned, I'm very thankful that he let go of a large number of people because now we have a smaller payroll. There's no real reason for them to go back." ***Note: Putin didn't fire them from the State Department. He just expelled them from Russia. We imagine the payroll hasn't really changed.***

JOHN HEFFERN, principal deputy assistant secretary of State for European and Eurasian Affairs **(@AmbHeffern)**: "The State and inter-agency community is thinking about our colleagues in Moscow and Consulates as they prepare for difficult weeks ahead."

NAHAL TOOSI and **MADELINE CONWAY:** "A senior U.S. diplomat serving overseas called Trump's remarks 'outrageous' and said it could lead more State Department staffers to head for the exits. 'This is so incredibly demoralizing and disrespectful to people serving their country in harm's way,' the diplomat said. ... 'THANK Putin?' another bewildered State Department official responded. 'I don't have words that are printable to describe my reaction.'" http://politi.co/2vVnVbI

-- TRUMP'S THINKING ON INFRASTRUCTURE: "I'm not sure that we will bring [Democrats] in. I mean, maybe we'll bring them in, maybe not. I think the infrastructure bill will be bipartisan. In fact, frankly, it may have more support from the Democrats. I want a very strong infrastructure bill."

FASCINATING -- NOT ONE QUESTION on two major issues Trump will have to confront in the next two months: the looming government shutdown and lifting the nation's borrowing cap.

-- NYT rundown of Trump's back-and-forth with the press http://nyti.ms/2vsAAQV ... ***Video of his whole 20-minute presser with the pool*** http://bit.ly/2vLcymI ... ***His other***

7-min. press availability yesterday http://bit.ly/2uw3n5R

PHIL RUCKER in Bedminster: "'When you put this guy in a cage and think you're controlling him, things like this happen'": "Midway through President Trump's second media availability in a single afternoon here Thursday, his press secretary, Sarah Huckabee Sanders, held up a sign signaling to the boss that it was time to drop the curtain on the show. 'One more question,' it read. The president either did not see her plea or opted to disregard it, because he kept answering questions - for 20 minutes straight, after having already fielded them for seven minutes in the earlier session. This was Trump in his element: At his luxurious private golf club here in Bedminster, the cameras trained on him, his vice president and national security advisers looking on admiringly, he parried queries - at times even gleefully - like a tennis player.

"Engaging with people -- journalists, advisers, friends and even foes -- is Trump's lifeblood. His Oval Office has felt like a busy train station, with people breezing in and out to share a juicy tidbit or to solicit the president's opinion on a pressing issue or to chew over something in the news. He likes to watch cable television news shows with other people, sometimes only through the phone. ... 'This is what General Kelly will learn very quickly, which is when you put this guy in a cage and think you're controlling him, things like this happen,' said one Trump confidant, who requested anonymity to speak candidly. ... Kellyanne Conway, counselor to the president, said Trump in recent days has been restless to share his thoughts on what she termed 'one of the juiciest, newsiest periods of his presidency.'" http://wapo.st/2vp6mzM

ATTN. TRUMP: Mattis gets a tour of Amazon HQ with Jeff Bezos. http://dailym.ai/2uLVkkP

CARL HULSE on the **TRUMP/MCCONNELL** feud: "Mr. McConnell's original point was that the president was still learning how things work in Washington. By publicly berating the man who should be his most indispensable ally on Capitol Hill, Mr. Trump may have affirmed Mr. McConnell's point." http://nyti.ms/2wOr0au

JOSH DAWSEY, "Behind the Trump-McConnell feud: The president ratcheted up his feud with the Senate majority leader, signaling again that he's willing to sacrifice the appearance of unity to get what he wants": "Increasingly, these people say, the president is prepared to cast himself as an outsider - and Congress as an 'insider' Washington institution. He has reminded advisers his poll numbers are higher than Congress' and that he ran against Washington -- and wants bills to sign -- and will blast his own party if he doesn't get them. ... McConnell's advisers have been amazed at the president's unwillingness to sell the health care bill publicly, his lack of policy knowledge, his seemingly unending appetite for chaos and his inability to control warring factions of aides, who complicate delicate negotiations by saying different things to different people.

"The two men have talked from time to time on the phone, but the conversations have often been brief, and Trump often disregards McConnell's advice. McConnell has

told people after meeting with Trump in the White House that it is difficult to keep the president on topic and that he wanders around verbally in a way that McConnell -- a man who does not see the purpose in unnecessary words -- doesn't understand." http://politi.co/2vsrHqM

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)** : If you know only one fact about rising drug costs, know this one: drug makers set prices for prescription drugs. To help manage nearly double-digit price increases, employers, unions and government programs use PBMs to negotiate lower net prices to help curb costs for employers and patients. Learn more at affordableprescriptiondrugs.org ******

PACIFIC DAILY NEWS (Guam newspaper) -- **"'Don't look at the flash or fireball' -- Guam Homeland Security releases fact sheet in light of North Korea threats":** "The advice includes tips such as: 'Do not look at the flash or fireball -- It can blind you' and 'Take cover behind anything that might offer protection.'

"'Lie flat on the ground and cover your head. If the explosion is some distance away, it could take 30 seconds or more for the blast wave to hit,' the sheet states. Homeland Security says residents should prepare an emergency supply kit and a family emergency plan. During an imminent missile threat, authorities recommend taking cover as quickly as possible under a concrete structure or below ground after an attack warning is issued. People should also avoid going outside for at least 24 hours to avoid any possible radioactive material, unless otherwise told by authorities." http://bit.ly/2hQCqrS ... ***The fact sheet*** http://bit.ly/2vVm1Zb

HILL PROBES -- "Trump's longtime secretary scrutinized by Russia investigators," by ABC's Benjamin Siegel: "Congressional investigators want to question President Donald Trump's longtime personal secretary as part of their ongoing probe into a controversial meeting between Trump campaign officials and a Russian lawyer promising dirt on Hillary Clinton, ABC News has learned.

"Rhona Graff, a senior vice president at the Trump Organization who has worked at Trump Tower for nearly 30 years, has acted as a gatekeeper to Trump. She remains a point of contact for the sprawling universe of Trump associates, politicians, reporters and others seeking Trump's time and attention, even now that he's in the White House." http://abcn.ws/2vpKtAB

SCOOP -- "Manafort switching legal team as feds crank up heat on him," by Josh Dawsey: "Former Trump campaign chairman Paul Manafort is changing his attorneys as a federal investigation heats up into his financial transactions, according to people familiar with the matter. Manafort's case will now be handled by Miller and Chevalier, a boutique firm in Washington that specializes in complicated financial crimes among other issues, these people said. A spokesman confirmed the change. ... Kevin Downing, a former senior Department of Justice official known for his work representing clients and firms facing complex financial investigations, will be working on the case. ... Manafort is cutting ties with WilmerHale, the firm that has represented him in the matter

so far. His former lawyer there, Reg Brown, led the congressional investigations practice." http://politi.co/2uMhlQA

BOOMERANG -- "Breitbart's war on McMaster bites Bannon," by Tara Palmeri: "The attacks on McMaster have put Bannon in an especially awkward position with his new boss, retired Marine general John Kelly, who has been increasingly defensive of McMaster, a longtime friend and fellow general, according to interviews with 10 administration officials and people close to the White House. McMaster, who pushed Bannon off the National Security Council principals' committee, hasn't spoken to Bannon in weeks, one senior administration official said." http://politi.co/2uuRb9q

DEPARTURE LOUNGE -- "Four Top Cybersecurity Officials Are Leaving U.S. Government," by Kevin Collier in his BuzzFeed debut: "Four senior cybersecurity officials are stepping down from their U.S. government positions, raising concerns that an exodus of top leaders may make the federal government more vulnerable to hacking. Two of those resigning - Sean Kelley, the chief information security officer for the Environmental Protection Agency, and Richard Staropoli, the chief information officer for the Department of Homeland Security - had been in their jobs for just a few months. The other two, Rob Foster, the Navy's chief information officer, and Dave DeVries, the director of information security and privacy at the Office of Personnel Management, are departing agencies for which computer security is a top priority." http://bzfd.it/2voYHBu

LATE-NIGHT BEST - "Weekend Update: Anthony Scaramucci FaceTimes the Show (Bill Hader)" -- *3-min. video* http://bit.ly/2uMqfgL

TRUMP'S FRIDAY -- THE PRESIDENT is participating in a workforce and apprenticeship discussion at his country club in New Jersey and he will meet with U.N. Ambassador Nikki Haley.

Playbook Reads

PHOTO DU JOUR: President Donald Trump and Vice President Mike Pence speak with reporters before a security briefing at Trump National Golf Club in Bedminster, N.J., on Aug. 10. | Evan Vucci/AP Photo

HOT DOC -- "Here's the Memo That Blew Up the NSC: Fired White House staffer argued 'deep state' attacked Trump administration because the president represents a threat to cultural Marxist memes, globalists, and bankers," by Foreign Policy's Jana Winter and Elias Groll: "The author of the memo, Rich Higgins, who was in the strategic planning office at the NSC, was among those recently pushed out. ... In the meantime, however, the memo had been working its way through the Trump White House. Among those who received the memo, according to two sources, was Donald Trump Jr. ... [who] gave the memo to his father, who gushed over it, according to sources. In a

comedy of errors, Trump later learned from Sean Hannity, the Fox News host and close friend of the president, that the memo's author had been fired. Trump was 'furious,' the senior administration official said. 'He is still furious.'" http://atfp.co/2uuM6xO

A BREAK IN PRECEDENT -- SEUNG MIN KIM: "White House vs. Democrats in tense standoff over judge picks": "Trump's judicial nominees are ignoring key Senate Democrats as they vie for lifetime appointments to the bench -- a break from longstanding practice that diminishes the minority's power to provide a check against ideologically extreme judges. The brewing tension between the White House and the Senate over filling an unusually high number of judicial vacancies is impeding the pace at which Trump installs lifetime appointees to the federal bench -- so far one of the president's few major victories, with his legislative agenda largely stymied in Congress." http://politi.co/2vL6Hhe

ANOTHER VIEW -- "Rep. Rohrabacher wades into Google's firing of controversial memo's author," by L.A. Times' Sarah D. Wire: "Rep. Dana Rohrabacher (R-Costa Mesa) took Google to task Thursday for firing a male employee, James Demore, who circulated a memo within the company arguing women are biologically incapable of doing a man's job in Silicon Valley.

"The 3,000-word memo that's caused a hubbub among one of California's more prominent industries and across the country contends men fundamentally have a higher drive for status than women and says the company has a bias toward liberal thought over conservative thought. It states that the company's diversity initiatives should be replaced with 'ideological diversity' policies. Rohrabacher joined the conversation, saying on Twitter he's troubled by the firing. He tweeted: 'You shouldn't lose your job for telling the truth!' and 'The mistreatment of conservatives and libertarians by tech monopolies is a civil rights issue.'" http://lat.ms/2wOtpSN

IVANKA INC. -- "Ivanka Trump Brand to Open NY Store in Second Stab at Retail," by Bloomberg's Lindsey Rupp and Taylor Cromwell: "The first daughter's brand will open a store in Trump Tower on Manhattan's Fifth Avenue, according to signage in the building. The location is slated to debut later this year, giving the tourists who throng to the site a chance to buy Ivanka Trump merchandise. It's unclear what products will be sold at the store or when exactly it will open: A sign promised a fall 2017 debut, but representatives for the brand declined to give specifics. The shop would represent Ivanka Trump's second foray into branded stores. She previously opened a fine jewelry boutique on the Upper East Side of Manhattan in 2007, before moving to the SoHo neighborhood in 2011. That location shut down in 2015." https://bloom.bg/2uMdAu9

--"Kushner fined for late financial report," by McClatchy's Anita Kumar and Ben Wieder: "Jared Kushner, who has spent months divesting pieces of his vast business empire to serve in the White House, was slapped with a fine by the Office of Government Ethics for late reporting of a financial transaction, according to a newly released document. Another 17 White House staffers ... filed their required personal financial disclosure statements late, according to data compiled by American Bridge

21st Century ... Reince Priebus ... was four days late. Press Secretary Sarah Huckabee Sanders was 23 days late. And Omarosa Manigault ... received a 32-day extension but still missed her deadline by eight days. ... Under federal law, when those who are required to file financial disclosure statements are more than 30 days late doing so they must pay a fine of $200, payable to the U.S. Treasury." http://bit.ly/2vsrvYA

MARK PRESTON talks to **GEORGE SHULTZ -- "The wise man Trump should listen to"** http://cnn.it/2uvZhL1

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)**: Pharmacy benefit managers negotiate the lowest net price for prescriptions on behalf of employers and other health care purchasers; however, the list price - the important starting point for those negotiations -- continues to rise, at a rate of nearly ten percent in 2016 alone. Increased competition, faster reviews of generics and biosimilars and ending anti-competitive practices can also bring down the cost of medications for patients. Learn more at affordableprescriptiondrugs.org ******

MEDIAWATCH -- "CNN severs ties with Jeffrey Lord," by CNN's Brian Stelter: "CNN severed ties with Jeffrey Lord on Thursday, hours after he ignited controversy by tweeting the words 'Sieg Heil!' at a prominent liberal activist. 'Nazi salutes are indefensible,' a CNN spokesperson said in a statement. 'Jeffrey Lord is no longer with the network.' Lord said his tweet was misunderstood. He said he was mocking fascists, not acting like one. 'I love CNN, but I feel they are caving to bullies here,' he said in a telephone interview shortly after the network's decision was announced." http://cnnmon.ie/2voGtQB

FUTURE OF NEWS -- FOR BEN SMITH -- "BuzzFeed News' Twitter Live Daily Morning Show to Debut in September," by Variety's Todd Spangler: "Here comes a social-media-spiked version of 'Good Morning America' for millennials: BuzzFeed News will bow its morning show -- live-streamed daily on Twitter -- on Sept. 25. The weekday show, 'AM to DM,' will run 8-9 a.m. ET on the Twitter account of @BuzzFeedNews. The program will be hosted by Saeed Jones, BuzzFeed News' executive editor of culture and BuzzFeed Books editor Isaac Fitzgerald. The show will be produced by Cindy Vanegas-Gesuale, a veteran of Fox Business Network, CNN and Huffington Post.

"'AM to DM' will follow a traditional morning-show format , delivering the day's top stories from staff reporters providing news and commentary on politics, social issues, technology, business and entertainment. But it will have some unique twists, given the nature of the medium: The show will feature 'everyday Twitter heroes' who have captured the spotlight and focus on what people are saying on Twitter live, as it happens during the broadcast. Also planned are regular segments with guest 'newsmakers and notables' discussing current trends, personalities -- and the best jokes from the twittersphere." http://bit.ly/2wOqTMm

Playbookers

PLAYBOOK ON THE ROAD -- Thanks to everyone who sent us photos of themselves reading Playbook during your travels this month! **Robb Watters:** "Reading it in Simi Greece!" ***Pic*** http://politi.co/2vLby1X ... **Steve Clemons** of The Atlantic: "Reading Politico Playbook on the aboriginal art floor of the Alice Springs, Australia airport! Alice Springs, of course, is the destination city made famous by the acclaimed film, 'Priscilla: Queen of the Desert'" http://politi.co/2uwl05y ... **Robert Allbritton:** "From your Publisher - 6 time zones west of you ... on The Big Island. Nice and relaxing" http://politi.co/2vV8Ck1 ... **Ben Chang:** "Greetings from Montana! Was able to pull up Playbook at this spot in Glacier National Park..." http://politi.co/2uuAxXJ ... **Shannon Gacke and Ben Mordechai:** "Habari from Zanzibar, Tanzania! We've made sure to read Playbook every time we've had wifi for our past two months in Tanzania!" http://politi.co/2vsRS0r

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)** : The high prices that drug makers set for prescription drugs can put financial strain on patients, employers, unions and others who provide health care coverage to more than 50 percent of Americans. Pharmacy benefit managers negotiate the lowest net price for prescriptions on behalf of employers, unions and government programs. But, as list prices - the starting point for those negotiations -- continue their nearly double-digit increases, the effects ripple throughout the system. The key to ensuring greater access and affordability lies in fostering greater competition. Facilitating faster reviews of generics and biosimilars, identifying off-patent drugs with little or no generic competition, and ending anti-competitive practices that keep safe, effective alternatives out of the market are also key to abating rising drug costs for patients. Learn more at affordableprescriptiondrugs.org ******

Subject: Sources: EPA aims to announce RFS decision today

By Eric Wolff

08/04/2017 10:09 AM EDT

EPA is aiming to announce as soon as today its decision to leave the Renewable Fuel Standard unchanged, two sources tell POLITICO.

The agency plans to leave refiners with the responsibility for complying with the RFS, as POLITICO reported Thursday, dealing a blow to billionaire Carl Icahn — who owns refiner CVR Energy — Valero, and other merchant refiners. EPA is not expected to have the formal decision ready to publish in the Federal Register until next week, but is planning to make the decision ahead of then, the sources said.

The announcement is still being reviewed by senior staff, and it could be delayed to early next week, though the hope is to get it out today, the sources said.

EPA began work on the denial after the D.C. Circuit Court of Appeals rejected challenges on the obligation issue in a decision last Friday.

The question of which companies must carry the program's compliance cost created an unlikely alliance of oil majors, represented by the American Petroleum Institute, and ethanol producers, who opposed the change for separate reasons. Merchant refiners were seeking the change, arguing that compliance costs were squeezing their bottom lines.

WHAT'S NEXT: EPA is expected to make the announcement as soon as today and publish its formal decision within the next two weeks.

Alaska

WATER
Intended Use Plans
Alaska WATER

Notice of the Department of Environmental Conservation announces the availability of the draft clean water and drinking water amended intended use plans for fiscal year 2018. The plans describe the department's strategy to loan funds made available under the Clean Water Act and the Safe Drinking Water Act for the purpose of planning, designing, and constructing sanitation and drinking water facilities. The amended drafts update the draft plans issued May 5, 2017, to address public comments. Comments are due Dec. 10, 2017. —State Publication Date: 11/29/2017.

Regulatory Update

California Regions

AIR
Boilers, Water Heaters, Steam Generators, and Process Heaters
California Regions AIR

Notice of the Santa Barbara County Air Pollution Control District announces revisions to and an additional meeting on a proposed rule that would amend regulations under Rule 360 regarding control of nitrogen oxide (NOx) emissions from boilers, water heaters, steam generators, and process heaters with a rated heat capacity of between 75,000 and 2 million British thermal units per hour. The rule would reduce the NOx emission limit to 20 parts per million by volume for all units supplied, sold, installed, or modified, effective Jan. 1, 2019. The rule also would add an exemption for recreational vehicles, manufactured homes, hot water pressure washers, and

portable water heaters used for underwater diving activities. In addition, the rule would clarify the standard source test methods and compliance demonstration requirements for all applicable fuel types. The revisions would clarify that the district will accept South Coast Air Quality Management District certified units that are fired on field gas and add a definition of "heat input." The meeting is scheduled for Dec. 13, 2017, in Buellton. A hearing is scheduled for March 15, 2018, in Santa Maria. Comments are requested, but a due date is not specified. Contact: Timothy Mitro; Santa Barbara County APCD; 805-961-8883; MitroT@sbcapcd.org

—State Publication Date: 11/29/2017.

Regulatory Update

AIR
Major Stationary Source Operating Permits/Electronic Notice
California Regions AIR

Proposed rule of the Santa Barbara County Air Pollution Control District would amend regulations under Rule 1304 regarding Part 70 major stationary source operating permits. The rule would revise public notice requirements by allowing for electronic notice of permit actions. A meeting is scheduled for Dec. 13, 2017, in Buellton. A hearing is scheduled for March 15, 2018, in Santa Maria. Comments are requested, but a due date is not specified. Contact: Timothy Mitro; Santa Barbara County APCD; 805-961-8883; MitroT@sbcapcd.org

Regulatory Update

Colorado

WATER
Gunnison and Dolores River Basins
Colorado WATER

Notice of the Department of Public Health and Environment, Water Quality Control Commission, announces corrections to a Sept. 10, 2017, final rule that amended regulations under 5 CCR 1002-35 to revise water quality classifications, standards, and designations for multiple segments in the Gunnison and Dolores river basins. The rule revised water body segmentation and aquatic life, recreation, water supply, and agricultural use classifications. The rule also revised molybdenum, cadmium, nickel, and lead standards; updated antidegradation designations and ambient quality-based standards; and revised temporary modifications. In addition, the rule addressed temperature standards, added nutrient standards for chlorophyll and total phosphorus, added a direct use water supply subclassification, addressed site-specific revisions, and corrected the duration of the nitrate standard from chronic to acute on all segments. The corrections update the tables by revising the format of parameter names and listings for water segments with multiple standards for one parameter. The rule, with corrections, is effective Dec. 31, 2017. Contact: Blake Beyea; DPHE; 303-692-3656; blake.beyea@state.co.us

—State Publication Date: 11/16/2017. Citations: 5 CCR 1002-35 (amended)

Regulatory Update

WATER
Management and Control of Designated Groundwater
Colorado WATER

Proposed rule of the Department of Natural Resources, Ground Water Commission, would amend regulations under 2 CCR 410-1 regarding the management and control of designated groundwater. The rule would combine provisions for approval of plans that allow for artificial recharge, storage, and recovery of water with provisions for replacement plans. The rule also would add standards for the presumption of water quality and clarify the applicability of the anti-speculation doctrine to replacement plans. In addition, the rule would require that designated sources of replacement water be physically available and supplied to the aquifer, limit certain diversions, and address identification and inclusion of sources of replacement water not currently legally available for replacement use. In addition, the rule would address applicant utilization of the storage space in aquifers, restrictions on location and use of remote recovery wells, and limitations on the amounts of water that may be recovered annually. Finally, the rule would add and update requirements for applications for all plans and plans allowing new appropriations. A hearing is scheduled for June 18, 2018, in Denver. Various deadlines and prehearing conference dates are specified for those seeking party status. Comments are requested, but a due date is not specified. Contact: Keith Vander Horst; DNR, Ground Water Commission; 303-866-3581; keith.vanderhorst@state.co.us

—State Publication Date: 11/28/2017. Citations: 2 CCR 410-1

Regulatory Update

WATER
San Juan and Dolores River Basins
Colorado WATER

Notice of the Department of Public Health and Environment, Water Quality Control Commission, announces corrections to a Sept. 10, 2017, final rule that amended regulations under 5 CCR 1002-34 to revise the water quality classifications, standards, and designations for multiple segments in the San Juan and Dolores river basins. The rule revised water body segmentation and aquatic life, recreation, water supply, and agricultural use classifications. The rule also revised cadmium, lead, molybdenum, and nickel standards; updated antidegradation designations; and revised temporary modifications. In addition, the rule addressed temperature standards, added nutrient standards for chlorophyll and total phosphorus, and added a direct use water supply subclassification. The corrections update the tables by revising the format of parameter names and listings for water segments with multiple standards for one parameter. The rule, with corrections, is effective Dec. 31, 2017. Contact: Blake Beyea; DPHE; 303-692-3656; blake.beyea@state.co.us

Regulatory Update

New Mexico

AIR
Construction Permits
New Mexico AIR

Final rule of the Albuquerque-Bernalillo County Air Quality Control Board amends regulations under 20.11 NMAC regarding construction permits. The rule addresses a petition from the

Albuquerque Environmental Health Department (EHD). The rule eliminates allowable emission increases and associated notice requirements for technical permit revisions and allows the EHD to provide notice of construction permit applications by web publication. The rule also increases the notice for information hearings to 30 days and eliminates air dispersion modeling for technical permit revisions. The rule will be submitted to the EPA as a revision to the state implementation plan. The rule is effective Dec. 13, 2017. Contact: Andrew Daffern; Environmental Health Department, Air Quality Control Board; 505-768-2601; adaffern@cabq.gov

Subject: POLITICO's Morning Energy, presented by the National Biodiesel Board: Pruitt's Midwest charm offensive short on policy promises — EPW axes votes on various nominations — Pence suggests some energy tax incentives will remain

By Anthony Adragna | 10/18/2017 10:00 AM EDT

With help from Darius Dixon

PRUITT'S CHARM OFFENSIVE HAS FEW ACTUAL PROMISES: Seven corn-state Republican senators emerged smiling from what they deemed a "good" meeting with EPA Administrator Scott Pruitt on Tuesday but they got no concrete policy promises on the Renewable Fuel Standard from him, Pro's Eric Wolff and your ME host report. Iowa Sen. Chuck Grassley said following the meeting he was "watching this issue closely" and plans "to hold the administration accountable," while his Iowa colleague Joni Ernst said: "Administrator Pruitt again claimed today that he will not do anything to undermine the program. However, we have heard this before. We now need to see it."

Ernst's statement is key because, unlike Sen. Deb Fischer, the Environment and Public Works Committee member pointedly declined to back Bill Wehrum to run the agency's air office following the meeting. That's likely why the committee announced a few hours after the meeting that it would postpone "until further notice" a vote slated for today on various EPA, NRC and federal highway picks. With just an 11-10 majority on the panel, Republicans can afford no defections. The committee provided no explanation for the last-minute move and declined to comment.

So what did they talk about with Pruitt? Senators said they reminded the administrator of President Donald Trump's repeated support for biofuels. They also discussed the possibility of allowing year-round sales of 15 percent ethanol and got positive signals on that front: "I'm also encouraged there about the fact that there's a lot of dialogue inside the EPA," Sen. Ben Sasse told reporters. And Pruitt - who showed up with a flock of senior staff and fled without taking questions - brought up the cost of biofuel credits, called Renewable Identification Numbers, one of the primary complaints of some independent refiners. "He also talked a lot about the volatility of RINS and the fact we need to address that," Sen. Mike Rounds told ME. "And we all agreed with him."

Attendees: Ernst, Grassley, Fischer, Rounds, Sasse, John Thune and Pat Roberts.

Watch this: Biofuels defy normal partisan politics and this bloc of corn-state Republicans could wreak havoc on their party's agenda if they throw their weight around on RFS issues. "We have a big enough group that is passionate about these issues that I think we can get their attention when we need to," Thune told ME of the dynamic.

Some greens agree with Pruitt, albeit for different reasons. A group of five environmental groups, including the Clean Air Task Force and Sierra Club, are backing Pruitt's call to reduce

biodiesel requirements. "We support EPA's current effort to determine whether reductions to these RFS mandates are warranted," they write in a letter.

For your radar: Iowa Gov. Kim Reynolds is holding a press conference today at 2:30 p.m. to discuss the "growing threat" to the RFS posed by EPA's signals. Watch here. Trump's slated to speak with Reynolds by phone at 11 a.m.

WELCOME TO WEDNESDAY! I'm your host Anthony Adragna, and Entergy's Rob Hall was first to identify Sen. John Thune as the senator who defeated a sitting party leader (Tom Daschle) for his seat. For today: Which senator lost their original 2002 bid but won a 2008 rematch? Send your tips, energy gossip and comments to aadragna@politico.com, or follow us on Twitter @AnthonyAdragna, @Morning_Energy and @POLITICOPro.

MONEY IN YOUR EARS: POLITICO's new Money podcast brings you to the intersection of Washington and Wall Street with the most influential minds on the economy. Every Wednesday, Ben White will help you understand the economic and financial policies that move markets. While money never sleeps, you have to - so let Ben keep you up to speed and turn dollars into sense. The first POLITICO Money podcast, premiering with our launch sponsor, Morgan Stanley, features Treasury Secretary Steven Mnuchin. Click HERE to subscribe.

CONCERNS RAISED OVER PUERTO RICO FRAUD: A group of House Natural Resources lawmakers, led by Chairman Rob Bishop, sent letters Tuesday to FEMA and the FBI seeking information about alleged mishandling by local officials of emergency relief supplies in Puerto Rico. "Allegations that local elected officials are distributing life-sustaining FEMA emergency supplies based on political loyalty is deeply disturbing," they wrote. "Any persons misappropriating FEMA emergency supplies should be prosecuted to the fullest extent of the law." The lawmakers want briefings from both agencies by Oct. 23.

Hearing announced: Bishop announced the committee would hold an oversight hearing on the Puerto Rico response efforts Oct. 24. Energy and Commerce subcommittees are expected to announce similar sessions this week.

McCaskill seeks her own investigation: Sen. Claire McCaskill, the top-ranking Democrat on the Homeland Security Committee, called for a bipartisan investigation into the federal government's response to the string of recent hurricanes. Letter here.

INTERIOR-EPA MARK SHELVED: Citing "uncertain timing of votes on the budget resolution," the Senate Appropriations Committee announced late Tuesday it would postpone a scheduled markup of the fiscal 2018 EPA-Interior spending package until next week. The move comes as the panel's chairman, Thad Cochran, returned to Washington after being away several weeks due to health problems. Separately, 115 scientists and health professionals sent a letter to committee members Tuesday urging them to maintain current funding levels for EPA.

TRUMP CLAIMS WEST VIRGINIA 180: During a Tuesday interview on "Fox News Radio," Trump personally took credit for boosting the fortunes of West Virginia thanks to his efforts to boost coal. "I've turned West Virginia around, because what I've done environmentally with

coal," he said. "And everyone's saying 'I can't believe it,' because they were having such problems." West Virginia's senators have repeatedly acknowledged coal will never return to where it once was so it's unclear what exactly Trump's taking credit for here.

Clips from Pruitt's own "Fox Business" interviews on Tuesday are available here and here.

PENCE: SOME ENERGY BREAKS WILL STAY: During an appearance in Buffalo, N.Y., Vice President Mike Pence suggested some current tax incentives for energy efficiency would likely stick around as Republicans advance tax reform. "Those incentives that are in the tax code today, tax credits that are in today will remain in effect unless we've addressed them in the plan that we've outlined," Pence said. "Some of those historic energy incentives, I expect to remain in place unless Congress decides otherwise."

WHITEHOUSE SLAMS EPA NOMINEE RESPONSES: Prior to the nomination hearing being shelved without explanation, Rhode Island Democratic Sen. Sheldon Whitehouse released responses from Wehrum and EPA chemical office pick Michael Dourson where they dodged questions on a host of matters related to their new posts. "The President's pick to run the air pollution office hasn't read the most pivotal Supreme Court ruling on greenhouse gas regulation ever?" Whitehouse said of Wehrum. "He's 'not familiar' with the science on the health effects of ozone, an all-too-common pollutant that affects vulnerable groups across the country? Really?" Read them here.

ME FIRST - CLEAN ENERGY GROUP BACKS GILLESPIE: Citizens for Responsible Energy Solutions today endorsed Republican Ed Gillespie's gubernatorial bid in Virginia and Jill Vogel's bid to become lieutenant governor. "I agree with Citizens for Responsible Energy Solutions that we need to find commonsense solutions that balance the Commonwealth's economic, energy and environmental needs," Gillespie said in a statement.

**** Presented by the National Biodiesel Board:** EPA wants to reduce volumes in the Renewable Fuel Standard (RFS), which would kill jobs, thwart economic growth and potentially bankrupt farmers. We must support U.S. workers and grow the economy with more biodiesel in a growing RFS. Make your voice heard with the EPA: http://bit.ly/2ghDLo3 ******

FERC CHIEF CALLS FOR ENFORCEMENT REVIEW: After a string of court rulings that rejected FERC's penalties, Chairman Neil Chatterjee said Tuesday it's time for the commission to take a hard look at its enforcement policies, Pro's Darius Dixon reports. "The courts have rejected FERC's interpretation of de novo review five times under the Federal Power Act," he told energy lawyers. "The courts have spoken, and I, for one, am listening." Chatterjee said his goal is to "chart a new course that is fair and legally defensible."

Don't hold your breath: Senate Energy Chairman Lisa Murkowski doesn't expect any package of energy nominees to advance this week given everything that's going on. "I don't think it's going to happen this week," she told ME. "Do I want it to happen? Yes." Two additional FERC picks are among the nominees awaiting floor action.

SENATORS TO FERC: IGNORE PERRY'S PUSH: Eleven members of the Senate

Democratic caucus, led by Energy and Natural Resources Ranking Member Maria Cantwell, are urging FERC in a letter to reject Energy Secretary Rick Perry's proposed grid resiliency plan that would benefit coal and nuclear sectors. "We urge the Commission to reject this ill-conceived proposed rule and return, in a deliberative manner and with the benefit of a full Commission, to reviewing and building upon the record developed in existing proceedings related to the organized markets in a way that truly benefits consumers," they wrote.

EARLY GRID STUDY WRITER CHIPS AT DOE PROPOSAL: Alison Silverstein, an early author of the Energy Department's grid study, gave a presentation Tuesday in Nevada that seemed to undermine the agency's controversial resiliency pricing proposal for coal and nuclear power. Speaking at the joint meeting of the fairly obscure Committee on Regional Electric Power Cooperation and Western Interconnection Regional Advisory Body, Silverstein's talk included a slide titled "Coal needed for resilience? Not so much..." which explained how "Coal plants that retired recently did not operate as baseload" - countering the crux of Energy Secretary Rick Perry's pricing plan to FERC - and pointed out that "[a]verage coal on-site inventories today only 45-70 days, not 90 days." Silverstein left DOE well before the final grid study was released in August.

SPARED? In private conversations with GOP leaders, Trump has pledged to spare Sens. John Barrasso and Deb Fischer from primary challenges launched by Steve Bannon, National Journal reports, citing conversations with two GOP sources familiar with the discussions. The president hinted at such a move during a Monday press conference.

LAWSUIT FILED OVER ROYALTY RULE: California and New Mexico filed a lawsuit Tuesday in the U.S. District Court for Northern California challenging the Trump administration's plan to repeal the 2017 valuation rule for coal, oil and natural gas extracted from federal lands, Pro's Alex Guillén reports . In their filing, the states argue Interior's explanations for repealing the rule "are nothing more than trumped-up technicalities that do not justify throwing out the Rule in its entirety." They call for the rule to be reinstated.

EXAMINING FOSSIL FUEL IMPACTS IN OKLAHOMA: The Coalition for Oklahoma's Renewable Energy released a report looking at the public health impacts of oil and gas development in Pruitt's home state. They note it comes as Pruitt's EPA and Interior have moved to suspend methane standards.

MAIL CALL! BUT REALLY, SHOW ME THE MONEY: House Natural Resources ranking member Raul Grijalva asked Interior Secretary Ryan Zinke in a Tuesday letter to explain what he's done with $400,000 in appropriated funds toward a study on the health impacts of mountaintop removal mining. Zinke's agency ordered the National Academy of Sciences to cease all work on the study back in August.

NEW CHALLENGE TO ENDANGERMENT FINDING: A group of 60 skeptics of mainstream climate change science sent Pruitt a letter Tuesday seeking "an honest, unbiased reconsideration" of the agency's 2009 endangerment that compelled it to take action on climate change. The Competitive Enterprise Institute led the effort.

FOR YOUR RADAR: The Bipartisan Policy Center hosts former Energy Secretary Ernest Moniz today at 9 a.m. for a discussion on the "role U.S. nuclear energy plays in achieving national security objectives." Watch here.

SENDING HELP: The offices of seven attorneys general fighting Trump administration environmental regulatory rollbacks - Illinois, Maryland, Massachusetts, New Mexico, New York, Washington and Washington, D.C. - will receive legal fellows from State Energy & Environmental Impact Center at NYU School of Law, the organization announced Tuesday.

Cleanup Plan for Toxic Texas Site Less Protective, Companies Say

Posted October 12, 2017, 02:51 P.M. ET

By Sylvia Carignan

International Paper and McGinnes Industrial Maintenance Corp. are objecting to EPA Administrator Scott Pruitt's plan for the first of nine Superfund 'mega-sites' he's targeted for cleanup.

Both companies are the potentially responsible parties the Environmental Protection Agency has identified for the Channelview, Texas, San Jacinto River Waste Pits Superfund site and say Pruitt's Oct. 12 plan is less protective for downstream communities.

The final plan involves excavating more than 160,000 cubic yards of contaminated waste, including dioxins, generated in the bleaching of wood pulp to make paper. The EPA considers this family of compounds to be carcinogenic and to have the potential to affect hormone levels and human growth and development. The cost of cleanup is expected to be $115 million.

The companies previously installed a protective cap at the San Jacinto River site to keep contaminants in the waste pits—which are partially underwater—from flowing into a nearby river.

"We cannot support a plan for the site that provides less protection to all affected communities than the existing cap already has provided," a spokesperson for McGinnes said in a statement.

To excavate the material, the EPA's plan is to remove part of the protective cap.

"We disagree with EPA's claim that the local or downstream areas can be protected during removal," the McGinnes statement said.

The companies repaired the cap in September after Hurricane Harvey hit the site, which is located near Houston, but community representatives say little is known about the storm's impacts on contaminants moving off the site. Jackie Young, founder of the Texas Health and Environment Alliance, said community members have gotten little information about storm damage there.

"I'm not sure if the extent of damage is well understood at this point," she told Bloomberg BNA.

A spokesperson for International Paper said in a statement that the cap "successfully withstood Hurricane Harvey," but that removing it "could result in significant damage to public health and the local environment."

The San Jacinto River Waste Pits were added to the National Priorities List—EPA's list of the country's most contaminated sites—in 2008.

As a result of changes Pruitt made to the Superfund program earlier this year, his office—instead of EPA regional offices—is making major decisions at nine Superfund mega-sites. These are sites whose cleanup costs can top $50 million and often involve the contamination of former mines, bodies of water, or landfills.

EPA Veteran to Head Agency's Midwest Region

Posted October 12, 2017, 02:51 P.M. ET

By Tiffany Stecker

An EPA veteran with support from both sides of the political aisle will oversee the agency's work in the Midwest.

Jim Gulliford will return to serve as Region 7 administrator, a position he held from 2001 to 2006, the EPA announced Oct. 12. He comes to the role after eight years as executive director of the Soil and Water Conservation Society, an Iowa-based nonprofit that advocates for agricultural conservation programs and science.

In the role, Gulliford will be a key liaison between the EPA and U.S. agriculture. The agency oversees a number of regulatory areas that directly affect farmers, including national biofuel policy, water quality regulations, and pesticide registrations. The region covers Iowa, Kansas, Missouri, Nebraska, and nine tribal nations.

'Quintessential Iowa'

Gulliford worked closely with the EPA in his position with the Soil and Water Conservation Society, at times hosting agency officials from Washington, D.C., at events in Iowa, Karl Brooks, the Region 7 administrator under President Barack Obama, told Bloomberg BNA.

"Gulliford is a solid guy," Brooks, now a professor at the University of Texas-Austin, said. His appointment "is good news for the region."

Gulliford's personality embodies the approachable, down-to-earth characteristics that typify Midwesterners, said Brooks. "[He's] quintessential Iowa."

Gulliford will join the agency as the EPA takes steps to roll back the Obama administration's Waters of the U.S. regulation to clarify which streams and wetlands fall under the Clean Water Act's protection. Agricultural organizations strongly oppose the regulation.

Mending State-Federal Relations

Region 7 also is home to the West Lake Landfill outside of St. Louis, a Superfund site that contains nuclear waste from the Manhattan Project.

Another top priority for the region is implementing settlements with St. Louis and Kansas City that require upgraded sewer infrastructure to comply with the law.

In a statement provided by the EPA, Nebraska Department of Environmental Quality Jim Macy said Gulliford would bring a "voice of reason" to the role and cooperate with states.

A top goal for the EPA under Pruitt is to strengthen the bond between states and the federal government.

"Nebraska DEQ is ready to work with Jim Gulliford to further improve federal and state relationships in the true spirit of cooperative federalism," Macy said.

Gulliford's name was floated earlier this year as a potential nominee to lead the Environmental Protection Agency's Office of Chemical Safety and Pollution Prevention. He also served as assistant administrator of the Office of Prevention, Pesticides and Toxic Substances for three years during the George W. Bush administration.

Feds Must Support Nuclear Power for National Security, Perry Says

Posted October 12, 2017, 02:43 P.M. ET

By Rebecca Kern

The commercial nuclear power industry needs a federal boost for national security reasons to prevent the U.S. from falling behind global competitors such as Russia and China, Energy Secretary Rick Perry told lawmakers today.

"If we're going to continue to be a leader in nuclear energy in the world, we're going to have to support this industry in this country," Perry said during testimony at an Oct. 12 House Energy and Commerce Committee hearing.

"The question is do we have a national security interest in the nuclear industry, and I think the answer is yes," he said.

"If we lose our supply chain, if we lose our intellectual chain of supply of bright scientists," Perry testified, "then we're going to lose our role as a leader when it comes to nuclear energy in the world, and that in turn is going to affect our ability to address the weapons side of it."

Perry was on the defensive during the hearing, which focused heavily on the Energy Department's recent proposal directing the Federal Energy Regulatory Commission to take action to prop up certain coal and nuclear plants that are having difficulty competing in wholesale energy markets.

An unusual set of energy industry bedfellows, including renewable, gas and oil industry groups, as well as large industrial manufacturers and free-market think tanks, oppose the plan. FERC has set an expedited three-week public comment deadline of Oct. 23.

Members from both sides of the aisle questioned Perry about the intention behind the proposal,

which he called"a way to kick-start a national discussion about resiliency and about reliability of the grid."

The proposal would allow generators with a 90-day supply of fuel on-site—which would include coal and nuclear facilities—to recover their operating costs at "a fair rate of return." Coal and nuclear plants now get paid a wholesale energy market rate set by historically low prices of natural gas. This is making it difficult for nuclear and coal plants to cover their operating costs and leading some utilities to close plants due to difficulty competing economically.

FERC, as an independent agency, has the authority to choose how to address the market challenges identified in the proposal. It can do so by a rule or other action, regulators and legal experts told Bloomberg BNA.

New York Poised to Require Ingredient Disclosure for Cleaners

Posted October 12, 2017, 11:31 A.M. ET

By Gerald Silverman

SC Johnson, Procter & Gamble, Unilever, and other household cleaning product manufacturers will have to disclose the chemical ingredients in their goods under a New York program expected to be announced shortly.

New York and California are quickly moving to be among the first states to require chemical disclosure of ingredients in cleaning products, according to cleaning industry trade groups.

California Gov. Jerry Brown (D) has until Oct. 15 to act on the Cleaning Product Right to Know Act of 2017 (S.B. 258), but he has not indicated whether he will sign the measure. The requirements would be phased in between 2020 and 2021 if the law goes into effect.

Given the size of the California and New York markets, both bills would change the labels consumers will see across the U.S. and information they can access anywhere, Peter Vujovich, state government relations and public policy director for the Consumer Specialty Products Association told Bloomberg BNA. He said New York is expected to release its final guidance on the program within days.

Federal laws do not require the disclosure of most ingredients in cleaning products.

Philip Morris Joins Growing Group of Carbon-Pricing Corporations

Posted October 12, 2017, 10:53 A.M. ET

By Christopher Martin and Emily Chasan

Philip Morris International Inc., the maker of Marlboro cigarettes, now uses an internal cost of carbon emissions in its business decisions, joining a group of almost 1,400 companies that agreed to consider how greenhouse gas emissions will affect their industries, according to a statement Oct. 12 from environment group CDP.

That's up from 150 companies in 2014.

Carbon markets from California to China and Europe are placing a price on the greenhouse gas as governments confront the growing threat of climate change. Businesses are responding by setting their own price and using it to determine the best course of action should their industry have to pay a carbon tax of some kind.

"Companies have accepted that there will be a carbon price one way or the other—carbon is no longer going to be a free ride," said Paula DiPerna, an adviser to CDP. "It's certainly become more of an investor focus. It's part of investors' lexicon of questions when they interrogate companies about environmental, social and governance issues."

The four-year effort by CDP to get global corporate leaders to measure the impact of carbon prices has been led by U.S. companies, which grew to 238 this year from 210 last year, including agriculture giant Cargill Inc. and cereal maker Kellogg Co. The biggest growth came from companies in Mexico, up 69 percent this year to 44, and China, which rose 40 percent to 102 now using an internal carbon price.

Philip Morris, which began using an internal carbon price in its decisions last year, adopted emission reduction goals of the Paris Climate Agreement and is using a mix of renewable energy and efficiency upgrades to meet it targets, Corey Henry, a spokesman, said in an emailed response to questions. The company set a price of $17 a ton.

It's used "to help us prioritize our GHG emission-reduction projects according to those most effective at reducing CO2," Henry said.

Dakota Access Boosts Drillers but Won't Be a Bakken Game-Changer

Posted October 12, 2017, 9:17 A.M. ET

By Meenal Vamburkar

Once hailed as the spur for a North American "energy renaissance," the $3.8 billion Dakota Access pipeline has limited driller costs in its first four months in operation.

Just don't expect it to live up to its pre-approval hype.

That's the conclusion of analysts who say North Dakota's Bakken shale play will continue to lag the drilling surge in Texas and Oklahoma, pipeline or no pipeline. The conduit's use has dropped the break-even cost of drilling in the Bakken to around $52 a barrel from $55, as drillers abandon costlier rail shipments, said Erika Coombs, an analyst at BTU Analytics LLC. But that compares with about $46 on average in Texas's Permian play and $41 in Colorado's DJ basin, she said.

Is the Dakota Access "a game-changer?" Coombs said in a telephone interview. "The short answer: For the basin as a whole, not really." It helps, she said, "but it's not enough to attract capital away from the Permian or Scoop/Stack."

First proposed in 2014, the 1,172-mile (1,886-kilometer) pipeline is designed to ship as much as 570,000 barrels of crude. However, its construction has faced major opposition from Native American tribes and environmental activists over the last year, including a legal suit that's ongoing in federal court.

A judge ruled Oct. 11 that use of the conduit, in operation since June 1, could continue while its environmental impact is reviewed as a result of that suit.

Lawyers for Energy Transfer Partners LP, which operates the line, had argued it would be expensive to purge or plug the conduit while the U.S. Army Corps of Engineers conducted a supplemental review into aspects of the project, including its impact on the hunting and fishing rights of Native American tribes.

There's a "serious possibility" that the corps will be able to back its prior conclusions for approving the pipeline's route, U.S. District Judge James E. Boasberg ruled Oct. 11. But he urged the Corps not to treat his decision "as an exercise in filing out the proper paperwork" but to give serious considerations to errors that were made and identified. A follow-up court conference has been set by Boasberg for Oct. 18.

U.S. Justice Department spokesman Mark Abueg declined to comment on the court's decision. Vicki Granado, a spokeswoman for Energy Transfer, didn't immediately respond to request for comment.

The ruling is a win "for all major interstate infrastructure projects currently under construction or consideration," said Craig Stevens, a spokesman for the GAIN Coalition, a group that promotes more infrastructure development.

When newly inaugurated President Donald Trump advocated green-lighting the Dakota Access in January, it was hailed as "a new beginning" for North America's "energy renaissance," in a statement by Ron Ness, president of the North Dakota Petroleum Council. "As Bakken crude is finally compensated for its true value, state tax coffers, mineral owners and workers will reap the rewards," he said at the time.

And it has helped. In July, just a month after the conduit began operating, rail transported just 10 percent of Williston Basin output, down from 32 percent a year ago, according to the North Dakota Pipeline Authority. The pipeline runs from North Dakota to Illinois, where flows can be diverted to the Midwest and, eventually, make their way to the heart of the U.S. energy market, the U.S. Gulf Coast.

But even with cheaper transport, and smoother access to major markets, the Bakken remains disadvantaged, both in terms of location and overall cost.

Named for Henry Bakken, a North Dakota farmer whose land hosted the first well in the region in the early 1950s, the Bakken is expected to produce an average of 1.1 million barrels a day of oil this year and next, a figure lower than the 1.2 million barrels produced in 2015, according to the Energy Information Administration. At the same time, Permian production is expected to reach 2.9 million barrels a day by the end of next year, the EIA said in July.

The Bakken's lack of growth "really is from the competition with the Permian basin and the Oklahoma Anadarko basin," said Lynn Helms, director of the North Dakota's Department of Mineral Resources, in a September webcast. One big problem, according to Helms, is that skilled, experienced workers left for other plays when the oil rout hit.

"It's been difficult if not impossible to get them to move back to North Dakota," he said.

The pipeline has opened new markets for Bakken drillers, which offers new promise for their

product, said Ryan Saxton, manager of oil transportation in North America at Genscape Inc., an energy data provider. But, he added,"that's not going to get you back to the hey-day of the Bakken."

—With assistance from Andrew Harris.

China Mulls Storage Salve for $4 Billion Renewables Headache

Posted October 12, 2017, 9:33 A.M. ET

By Feifei Shen

China is considering a prescription for nearly $4 billion worth of wasted electricity production looming over its push into clean energy.

The world's biggest investor in renewables plans an aggressive expansion into energy storage with an eye to making the technology widespread by 2025, according to a statement posted on the website of the National Development and Reform Commission Oct. 11.

In recent years, China's booming renewables sector has helped drive down the cost of solar panels and wind turbines globally. A push by the nation into storage may accelerate an expected drop in battery costs caused by increased global investment in their use for electric vehicles and grid use.

China will kick start the storage business with several pilot projects including lithium-ion battery storage systems of about 100 megawatts in size, along with other technologies such as supercritical compressed air and flywheel energy storage systems, according to the NDRC.

Storage is seen as critical to overcoming curtailment, a situation that arises when grid access is constrained, particularly for wind- and solar-generated electricity. China's renewable plants suffer from the world's most severe curtailment, according to a Bloomberg New Energy Finance report published in September.

Curtailment Cost

The phenomenon carries a heavy cost. Renewable energy generators in China experienced losses of 25.5 billion yuan ($3.87 billion) in 2016 because of the curtailment of wind and solar energy, representing 49.7 terawatt-hours of wasted wind and 3.28 terawatt-hours of squandered solar, BNEF estimated.

"The curtailment issue is tough and won't see significant improvement by 2020," said Tian Miao, a Beijing-based senior analyst at Sun Hung Kai Financial Ltd. "Storage will help make a better use of renewables but it needs long-term progress."

Along with the pilot projects, China is also encouraging companies to create innovative financing models and to participate in overseas projects to improve domestic manufacturing technology, the nation's top economic planning agency said. Overseas storage projects would involve vanadium redox battery storage plants and lead carbon capacitors.

China's total installed renewable power capacity surpassed 600 gigawatts as of the end of June, according to data from the National Energy Administration. The rate of curtailment, or idle rate,

stood at 13.6 percent for wind turbines in the first half and 6.7 percent for photovoltaics, NEA data showed.

Along with supporting storage technology aimed at helping to absorb more renewable energy, China will also study the setting of prices for electricity coming from storage systems, the NDRC said.

Storage Needs

China's move is "the first step in the right direction," said I-Chun Hsiao, a BNEF analyst based in Tokyo, who added that the nation is keen to develop all kinds of technology.

Excluding capacity from pumped hydro power, China had 243 megawatts of storage at the end of 2016, up 72 percent from a year earlier, the China Energy Storage Alliance said in May. Lithium-ion batteries hold the biggest share, followed by lead-acid batteries and redox-flow batteries, the alliance said.

Global electricity storage capacity should triple by 2030 if countries were to double their share of clean energy such as solar and wind, according to the International Renewable Energy Agency.

With growing demand for storage from stationary and mobile applications, the total stock of storage in energy terms will need to grow to as much as 15.72 terawatt-hours by 2030 from an estimated 4.67 terawatt-hours this year, the Abu Dhabi-based agency said in a report last week.

China's Top Coal Region to Cut Pollution by 40 Percent

Posted October 12, 2017, 9:07 A.M. ET

By Feifei Shen

China's second-largest coal producing region is planning to cut pollution by two fifths over the autumn and winter seasons, Xinhua News Agency reported.

The reduction in China's northern province of Shanxi seeks to reduce the concentration of PM2.5 particles and sulfur dioxide from October to March 2018, Xinhua reported Oct. 11, citing the provincial environmental protection bureau.

In order to meet the target, authorities will take measures involving the closure of small highly-polluting firms, production cuts in heavy industry, and a ban on burning low-quality coal. One million households will also be pushed to shift toward electric or gas heating systems from traditional coal. Coal burning has also been prohibited completely in parts of six major cities, Xinhua said.

Shanxi is joining other regions in northern China to make greater efforts to curb smog during the winter, when pollution usually accumulates from home heating and weather conditions. Recurrent air pollution has been a persistent problem despite several years of government campaign to control it to avoid social unrest.

Harsher measures to reduce pollution could challenge the province as it seeks to maintain economic growth at the same time. Shanxi's economy grew by 4.5 percent last year from the previous year, lagging behind the nation's 6.7 percent as a whole.

China also plans to plans to cut average PM2.5 concentrations in Beijing and surrounding areas by more than 15 percent, the environmental ministry said in August. Authorities will require emission licenses in the region for power, steel, cement, copper, zinc, lead and aluminum producers by the end of the year.

The Shandong provincial government has offered 600 million yuan ($91 million) in subsidies for people switching to electric and gas heating systems in six cities that affect the Beijing-Tianjin-Hebei region, Xinhua said.

Merkel Signals Deeper Green Ambitions as Pollution Overshoots

Posted October 12, 2017, 9:18 A.M. ET

By Brian Parkin

Chancellor Angela Merkel's government signaled it will step up its green programs after acknowledging Germany's emissions are on track to overshoot a target a little more than two years away.

The leader of Europe's biggest economy is caught between negotiations to forge a new government and preparations to host a key United Nations climate meeting next month. Her desire to lead the fight against global warming is butting against the hard reality of an industry that still relies on coal for the brunt of its power.

"It's clear that Merkel dare not say 'we've failed and that's that,'" Environment Minister Barbara Hendricks told reporters in Berlin late Oct. 11. "There'd be a knock-on effect, hurting the chances of meeting 2030 climate goals and therefore jeopardizing our commitments to the Paris Climate Accord—efforts to cut CO2 must be a priority."

Even as Germany's installed the most renewable power in Europe, it also continues emitting the most carbon dioxide in the bloc, thanks to heavy reliance on coal. A report published this week by Merkel's government showed it is on track to cut emissions by a third by 2020, short of the target for a 40 percent reduction from 1990s levels. Coal unions are mobilizing hundreds of thousands of members to guard their interests against greater efforts to green the economy.

Rising carbon dioxide emissions in Germany open Merkel to accusations of double standards in climate protection. U.S. Energy Secretary Rick Perry in April chided Germany and other European nations for "cheerleading" the Paris deal while allowing their own pollution to increase, particularly from coal plants, which accounted for about 40 percent of power generation last year and a third of carbon dioxide emissions.

Germany pledged in 2012 to exceed the EU's target to cut emissions by 30 percent by 2020, instead opting for a more ambitious 40 percent goal. This week's report said Germany will achieve at best a 32.5 percent cut by next decade.

Merkel vowed Sept. 14 to redouble efforts to fulfill the pledge. However, she hasn't outlined any proposals while she tries forming a new government with the business-friendly Free Democratic party and the Green Party, which wants to accelerate a coal phaseout.

"Hard talks are ahead for Merkel in these coming weeks -- it's crucial she makes the right decisions," said Claudia Kemfert, who chairs the department of Energy Economics and Sustainability at the Hertie School of Governance in Berlin and is an independent adviser to Merkel in climate policy.

A failure to navigate a new strategy could open Merkel up for criticism by countries including China, India and the U.S. when they meet in Bonn in November. The COP23 meeting in West Germany's old capital will assess the concrete plans countries are taking to keep global temperature rises well below 2 degrees Celsius (3.6 degrees Fahrenheit) this century.

For a story on how Merkel's green policies actually pushed up coal demand, click here.

Merkel "has no other option at hand" but to cap emissions from Germany's 140 coal power plants, Kemfert said Oct. 12 by phone. "Nothing else will work in time by 2020 and Merkel's under enormous pressure to signal to the world in Bonn that she means business."

Germany's emissions assessment held better-than-expected economic growth, coal plants, transportation emissions and a growing population responsible for making the country miss its target.

Brazil Experiments With Floating Solar Panels Above Dams

Posted October 12, 2017, 6:57 A.M. ET

By Michael Kepp

Floating solar panels on the reservoirs above two state-owned dams will showcase technology that could eventually help Brazil diversify its energy sector as the country grapples with severe droughts.

Brazil's nationwide drought is now in its fifth year and has hampered hydropower generation, which accounts for 70 percent of the country's electricity.

Subsidiaries of Eletrobras, the federal electricity holding company, recently contracted for floating solar systems on the reservoirs above two dams in drought–stricken areas. The grid of modular solar panels mounted on a floating array will allow dam operators to generate electricity even while reducing the flow of water through dam turbines when reservoir levels are low.

"Although France, England, and Japan were the first countries to install such systems, Brazil is the first country to build them on dam reservoirs," Orestes Goncalves Jr., managing partner of floating solar company Ciel & Terre's Brazilian office, told Bloomberg BNA. "And when Chesf and Eletronorte [the Eletrobras subsidiaries] confirm the viability of these floating systems here, they will encourage private Brazilian companies to install them."

Chesf expects its 1 megawatt, 12.5-million-real ($4-million) floating solar system to start operation by the end of the year at the 1,050-megawatt Sobradinho dam in northeast Bahia state.

Eletronorte is building a 57-million-real ($18-million), 5-megawatt floating solar project on the reservoir of the 250-megawatt Balbina dam in the western Amazon state of Amazonas, with

operations expected to begin by next July. A smaller-scale pilot solar project had already been tested at the Balbina dam.

Because of drought, the Sobradinho dam is generating electricity at 16 percent of its installed capacity, Jose Bione, the manager in charge of the floating solar system at Chesf, told Bloomberg BNA.

The Balbino dam is functioning at 80 percent of its capacity, but that was at 40 percent from the end of 2015 until this May, Davidson Pereira Campos, manager of Eletronorte's innovation, technology and energy department, told Bloomberg BNA.

Eyes on Private Dams

"The private sector, which has 16 dams in the northeast ... will probably wait to see if floating systems at Sobradinho and Balbina are viable before waging capital on similar investments," Bione said.

Brazil's Votorantim Group, one of Latin America's largest industrial conglomerates, is studying using floating solar projects on the reservoirs of some of its 33 dams nationwide, which mainly supply electricity to steel mills, aluminum smelters, and pulp and paper plants, the company told Bloomberg BNA.

Braskem, Latin America's largest petrochemical producer, is also evaluating installing floating solar systems on small, natural lagoons on its Brazilian properties, mainly to provide electricity for its administrative offices, Robson Casali, who is in charge of Braskem's energy-related business, told Bloomberg BNA.

In addition to the dam-based projects, in August, a consortium led by France's Ciel & Terre installed a 304-kilowatt floating solar system on a rainwater accumulation pond in the north-central state of Goais.

The consortium includes Canadian Solar, the biggest solar panel maker in Brazil, and WEG Energy S.A., which manufacturers devices to transform the direct current from the floating solar panels to alternating current.

Future Energy Auctions

While floating systems are more expensive than land-based solar power, the water cools the panels, which can make them more efficient.

If the government confirms the viability and efficiency of these floating solar systems, it could allow developers to sell their future power at energy auctions, analysts and industry advocates said.

At these auctions, energy developers offer future power to electricity distributors at the lowest prices below a government-set ceiling, and they sign 20- to 30-year contracts with the first distributors that agree to buy the electricity.

"If the government finds that floating solar systems are structurally operative and maintainable during the 20- to 30-year duration of a supply contract, it will allow developers to sell future solar power from such systems at energy auctions," Helena Chung, a Bloomberg New Energy Finance analyst in Brazil, told Bloomberg BNA.

Russia-backed Pipeline May Need to Comply With EU Energy Law

Posted October 12, 2017, 12:18 P.M. ET

By Ewa Krukowska

The European Commission plans to propose in November an update of its natural-gas security regulation that would make new pipelines—including the controversial Nord Stream 2 link from Russia to Germany—subject to the European Union energy law.

The expansion of the Nord Stream pipeline has divided EU governments concerned about the bloc's dependence on Russian gas and President Vladimir Putin's meddling in Ukraine. It also has highlighted a split between lawyers on the appropriate legal regime for the project.

The commission's proposal would put an end to the legal wrangling by making the bloc's energy-market liberalization package applicable to all new pipelines, according to two EU officials.

Under the planned update of the gas regulation, the definition of a gas inter-connector would be broadened to include third countries, such as Russia, according to the officials, who spoke on condition of unanimity. That would mean the so-called third liberalization package applies to the offshore section of Nord Stream 2 that falls under the territorial jurisdiction of Finland, Sweden, Denmark, and Germany.

The Brussels-based commission has a policy of not commenting on draft laws. Its president, Jean-Claude Juncker, signaled in September that the bloc's regulator will put forward "a proposal on common rules for gas pipelines entering the European internal gas market."

Legal Framework

Following the revision of the law, the commission would no longer need a mandate it is currently seeking from member states to negotiate a legal framework for the gas link with Russia. National governments have been split on the EU executive's request and a recent EU legal opinion said in September there was no legal void on the issue of Nord Stream 2.

At a meeting of officials from EU states on Oct. 12 in Brussels, Poland presented its own analysis, which argued the third package should apply to Nord Stream 2 even under current legislation, according to a document obtained by Bloomberg News. The project endangers the energy security of the union, specifically in central and eastern European member states, Poland said.

"The project also has an adverse effect on competition, making the dominant position of Gazprom on the natural gas supply market in the EU even stronger," the document showed. "In view of this, the EU institutions' passivity as far as the application of the rules of the third energy package to Nord Stream 2 is concerned would be an obvious violation of the fundamental principles of the Energy Union."

Third-Party Access

At the heart of the EU energy-market liberalization package is a provision preventing a gas provider from controlling the transmission business, known as ownership unbundling. It also requires third-party access to the pipeline, reducing the amount of gas that the Nord Stream 2 consortium can

ship and potentially lowering its profitability.

Russian export monopoly Gazprom PJSC has argued that Nord Stream 2 is not subject to the EU third package and would only need approvals from the governments of those member states whose waters the pipe would cross. Gazprom is pursuing the project with western European companies ranging from Germany's Uniper to Paris-based Engie.

In 2014, a conflict over the third energy package led to the scrapping by Russia of the South Stream project that would have piped gas under the Black Sea to Europe. Putin declared the pipeline canceled following calls by the EU regulatory arm on national governments not to continue the project until it is compatible with rules on public procurement and unbundling.

European Partners

Uniper, Engie, Royal Dutch Shell Plc, OMV AG, and BASF SE's Wintershall are European partners of Gazprom in the project to expand Nord Stream by 55 billion cubic meters a year, which would double its capacity to almost 30 percent of current EU demand. The new pipeline would circumvent Ukraine and would deprive it of transit fees.

While Nord Stream 2 argues a new pipeline is needed to ensure safe supplies in the coming decades amid the projected rise in gas demand, opponents of the project say it hurts EU cohesion and weakens the bloc's Energy Union strategy aimed at integrating the region's gas and power markets and improving security.

The revised regulation would need support from EU governments and the European Parliament to enter into force.

U.K. Eyes Cap on 'Rip-Off' Power, Gas Prices

Posted October 12, 2017, 11:47 A.M. ET

By Alex Morales

The U.K. government published its plans to cap domestic power and gas prices to protect millions of households from what it calls "rip-off" charges at the hands of the biggest utilities.

The new law will empower the energy regulator, Ofgem, to introduce the cap for those on Standard Variable Tariffs, the default rate consumers revert to once fixed-term contracts expire. The Department for Business, Energy and Industrial Strategy estimates there are 18 million such accounts.

"Our broken energy market has to change—it has to offer fairer prices for millions of loyal customers who have been paying hundreds of pounds too much," Prime Minister Theresa May said in a statement. The draft legislation "is a vital step towards fixing that."

May is delivering on a Conservative Party election pledge that was shared by the Labour opposition, meaning the legislation is unlikely to be obstructed in Parliament. Legislators from both parties want to fast-track the bill and the business department is seeking to build cross-party consensus on how the cap operates.

The draft bill requires Ofgem to consult on and impose the cap "as soon as practicable" after the legislation is passed, BEIS said Oct. 12, without being specific about the timing. The cap will be a temporary measure effective until end-2020, after which Ofgem will decide whether it should be extended on an annual basis until its expiry in 2023.

"It's likely to take at least a year before a full consultation process on a market-wide cap can be concluded and implemented," Ryan Thomson, a partner at energy consultants Baringa Partners, said by email. "Any potential benefits to consumers may not be felt until 2019."

Fast-track implementation is opposed by the utilities, which say they need to make a fair margin on the prices they charge in order to invest for the future. They also point to the mounting cost of meeting government targets for renewables, energy efficiency, installing smart meters and subsidizing poorer households.

"It is disappointing that the government has chosen to proceed with this crude and counter-productive legislation," said Sam Hall, a senior research fellow at the think tank Bright Blue. "A price cap risks harming investment in new power generation and reducing competition in the market."

Centrica's Tumble

May's announcement to Conservative supporters last week that she'd legislate for the cap sent shares of Centrica Plc, the owner of British Gas, tumbling to a 14-year low. The U.K.'s "Big Six" utilities also include Electricite de France SA, SSE Plc, Innogy SE's Npower unit, Iberdrola SA's ScottishPower business and EON SE.

The government move follows a probe by the Competition and Markets Association that found customers overpay on their energy bills by 1.4 billion pounds ($1.8 billion) a year.

The energy market "does not operate in the interests of the majority of consumers," the business department said. "While we are in favor of free markets, we will always take action to fix them when they're broken."

Ofgem said on Oct. 11 it is extending a safeguard tariff to 1 million more vulnerable households, with a further 2 million set to benefit by "winter next year." The price cap already applies to 4 million customers.

Aussie Green Energy Bank Warns Funds at Risk If Targets Scrapped

Posted October 12, 2017, 03:43 P.M. ET

By Perry Williams

Australia's government-owned green bank said investments in renewable energy generation will drop if the nation doesn't extend into the next decade clean energy targets and the financial incentives to meet them.

Clean Energy Finance Corp., which invested nearly A$2.1 billion ($1.6 billion) in the year to June in renewable and power storage projects, will be forced to cut funding if the country's existing subsidies program that expires in 2020 isn't replaced, according to Ian Learnmonth, the lender's chief executive officer. Outside investments from developers will fall as well if the government of Prime Minister Malcolm Turnbull fails to set clear targets, he said.

"You are going to need a greater price signal than just the wholesale power price," Learnmonth said in an interview. "Developers would be cautious. You would see a downturn in investment if there is no guidance over the coming 12-18 months."

Extending clean energy targets beyond 2020 has become a lightning rod within the divided coalition government as it tries to balance competing energy sources amid spiraling power prices. A decline in renewables costs has boosted speculation Turnbull may refrain from setting new clean energy targets as he seeks to avoid further political infighting that has plagued his government.

CEFC, which has access to a A$10 billion fund, more than doubled investments in the year ending in June across 35 developments in solar, wind, energy storage and efficiency projects. It spent A$837 million in 2015-16 and A$484 million in the year before.

The government body has commissioned consultant Jacobs to calculate the impact of different policy outcomes on pricing forecasts for clean energy and a report is due in November. The results of that modeling will help the CEFC determine how much it might invest in a project, Learmonth said.

While cost declines have put the price of solar and wind power in line with thermal generation, according to Learmonth, prices fail to reflect the storage capacity needed to ensure the power grid can call on renewables when required. The cost of solar in Australia has dropped by more than half since the start of the decade and batteries will fall 60 percent by 2020, Energy Minister Josh Frydenberg said Oct. 9 at a conference in Sydney.

Australia to Fund Companies to Scale Back Energy Use This Summer

Posted October 12, 2017, 03:20 P.M. ET

By Murray Griffin

Australia will pay 10 large industrial energy users and small businesses to reduce energy use at times of extreme peak demand under a pilot program that has received A$35.7 million ($27.9 million) in government grants.

The Demand Response pilot project includes a diverse range of energy users that adds up to a commitment to cut energy demand by 200 megawatts by 2020 when requested. Federal funding for the program will total A$28.6 million ($22.4 million), with the remaining grant money provided by the New South Wales government as extra support for projects in that state, the two governments announced Oct. 11.

The new project aims to help the expansion of country's relatively small demand management industry.

"Demand response will not only ease the strain on the electricity grid and prevent blackouts. These projects will also put money back into the pockets of Australian businesses and households, helping to reduce their energy costs and emissions," said Ivor Frischknecht, chief executive officer of federal authority Australian Renewable Energy Agency.

Years of policy reversals on energy and climate policy have raised fears of blackouts on extremely hot days in the impending Australian summer, as the grid struggles to supply sufficient electricity to millions of air-conditioned homes and nonresidential buildings.

Consequently, the government wants at least 143 megawatts of the total demand reduction capacity to be on-call ahead of this summer.

Ready to Participate

With one exception, the 10 project grants will go to intermediaries such electricity companies that will in turn invite their customers to participate. Energy company AGL Energy Ltd., for example, will provide 20 megawatts of demand response in New South Wales under the program, with 17 megawatts coming from commercial and industrial customers and 3 megawatts from residential customers.

"We expect the residential component of this program will grow to over 10,000 customers during the three-year project, and we will be providing a number of innovative energy solutions to our residential NSW customers who sign up to this project," an AGL spokesperson told Bloomberg BNA by email Oct. 12.

Meanwhile, EnergyAustralia said it will provide 50 megawatts of demand reduction capacity, with 40 megawatts to be secured in time for the summer, which starts Dec. 1.

Intercast & Forge, Australia's largest foundry, will receive A$323,654 ($253,300) to participate directly.

Energy users that sign up to the program will be paid a participation fee, irrespective of whether they're called on to reduce demand during an extreme peak period.

They will receive an additional payment if they are actually requested to scale back demand.

Danish Company Dong Turns Trash into Energy

Posted October 12, 2017, 8:02 A.M. ET

By Jess Shankleman

The U.K. might soon be powering its lights with energy that comes from the trash. A Danish energy company is working on new machines that sort household trash from recycling, while rapidly breaking down organic materials like food to create power from biogas produced by the process.

Dong Energy A/S, which runs hundreds of wind turbines in the North Sea, says its plant 30 kilometers (19 miles) outside of Manchester is one of the first to use enzymes on an entire waste stream and then combine it with recycling sorting technology. That would be particularly helpful in cities where space is at a premium and small apartments often have room for only one trash bin.

The process "is a useful option for local authorities and waste companies that have not yet rolled out separate food waste collections," said Charlotte Morton, chief executive of the Anaerobic Digestion & Bioresources Association.

Dong, which is changing its name to Oersted, says its "Renescience" plant in Northwich will be finished at the end of this year at a cost of 600 million krone ($95 million). It will help deal with Britain's mountains of waste, about a quarter of which goes to landfill dumps, where it releases the potent greenhouse gas methane as it rots.

"If everything goes well, this is going to be a big showcase that people will come to from all over the world to see," Thomas Dalsgaard, executive vice president of thermal power and bioenergy at Dong, said in an interview at the plant.

The Renescience process starts with a giant claw that crunches into a mountain of trash and it ends with seven different types of material—from plastics to metals and biogas, that can be used to create electricity, recycled or sold on to a scrap yard. Nothing goes to landfill.

Renescience enzymes, like those found in washing powder, clean trash for 12-hours in tanks 50 meters (164 feet) long, speeding up the decomposition process and taking organic materials to an anaerobic digestion plant where it's used to create electricity.

Anything that's left is sorted through a series of ballistic separators, conveyor belts, magnets and shredders to give the finished clean and reusable products. While some leftovers from the process are currently incinerated, Dalsgaard said that will stop by 2020.

"You can be lazy and have a good conscience with Renescience, and you can also solve an issue about space and we can solve whatever residuals would be from household sourcing," he said.

In fact, he reckons Renescience is better than home sorting because any waste food, like ketchup at the bottom of a plastic bottle is turned into electricity rather than washed away.

If the technology proves a success, Dong has plans to develop a series of plants across the U.K., Europe and the world, including Malaysia. Britain was the ideal place to start because filling landfills with mountains trash are getting more expensive.

Crucially, the biogas that drives the engines can create a steady flow of power to back up intermittent electricity generated by wind and solar. That could provide an alternative to plans for costly new nuclear power stations like the once being built at Hinkley Point.

"We would argue that offshore wind in a country like this is very close to being baseload, so combined with decentralized generation in multiple sites and storage, it could be a cost effective alternative to nuclear," he said.

Exxon Touts New Methane Efforts As EPA Pushes Rule Delay

Posted September 25, 2017, 12:48 P.M. ET

By Abby Smith

ExxonMobil Corp. announced new efforts to reduce methane emissions from its facilities, even as the EPA seeks to delay Obama-era pollution limits for new drilling operations in the oil and natural gas sector.

Some environmentalists are hailing ExxonMobil's new program as "real leadership" in a landscape where the Trump administration is working to broadly roll back federal requirements on the oil and gas industry to reduce methane emissions.

The oil and gas giant today announced an "enhanced" program for detection and repair of methane leaks at natural gas facilities operated by its subsidiary XTO Energy Inc. The program includes a commitment to phase out within three years high-emitting devices. It also includes a commitment to personnel training and research initiatives.

"At a time when others are trying to claw back basic protections and make excuses for inaction, this kind of company responsiveness to local community, investor, and advocate concerns is refreshing," Mark Brownstein, vice president in the climate and energy program of the Environmental Defense Fund, said in a statement.

Exxon's announcement comes after the Environmental Protection Agency Sept. 22 sent to the White House its final versions of rules to delay—for at least two years—key requirements of Obama-era methane limits. Many industry trade groups, including the American Petroleum Institute, which represents ExxonMobil, strongly support the delay.

Ameren to Add $1 Billion of Wind Farms in the Midwest by 2020

Posted September 25, 2017, 01:34 P.M. ET

By Brian Eckhouse

Ameren Corp., the St. Louis-based utility holding company, is planning to add about $1 billion of new wind-power plants by 2020 as part of a broader plan to reduce carbon emissions.

At least 700 megawatts of wind farms will be built in Missouri and neighboring states with U.S.-made turbines, Ameren said in a Sept. 25 statement.

The move comes as the company shifts away from coal-fired power plants and falling prices make wind more competitive.

“Because of significant advancement in technology, harnessing wind is less expensive than other forms of new generation,” Michael Moehn, president of Ameren Missouri, said in the statement.

Wind-turbine prices in the U.S. have fallen to $830,000 a megawatt, below the global average of almost $1 million, according to Bloomberg New Energy Finance. Because the company expects to complete the projects by 2020, they will probably qualify for a federal tax credit for wind power, Alex Morgan, a New York-based analyst at BNEF, said in an email Sept. 25.

Ameren Missouri, which is targeting a 35 percent reduction in carbon emissions from 2005 levels by 2030, also plans to add 100 megawatts of solar power over the next 10 years, with 50 megawatts expected online by 2025. The company announced in May plans to build as much as 1 megawatt of solar capacity at St. Louis Lambert International Airport that’s expected to be complete in 2018.

It plans to retire more than half of its coal-fired generating capacity, including the Meramec Energy Center in St. Louis County by the end of 2022.

Funding Tesla Ticks Off Automakers Needing Electric Car Credits

Posted September 25, 2017, 7:16 A.M. ET

By John Lippert and Ryan Beene

Tesla Inc. has generated nearly $1 billion in revenue the last five years from an unlikely source: Rival automakers. Needless to say, the other companies aren’t happy.

California requires that automakers sell electric and other non-polluting vehicles in proportion to their market share. If the manufacturers don’t sell enough of them, they have to purchase credits from competitors to make up the difference. Tesla, which exclusively sells battery-powered models, sold $302.3 million in regulatory credits last year alone.

“It really makes them mad that Tesla got so much of a boost out of being the only purely electric car manufacturer out there,” Mary Nichols, the chair of the California Air Resources Board, said in an interview Sept. 22 at Bloomberg’s headquarters in New York. “In effect, they helped to finance this upstart company which now has all the glamour.”

China and the European Union -- two of the world’s biggest auto markets -- are considering mandates and credit systems similar to California’s. For all the flack the state has taken from traditional carmakers for how its benefited Tesla, Chief Executive Officer Elon Musk has also been a critic.

Musk, 46, last year said the Air Resources Board was being “incredibly weak” and called its standards “pathetically low.” Rules should be tougher and the credits should be worth more,

according to the CEO.

"Nobody's happy," Nichols said. "That's my mantra."

German Coal May Be Another Loser as Merkel Pushed Toward Greens

Posted September 25, 2017, 8:19 A.M. ET

By Brian Parkin and Mathew Carr

Coal's future in Europe's biggest economy may take center stage when German Chancellor Angela Merkel tries to form a new government after losing support in national elections.

Voters weary with Germany's so-called Grand Coalition between Merkel's Christian Democratic-bloc and the Social Democratic Party cast their ballots elsewhere. While Merkel still came out atop Sunday's poll, her potential partners in a new government narrowed to the Green Party and Free Democrats, both of which have different outlooks for coal.

"What's sure is that campaign pledges on climate protection and a faster phase-out of coal power are not negotiable," said Oliver Krischer, the deputy parliamentary chairman for the Green Party, in a phone interview on Sept. 22.

The Greens were the main force behind the introduction of clean power subsidies the last time they were in the national government from 1998 to 2005. On Sept. 24 they won 9 percent of the vote and could return to power by joining forces with Merkel's bloc and the FDP. Social Democrats have ruled themselves out of government after their worst result since 1949.

Still, energy and environment policy differences will make negotiations for a coalition government "difficult," according to a Barclays research note on Sept. 22, which cited opposition among Merkel's supporters to shuttering coal plants. The FDP campaigned on economic competitiveness being paramount in energy policy.

High Hurdles

"Very high policy hurdles separate us from the Greens -- not just on energy," said Frank Schaeffler, who's seeking a return to parliament for the Free Democrats as a finance spokesman, in an interview late Sept 24. "The divisions are not insurmountable but each party has its red lines -- the challenge will be to see just how robust those lines really are."

Both the Greens and the FDP expect invitations to enter exploratory coalition talks with Merkel, in a process that could take weeks or months before a new government emerges.

The Greens want to shape climate policy in government "but not at any price," Krischer said.

Hard coal and lignite plants generated about 40 percent of all Germany's power last year and about a third of all its carbon dioxide pollution. During the election campaign, Merkel eschewed any talk on a phase-out date for coal.

The Greens campaigned to end coal power by 2030 -- a step already envisaged by city states like Berlin. They also want to shut 20 of the most polluting coal plants by 2020 to help the nation meet its carbon dioxide reduction targets.

Efforts to cut emissions have faltered in Germany, despite the highest rate of renewable energy use in Europe. Persistent coal use means Germany is set to reduce carbon dioxide as much as 31 percent by 2020 rather than the 40 percent it targeted, according to Berlin-based environmental think tank Agora Energiewende.

"We will find ways to achieve our 40 percent target by 2020 -- that I can promise you," said Merkel in a Sept. 14 campaign speech that suggested a willingness to cap coal's future in Germany.

India's Modi Starts $2.5 Billion Plan to Grow Electricity Access

Posted September 25, 2017, 02:17 P.M. ET

By Rajesh Kumar Singh

India's Prime Minister Narendra Modi unveiled a 163.2 billion-rupees ($2.5 billion) program to ensure electricity for all households.

The program will help poor people get electricity connections at no cost, Modi said, adding that his government is making efforts to provide power to about 3,000 unelectrified villages. Power Minister R. K. Singh said the nation will aim to complete electrification of all households ahead of a March 2019 deadline.

The announcement comes amid concerns over a slowing economy, which has led the government to consider measures to boost growth. Modi came to power in 2014 with popular promises such as job creation and electricity for all and will be tested on the pledges in 2019, when he faces re-election.

"Power for all is a very ambitious plan and the prime minister knows the political gains it can bring if he can pull it off," said Sandeep Shastri, a political analyst and a pro vice chancellor at Jain University in Bengaluru. "So, when he announces schemes to connect all households, beyond a shadow of doubt he has the 2019 elections in mind."

Nearly 304 million Indians don't have access to electricity, accounting for about a quarter of the global population living without power, according to NITI Aayog, a government think-tank. Several of these are in rural areas, where state power retailers are reluctant to supply electricity as returns fall below the investment made in infrastructure.

Dubai Introduces Incentives to Spur Electric Vehicle Market

Posted September 25, 2017, 01:39 P.M. ET

By Matthew Kalman

Electric-car drivers in Dubai will enjoy free parking, recharging, vehicle registration, and toll exemptions until the end of 2019, the Dubai Supreme Council of Energy announced.

The incentives are designed "to encourage the public use of electric vehicles in Dubai to help protect the environment," said Mohammed Al Tayer, vice chairman of the energy council and managing director/chief executive officer of the Dubai Electricity and Water Authority.

The move is part of the Dubai Green Mobility initiative to motivate organizations to use more hybrid and electric vehicles to help reduce carbon emissions in ground transportation, which is the second-largest greenhouse gas emitter in Dubai, according to Al Tayer.

Additions to Government Fleet

At least 10 percent of the new cars that Dubai's government institutions buy between 2016 and 2020 will be electric or hybrid, helping to raise the proportion of such vehicles to 2 percent by 2020 and 10 percent by 2030.

"This supports the Dubai Clean Energy Strategy 2050 for Dubai to have the lowest carbon footprint in the world by 2050, and the Dubai Carbon Abatement Strategy to cut carbon emissions by 16 percent by 2021," Al Tayer added.

Abu Dabi currently has 100 public electric vehicle charging stations, with 100 more planned in 2018. Electric or hybrid cars are distributed by Tesla, BMW, Renault, and Toyota. The sector grew by 30 percent from 2014 to 2016, Al Tayer said. The incentives could save the average driver commuting daily to Dubai's business district, charging and parking for free and using the Salik toll gates more than 10,000 dirhams (about $2,722) each year, said Nabeel Alzaka, co-founder and CEO of Surface Mobility Consultants in Dubai.

"There is an appetite for electric vehicles, particularly now that car manufacturers are becoming a little bit more inventive," Alzaka said by phone Sept. 24, noting that some electric models, like the BMW i8 now in service with the Dubai police, matched in looks and performance the high-end supercars popular in the Emirates.

"These cars are as fast as Lamborghinis and Ferraris. They are as glitzy and as glamorous," he said. "The car manufacturers are heading toward providing those fast supercars the Dubai market will want. Will that ever eradicate Ferraris and Lamborghinis? I don't think so. People will still want to have the gas-guzzlers and the sound of the engines but I think you'll find people will swap their petrol cars for a nice, shiny, sparkling electric vehicle."

Subject: Today on Climate Beat

August 11, 2017

Today on Climate Beat . . .

. . . we took a trip to the Bay State, where environment regulators finalized a comprehensive suite of rules to reduce greenhouse gas emissions from multiple sectors -- as required by an executive order that Gov. Charlie Baker (R) signed last September.

Out West, California Attorney General Xavier Becerra (D) is taking EPA to court for allegedly missing deadlines under the Freedom of Information Act to respond to a request the state filed in April seeking documents related to whether EPA Administrator Scott Pruitt has complied with federal ethics laws.

Speaking of Pruitt, in a recent interview with an Iowa radio station, he tamped down calls from producers of low-carbon advanced and cellulosic biofuels that EPA might increase proposed blending mandates for the fuels under the Renewable Fuel Standard in 2018.

In our daily news roundup, we brought you news of a recently released National Oceanic and Atmospheric Administration (NOAA) report finding 2016 was a record-breaking year in terms of global warming trends.

And don't miss some of our must-read stories from the week, including news from the courts on the Clean Power Plan, the related new source power plant rule and more.

EPA Announces Intention To Nominate Members To Three Important Federal Advisory Committees

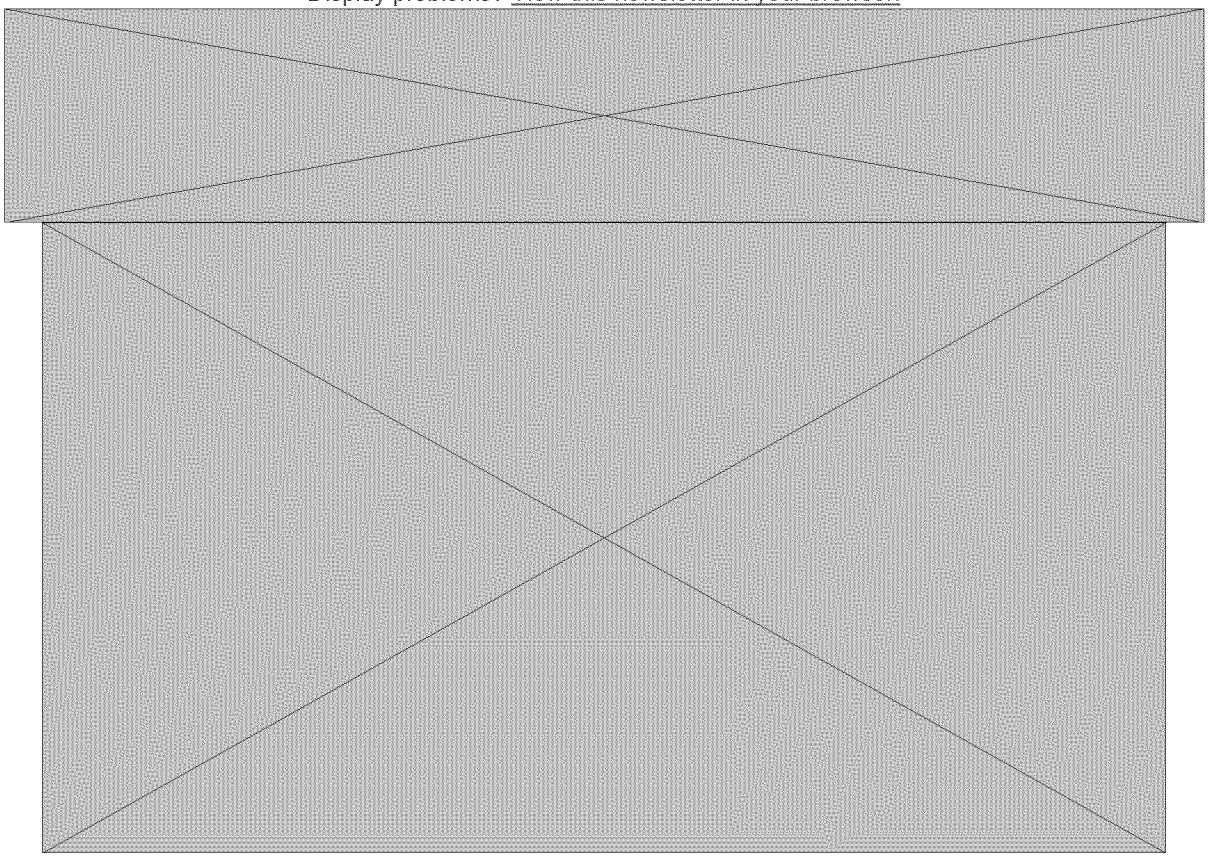
WASHINGTON (November 3, 2017) – Today, Environmental Protection Agency (EPA) Administrator Scott Pruitt announced his intention to appoint members who will serve on the Board of Scientific Counselors (BOSC), the Clean Air Science Advisory Committee (CASAC) and the Science Advisory Board (SAB).

"To ensure that EPA is receiving the best independent scientific advice, I am appointing highly-qualified experts and scientists to these important committees," **said EPA Administrator Scott Pruitt**.

In a fair, open, and transparent fashion, EPA reviewed hundreds of qualified applicants nominated for these committees. Members who will be appointed include experts throughout the environmental stakeholder community, including from NGOs, academia, industry, and state, tribal and local officials. The makeup of the membership speaks to EPA's commitment to science and openness to expertise from a diverse array of perspectives. Those nominees willing to serve have committed to remaining financially independent from EPA grants during their tenures.

Federal Advisory Committees (FAC) members that will serve on the BOSC can be found here.

Federal Advisory Committees (FAC) members that will serve on the CASAC can be found here.



Federal Advisory Committees (FAC) members that will serve on the SAB can be found here.

Subject: POLITICO's Morning Energy: Irma batters Florida with massive flooding, electric outages — EPA's climate adaptation work continues — Elliott tapped for PHMSA chief

By Anthony Adragna | 09/11/2017 10:00 AM EDT

IRMA WALLOPS FLORIDA: It may take days to fully understand the scale of the damage, but the catastrophic Hurricane Irma hammered Florida throughout Sunday just days after Texas bore the brunt of Hurricane Harvey. Millions of people were without power (latest estimates had around 3.5 million customers without electricity) and Acting Homeland Security Secretary Elaine Duke told the Miami Herald many could be without power for weeks in the storm's aftermath. Florida Power & Light CEO Eric Silagy said in a statement late Sunday that an "extensive rebuild" of Florida's west coast electric grid would leave customers without power for extended periods.

EPA said ahead of landfall it had completed rapid assessments of 90 Superfund sites in Florida and would ensure any impacted site would be inspected as soon as it's safe to do so. Sen. Marco Rubio told the Associated Press on Sunday agency officials were "generally positive" about the security of Superfund sites during the hurricane, but "they can't guarantee it 100 percent," he added. EPA Administrator Scott Pruitt also allowed three Tampa Electric Company facilities and several Monroe County units to operate without meeting all air pollution controls in an attempt to ensure a steady stream of electricity.

TIME TO DISCUSS CLIMATE CHANGE? Bucking prominent Trump administration officials like Energy Secretary Rick Perry and Pruitt, Miami's Republican mayor said Saturday it's "the time" to discuss climate change and what can be done about the problem, The Miami Herald reports. "This is the time to talk about climate change," Mayor Tomás Regalado said. "If this isn't climate change, I don't know what is. This is a truly, truly poster child for what is to come."

McCain agrees: Speaking on CNN's "State of the Union" on Sunday, Sen. John McCain said it was time to sit down and discuss potential solutions. "There [are] things happening with the climate in the world that is unprecedented," he said. "We have to understand that the climate may be changing and we can take common sense measures which will not harm the American people."

Quotable: In response to Pruitt's comments that discussing climate change during hurricanes is "insensitive," climate hawk Sen. Brian Schatz tweeted: "Every Senate R except for one voted for Pruitt. The Republican Party is refusing moral and political responsibility for the planet itself."

IT'S MONDAY EVERYONE! I'm your host Anthony Adragna, and 39 states (more than ME would've thought) have had a lawmaker serve as president pro tempore in the Senate. For today: Who is the longest-serving Speaker of the House in U.S. history? Send your tips, energy gossip and comments to aadragna@politico.com, or follow us on Twitter @AnthonyAdragna, @Morning_Energy and @POLITICOPro.

CLIMATE ADAPTATION WORK TRUDGES ON: Staffers working on climate adaptation at EPA continue those efforts even though the four people working on that matter were moved to different offices a few months ago, Pro's Emily Holden reports . "Unequivocally, the Office of Policy continues to support work on climate adaptation," said Joel Scheraga, a veteran EPA employee and the agency's senior adviser for climate adaptation. "The bottom line is that climate adaptation work continues." Even though Pruitt has put many climate change initiatives on ice, Scheraga said EPA is still available to work with state and local leaders who want to prepare for the effects of climate change, including heavy rains, more intense hurricanes and sea-level rise.

An agency spokesman, Jahan Wilcox, said the reorganization "occurred in the spring and allowed these four employees to continue their work on climate change adaptation within the Office of Policy," which is run by Samantha Dravis, a top aide to Pruitt. The four work within the Office of Regulatory Planning and Management and the National Center of Environmental Economics.

MORE EPA AMENDMENTS COMING: Hurricane Irma prompted House Majority Leader Kevin McCarthy to scrap votes scheduled for today, but lawmakers will vote on lingering EPA and Interior amendments to an eight-title spending package H.R. 3354 (115) this week. Before breaking last week, votes were ordered on amendments barring EPA from enforcing its methane rule, prohibiting the use of the social cost of carbon in regulations, blocking the closure of any EPA regional offices and slashing agency appropriation by $1.87 billion.

INVESTIGATIONS GALORE! Confirmation came late Friday that a bunch of Trump administration actions were under review by watchdogs. Among them:

1. **Zinke's call to Alaskans:** GAO said it would issue a legal opinion about Interior Secretary Ryan Zinke's calls to Alaska Sens. Lisa Murkowski and Dan Sullivan over their Obamacare repeal votes, Pro's Alex Guillén reports, citing letters released Friday. Zinke allegedly told both lawmakers that Murkowski's vote against moving ahead on healthcare repeal efforts could negatively impact Alaskan energy goals in the Trump administration.

2. **Interior's staff reshuffle:** Interior's inspector general confirmed it would look into Zinke's June reassignment of a number of senior executive staff, Pro's Esther Whieldon reports. Among of the dozens of staff moves under review is Zinke's decision to transfer Joel Clement from a managerial position involving climate change issues to a job collecting royalties from oil and gas companies.

3. **Hiring practices for political appointees:** GAO has also agreed to look into the hiring practices of various political appointees at EPA and the White House Council on Environmental Quality, as well as whether those officials are complying with ethics requirements, two senior Environment and Public Works Committee Democrats said Friday. "When an agency can just ignore those rules-and congressional oversight-the result often leads to corruption and scandal," Sens. Tom Carper and Sheldon Whitehouse , who requested the probe, said in a statement. "We're grateful that GAO will let us know what EPA hasn't."

AT LONG LAST, PHMSA CHIEF PICKED: Late Friday night, the White House announced its selection of Howard "Skip" Elliott to run the Pipeline and Hazardous Materials Safety Administration, Pro Transportation's Tanya Snyder reports . He's a 40-year veteran of the U.S. freight rail industry and currently vice president of public safety, health, environment and security for CSX Transportation in Jacksonville, Fla. Elliott's portfolio includes hazardous materials transportation safety, crisis management, and environmental compliance. He received a lifetime achievement award from the Association of American Railroads for his work on hazardous materials transportation safety.

ICYMI: Fears are growing among the solar industry that a forthcoming trade commission ruling - and Trump's increasing frustration with advisers recommending a cautious approach to trade - could result in steep tariffs being set on shipments of solar equipment into the country that could stunt the industry's rapid growth, Pro's Esther Whieldon, Eric Wolff and Andrew Restuccia report. The U.S. International Trade Commission rules later this month on the complaint from solar manufacturers Suniva and SolarWorld USA and, if it finds damage, would send the matter over to the White House for a final decision.

Key takeaway: A senior administration official said Trump is very likely to support tariffs against the solar imports if the ITC sends the complaint over to 1600 Pennsylvania.

Meanwhile, the sector boasted its largest second quarter ever with 2,387 megawatts of solar photovoltaic systems installed, according to the Solar Energy Industries Association's latest report. That's more than quarter one of 2017 and represents a eight percent year-over-year increase.

MAIL CALL! REVERSE COURSE ON CLIMATE PREPAREDNESS: Carper, top EPW Democrat, sent a letter to Trump Friday urging him to reinstate several previously canceled Obama-era initiatives on climate preparedness. "While our country debates how to address climate change, rising sea levels and extreme weather events are no longer a matter of debate, becoming the new norm and placing extreme burdens on the American people and economy," Carper wrote. Among his requests: Reinstate the requirements that federally funded projects be required to take flood risks under consideration and hold a "red team-blue team" exercise on preparedness rather than climate science.

EYEING AN EXIT? Tucked away in a New York Times report on how Trump's rattling Republicans ahead of the midterms comes the tidbit that Rep. Fred Upton, chairman of the House Energy and Commerce Energy Subcommittee, "may retire or run for the Senate." Upton has been one of the most visible faces on energy policy in the House. He later emailed Jonathan Martin, the Times reporter, to say he was eyeing the Senate seat now held by Sen. Debbie Stabenow. ME can't wait for the Upton v. Kid Rock primary.

WATCH THIS SPACE: Wednesday marks the deadline for EPA and environmental challengers to suggest expedited briefing schedules in the lawsuit over Pruitt's delay of the chemical safety rule, Pro's Alex Guillén reports in Energy Regulation Watch. That comes even as the U.S. Court of Appeals for the D.C. Circuit declined to immediately reinstate the rule in the aftermath of Hurricane Harvey. And, ICYMI, Trump picked Gregory Katsas, currently a deputy

counsel at the White House, for the open slot of the D.C. Circuit left open recent retirement of Judge Janice Rogers Brown.

THIS SEEMS TIMELY: The National League of Cities and the Environmental and Energy Study Institute are holding a briefing today at 3 p.m. in Cannon 122 to hear what various cities around the U.S. are doing to invest in resiliency. Speakers include Pittsburgh Mayor Bill Peduto.

IT'S TIME TO RECTIFY: Germany's automobile industry must "rectify the mistakes" exposed in its Dieselgate emissions scandal but there's still a robust future for the sector, Chancellor Angela Merkel said in a podcast Saturday, POLITICO Europe's Kalina Oroschakoff reports . "We've experienced a major loss of trust in the car industry," Merkel said. "But at the same time, we also know that the car industry is an important pillar of our economic success, as well as of our reputation as an export nation, and the quality label 'Made in Germany.'" With just two weeks to go until the German elections, Merkel is trying to walk the fine line of chastising the industry for its failure in the emissions cheating scandal without alienating the hundreds of the thousands of workers in the sector.

THIS SEEMS LIKE A BIG DEAL: China has begun the preliminary research into eventually banning the sale of all fossil fuel powered vehicles, the BBC reports. "Those measures will certainly bring profound changes for our car industry's development," Xin Guobin, the country's vice minister of industry, said. China has not said when the ban might go into effect.

Subject: Morning Media: Trump's newsy briefings with the press pool -- CNN fires Jeffrey Lord -- James Benet to testify in Sarah Palin lawsuit

By Hadas Gold | 08/11/2017 06:04 AM EDT

With Cristiano Lima and Alex Weprin

PRESIDENT DONALD TRUMP SPOKE TWICE WITH THE PRESS YESTERDAY, his most extensive back and forth with the media since his February press conference. Granted, it was with the press pool so it was a limited group that was with the president at his Bedminster golf club. But aside from the interviews he's had with select outlets, it's progress. Maybe a full White House press conference will be coming soon.

It was a newsy few minutes in both instances, where Trump stepped up his rhetoric about North Korea, further slammed House Majority Leader Mitch McConnell, declared an opioid national emergency and perhaps jokingly, thanked Vladimir Putin for kicking out American diplomats. Kellyanne Conway told the Washington Post that "Trump in recent days has been restless to share his thoughts on what she termed 'one of the juiciest, newsiest periods of his presidency."

"Folks, for a president who hasn't done a full press conference since Feb, today's 2 avails were very lengthy, many many questions answered," The Post's Phil Rucker tweeted shortly after the second pool spray.

Good morning, happy Friday and welcome to Morning Media! Until Aug. 16 you can reach me at hgold@politico.com / and forever more at @Hadas_Gold. Morning Media is edited by **Alex Weprin** (@alexweprin / alexweprin@gmail.com) and produced with writing/reporting help from **Cristiano Lima**. (clima@politico.com / @ludacristiano). **Archives**. Subscribe.

BREITBART'S CONTINUED ATTACKS ON H.R. MCMASTER ARE STARTING TO BACKFIRE ON STEVE BANNON , via my colleague Tara Palmeri: "The attacks on McMaster have put Bannon in an especially awkward position with his new boss, retired Marine general John Kelly, who has been increasingly defensive of McMaster, a longtime friend and fellow general, according to interviews with 10 administration officials and people close to the White House. McMaster, who pushed Bannon off the National Security Council principals' committee, hasn't spoken to Bannon in weeks, one senior administration official said .... In June, Trump started telling aides that he suspected that Bannon was a source of negative stories, according to aides. After a slew of stories about Bannon "winning" policy wars in the White House-like Trump's decision to pull out of the Paris climate accord-the president told Bannon to "knock it off," according to the senior administration official." Read the full piece here.

CNN FIRES JEFFREY LORD AFTER NAZI SALUTE CONTROVERSY via Cristiano Lima: The channel announced Thursday it was parting ways with one of its original pro-Trump pundits after he tweeted "Sieg Heil!," an oldtime Nazi salute, at Media Matters president Angelo

Carusone, whom Lord had denounced as a "fascist." Lord, whose heated exchanges with other CNN commentators and anchors have repeatedly gone viral, said the tweet was a misunderstanding in a phone call prior to the dismissal. "I love CNN, but I feel they are caving to bullies here," he told the TV news outlet. CNN, however, was swift to respond: "Nazi salutes are indefensible," a CNN spokesperson wrote in a statement. "Jeffrey Lord is no longer with the network." Lord's departure marks the second prominent pro-Trump personality to leave the channel this week, with analyst Kayleigh McEnany announcing she's taking a role at the RNC. McEnany also recently hosted a "Trump TV" video on one of Trump's Facebook pages.

-- Right-wing pundits are standing by Lord, with other avid Trump supporters like Mike Cernovich and Sean Hannity leading the charge. "Media smears Jeffrey Lord for making 'Nazi gesture' when he was clearly satirizing the left," Cernovich tweeted Thursday. Hannity later seemed to chime in as well: "How sad in America that only conservatives get investigated, fired, boycotted and attacked." But don't expect to see Lord joining Hannity over at Fox News. A spokesperson tells POLITICO they "have no plans to hire him." Read more here.

BILL O'REILLY TO MAKE CNN DEBUT, by Alex Weprin: Former Fox News host Bill O'Reilly is joining CNN... well, at least for one interview. O'Reilly will appear on Michael Smerconish's CNN program sometime in September. The appearance will be part of a promotional campaign for O'Reilly's next book in the "Killing" series, "Killing England," which will hit bookshelves next month. O'Reilly has often appeared on other channels while promoting his books, though he has never appeared on CNN before.

N.Y. TIMES EDITORIAL PAGE EDITOR JAMES BENNET TO TESTIFY IN SARAH PALIN DEFAMATION SUIT: Big development in the lawsuit the former Alaska governor brought against the Times. If you don't recall the details: Palin brought the suit following an editorial which mistakenly tied an ad from Palin's PAC to the attack on former Arizona Rep. Gabrielle Giffords in 2011, an attack that saw six others killed. The paper later issued a correction to the editorial. According to The Hollywood Reporter, which calls the move "unusual," the judge in the case said he needs to hear from the paper's editorial writer(s) to decide whether the lawsuit should move forward. At issue is whether the editorial writer(s) were aware of previous reports in the New York Times that contradicted the allegedly false statements made in the editorial -- that would help prove "actual malice." A Times spokesperson said "We've seen the order and will be providing the testimony that the judge has ordered," later adding that they have designated editorial page editor James Bennet as the witness who will testify.

THE STORY BEHIND THE SETH RICH STORY, by Alex Weprin: In a detailed story, CNN's Oliver Darcy tries to figure out what happened leading up to the now-retracted story about Seth Rich that ran on Foxnews.com earlier this year. Darcy reports that the reporter who wrote the story for Fox News was blindsided by a report on the case from the D.C. Fox affiliate. Ultimately, her story was not vetted in the process it normally would have been if it had not been rushed to publication. You can read the whole thing here.

-- NPR's David Folkenflik adds some context, arguing that the CNN story "has some significant blind spots." "For one thing, Fox News has no conventional 'standards and practices'

office. Doesn't exist," Folkenflik tweeted. You can read his tweetstorm here.

DRUDGE CHANGES HIS LOOK: For those of us obsessives who follow Matt Drudge's every move (I once climbed over chairs at one of the presidential debates to talk to him, only to have him firmly push my recorder out of the way) the last few days of the Drudge Report's black and white-only look have been... sort of ominous, especially because it started with a photo of Kim Jong Un and a missile. But Drudge himself told Mike Allen "We have clearly entered a historic era. It's feeling like The Roaring 20's this autumn with tech valuations at such hysterical heights. The socials, like Instagram Live, are alive with the spirit of Warhol. The sound of the atom splitting is looming over Korea. What's old is new. So, black and white and read all over!"

LIVE FROM NEW YORK, IT'S SPICEY! By Alex Weprin: According to US Weekly, former White House press secretary Sean Spicer "is angling" to secure a cameo on NBC's "Saturday Night Live" when it returns from its summer hiatus. Spicer, of course, was immortalized on the program by actress Melissa McCarthy, whose uncanny impression of him earned herself an Emmy nomination.

MORE ON BUZZFEED AND TWITTER'S LIVE MORNING SHOW: A day after Facebook announced their relaunched video content platform, Twitter and BuzzFeed unveiled "AM to DM," their social media spin on the traditional early morning TV show. "BuzzFeed News reporters, editors, and special guests will take viewers through the day's top stories, bringing headlines from BuzzFeed News reporters all over the world," the outlet said in a release . The hosting team will feature books editor Isaac Fitzgerald and executive editor of culture Saeed Jones and be produced by Cindy Vanegas-Gesuale, a CNN, Fox News and HuffPost vet. The show, the concept of which was released in May, will premiere Sept. 25. Read on here.

REVOLVING DOOR:

-- Adam Ostrow, previously chief strategy officer at Mashable, is joining TEGNA as chief digital officer. [Variety]

-- Alison Smale, a veteran New York Times editor and correspondent, is joining the United Nations as under secretary general for global communications [New York Times]

-- Morris Publishing Group has been purchased by New York-based New Media Investment Group. The Savannah Morning News, Juneau Empire, the Topeka Capitol-Journal and others will soon be added to subsidiary GateHouse Media's portfolio of daily newspapers. [AdWeek]

SOUNDBITE: "I want to thank him because we're trying to cut down on payroll, and as far as I'm concerned, I'm very thankful that he let go of a large number of people, because now we have a smaller payroll," [President Trump, speaking about Vladimir Putin kicking out American diplomats]

TIL: You can be arrested in Turkey just for what your T-shirt says. [POLITICO Magazine]

EXTRAS:

-- The nonstop focus on Trump by the cable networks has meant stories around the country are getting less airtime. [Washington Post]

-- Facebook and the James W. Foley Legacy Foundation are partnering to teach journalists and students how to keep themselves safe online and in the field. [James Foley Legacy Foundation]

-- Mexican journalists, facing threats of violence and forced to flee their homes and jobs, confront their biggest fear: Uncertainty. [Nieman Lab]

-- An executive at HBO allegedly offered the hackers that broke into its systems $250,000 as a "bug bounty payment." [THR]

-- Megyn Kelly threw out the first pitch at a minor league baseball game in Durham, NC. [The News & Observer]

-- Talk about timing! The next episode of CBSN On Assignment will see correspondent Vladimir Duthiers traveling to Guam, South Korea and Hawaii to talk to troops about responding to North Korea. [CBS News]

-- Another look at the women of the alt-right. [Harper's]

-- MSNBC host Joy Reid gave a shoutout to MSNBC exec Yvette Miley for receiving the 2017 Chuck Stone Lifetime Achievement Award at the NABJ Salute To Excellence Awards Gala. [MSNBC]

-- Education Secretary Betsy DeVos reached a milestone of sorts: She was finally interviewed by reporters. [Poynter]

Correction: A previous version of Morning Media said, citing a tweet from Esquire's former executive features editor, that Esquire is ending its digital features program. But a Hearst spokesperson told me that "Esquire, nor any of Hearst Magazines Digital Media's properties, have stopped commissioning and publishing feature stories."

Subject: POLITICO's Morning Score: West Virginia Gov. Justice switches from Democrat to Republican — Club for Growth jumps into primary to replace Chaffetz — Senate Conservatives Fund endorses Brooks

By Daniel Strauss | 08/04/2017 10:00 AM EDT

With Zach Montellaro, Elena Schneider, Scott Bland and Maggie Severns

The following newsletter is an abridged version of Campaign Pro's Morning Score. For an earlier morning read on exponentially more races - and for a more comprehensive aggregation of the day's most important campaign news - sign up for Campaign Pro today. (http://www.politicopro.com/proinfo)

MOUNTAINERS ARE ALWAYS FREE - "West Virginia Democratic governor switches to GOP," by POLITICO's Matthew Nussbaum, Gabriel Debenedetti, and Daniel Strauss: "West Virginia Gov. Jim Justice is expected to announce a party switch in a surprise appearance with President Donald Trump in Huntington, W.Va., on Thursday, according to two sources ... Justice, who seldom worked with other Democrats, recently spent a well-publicized day hunting with Donald Trump Jr. - a familiar political optic in a largely rural state with a strong hunting tradition. But his move still blindsided his old party, which is now left with control of just only 15 governors mansions. Rumors that Justice was going to make the switch circulated throughout the day but West Virginia Democrats and multiple national Democrats who have worked for Justice in the past said he gave them no advance notice on the party switch."We are sitting here in our office, everyone of us that is capable standing on two feet, looking at each other saying, 'oh my goodness, did anybody see this coming?" said Steve Roberts, president of the West Virginia Chamber of Commerce." **Full story.**

- MANCHIN STATEMENT: "I have been and always will be a proud West Virginia Democrat. I am disappointed by Governor Justice's decision to switch parties. While I do not agree with his decision, I have always said that I will work with anyone, no matter their political affiliation, to do what is best for the people of West Virginia."

MORE WEST VIRGINIA - "Senate Leadership Fund launches digital campaign vs. Manchin," by Campaign Pro's Kevin Robillard: "Senate Leadership Fund, the deep-pocketed GOP super PAC, is launching a digital campaign attacking Democratic Sen. Joe Manchin ahead of President Donald Trump's visit to West Virginia tonight. The campaign will direct voters to a website labeling Manchin "The Joe You Don't Know," which notes Manchin voted against repealing Obamacare and has voted against 60 percent of Trump's judicial nominees. It's the first of what will be a slew of attacks aimed at pitting the former governor and second-term senator against Trump, who is ultra-popular in the state." **Full story.**

NEW THIS MORNING - EMILY's List endorses Andrea Ramsey: EMILY's List is backing Andrea Ramsey in KS-03, one of several Democrats jockeying to take on GOP Rep. Kevin Yoder, per a statement from the group. Hillary Clinton won the district in 2016, putting it atop

the list of Democratic targets.

I LIKE MIKE - Pence to keynote Koch summit: Vice President Mike Pence will address Americans for Prosperity's annual summit, which is set for Aug.19 in Richmond, Va. The summit offers AFP volunteers a chance to network, attend trainings and hear from a battery of speakers. This year's summit will have a focus on tax reform, the Koch network's main focus heading into fall.

CASH FLOW - Super PACs prep for Aug. 15 special primaries: Senate Leadership Fund raised over $1.5 million in 26 days in July, mostly via a $1 million check from Steven A. Cohen and $250,000 from Phil Ruffin, as it spends heavily to back Sen. Luther Strange in the fast-approaching Alabama Senate special GOP primary. In Utah, where three Republicans are competing in a primary for former Rep. Jason Chaffetz's old 3rd District, Tanner Ainge's mother Michelle gave $250,000 to the super PAC backing him, Conservative Utah . And the Club for Growth transferred $130,000 to National Horizon, which has been backing Republican Chris Herrod.

- AIR WAR - The Club for Growth reserved TV airtime in UT-03, a race the conservative group hasn't formally endorsed in yet. A TV tracking source said the ad buy, worth $90,000, will start Monday. "It's not surprising to learn John Curtis is nervous about voters discovering his long record of supporting tax hikes, but we have no formal announcement today," Rachael Slobodien, a spokeswoman for the Club said in a statement.

Days until the 2017 election: 95.

Days until the 2018 election: 459.

Thanks for joining us. You can email tips to the Campaign Pro team at sbland@politico.com, eschneider@politico.com, krobillard@politico.com, dstrauss@politico.com and mseverns@politico.com.

You can also follow us on Twitter: @politicoscott, @ec_schneider, @politicokevin, @danielstrauss4 and @maggieseverns.

DAILY WAR EAGLE - "One of Mo Brooks' endorsers is also his chief of staff" by AL.com's Howard Koplowitz: "Among the endorsements U.S. Senate candidate Mo Brooks received on Wednesday was the backing of Mark Pettitt, who identified himself at the event at Hoover Tactical Firearms as an Alabama Strike Force member "who has been a beneficiary of Mo's help." But Pettitt is also Brooks' chief of staff -- and defended omitting his title at the event in an interview with AL.com on Thursday. "We don't like to mix official office with campaigns," Prewitt said. "What I do on my day job is supposed to be independent of what I do on my campaign time." **Full story.**

- MORE ALABAMA - The National Rifle Association of America Political Victory Fund is spending $43,117 in radio ads in support of Sen. Luther Strange according to independent expenditure filings on Aug. 2.

- EVEN MORE ALABAMA - "Senate Conservatives Fund endorses Brooks," by Campaign Pro's Daniel Strauss: "The anti-incumbent conservative outside group Senate Conservatives Fund has endorsed Rep. Mo Brooks, less than two weeks before Alabama's special Senate primaries. Brooks is one of almost a dozen challengers to incumbent Sen. Luther Strange, who was appointed earlier this year to fill Attorney General Jeff Sessions' old seat ... "We're also proud to help defend Mo Brooks against the false attacks being made by Senator Mitch McConnell and his political machine," SCF President Ken Cuccinelli said in an email to supporters announcing the endorsement." **Full story**.

CROWDED HOUSE PRIMARY, GOP EDITION - NV-03: Tons of Democratic candidates are piling into House primaries around the country, but Nevada Republicans clearly see an opportunity in Democratic Rep. Jacky Rosen's seat, which she's leaving open to run for Senate. Via the Nevada Independent's Riley Snyder: "[F]ormer Assemblywoman Victoria Seaman. Seaman, who lost a key state Senate bid by a little more than 1,000 votes in 2016, said on Wednesday that she's jumping in the race ... Seaman repeatedly expressed her desire to help carry out President Donald Trump's agenda on everything from immigration policy to repealing the Affordable Care Act, noting that the state's 3rd Congressional District narrowly swung to Trump." **Full story.**

STAFFING UP - Republican Ohio Senate candidate Mike Gibbons added Matt Wills as a political adviser and Chris Schrimpf as senior communications adviser. Wills previously worked for Lt. Gov. Mary Taylor and was executive director of the Missouri Republican Party, while Schrimpf was a top staffer on Gov. John Kasich's 2016 presidential campaign and worked for Missouri Gov. Eric Greitens last year as well.

RECESS ADS - American Bridge attacks 15 House Republicans in digital ads: "American Bridge is launching digital ads that will air throughout the August recess attacking 15 House Republicans on their health care votes. The ads, which will target swing voters through Labor Day, will go after incumbents, including: Reps. Jack Bergman, Tim Walberg, Fred Upton, Mike Bishop and Dave Trott in Michigan; Reps. Mario Diaz-Balart and Brian Mast in Florida; Reps. Mike Gallagher and Paul Ryan in Wisconsin; Rep. Barbara Comstock in Virginia; Rep. Martha McSally in Arizona; Rep. Darrell Issa in California; Rep. Bruce Poliquin in Maine; Rep. Will Hurd in Texas; and Rep. Rod Blum in Iowa." **Watch the ad here. Full story.**

ALL ABOUT 218 - "Democrats begin to see Pelosi as a 2018 problem," by McClatchy's Alex Roarty: "Nancy Pelosi might actually be in trouble. In a survey of 20 Democratic House candidates, only one - a former Senate staffer from Orange County, California - would state support for the congresswoman staying on as leader of the House Democratic Caucus. Of the rest, 18 declined to say if Pelosi should keep her job, while one, a political newcomer from a culturally conservative Ohio district, said he would vote for someone other than Pelosi." **Full story.**

CODA - QUOTE OF THE DAY: "I can't help you anymore being a Democrat governor ... So tomorrow, I will be changing my registration to Republican." - West Virginia Gov. Jim Justice, who said in May that the health care bill Trump backed would "cripple" his state, explaining his

party switch alongside Trump before a crowd in Huntington.

Subject: Playbook Power Briefing, presented by the Coalition for Affordable Prescription Drugs (CAPD): TRUMP retweets cartoon of train running over personification of CNN, someone calling him a fascist -- DoJ wants 1.3 million IP addresses from anti-Trump site

View online version | Add politicoplaybook@politico.com to your address book.

Today's Playbook Power Briefing presented by the Coalition for Affordable Prescription Drugs (CAPD)

By ANNA PALMER (anna@politico.com; @apalmerdc), JAKE SHERMAN (sherman@politico.com; @JakeSherman), DANIEL LIPPMAN (daniel@politico.com; @dlippman), ZACH MONTELLARO (zmontellaro@politico.com; @ZachMontellaro)

Good Tuesday afternoon. THE STORY EVERYONE IS TALKING ABOUT -- MCKAY COPPINS on **A.J. DELGADO -- "From Trump Aide to Single Mom:** Last November, A.J. Delgado played a vital role on a winning campaign. Then everything fell apart:" http://theatln.tc/2uFPSVs

FROM TRUMP TOWER -- @realDonaldTrump at 11:21 a.m.: "For every CEO that drops out of the Manufacturing Council, I have many to take their place. Grandstanders should not have gone on. JOBS!"

-- @ScottPaulAAM, president of the Alliance for American Manufacturing, at 11:37 a.m.: "I'm resigning from the Manufacturing Jobs Initiative because it's the right thing for me to do."

-- BY THE WAY, the irony is this council doesn't really do much.

THE PRESIDENT'S TWITTER ACCOUNT continues to be a source of controversy. This morning he retweeted a cartoon of a reporter adorned with the CNN logo being hit by a Trump Train. It was quickly removed from his Twitter feed. It is not the first time a tweet from the president's account has shown violence against the personification of CNN. He tweeted a video of himself tackling pro-wrestling icon Vince McMahon with a CNN logo superimposed over his head in July. ***The cartoon*** http://bit.ly/2uFKilT

-- Trump also retweeted Pizzagate conspiracy theorist Jack Posobiec (who also once tried to spread a hoax that anti-Trump protesters were shouting "Rape Melania") and retweeted (and deleted) a tweet from a Twitter user calling him a fascist, presumably by accident.

VALLEY TALK -- "DreamHost is fighting DoJ request for 1.3M IP addresses of visitors to anti-Trump protest site," by TechCrunch's Natasha Lomas: "Web hosting service DreamHost is fighting a Department of Justice demand to scoop up all the IP

addresses of visitors to an anti-Trump website. The website in question, disruptj20.org, organized participants of political protests against the current U.S. administration. Blogging about its objections to the warrant yesterday, DreamHost's general counsel describes it as 'a highly untargeted demand that chills free association and the right of free speech afforded by the Constitution'. ... In the warrant the DoJ demands that DreamHost hand over 1.3 million visitor IP addresses to the disruptj20.org website, along with contact information, email content, and photos of thousands of people." http://tcrn.ch/2uY7ZkA

VICE PRESIDENT MIKE PENCE is in Argentina, meeting with President Mauricio Macri. During joint remarks, Pence dodged a question on White House infighting, per pooler Phil Rucker of the Washington Post: "Pence was asked about the infighting back home at the White House and specifically the campaign to undermine National Security Adviser H.R. McMaster. Pence did not specifically answer the question, instead highlighting what he sees as progress and 'strong leadership' of Trump in his seven months as president. 'Our administration, now some seven months old, has seem America restore more than a million new jobs at home, but also what the world has seen under President Donald Trump is an American president who's once again embracing our historic role as leader of the free world without apology,' Pence said."

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)**: If you know only one fact about rising drug costs, know this one: drug makers set prices for prescription drugs. To help manage nearly double-digit price increases, employers, unions and government programs use PBMs to negotiate lower net prices to help curb costs for employers and patients. Learn more at affordableprescriptiondrugs.org ******

NOT JUST NUKES -- "North Korea's Trump card -- chemical weapons targeting American troops," by McClatchy's Stuart Leavenworth: "[T]here's at least one significant reason why U.S. military leaders would be reluctant to carry out such a strike: North Korea would surely retaliate, and this retaliation could include use of chemical weapons. 'Nuclear weapons are not the only threat,' said Kelsey Davenport, director of non-proliferation policy for the Arms Control Association. 'North Korea could respond to a U.S. attack using chemical weapons. That would be devastating.' North Korea is known to have compiled large stockpiles of nerve agents such as sarin and VX. It could fire these from hidden artillery and missile sites, targeting U.S. military bases in the region and cities such as Seoul and Tokyo." http://bit.ly/2uYkrAR

MUST WATCH REPORT -- Vice News' Elle Reeve has a great report from Charlottesville that aired last night on "Vice News Tonight." She has exclusive interviews with white nationalist leaders including Chris Cantwell and David Duke and Charlottesville residents who were protesting the white nationalists and neo-Nazis. http://bit.ly/2uFETeG

MARK YOUR CALENDARS -- "Paul Ryan to hold televised town hall next week," by the Wisconsin State Journal's Mark Sommerhauser: "House Speaker Paul Ryan will hold a televised town hall meeting with constituents live from Racine next week on CNN,

his office has announced. The town hall will be at 8 p.m. Monday, Aug. 21, according to a release from Ryan's office. It will be hosted by CNN's Jake Tapper and held at the Racine Theater Guild." http://bit.ly/2uFJWLY

TODAY'S BEYOND THE BELTWAY -- Illinois' first lady has increased behind-the-scenes role -- California braces for far-right rallies http://politi.co/2uXQQaX

ANOTHER MOVIE TRAILER AD -- Democrat Boyd Melson, a retired boxer and West Point graduate, announced he was running for Congress in New York's 11th district with a splashy new ad. The district is currently represented by Rep. Dan Donovan (R-N.Y.), who won his election in 2016 by over 25 points. The ad comes from Hilltop Public Solutions, the same firm that produced the viral ad for Randy Bryce, the Democratic iron worker challenging Speaker Paul Ryan. ***Melson's ad*** http://bit.ly/2uYOOXT

GOOD USE OF FOIA -- "Did the mayor of New York assassinate a groundhog, and other shocking revelations from the #Groundhoghazi emails," by Matthew Guariglia in Muckrock http://bit.ly/2uY8lYB

HOLLYWOODLAND -- "Greg Berlanti, Martin Gero Team for Political Drama at NBC," by Hollywood Reporter's Lesley Goldberg: "Greg Berlanti and Martin Gero are getting political. The 'Blindspot' duo have scored a hefty put-pilot commitment from NBC for drama 'Republic.' The project is described as a hopeful political drama that follows the newly minted female chief of staff to a moderate Republican president. With their administration in dire crisis, they find themselves under fire from extremists on both sides, defending their well-intentioned actions both politically and legally." http://bit.ly/2i35OLD

MEDIAWATCH -- PLAYBOOK SCOOPLET: AMIE PARNES is now a political analyst for CNN. She will also remain at The Hill.

TRANSITIONS -- Brandon Shaw has started as director of corporate comms at ICM Partners after a few years at Fifteen Minutes PR. He also previously worked for the Obama White House. ... **Wendy Helgemo** has joined GWU as the inaugural director of its AT&T Center for Indigenous Politics and Policy. She was most recently senior adviser on Indian affairs to former Sen. Harry Reid (D-Nev.).

SPOTTED at the 50th birthday party last night at Old Ebbitt of Sean Miles, senior adviser to Florida Gov. Rick Scott: Loretta Solon Greene, George Gigicos, Brennan Hart, Nick Owens, Elizabeth Pinkerton, Geoff Smith, Lenwood Brooks, Elizabeth Rojas, Emily Murphy, Sarah Habansky, Ryan O'Dwyer, Ryan Eaton

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)** : The high prices that drug makers set for prescription drugs can put financial strain on patients, employers, unions and others who provide health care coverage to more than 50 percent of Americans. Pharmacy benefit managers negotiate the lowest net price for prescriptions on behalf of employers, unions and government programs. But, as list

prices - the starting point for those negotiations -- continue their nearly double-digit increases, the effects ripple throughout the system. The key to ensuring greater access and affordability lies in fostering greater competition. Facilitating faster reviews of generics and biosimilars, identifying off-patent drugs with little or no generic competition, and ending anti-competitive practices that keep safe, effective alternatives out of the market are also key to abating rising drug costs for patients. Learn more at affordableprescriptiondrugs.org ******

Subject: POLITICO's Morning Transportation: Self-driving car bill zooms through committee — TSA issues warning after Las Vegas shooting — Shuster gets a business aviation ally

By Brianna Gurciullo | 10/05/2017 10:00 AM EDT

With help from Tanya Snyder, Stephanie Beasley and Lauren Gardner

Morning Transportation will not publish on Monday, Oct. 9. Our next Morning Transportation newsletter will publish on Tuesday, Oct. 10.

THE AYES HAVE IT: The Senate Commerce Committee approved Wednesday its self-driving car bill (S. 1885 (115)). And, yes, the bill is just about cars - Sen. Jim Inhofe (R-Okla.) withdrew his amendment to include trucks . More than two dozen other amendments were adopted en bloc dealing with everything from data to child safety. Check out the full list here.

What's next? Chairman John Thune (R-S.D.) said the bill "could go standalone" to the floor, but could also hitch a ride on "some fast-moving vehicle at the end of the year that has broad shoulders," if differences with the House bill (H.R. 3388 (115)) can be worked out in advance. "We'll look for any opening and any legislative vehicle that might be out there that would give us an opportunity to advance it," he told reporters after the hearing. "I wouldn't rule any of those things out." Once it hits the floor, expect to see amendments to change everything from the balance of state and federal power to a potential mandate for a manual override in case of a technological malfunction.

Quote(s) du jour: "He said he's gonna shave his beard," Sen. Bill Nelson (D-Fla.) said about bill co-author Gary Peters (D-Mich.) when the committee approved the legislation. "It turned gray during the discussions here," Peters said. Here's a pic of said beard, courtesy of Reuters' David Shepardson.

IT'S THURSDAY: Thanks for tuning in to POLITICO's Morning Transportation, your daily tipsheet on all things trains, planes, automobiles and ports. Send tips, feedback and lyrics to bgurciullo@politico.com or @brigurciullo.

"Sat back with the window down / Eighty an hour and the radio loud / The same songs with the same old rhymes / Tell me to shake it off and swing from the lights."

GET LISTENING: Follow MT's playlist on Spotify. What better way to start your day than with songs (picked by us and readers) that are all about flying, driving, commuting and sailing?

MORE DOGS: The Senate Commerce Committee also on Wednesday approved a TSA reauthorization bill by voice vote, setting a five-year term for the administrator and increasing the use of canine units for passenger screening. In addition, the bill (S. 1872 (115)) encourages more adoption of new technologies and expands the law enforcement reimbursement program, which the Trump administration had proposed eliminating.

And more guns? Some Democrats, including Sen. Richard Blumenthal, objected to a Thune amendment to increase pilot access to firearms training, though the Connecticut senator said he did so "reluctantly" because it was "a lot more reasonable than other proposals that are out there." He said he was worried that the provision would give the administration more discretion to grow the number of pilots who carry guns and lower training requirements. "It could mean more guns on planes," he said.

ICYMI: The committee also approved by voice vote Howard "Skip" Elliott's nomination to be the head of PHMSA. The former CSX Transportation vice president of public safety, health and environment had his hearing on Sept. 27. Check out his questionnaire here and his responses to questions for the record from senators following the hearing here.

Cheat sheet: MT just bookmarked this Eno Center for Transportation page with the statuses of all outstanding DOT noms.

TSA ISSUES WARNING AFTER LAS VEGAS: TSA advised transportation hub operators to begin developing plans with their staff and security personnel at neighboring buildings to protect large crowds from incidents like the Las Vegas shooting, according to a memo obtained by POLITICO. The agency warned transportation industry officials that subway, rail, bus, cruise and ferry stations might be particularly vulnerable to similar attacks, given their tendency to attract mass gatherings.

SHUSTER GETS A BIZ AV ALLY: Rep. Bill Shuster (R-Pa.) is touting private airplane company NetJets' backing of his FAA reauthorization as many general aviation groups have urged lawmakers to reject his air traffic control proposal. "Current ATC personnel, while highly professional, face challenges outside their own control, including budget uncertainties and outmoded equipment and systems," NetJets executive Alan Bobo wrote in a letter to Shuster. "Such systemic challenges ultimately touch all aviation operations within U.S. airspace and impact not only efficiency, but safety as well." Bobo praised Shuster for reworking the board of the nonprofit corporation he has proposed and exempting GA from paying user fees under the bill (H.R. 2997 (115)).

FOR YOUR RADAR: Open Skies will be the focus of an address today by Yousef Al Otaiba, the United Arab Emirates' ambassador to the United States, at a Boeing facility in Charleston, S.C. UAE carriers, including Etihad Airways and Emirates Airline, have put in orders for over 500 planes made by Boeing. Some major U.S. airlines have accused the UAE of flouting its Open Skies agreement with the United States by copiously subsidizing Etihad and Emirates. MT is bracing for press releases from both sides of the dispute today.

WELL, HERE'S WHAT WE THINK: The Trump administration hasn't unveiled an updated list of "principles" for investing in infrastructure, but the New Democrat Coalition is out with their preferences this week, calling for more funding for the Highway Trust Fund and putting money from "deemed repatriation" toward infrastructure. The group of House Dems also back using public-private partnerships "where appropriate" and setting up an infrastructure bank. Their document says policymakers should zero in on maintenance projects before new

undertakings - and those new ones should "modernize our infrastructure through innovative design and technologies." It also points out that some regulatory streamlining provisions in the FAST Act and MAP-21 haven't gone into effect.

In other ideas: Remember when MT mentioned that the Congressional Progressive Caucus is proposing $2 trillion in federal funding for infrastructure as a part of its dream budget? Here's how the caucus suggests paying for it, at least in part: by implementing "a $10.25 per barrel fee on oil paid by oil companies, phased in over five years."

LOWEY CALLS FOR EMERGENCY INFRASTRUCTURE FUNDING: The White House is asking Congress for almost $30 billion for disaster recovery, including $12.8 billion for FEMA. But New York Rep. Nita Lowey, the top Democrat on the House Appropriations Committee, thinks lawmakers "should add to this request by appropriating funding for flexible Community Development Block Grants; rebuilding coastlines, roads, transit systems, airports, ports, and other infrastructure; small business loans; and repairs to military installations and other federal facilities damaged in the storms." Sarah Ferris has more.

SWIFT MOVES ON MITNICK NOD: The Senate Homeland Security Committee approved John Mitnick's nomination to be DHS general counsel on Wednesday, just one day after holding his hearing. Also approved were measures that would establish new pay standards at TSA and Customs and Border Protection. Specifically, one of the bills (S. 1305 (115)) aims to help CBP maintain a steady workforce by giving the agency the authority to offer retention bonuses. Steph has more details for Pros.

WELCOME TO THE SPACE JAM: The National Space Council, led by Vice President Mike Pence, is having its first meeting today. Jacqueline Klimas reports for Pro Defense that the meeting "will shine the spotlight ... on some of the leading private space companies that are funded by billionaire investors," like SpaceX and Blue Origin. "The agenda suggests that the administration's desire to craft a bold strategy to revitalize the space program will rely significantly on the ideas of the newest and most innovative players in the space sector - and is already wrestling with ways to bridge the divide with traditional government contractors to fuel what [President Donald] Trump has called 'the next great American frontier,'" Jacqueline writes.

BOONIES EXPRESS: The American Public Transportation Association is touting a new report showing that transit ridership rose 8 percent in small towns and rural areas between 2007 and 2015, even as the rural population declined. APTA says seniors, veterans and people with disabilities, who disproportionately reside in rural areas, are a good match for affordable public transportation.

SHIFTING GEARS: Heidi King is now deputy administrator at NHTSA and serving as acting administrator. Her past experience includes stints at GE Capital, the House Energy and Commerce Committee and the Office of Management and Budget. ... Joel Kelsey was promoted from legislative director to chief of staff for Blumenthal. Kelsey was previously a senior policy adviser to Blumenthal, responsible for the Connecticut Democrat's Commerce Committee portfolio. Laurie Rubiner, Blumenthal's last COS, left to be president and CEO of the Alliance for Children's Rights. ... Steve Cernak started Wednesday as chairman of the American

Association of Port Authorities' board. Cernak is the chief executive and port director of Port Everglades in Broward County, Fla.

THE AUTOBAHN:

- "U.K. works backchannels to resolve Bombardier blowup." POLITICO Europe.

- "A weird buyer's market is brewing for hurricane cars." Bloomberg.

- "Poll: Gas tax repeal unpopular" in California. POLITICO California Playbook.

- "Where driverless cars brake for golf carts." The New York Times.

- "Thousands of tales of torment from the nation's worst transit system." Bloomberg.

- "Groups sue FAA to seek air tour plans for national parks." The Associated Press.

- "AFP pressures Trump-state Democrats on tax reform." POLITICO Pro Campaigns.

- "Afghan refugee becomes youngest woman to fly solo around the world." National Geographic.

- "Does Uber lead to less drunk driving? It's complicated." The Verge.

THE COUNTDOWN: DOT appropriations run out in 65 days. The FAA reauthorization expires in 178 days. Highway and transit policy is up for renewal in 1,092 days.

Analysis

Air Pollution Control Guide

State

Texas (Open Burning). Updated to reflect a final rulemaking by the Texas Commission on Environmental Quality amending regulations regarding outdoor burning. The regulations require regulated entities to notify the Texas Forest Service that burning will take place. The regulations also establish weather conditions under which open burning is permissible. The regulations prohibit the open burning of several categories of materials. The rule took effect Aug. 3.

Wisconsin (Other Industry Categories). Updated to reflect a final rulemaking by the Wisconsin Department of Natural Resources exempting hazardous waste treatment, storage, and disposal facilities from air emission standards for seven compounds. Such facilities otherwise would've been subjected to standards established to limit emissions from surface coating operations for automobiles and light-duty trucks. The rule took effect Aug. 1.

Water Pollution Control Guide

State

California (Ocean Plan). Updated to reflect amendments to the California State Water Resources Control Board's (SWRCB's) plan to maintain ocean water quality that address the impact of commercial vessel discharges, trash, and desalination facilities.

California (Inland Surface Waters and Enclosed Bays and Estuaries). Updated to reflect an SWRCB amendment to the water quality plan for inland surface waters and enclosed bays and estuaries, effective June 28, 2017, that set mercury limits to protect beneficial uses associated with consumption of fish and established three new beneficial use definitions associated with

tribal activities. The board also has adopted an amendment to protect beneficial uses from the impact of trash.

California (Inorganic Chemicals). Updated to reflect a May 5, 2017, state court decision that overturned the maximum contaminant level (MCL) of 10 parts per billion for hexavalent chromium in drinking water. The court said the state failed to determine if the limit was economically and technically feasible, as required by state law.

Connecticut (Nonpoint Discharges to Surface Waters). Updated to reflect the latest nonpoint source management plan approved by the federal Environmental Protection Agency. The plan directs the state Department of Energy and Environmental Protection (DEEP) to take actions such as identifying major nonpoint sources of water pollution and determining the ones most requiring action, improving transportation design to reduce runoff from roadways and airports, and controlling nitrogen and pathogens as part of the coastal nonpoint source control program.

Connecticut (Watershed Management Program). Updated to reflect new information on the program. The program is focused on developing a comprehensive management plan for improving watersheds, acting as a liaison between various municipal and state agencies, improving public outreach and education, and managing nonpoint source-related projects.

Connecticut (Wetlands Protection).

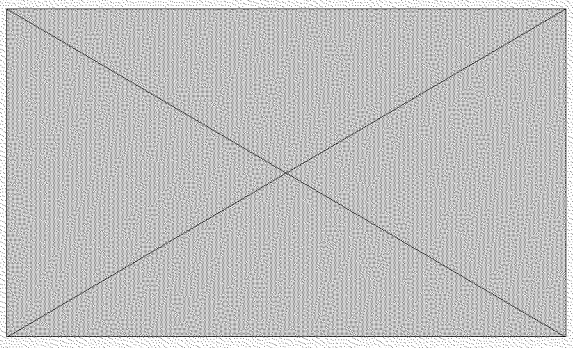
Subject: AEI Today: What might have been

The outlook for an ambitious Republican reform agenda is bleak at this point, to put it mildly.

AEI's daily publication of independent research, insightful analysis, and scholarly debate

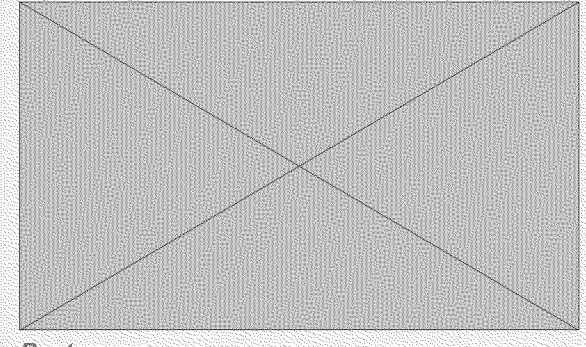


Reuters

What might have been

James C. Capretta | National Review Online

At this point, there probably isn't much that can be done to salvage the Republican legislative agenda. This presidency's controversies have made bipartisan cooperation all but impossible, and there isn't nearly enough unity in the GOP to pass charged legislation on partisan votes. Still, Republicans don't have much to lose by trying something different. They should abandon the idea of massive, sequential, partisan bills and start over with an approach straight from the Bill Clinton playbook: going all in on one omnibus package.

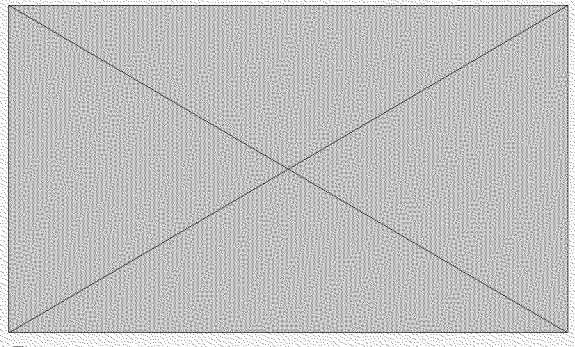


Reuters

Charlottesville's irony

Gerard Robinson | Richmond Times-Dispatch

It's telling that Charlottesville, a small central Virginia city where Thomas Jefferson built the University of Virginia, will become the site that forces America to deal with who we are as a republic: divided and scared. But then Jefferson warned his victorious generation in 1787 that dissent and rebellion are always smoldering. Jefferson's words don't reverse the three deaths or dozens injured last weekend. They instead remind us that the road to freedom is painted in nasty and brutish brushstrokes.



Reuters

Testimony: The Afghanistan

conundrum (2015)

Frederick W. Kagan | House Testimony

Last night, President Trump addressed the nation about his plans for the future of US engagement in Afghanistan. Two years ago, AEI's Fred Kagan addressed the House Subcommittee on the Middle East and North Africa, laying out the challenge before America's leaders. "Enemy groups are both multiplying and gaining strength," he said. "Supporting the Afghan government requires more US troops and expanded authorities for those that are there."

Reuters

An ominous how-to for a terrorist attack on American soil

Marc A. Thiessen | The Washington Post

The terrorist attack in Barcelona follows a pattern that has left more than 100 people dead and hundreds more injured in Nice, Berlin, London, Stockholm, and Ohio State University — a terrorist takes a van or truck and plows through innocent pedestrians, turning the vehicle into "a mowing machine." Those words come from an article in a glossy online al Qaeda magazine, which provides detailed instructions for how to carry out these vehicular attacks.

Subject: Senate energy committee approves FERC, DOE and DOI nominees

By Darius Dixon

09/19/2017 10:19 AM EDT

A slate of President Donald Trump's nominees for FERC and the departments of Energy and Interior sailed through the Senate Energy and Natural Resources Committee this morning.

FERC chairman nominee Kevin McIntyre, Democratic FERC commissioner pick Rich Glick, Interior Department solicitor-to-be Ryan Nelson and assistant DOI secretary for Land and Minerals Management nominee Joseph Balash were all approved on a voice vote.

Democratic Sen. Al Franken asked to be recorded as voting against Balash.

Sen. Maria Cantwell, the top Democrat on the energy committee, said she was "favorably impressed" by McIntyre who, when confirmed by the full Senate with Glick, will bring FERC's leadership board back to full strength for the first time since 2015.

But Cantwell requested a roll call vote on DOE general counsel nominee David Jonas, who faced pointed questions from lawmakers about his past opposition to women and gay people serving in the military. He was approved today on a 14-9 vote. Sens. Joe Manchin and Angus King voted alongside every Republican on the committee in Jonas' support.

WHAT'S NEXT: The nominees now await confirmation by the full Senate. The timing of those votes has not yet been announced.

Subject: Playbook Power Briefing, presented by PhRMA: JOHN CONYERS RESIGNS -- The latest on funding the government -- The COST of the MUELLER probe -- TRUMP tells Middle Eastern leaders U.S. will recognize Jerusalem as Israel's capital

View online version | Add politicoplaybook@politico.com to your address book.

Today's Playbook Power Briefing presented by PhRMA

Good Tuesday afternoon. SPOTTED LAST NIGHT: JARED KUSHNER having dinner with **MICK MULVANEY** at the Tabard Inn. Jared ordered chicken. He was "very enthusiastic" about the dish, according to our tipster.

WATCH ANNA at this afternoon's Women Rule sessions, where she will moderate a panel with women entrepreneurs including Audrey Gelman of The Wing, Camille Hearst of Kit and Laurie Fabiano of the Tory Burch Foundation and hold a one-on-one conversation with Kellyanne Conway. ***Livestream*** http://politi.co/2nuAbNE

JOHN CONYERS HAS RESIGNED -- "John Conyers retires after 53 years in office amid sexual harassment claims," by the Detroit Free Press's Kathleen Gray and Todd Spangler: "Facing a rising chorus of voices demanding he step down because of sexual harassment claims, U.S. Rep. John Conyers Jr., D-Detroit, on Tuesday retired from the seat he has held for more than five decades, a swift and crushing fall from grace for a civil rights icon and the longest-serving active member of Congress.

"Saying he was finalizing his plans for retirement, Conyers added he would endorse his son, John Conyers III, to replace him Congress, potentially setting up a fight between him and his cousin, state Sen. Ian Conyers, in a special election to be called by the governor." http://on.freep.com/2BLuaPN

-- ALASKA REPUBLICAN REP. DON YOUNG is now the dean of the House. He assumed office in 1973, after Nick Begich died in a plane crash with then-House Majority Leader Hale Boggs.

GREAT SCOOP -- "Kihuen aides seek new jobs after sexual harassment accusation," by Heather Caygle: "Rep. Ruben Kihuen's chief of staff is trying to find jobs for several staff members amid calls from top Democrats that Kihuen step down after an accusation he sexually harassed a campaign staffer last year. Peter Koltak, Kihuen's chief of staff, circulated an email to other Democratic offices Tuesday morning with the resumes for what appears to be most, if not all, of the D.C. office staff. 'I'm hoping to place them all here pretty quickly in other offices,' Koltak wrote in the email, obtained by POLITICO." http://politi.co/2km0EM9

THE COST OF ROBERT MUELLER'S PROBE: $3,213,695 through Sept. 30. ***The***

DOJ's report on the cost http://bit.ly/2BHTaaB

GOVERNMENT FUNDING DELAYED -- VOTE DELAYED FROM WEDNESDAY TO THURSDAY -- JENNIFER SCHOLTES and **SARAH FERRIS:** "House GOP leaders Tuesday decided to hold tight for now on their plan to fund the government until Dec. 22, to the chagrin of fiscal hardliners pushing for a Dec. 30 deadline.

"In a closed-door Republican Conference meeting, House Speaker Paul Ryan made the case for the pre-Christmas vote, according to lawmakers in the room. Later Tuesday, though, Republicans said the bill would not be taken up by the Rules Committee until Wednesday, instead of Tuesday afternoon as previously planned. A floor vote now is not expected until Thursday, as whipping continues.

"Government funding expires on Friday. House Republicans plan on a stopgap spending bill, though it's still unclear if there will be the Democratic support needed in the Senate and a Thursday House vote will make the timeline for Senate action even tighter." http://politi.co/2BLODni

-- FISSURES REMAIN: Rep. Mark Meadows (R-N.C.) and many members of the House Freedom Caucus want a stop-gap funding bill to run until Dec. 30. They think they will lose leverage if they set the funding deadline to Dec. 22.

PAGING NANCY PELOSI -- @cspan: ".@RepAlGreen: 'Tomorrow we will be Articles of Impeachment to the floor of the Congress of the United States of America for a vote.'"

WATCH THIS CASE -- "Supreme Court seems divided in case of baker who refused to create a wedding cake for a same-sex couple," by Robert Barnes and Ann Marimow: "The Supreme Court seemed closely divided Tuesday over whether the First Amendment protects a Colorado baker from creating a wedding cake for a same-sex couple, with Justice Anthony M. Kennedy likely to cast the deciding vote. During a nearly 90-minute oral argument, Kennedy gave both sides reason for hope and concern. He worried that ruling for the baker would allow shops to put up window signs saying they refused to provide wedding services for same-sex couples. But he also said that Colorado had been 'neither tolerant nor respectful' of the baker's religious convictions." http://wapo.st/2kmIxWz

ON THE WORLD STAGE -- "U.S. to Recognize Jerusalem as Israel's Capital, Trump Says, Alarming Middle East Leaders," by NYT's Mark Landler and David Halbfinger: "President Trump told Israeli and Arab leaders on Tuesday that he plans to recognize Jerusalem as the capital of Israel, a symbolically fraught move that would upend decades of American policy and upset efforts to broker peace between Israel and the Palestinians. ... Palestinian officials said Mr. Trump told the president of the Palestinian Authority, Mahmoud Abbas, that the United States would move the embassy to Jerusalem. Jordan said the president gave a similar message to King Abdullah II.

"American officials, however, said such a move could not occur immediately for

logistical reasons, given the lack of facilities to house the embassy staff. As a result, Mr. Trump is expected to sign a national security waiver that would authorize the administration to keep it in Tel Aviv for an additional six months." http://nyti.ms/2krPDcp

-- "Russia labels Voice of America and 8 other U.S. media 'foreign agents'," by CNN's Jethro Mullen: "Russia is labeling nine U.S. government-backed news outlets -- including Voice of America -- as foreign agents. ... Russia's Justice Ministry designated the nine outlets, which also include Radio Free Europe/Radio Liberty, as foreign agents, the country's state-run news agency Tass reported Tuesday. The announcement comes less than a month after the production company behind the American version of the Russian state-funded network RT was forced to register as a foreign agent with the U.S. Department of Justice." http://cnnmon.ie/2knunnW

SMOOTH SAILING FOR POWELL -- "Banking Committee approves Powell as Fed chair, with only Warren opposed," by Victoria Guida: "The Senate Banking Committee voted 22-1 on Tuesday to approve the nomination of Jerome Powell as chairman of the Federal Reserve board. ... Sen. John Kennedy (R-La.) said his vote shouldn't be taken as an 'automatic yes' on the Senate floor. During Powell's confirmation hearing, Kennedy raised worries that the nominee hadn't done enough to ease rules on community banks during his time on the Fed board. Powell's nomination will now move to the full Senate." http://politi.co/2BKt3je

HOLLYWOODLAND -- "Disney and Fox are closing in on deal, could be announced next week - Sources," by CNBC's David Faber: "Disney and Twenty-First Century Fox are closing in on a deal, and it could come as soon as next week, according to sources familiar with the matter. CNBC has been reporting that Disney has held talks with the Rupert Murdoch-controlled media company to acquire its studio and television production assets, leaving Fox with its news and sports assets. Fox is also talking with CNBC parent company Comcast, but the talks with Disney have progressed more significantly." http://cnb.cx/2koqGOP

MEDIAWATCH -- STEVE BANNON is returning as a regular host, along with Alex Marlow, of the morning radio show "Breitbart News Daily" on SiriusXM's Patriot channel, the network announced today.

--"How brands secretly buy their way into Forbes, Fast Company, and HuffPost stories," by Jon Christian in The Outline: "In late October, TechCrunch editor-at-large John Biggs noticed a Facebook Messenger request from someone he didn't know, a man named Varun Satyam. When Biggs accepted the request, Satyam introduced himself as a marketer for technology startups. He was looking for coverage of some clients, he said, and he was willing to pay Biggs to write about them. It was a bold opening move, and an unethical proposition for any journalist who wants to retain their credibility. But Biggs wasn't surprised. He estimates that he receives two or three similar offers each month, and he doesn't take them seriously.

"'They're stupid,' said Biggs. 'Organic press is far more effective and anyone with a brain can see through them.' But solicitations like Satyam's may be more successful than Biggs is aware. Interviews with more than two dozen marketers, journalists, and others familiar with similar pay-for-play offers revealed a dubious corner of online publishing in which publicists, ranging from individuals like Satyam to medium-sized

"digital marketing firms" that blur traditional lines between advertising and public relations, quietly pay off journalists to promote their clients in articles that make no mention of the financial arrangement." http://bit.ly/2BKzumf

-- From Michael Calderone in this morning's Morning Media: "Trump has often suggested that members of the media be sued for their work -- now, if anyone ever follows through against Fox News Radio White House correspondent Jon Decker, he'll at least be able to save some money on representation. Decker was sworn in Monday to the D.C. bar, making him, so far as Morning Media knows, the only lawyer in the White House press corps."

Afternoon Briefing - Your Preview of Today's News

The following news provides a snapshot of what Bloomberg BNA is working on today. Read the full version of all the stories in the final issue, published each night.

Grid Study Resurrects Debate Over Utility Air Pollution Permits

Posted August 28, 2017, 7:31 A.M. ET

By Abby Smith and Dean Scott

The Energy Department's electric grid study is reviving debate over possible changes to Clean Air Act permitting requirements, underscoring industry arguments that the regulations limit coal-fired power plants' ability to improve efficiency.

The grid study commissioned by Energy Secretary Rick Perry, released Aug. 23, makes a number of suggestions to boost baseload power, including changes to wholesale energy markets to better value the reliability and resiliency that supporters argue coal and nuclear provide. But the study also suggested that environmental regulations are a hurdle for utilities that want to modify their coal-fired plants to boost efficiency, identifying the EPA's New Source Review (NSR) program as an "important concern."

That program requires manufacturing facilities, power plants, and other industrial facilities to obtain a permit before beginning construction on new facilities, as well as for "major modifications" to existing plants. The grid study suggests uncertainty over those permitting requirements "discourages" utilities from retrofitting plants with carbon capture equipment or investing in efficiency improvements.

"Ironically, the uncertainty surrounding NSR requirements has led to a significant lack of investment in plant and efficiency upgrades, which would otherwise lead to more efficient power generation, benefits to grid management, and reduced environmental impacts," Energy Department staff wrote in the study.

Any effort to ease Clean Air Act permitting requirements would be strongly opposed by environmental advocates. But the Trump administration wouldn't be the first to tackle New Source Review requirements over those objections: the Environmental Protection Agency under President George W. Bush tried to overhaul the permitting regulations, but their changes were ultimately set aside by a federal appeals court.

Several companies, such as Missouri-based utility Ameren Corp. and a coalition that includes BP America and Koch Industries, encouraged the Trump administration to alter New Source Review requirements as a part of a strategy to boost domestic manufacturing.

Ameren Missouri, in an email statement provided to Bloomberg BNA, said the Energy Department's report "correctly highlights problems" with the permitting program.

"Rather than encourage efficiency projects, which reduce emissions including greenhouse gases, past administrations have targeted boiler and turbine projects that improve efficiency, thereby deterring those beneficial projects," Ameren said. "The EPA should reaffirm how and when a project triggers NSR review and that emission calculations must account for efficiency improvement."

Legitimate Hurdles to Efficiency?

There are some obvious reasons why the EPA's interpretation of its permitting authority raises costs for power plants and delays investments that would improve plant efficiency, according to John Graham, who worked as administrator of the Office of Management and Budget's Office of Information and Regulatory Affairs under Bush.

"You start with the basic economic theory, that NSR raises the anticipated cost of making energy efficiency investments because, one, delays in the approval processes, and two, the possibility of additional expenditures triggered by NSR," Graham told Bloomberg BNA in a statement.

A 2005 National Research Council report found that using economic incentives to improve emissions control, rather than a "command and control" regulatory approach, "would cut the costs of compliance by about a third without any compromise in emissions controls," Graham said.

Jeff Holmstead, who served as the EPA's assistant administrator for air and radiation from 2001 through 2005, said environmental groups that oppose changes to the permitting program are ignoring the real-world experience of power plants that have tried and failed to negotiate the regulatory hurdles.

"There is no doubt that the threat of NSR discourages plants from making energy efficiency improvements," Holmstead, who now heads Bracewell LLP's environmental strategies group, told Bloomberg BNA. "If you look at all the NSR enforcement cases brought against coal-fired power plants, it's in large part because efficiency was being sought" through improvements by utilities, which were deemed a significant plant modification, he said.

Holmstead and Graham were among the authors of a recent paper suggesting changes that they say would address industry concerns with the permitting program while maintaining the environmental benefits.

Climate Rule Rewrite

One of industry's solutions is to have the EPA revise its new source requirements in conjunction with what many expect to be a scaled back "replacement rule" for the Obama administration's Clean Power Plan, Holmstead said.

The EPA under Bush tried a similar fix—opting to exclude pollution control projects from new source requirements—but its revision was struck down in a 2006 ruling by the U.S. Court of Appeals for the District of Columbia, New York v. EPA.

Several labor groups, including the United Mine Workers of America and the AFL-CIO, suggested the EPA couple New Source Review changes with a narrow replacement rule for the Obama-era

Clean Power Plan, which sought to curb carbon dioxide emissions from existing power plants.

According to a handout from a June 26 meeting with White House officials on Clean Power Plan repeal, labor groups pitched a replacement rule that would require only heat rate improvements from power plants. The groups argued that EPA also must "streamline" permitting requirements, which they indicated would open the door to "substantial efficiency improvements" and carbon emission reductions.

Allison Watkins Mallick, an environmental attorney with Baker Botts LLP in Washington, D.C., told Bloomberg BNA that revamping New Source Review is "certainly something [EPA] could address simultaneously" with revisions to the Clean Power Plan, though she did not speak to specific proposals.

In terms of New Source Review fixes, Mallick pointed to a shift in how EPA determines whether emissions increase. Generally, a source triggers permitting requirements if it undertakes modifications that result in increased air pollution.

Regulatory Changes Needed

Mallick said the way the EPA currently measures an increase in emissions is by focusing on overall emissions.

"One thing they might consider changing as part of NSR reform is instead of looking at increases in overall tonnage," the agency could instead look at "emissions rates, similar to how it does in" new source performance standards.

This shift wouldn't require a change to the Clean Air Act, she said. The Bush EPA proposed to make such a change, but didn't follow through on that.

"That hasn't been reviewed by the courts," Mallick said, adding there is "no case law specifically limiting" that change.

But Mallick also noted a challenge to any reform effort would be the EPA's bandwidth to undertake such a significant rulemaking effort. She cautioned that while the EPA could link Clean Power Plan revisions and New Source Review changes, that could require more time because of split resources.

The EPA will have to weigh "how this fits in with other competing regulatory priorities," Mallick said.

Carbon Capture Barriers

Holmstead said there may be comparatively less support for the grid study's portrayal of permitting requirements as a major hurdle for carbon capture and storage projects.

That issue is "all about cost," he said, noting that current incentives to capture and store haven't been enough to spur widespread deployment.

New source requirements are "not one of the top reasons for not moving forward" on carbon capture, Holmstead said, although they could be more of an issue if more projects are built. Because capturing carbon eats into the efficiency of a power plant, utilities could opt to produce more power, and thus emit more pollution, to offset the "parasitic" drain on power from carbon

capture, he said.

On whether NSR permitting is an obstacle to deploying carbon capture and storage technologies, Graham said a carbon tax would be the most efficient way to support such efforts.

Mallick noted that any installation of carbon capture equipment constitutes a "physical change" that could potentially put the plant "into the land of NSR applicability."

Nonetheless, "technological barriers are significant, if not more significant," than the regulatory hurdle New Source Review poses, she said.

Skepticism of Actual Burdens

Environmental advocates who were involved in the legal fight over the Bush administration's push to revamp the permitting program are skeptical of the grid study's arguments.

"It seems as though the Department of Energy has skipped that part of history," Ann Weeks, legal director for the Clean Air Task Force, told Bloomberg BNA.

The grid study cites several sources that pre-date that court decision, including a 2002 EPA report which proposed New Source Review changes and a 2003 report from the American Enterprise Institute, an industry-funded think tank.

None of the grid study's arguments over New Source Review are new, Weeks said. But, she suggested the Trump administration felt the need to bring them up again in order to advance the president's pro-coal agenda.

"What it all boils down to is [industry arguing], 'We don't want to clean up our dirty coal plants,'" Weeks said. If the Trump administration tries "to do the same kinds of [reforms to New Source Review] with the same lack of basis that the Bush administration did, I would imagine we will meet them in the same place and have the same conversations."

Weeks said power plant efficiency improvements generally shouldn't trigger New Source Review requirements and said the "only thing" easing New Source Review requirements would do is "tell the people who live near these facilities and breathe the pollution that they don't matter."

In addition, reducing regulatory requirements wouldn't "guarantee" an improved outlook for coal, Weeks said.

"The main reason coal has fallen in the last number of years is because natural gas prices are so low," she said. "Blaming [New Source Review] for all those problems is a little silly."

Trump Taps Democrat for New Term as Nuclear Regulator

Posted August 28, 2017, 10:46 A.M. ET

By Alan Kovski

President Donald Trump announced his intent to nominate Jeffery Baran to a new term on the Nuclear Regulatory Commission.

Baran, a Democrat, has been a member of the commission since 2014. If confirmed, he would start a new five-year term July 1, 2018.

Baran worked for the House Energy and Commerce Committee during 2009-2014 as a staff counsel and then Democratic staff director for energy and environment. He was a counsel to the House Oversight and Government Reform Committee from 2003 to 2008.

His priorities since joining the commission have included, among other things, implementation of safety lessons learned from the 2011 failures of the Fukushima Daiichi nuclear power plant in Japan. The White House announced Trump's intent to nominate him late Aug. 25.

Baran is one of three current members of the NRC, along with Chairman Kristine Svinicki, a Republican, and Stephen Burns, an independent.

Two more Republicans, Annie Caputo and David Wright,have been nominated to the five-member commission. The Senate Environment and Public Works Committee approved their nominations, and they await votes by the full Senate. Caputo is an energy policy adviser to the Environment and Public Works Committee, and Wright is a former chairman of the South Carolina Public Service Commission.

Corporate America May be Best Hope to Re-Engage Trump on Climate

Posted August 28, 2017, 8:03 A.M. ET

By Dean Scott

You'd think U.S. companies would be ready to throw in the towel after they failed to sway President Donald Trump to stay in the landmark Paris climate pact.

But companies that favor U.S. engagement on climate are exploring ways to push the White House to re-think its approach to climate change and clean energy. They include bolstering formal business alliances; working with California and other states whose governors seek to engage business on the issue; and trying to reframe the climate discussion by using terms such as "more resilient infrastructure" in place of "adaptation."

Corporate voices are considered the last, and perhaps only, hope of getting Trump to focus on climate impacts at home and get him back to negotiations in climate talks abroad after his announcement June 1 that he is pulling the U.S. out of the Paris Agreement.

Dozens of Fortune 500 companies want to ensure they aren't left outside the room in future talks that could impact whether their renewable energy and low-carbon technologies are able to compete with the more than 195 nations still in the pact.

Nothing in the work toward addressing climate "is as impressive as our business leaders saying we need America back at the table," said Sen. Ben Cardin (D-Md.), the top Democrat on the Senate Foreign Relations Committee.

'Lead By Example'

Microsoft, which urged the Trump administration not to abandon the Paris agreement, seeks in the wake of Trump's decision "to lead by example," Rob Bernard, Microsoft's chief environmental

strategist, said in a statement to Bloomberg BNA.

The technology giant wants to invest in more renewable energy to power its global data center operations and expand its use of an internal carbon fee, which it began in 2012 to make its data centers, offices, manufacturing, and other business units accountable for their contributions to the company's overall carbon footprint.

BP, which along with others in the energy sector such as Exxon Mobil, Chevron, and Shell backed the Paris climate pact, sees climate change as "an important long-term challenge justifying global action" in the wake of Trump's decision to pull out of the Paris deal, and it continues to back an economywide price on carbon, BP America said in a statement to Bloomberg BNA.

The company said it will continue to back increased production of natural gas, which is less carbon-intensive than oil or coal, and support more innovation in carbon-mitigation technologies.

Other large companies are part of the Center for Climate and Energy Solutions' Business Environmental Leadership Council, a group of mostly Fortune 500 companies launched in 1998 to back mandatory climate policies. Earlier this month, the group's members—which include Bank of America, Duke Energy, and Berkshire Hathaway Energy—were joined by Amazon, which the council said was the leading U.S. corporate purchaser of renewable energy last year.

"It has never been more important to bring business leaders together with policymakers to explore pragmatic steps toward a clean energy future," Bob Perciasepe, the center's president, said in a statement.

Beyond those corporate efforts, a total of 14 states including California, New York, Rhode Island, Virginia, and Washington also have launched the U.S. Climate Alliance, pledging to fill the gap from the federal retreat on climate.

California Gov. Jerry Brown (D) has announced plans to host a September 2018 international climate summit in San Francisco in which he envisions entrepreneurs, world leaders and others exploring solutions. And the nonprofit Climate Group will host Climate Week NYC in New York Sept. 18 to 24 featuring business leaders and others to advocate for climate action to coincide with the annual UN General Assembly.

Reframing the Discussion

Some say reframing the discussion could help in pushing policies that ensure roads, bridges, and other projects are better able to weather sea level rise, more flooding and higher temperatures.

"The data shows that as we get temperature increases, we get more cracking potholes, increased flooding, and you end up with more infrastructure loss," Lisa Grice, global director of sustainability services at the Ramboll Environ, an environmental consulting firm, told Bloomberg BNA.

The Trump administration is more likely over time to be receptive to ideas that benefit the clean energy industry or bolster reliability of the power grid if framed not so much as climate-friendly projects but rather "wins for driving jobs or providing other economic value," according to Grice, who worked during the Bush administration to launch the Environmental Protection Agency's Climate Leaders program, which recognized voluntary corporate action on climate.

"You need to think of these as climate change tactics," she said, such as completing infrastructure projects that the administration can tout as simply making good on Trump's pledge for improved

roads and bridges. They may include what Grice calls improved "asphalt road resiliency" that—without directly mentioning climate change—will shore up defenses against climate impacts.

Some of that change in terminology may appear subtle at first but is likely necessary, according to Grice, who said a preference for the more neutral-sounding term of "resiliency" over climate adaptation is already underway.

"We have a challenge not just from extreme storm events but also a combination of typical storm events with modest sea level rise, which also creates all kinds of property loss and impacts and elevates the cost of climate adaptation," Grice said. "Finding a way to frame the federal government as a hero or savior would really appeal to this administration" if it could point to progress in shoring up communities from those threats, even as it will likely do so without even mentioning climate, she said.

"Now, the more individual companies can help frame anything that the federal government is doing around, say, energy efficiency, renewable energy, or climate resilience as a win for driving jobs or other economic value will incentivize this administration to do more," she said.

No Letting Up

The Trump administration so far has shown no signs of letting up on its campaign against climate policies, from ending overseas climate aid to rolling back Obama administration rules cutting vehicle and power plant greenhouse gas emissions.

A coordinated business campaign to keep the U.S. in the Paris deal also didn't sway Trump. About 1,000 companies and investors urged the president to stay, including U.S. industry leaders in technology, energy, health, and manufacturing such as Apple, Google, Facebook, HP, Intel Corp., Blue Cross Blue Shield of Massachusetts, Johnson Controls and Mars Inc.

More recently, climate-friendly corporate voices may also have to overcome what appears to be a growing schism between some corporate leaders and Trump over his response to a white supremacist rally in Charlottesville, Va., earlier this month. Trump disbanded two advisory groups made up of CEOs—the Strategy & Policy Forum and the Manufacturing Council—but only after corporate chiefs began resigning.

Also scrapped: an Advisory Council on Infrastructure, which Trump only created in mid-July to advise him on his $1 trillion infrastructure plan. Among the projects the infrastructure panel was to make recommendations on were two that could impact the U.S. carbon footprint: renewable energy generation and electricity transmission.

The Trump administration argues that it isn't losing a seat at the table in international climate talks even as it walks away from the Paris deal because it can continue in negotiations under the parent treaty to the Paris deal, the UN Framework Convention on Climate Change. Even with Trump's announcement, the U.S. cannot technically withdraw from the Paris pact for four years, a span that gives U.S. companies and other supporters years to push Trump to reconsider his withdrawal.

Still Prodding Trump to Tweak Pledge

Some continue to argue that Trump can address much of his concern by taking advantage of flexibility in the Paris accord that allows nations to adjust their pledges to curb greenhouse gas emissions. That would allow Trump to pare back the U.S. pledge Obama made to the Paris deal, which is to cut emissions up to 28 percent by 2025 from 2005 levels.

"Rather than withdrawing from the agreement, a process that will take several years to accomplish, the U.S. is free to adjust its commitment if the [Trump] Administration feels the original commitment is inappropriate," Stephen Harper, Intel Corp.'s global director of environment and energy policy, said in a statement to Bloomberg BNA.

"The Paris process will also provide a forum for countries to strike additional bi- and multilateral deals on technology transfer, particularly in the area of renewables and alternative energy," Harper said.

"U.S. companies will lose business if we are not part of such deals," he said, and the specter of a U.S. withdrawal from a deal signed by more than 190 parties could isolate it from world efforts to confront global warming and develop the renewable energy technologies those nations will need for such a global effort, he said.

Staying outside what is now a "virtually global effort to address climate change could make it vulnerable to border taxes and other trade retaliation by countries who are part of that effort," Harper said, and such policies "would punish U.S. exports and our economy."

'Open to Re-Engaging'

Trump "is open to re-engaging in the Paris Agreement if the United States can identify terms that are more favorable to it, its businesses, its workers, its people, and its taxpayers," according to a State Department statement issued Aug. 4 as the U.S. notified the UN of its plans to withdraw. One theme the Trump administration intends to bring to future climate change negotiations, according to the statement, is finding ways to help other countries "access and use fossil fuels more cleanly and efficiently."

Myron Ebell, energy and environment director at the Competitive Enterprise Institute, who favored withdrawal from the Paris accord, said he reads any hint of a renegotiation as little more than a token acknowledgment to those in the Trump camp who favor international engagement.

"The president has clearly said that the only deal the U.S. would be interested in doing would be one that would serve America's interests," Ebell said. "As he has defined it, America's interest is to be the world's largest energy producer and to become one of the major coal, oil, and liquefied natural gas exporters in the world."

Too Much Wind? Harvey Could Overpower Texas Wind Generation

Posted August 28, 2017, 7:44 A.M. ET

By Brian Eckhouse, Christopher Martin and Ryan Collins

One of the worst things that can happen to a wind farm is too much wind.

Hurricane Harvey was packing top winds of 115 miles an hour Aug. 26, according to a National Hurricane Center advisory. That's more than twice the 55 miles-an-hour speed that prompts many turbines to shut off. The result: The storm could knock out between 2.1 and 3.6 gigawatts of power near the Texas coast, according to Bloomberg New Energy Finance.

Wind-farm operators have been bracing for days. Avangrid Inc., the New Haven, Connecticut-based

power company, evacuated all personnel from its wind farm complex on the South Texas coast, a spokesman said in an email.

"The problem with this hurricane is they don't see it trailing off in any direction so it's just going to hover," said Jeff Ferguson, the Magnolia, Texas-based senior vice president of project development at Apex Clean Energy Inc. "So it could be next week for the winds to diminish adequately so we can resume normal operations."

Production was set to peak in the late Aug. 25 and taper off as turbines automatically begin to shut down, according to Simon Mahan, a director at Southern Wind Energy Association. Turbines generally aren't designed for hurricane risk, said Alex Morgan, a New York-based analyst at BNEF.

"They'll pitch down and yaw into the wind, which allows them to safely pinwheel," said John Martinez, director of operation at Pattern Energy Group Inc., which owns the 283-megawatt Gulf Wind farm in Kenedy County. "This way the blades don't flex, which can be damaging. The turbines are designed to automatically do that."

Least Worrisome

Wind power may be the least of the region's power-market worries. If hundreds of thousands of people lose power as is expected, it doesn't matter whether the wind farms are running or not, because they'd have nowhere to send the electricity generated. It's the very reason why power and gas are trading down.

"With gas plentiful and load down, I suspect the lack of wind won't matter at all," Cody Moore, the Houston-based president of BioUrja Group's power trading division. "I'd be more concerned with the safety of the turbines than any need for load."

Texas easily boasts the most wind capacity among U.S. states, about 21 gigawatts, or one-quarter of national capacity, according to the American Wind Energy Association. A majority of the wind is located in western Texas, which Genscape Inc. expects won't be greatly affected by Harvey.

The 3.6 gigawatts of capacity installed in the south power zone of the Electric Reliability Council of Texas is a different matter. About 2.1 gigawatts is directly along the coast.

"As that storm starts coming onshore, there's a good chance winds will exceed 55 miles per hour," Michaella Farese, a Boston-based meteorologist and demand forecaster at Genscape, said in an interview Aug. 25.

Energy Regulator Makes First Move in Months, OKs Nexus Pipeline

Posted August 28, 2017, 11:15 A.M. ET

By Catherine Traywick and Mark Chediak

DTE Energy Co. and Enbridge Inc. won U.S. approval to build the $2 billion Nexus natural gas pipeline in the Midwest, ending a review that lasted almost two years and forced delays to the

project.

The 257-mile (413-kilometer) pipeline will transport 1.5 billion cubic feet a day of Appalachian gas to Ohio, Michigan, Illinois and Ontario. The Federal Energy Regulatory Commission approved the project Aug. 25. It's the first major pipeline the agency has authorized since the February resignation of then-Chairman Norman Bay, whose departure left the commission without the quorum needed to make major decisions.

The approval spares Nexus developers further delays, after being forced to push the project's in-service date into 2018. DTE Chief Executive Officer Gerard Anderson said in July that two-thirds of the pipeline's capacity had been contracted, with more commitments expected once construction begins. He said the delay wouldn't affect its earnings projections.

DTE and Enbridge can begin preparations to start construction in order to get the pipeline into service in 2018, the companies said in a joint email statement. A more precise in-service date will be provided after the companies review the U.S. order, they said.

The developers expected the pipeline to be approved in February, prior to Bay's departure. FERC approved three other major natural gas lines during Bay's final days: Williams' $3 billion Atlantic Sunrise pipeline, National Fuel Gas Supply Corp.'s $455 million Northern Access project and Energy Transfer Partners' $4.2 billion Rover line.

The pipeline will take 7 to 10 months to build, Chief Operating Officer Jerry Norcia said during a July earnings call.

China Power Behemoth Born as Shenhua, Guodian Merger Approved

Posted August 28, 2017, 02:51 P.M. ET

By Bloomberg News

China is creating the world's largest power company.

The government of President Xi Jinping approved the merger of Shenhua Group Corp., the country's top coal miner, with China Guodian Corp., among its largest power generators, the State-owned Assets Supervision and Administration Commission said Aug. 28. With assets of 1.8 trillion yuan ($271 billion), the new entity will be the world's second-biggest company by revenue and largest by installed capacity, according to Bloomberg New Energy Finance.

The Shenhua-Guodian tie-up could be the first of a handful of mergers in China's power industry as top policy makers try to cut industrial overcapacity and the number of state-owned enterprises. The announcement concludes months of speculation about the combination, first reported by Bloomberg in June.

"People have been waiting for the other shoe to drop," said Tian Miao, a Beijing-based senior analyst at Sun Hung Kai Financial Ltd. "This confirms the direction of state-owned enterprise reform, with companies in the same industry merging to reduce redundant investment and improve

efficiency."

Neither Shenhua nor Guodian's Beijing-based spokesmen answered calls to their offices seeking comment or replied to emailed questions. About three hours before Sasac's one-sentence statement was released Aug. 28, Ling Wen, Shenhua's acting chairman, told reporters in Hong Kong that the company still hadn't received merger approval.

The new company, expected to be called National Energy Investment Corp., will have installed capacity of more than 225 gigawatts, topping Electricite de France SA and Enel SpA, according to Frank Yu, an analyst at Wood Mackenzie Ltd. EDF, as the French generator is known, had net installed capacity of 137.5 gigawatts last year, according to a company presentation. Italy's Enel had total installed capacity of 83 gigawatts as of June 30, it said.

Mutual Benefits

Shenhua will be able to lower its reliance on coal-fired capacity, currently about 90 percent, by gaining some of Guodian's clean energy assets, Yu wrote in a research note earlier this month. Guodian, meanwhile, will be able to benefit from Shenhua's coal supply and price risk management, as well as its integrated infrastructure of railways, harbors, and ships.

As part of the merger, China Shenhua Energy may acquire Guodian's Shanghai-listed GD Power Development Co., Bloomberg news reported in late June. GD Power trading has been suspended since June 5, as have China Shenhua Energy's Shanghai shares.

Shenhua had 1.014 trillion yuan in assets, it said in a report in June, and its listed unit produced about 290 million tons of coal last year. Guodian had total assets of 803 billion yuan, according to a statement from the company posted by state-backed industry group China Electricity Council. Shenhua had 82 gigawatts of generating capacity, while Guodian had 145 gigawatts, according to BNEF.

Coal & Renewables

Xi's government also is seeking to lower the country's reliance on coal power and increase the use natural gas, as well as wind, solar, hydropower, and nuclear. The generation capacity of the merged company will be 23 percent renewables, according to BNEF.

"This is crucial for Shenhua since due to new changes, wind, solar, nuclear and hydro generation hours are still guaranteed by regulators, while coal generators must increasingly compete in liberalized wholesale markets," BNEF analyst Sophie Lu wrote in an Aug. 9 report. "This is only one in a series of megamergers China plans for power sector consolidation."

The government also may seek a way to bundle nuclear power generators into the megamerger mix, according to Wood Mackenzie's Yu.

"The ultimate goal is to form bigger energy companies that can hedge against market risks between coal and power," Yu said. "Or they can sell their nuclear technology or their coal-power technology to emerging markets in Asia. That's what the government wants to promote."

China Huaneng Group, the country's biggest coal-fired power producer, may merge with State Power Investment Corp., a coal-fired generator that also owns State Nuclear Power Technology Corp., Bloomberg reported in May. SPIC Chairman Wang Binghua said in July that the company is in contact with Huaneng Group about a restructuring and "something big may happen later."

China Huadian Corp. and China Datang Corp. are the remaining two of China's big-five state-power generators.

Virtual Currency May Boost Australia's Grassroots Solar Trade

Posted August 28, 2017, 7:55 A.M. ET

By Jason Scott

An Australian company is introducing its own version of bitcoin that will let homeowners and businesses sell excess energy generated from their rooftop solar panels to neighbors, without a middleman taking a cut.

As of Aug. 28, Perth-based Power Ledger had sold about 57 percent of the 100 million so-called "power tokens" offered at 8.8 U.S. cents a piece since Aug. 27. A $25,000 cap has been installed to discourage large entities from controlling the market.

"This will make solar panels more viable financially and improve efficiency in the energy market," Jemma Green, the company's co-founder and chair, said in an interview. "It will also allow mum-and-dad investors who want to support renewable energy to buy small stakes in large-scale, community-owned solar projects."

According to a RenewEconomy report in April, Australia's solar power capacity "is expected to double over the next few years as households continue to invest in rooftop panels to reduce electricity bills and the large-scale solar sector takes off after years of promise."

About 5.6 gigawatts of the nation's total solar capacity of 6 gigawatts comes from rooftop panels, with the balance derived from large-scale projects, according to RenewEconomy. While at this stage they only meet about 3.3 percent of the nation's total energy demand, the panels are on 21 percent of suitable Australian rooftops, the highest penetration of rooftop solar in the world, it said.

The tokens being issued by Power Ledger, started in May 2016, will also let solar farms sell electricity to individual customers, and apartment buildings and offices trade energy from their rooftop solar panels, Green said.

Blockchain Technology

To facilitate the trades, the company developed its own blockchain technology, which uses a distributed ledger to facilitate settlements without an intermediary. Blockchains are now being used for everything from concert ticket sales to distributing medical records confidentially and issuing catastrophe bonds.

"The internet revolution has given us lots of ways of sharing information, but distributing it in a controlled way has previously been elusive," Green said. "Blockchains are a way to ensure there's only one true copy that can't be altered and can be passed around among peers."

Power Ledger is also selling another tranche of tokens at a price yet to be disclosed. About 90 million of the 250 million tokens in that tranche have been sold.

Wyoming/Tallgrass Interstate Gas Transmission Pipeline Abandonment

GENERAL ENVIRONMENT AND SAFETY

Notice of FERC announces the filing of an application requesting authorization to abandon a 47-mile pipe segment from the discharge side of the existing Labonte Compressor Station in Converse County, Wyo., to the inlet side of the existing Guernsey Compressor Station in Platte County. The applicant, Tallgrasss Interstate Gas Transmission LLC, of Lakewood, Colo., specifies that the segment will be abandoned in place and sold to Tallgrass Midstream LLC (TMID). TMID will purchase, convert, own, and operate the pipeline segment as a crude oil pipeline to meet demand for pipeline transportation of crude oil. The agency will complete an environmental analysis or issue a notice of schedule of environmental review by Nov. 22, 2017. Comments are due Sept. 14, 2017. HAZARDOUS MATERIALS TRANSPORTATION

Chemical Transportation Advisory Committee Meetings

HAZARDOUS MATERIALS TRANSPORTATION

Notice of the U.S. Coast Guard announces meetings of the Chemical Transportation Advisory Committee and its subcommittees to discuss issues related to the marine transportation of hazardous materials. The meetings will address safety standards for the design of vessels carrying natural gas or using natural gas as fuel, marine vapor control system regulations implementation and guidance, hazardous substance response plans for tank vessels and facilities, and international maritime organization activities. The meetings also will address regulatory reform of Coast Guard regulations per executive orders 13771 (82 FR 9339; 02/03/2017) and 13783 (82 FR 16093; 03/31/2017). The subcommittee meetings are scheduled for Oct. 3 and 4, 2017, in Washington, D.C. The full committee meeting is scheduled for Oct. 5, 2017, at the same location. Comments are due Sept. 26, 2017. Contact: Jake Lobb; USCG; 202-372-1428; jake.r.lobb@uscg.mil

OCCUPATIONAL SAFETY AND HEALTH
Cranes and Derricks in Construction/Operator Certification
OCCUPATIONAL SAFETY AND HEALTH

Proposed rule of OSHA extends for one year, until Nov. 10, 2018, the enforcement date for crane operator certification and the existing employer assessment duty to ensure crane operator competency for construction work. The provisions were originally adopted in an Aug. 9, 2010, final rule (75 FR 47906), and the deadline for operator certification and existing employers duties was extended for an additional three years, until Nov. 10, 2017, in a Sept. 26, 2014, final rule (79 FR 57785). The proposed rule would extend the existing employer duty and enforcement date for an additional year to provide that covered operators are competent to operate the equipment safely. Comments are due Sept. 29, 2017. Contact: Frank Meilinger; OSHA, Office of Communications; 202-693-1999; meilinger.francis2@dol.gov; Citations: CFR 1926.1427

Underground Metal and Nonmetal Mines/Escape and Evacuation Plans
OCCUPATIONAL SAFETY AND HEALTH

Notice of the Mine Safety and Health Administration announces the submission of a continuing information collection request to the OMB regarding the development of escape and evacuation plans to address the conditions of underground metal and nonmetal mines. The collection addresses requirements for each plan submission to include mine maps or diagrams showing principal air flow; location of escape routes; and locations of existing telephones, primary fans, primary fan controls, fire doors, ventilation doors, and refuge chambers. The collection also addresses requirements for each plan submission to include procedures to show how the miners will be notified of an emergency, an escape plan for each working area in the mine, a firefighting plan, and surface procedures to be followed in an emergency. In addition, the collection

addresses requirements for each plan submission to include a statement of the availability of emergency communication and transportation facilities, emergency power, and ventilation and the location of rescue personnel and equipment. Comments are due Sept. 29, 2017. Contact: Michel Smyth; Labor Department; 202-693-4129; DOL_PRA_PUBLIC@dol.gov. Citations: 30 CFR 57.11053

Voluntary Protection Programs
OCCUPATIONAL SAFETY AND HEALTH

Notice announces the intention of OSHA to seek OMB approval for a continuing information collection request regarding the Voluntary Protection Programs (VPPs), under which the agency, participating employers, and labor cooperate to address employee safety and health issues and expand employee protection. The collection gathers compliance information from employer applicants and participants, including information concerning injury and illness rates and workplace safety and health management programs. The collection also gathers application information for employees of VPP participants who wish to participate in the Special Government Employee Program for on-site evaluations, including an eligibility information sheet, current resume, financial disclosure form (OGE Form 450), and optional application for federal employment (OF 612). In addition, the collection addresses application requirements for OSHA Challenge administrators. Comments are due Oct. 30, 2017. TOXIC SUBSTANCES

Phthalates/Children's Toys and Child Care Articles

TOXIC SUBSTANCES

Final rule of the Consumer Product Safety Commission codifies the agency's determination that four plastics with specified additives do not contain phthalates prohibited in children's toys and child care articles and therefore do not require third-party testing. The agency determined that polypropylene, polyethylene, high-impact polystyrene, and acrylonitrile butadiene styrene, with specified additives, do not contain the prohibited phthalates (DEHP, DBP, BBP, DINP, DIDP, DnOP) in concentrations above 0.1 percent with a high degree of assurance. As a result, these plastics with specified additives do not require third-party testing for compliance with the phthalates prohibitions on children's toys and child care articles under Section 108 of the Consumer Product Safety Improvement Act. The rule is effective Sept. 29, 2017. Contact: John Boja; CPSC, Office of Compliance and Field Operations; 301-504-7300; jboja@cpsc.gov. Citations: 16 CFR 1308.1, 1308.2

President Trump's immigration vision isn't the Reagan way

Marc A. Thiessen | The Washington Post

It was not that long ago that a Republican presidential candidate vowed that "we will make America great again." His name was Ronald Reagan, and he made that promise to restore American greatness at the most appropriate place he could imagine: in the shadow of the Statue of Liberty. It's worth recalling Reagan's words that day as we debate the Trump administration's proposal to cut legal immigration in half.

Subject: POLITICO's Morning Energy: FERC back to work — Trump and Justice, a coal country bromance — Interior IG to probe Zinke's Obamacare call

By Annie Snider | 08/04/2017 10:00 AM EDT

With help from Alex Guillén, Esther Whieldon, Eric Wolff and Emily Holden.

FERC IS BAAAAACK: Just before slipping out for August recess Thursday night, the Senate confirmed Republican FERC nominees Neil Chatterjee and Rob Powelson, effectively restoring a quorum at the agency after nearly six fallow months, during which billions of dollars in shovel-ready energy infrastructure projects have stalled.

Even as President Donald Trump has touted plans for a major infrastructure overhaul and cleared hurdles for high-profile pipeline projects like the Keystone XL, his biggest and most tangible impact on infrastructure so far may well be the $13 billion in projects, expected to generate more than 23,000 construction jobs, that went on hold during the bureaucratic morass that was partly of his making, Eric Wolff and Darius Dixon report this morning. For many of these projects, the loss of the quorum in February, shortly after Trump demoted FERC's former chairman, may have cost them a year of work, thanks to the limited construction season in much of the country.

No small matter: "I would not begin to minimize even the passage of another month," former FERC Commissioner Colette Honorable told Eric and Darius, "because there are high stakes in the matters that come before FERC each and every day - vast amounts of capital at issue, vast amounts of consumer cost or savings at stake."

Once Chatterjee and Powelson are sworn in - expected to happen in the next few days - the agency can begin working through the backlog. That's a win for project backers but a setback for anti-pipeline advocates, who accuse FERC of ignoring the climate and environmental implications of its decisions. Lena Moffitt of the Sierra Club blasted the confirmations Thursday night, arguing that the two soon-to-be commissioners are too aligned with the fossil fuel industry. "As the gas industry is threatening a massive expansion of fracked gas projects, it is more important than ever that our FERC Commissioners put the health and safety of the public and our climate first, not rubber stamp any project the industry puts in front of them," she said in a statement.

It's not just infrastructure: We previously laid out a lot of the policy work also piling up for FERC - and that was three months ago!

More hands coming: The Senate Energy and Natural Resources Committee has scheduled a September hearing for Trump's next two FERC nominees: Glick, a Democrat, and Kevin McIntyre, Trump's pick for the agency's chairmanship.

FINALLY FRIDAY! I'm your fill-in host, Annie Snider, and it's my last day with you. Susan Lafferty with Eversheds Sutherland US was first through the door answering that Transportation

Secretary Elaine Chao is constitutionally ineligible for the presidency, because she is originally from Taiwan. Here's Susan's question for today, inspired by a book she's reading with her kids: Which president is rumored to have been stuck in his bath on his Inauguration Day, and in what year did that inauguration take place? Send your guesses to Darius Dixon, who takes the ME reins for Monday - along with your tips, energy gossip and comments at ddixon@politico.com, or follow us on Twitter @Dariusss, @aadragna, @Morning_Energy, and @POLITICOPro.

BASKING IN THE APPALACHIAN LOVE: After a rough couple of weeks for Trump in which Republicans failed to achieve their years-long bid to repeal Obamacare, a new communications director imploded and Russia allegations continued to dominate the news, the president turned to a friendly crowd Thursday night in Huntington, W.Va., where his favorite energy talking points drew roaring applause. After waving a supporter's "Trump digs coal" sign on his way to the podium, Trump touted his withdrawal from the Trans-Pacific Partnership and "the job-killing Paris climate accords" and took credit for an upswing in coal exports, which have seen a bump compared with 2016 but remain far below shipments in previous years.

West Virginia Gov. Jim Justice, a former coal businessman and the richest person in the state, also got a turn at the mic to announce that he will leave the Democratic Party to become a Republican. "I can't help you anymore as a Democrat governor," he told the crowd before lavishing praise on Trump's children and declaring, "Have we not heard enough about the Russians?" Justice said he's been in the Oval Office twice in two weeks to present ideas on coal and manufacturing.

MANCHIN OUT ON A LIMB: The announcement meant further political isolation for Sen. Joe Manchin, the sole Democrat in West Virginia's congressional delegation, as he faces reelection in 2018. The Senate Leadership Fund, a deep-pocketed GOP super PAC, launched a digital campaign Thursday attacking the Democrat. Manchin has refused to change parties and resisted entreaties to join Trump's Cabinet, a move that could have given Republicans one additional vote in the Senate (coincidentally, that's how many extra votes they needed on Obamacare last week). In a statement Thursday ahead of Trump's West Virginia rally, Manchin welcomed the president and said he is "particularly excited" to work with him on tax reform. "Our job is to fix things, not fight," Manchin said.

WIND AT GREENS' BACKS - BUT FOR HOW LONG? Environmentalists hope that EPA Administrator Scott Pruitt's deregulatory agenda is beginning to crumble after he hit two roadblocks this week, Alex Guillén reports: First a federal court reinstated an Obama-era methane regulation, and then Pruitt backed off on his attempts to delay implementation of a sweeping ozone rule. "This week's been a reality check for Pruitt and Trump that when they ignore the law, they're going to lose, and I think that may be starting to sink in," said Mary Anne Hitt, director of the Sierra Club's Beyond Coal campaign.

But Pruitt supporters aren't hanging their heads yet. For one thing, this week's losses were relatively minor, with the biggest battles over the most contentious Obama-era rules yet to come.

Moreover, argued Christi Tezak of ClearView Energy Partners, Pruitt has multiple paths to victory. "You can certainly win by vaporizing a rule, no doubt. You can win by putting in place a different rule that makes it harder to do a stricter rule later. You can win through delays, even if courts reverse you later," she told Alex.

INTERIOR IG LAUNCHES PROBE OF ZINKE-MURKOWSKI CALL: The Interior Department's inspector general has begun a preliminary investigation into Secretary Ryan Zinke's call to Sen. Lisa Murkowski in which he conveyed the administration's dissatisfaction with her vote against a motion to proceed on the GOP health care bill. IG Mary Kendall told Reps. Raúl Grijalva and Frank Pallone in a letter Thursday that she is looking into "potential legal and ethical violations" by Zinke during the July 26 call. But the Alaska Republican has said she didn't take the call as a threat, and Zinke posted a photo Thursday on Twitter of the pair sharing a beer. "My friends know me well," he wrote. Esther Whieldon has all the details.

SCHWARZENEGGER FLEXING CLIMATE MUSCLES AGAINST TRUMP: Former California Gov. Arnold Schwarzenegger today will announce an ambitious national effort aimed at countering Trump's withdrawal from the Paris climate accord by providing state and local lawmakers with a toolbox for passing substantive climate change legislation, POLITICO California's Carla Marinucci reports.

The project, dubbed a "digital environmental legislative handbook," offers a curated list of legal and legislative research, voting records, bill language and data to help lawmakers prepare bills on everything from air quality to renewable energy to climate change. "With his decision on the Paris agreement, it is even more so important to make this information available - because it shows the kinds of wonderful things states can do - without waiting for the federal government," Schwarzenegger told Carla. He's set to unveil the toolbox before the National Caucus of Environmental Legislators.

GREEN GROUPS PRESS COURT ON CPP RULING: Environmental groups are asking the D.C. Circuit Court of Appeals not to hold off on ruling on the Obama administration's Clean Power Plan, arguing that the White House's Unified Agenda indicates that it could be at least 12 months before the Trump administration will propose its repeal of the contentious rule. The classification of the CPP repeal as a "long-term" action "demonstrates that even the preliminary step of a *proposed* rule may be delayed for at least another year," the green groups wrote in a court filing Thursday, arguing that the court should not hold off on a fully-briefed case "for a period far longer than the Supreme Court presumed when it issued its stay pending this Court's disposition of the merits." Here's Alex with more.

ANOTHER SAGE GROUSE REBELLION? The team of Interior politicals and career staff assigned to review the agency's land-use conservation plans for sage grouse in Western states could send Zinke their recommendations as soon as today. The Obama administration's plans, which sparked ire across the West, aimed to avoid an Endangered Species Act listing by boosting protections on broad swaths of federal land. The new recommendations, due to Zinke by Sunday, could include ideas for easing the path for fossil fuel development on federal land in the bird's range.

EPA REMAINS QUIET IN METHANE APPEAL: EPA is staying mum in the ongoing legal battle over Pruitt's 90-day stay of the methane rule for new oil and gas wells. The agency did not file any brief taking a position on requests from industry groups and states that support the stay seeking a rehearing before the full D.C. Circuit Court of Appeals, and a spokesman had no comment on the record. The stay's supporters made one last argument Thursday for an *en banc* review, saying the court didn't have the jurisdiction to hear the case in the first place. It's not clear when the D.C. Circuit will decide whether to hear the appeal, but time is of the essence: Pruitt's stay would have expired in 27 days anyway.

EPA, DOT READY TO TAKE COMMENT ON MPG REVIEW: EPA and the Department of Transportation could move to reopen comments on a review of the 2022-2025 mileage standards as soon as today, a source tells ME. As part of setting vehicle emission requirements for both 2017-2021 and 2022-2025, EPA agreed to review the second set of standards for appropriateness. The review was completed over a year early under former Administrator Gina McCarthy, and she affirmed the mileage standard of 54.5 miles per gallon. Under pressure from the auto industry, Pruitt and Chao revoked that affirmation in March, and now the agency will announce that it will take the next step in the review by reopening the docket for further input.

GAO SEES ROOM FOR IMPROVING PHMSA'S SAFETY CALCULATIONS: The Government Accountability Office recommended Thursday that the Pipeline and Hazardous Materials Safety Administration take steps to ensure that the formula it uses to identify which pipelines pose the greatest safety risk is effective. PHMSA uses the formula to set its priorities each year and decide how often it checks on parts of the nation's 2.7-million-mile pipeline network. GAO said the agency needs to document its reasoning behind each component of its formula and create a process to periodically review its effectiveness.

SPRING'S COMING SOONER IN THE HIGH NORTH: Snow is melting earlier in the spring and coming later in the fall on the North Slope of Alaska, according to a study by NOAA and the Cooperative Institute for Research in Environmental Sciences published in the *Bulletin of the American Meteorological Society*. Between 1975 and 2016, the researchers found the snow-free season was growing by about one week per decade, with major ecosystem implications. Native birds have been laying eggs earlier, and rivers have broken through the ice to flow earlier in the season, the researchers found.

ENVIROS PLAN BORDER WALL RALLY: Dozens of environmental and social justice groups are planning a two-day rally and walk in southern Texas on Aug. 12-13 aimed at highlighting the potential social and environmental impacts that Trump's plan to expand the border wall could have on nearby towns and wildlife. The rally, which will include speakers such as Sierra Club President Loren Blackford, will also take aim at Trump's anti-immigration policies. The move is part of a new strategy by environmental groups to combine forces with social justice groups on this issue.

QUICK HITS

- On environment and energy, Trump often picks his own facts. New York Times.

- U.S. shale oil producers cannot shake impulse to keep producing. Reuters.

- Monsanto employee emails show efforts to marshal scientists. Wall Street Journal.

Subject: POLITICO's Morning Score: Angry donors close their wallets — Tim Murphy to retire in January — AFP to spend $4.5 million on tax reform

By Maggie Severns | 10/05/2017 10:00 AM EDT

With Daniel Strauss, Elena Schneider and Zach Montellaro

The following newsletter is an abridged version of Campaign Pro's Morning Score. For an earlier morning read on exponentially more races - and for a more comprehensive aggregation of the day's most important campaign news - sign up for Campaign Pro today. (http://www.politicopro.com/proinfo)

Morning Score will not publish on Monday, Oct. 9. Our next Morning Score newsletter will publish on Tuesday, Oct. 10. Please continue to follow PRO Campaigns issues here.

MONEY ON MY MIND - "Angry GOP donors close their wallets," by POLITICO's Alex Isenstadt and Gabriel Debenedetti: "Republicans are confronting a growing revolt from their top donors, who are cutting off the party in protest over its inability to get anything done. Tensions reached a boiling point at a recent dinner at the home of Los Angeles billionaire Robert Day. In full view of around two dozen guests, Thomas Wachtell, a retired oil and gas investor and party contributor, delivered an urgent message to the night's headliner, Senate Majority Leader Mitch McConnell: Just do something.

Wachtell, who has given tens of thousands of dollars over the years to Senate Republicans, recalled that McConnell responded defensively. Passing legislation takes time, the Republican leader responded, and President Donald Trump didn't seem to understand how long it required.

'Anybody who was there knew that I was not happy. And I don't think anybody was happy. How could you be?' said Wachtell, who has previously given over $2,000 to McConnell but recently stopped donating to Senate GOP causes. 'You're never going to get a more sympathetic Republican than I am. But I'm sick and tired of nothing happening.'" **Full story.**

RETIREMENT WATCH - Pennsylvania GOP Rep. Tim Murphy to retire: Murphy announced his retirement late Wednesday. He faced blowback from his own party this week after the Pittsburgh Post-Gazette reported that Murphy - who is anti-abortion rights - apparently urged his mistress to have an abortion. NRCC Chairman Steve Stivers (R-Ohio) said in a statement that "while I am extremely disappointed in the circumstances surrounding Congressman Murphy's retirement, I remain confident that PA-18 will remain under Republican control next year." **Full story.**

FIRST IN SCORE - State senator to announce campaign today: State Sen. Guy Reschenthaler will launch his bid to replace Murphy today, according to a Republican source familiar with the state legislator's decision. Republicans in the state expect more candidates to jump into the race for this Republican-leaning seat in southwestern Pennsylvania.

- VoteVets endorses Democrat Pam Iovino: VoteVets announced Wednesday that it will back Democrat Pam Iovino, a veteran who's one of three Democrats running to replace Murphy, per a statement from the group.

THE HEAT IS ON - "AFP pressures Trump-state Democrats on tax reform," by POLITICO's Kevin Robillard: "Americans for Prosperity is spending $4.5 million on television ads to push three Democratic senators up for reelection next year to back the GOP's plan for tax reform. The group is spending $2 million to pressure Sen. Joe Donnelly in Indiana, $1.5 million to persuade Sen. Tammy Baldwin in Wisconsin and $1 million to goad Sen. Claire McCaskill in Missouri. All three senators are up for reelection in 2018 in states President Donald Trump won during the 2016 election cycle. ... The ads feature a young woman speaking direct to camera about the impact of tax cuts. 'People are sick of politics,' she says. 'I am too. But fixing our broken tax system isn't about politics - it's about helping people. It means the powerful, the well-connected, politicians - they'll stop benefiting from a rigged system. It means everyday Americans will have more to spend on what's important to them.'" **Full story.**

FIRST IN SCORE - Democrat Dan Haberman releases video announcing Michigan Congress run: Attorney and businessman Dan Haberman is announcing today he's running for Congress in Michigan's 11th District, which is currently held by retiring GOP Rep. Dave Trott. Haberman opens his emotional three-minute campaign video announcement by recalling a recent incident in which a bomb threat was called into his daughters' Jewish preschool. "It's crystal clear why this is happening now," Haberman says shortly before the video cuts to footage of the Charlottesville rally.

Haberman has not held public office before but worked in the past to push passage of a smoke-free air law in the state. The video calls out Trump's reaction to the Charlottesville rally, but Haberman also struck a bipartisan tone in an interview: "All of us - Democrats, Republicans, Independents, people who don't pay attention - we all deserve a government that functions," Haberman told Morning Score. The Cook Political Report currently rates the district as "Republican toss up." **Watch the video.**

Days until the 2017 election: 33.

Days until the 2018 election: 397.

THE HEAT IS OFF - "Republican governors not sweating GOP primary turmoil," by POLITICO's Daniel Strauss: "Congressional Republicans are bracing to deal with an angry base and a wave of anti-establishment candidates inspired by Roy Moore's Alabama victory in

next year's primaries. But the governors readying 2018 reelection campaigns have no such concerns. Some of them are preparing to face the same voters. But GOP operatives say that the anger those voters feel toward Washington and congressional Republicans - and especially Senate Majority Leader Mitch McConnell - is not matched by anything simmering against state leaders broadly. ... There are still primaries on the horizon for a handful of the dozen Republican governors standing again in 2018. Some Illinois Republicans see an opening to challenge Gov. Bruce Rauner after he signed an abortion funding bill. And the lieutenant governors-turned-governors in South Carolina and Kansas look set to face competition for full terms, too." **Full story.**

Q3 CAMPAIGN FINANCE -

- Indiana Senate: Roughly 80 percent of the $1 million state Republican Rep. Mike Braun said he raised was self funded, via the AP.

- Massachusetts Senate: Republican businessman John Kingston said he will pour $3 million of his own cash into his potential bid, via The Boston Herald.

- MI-06: Democrat Matt Longjohn raised $211,000 since launching his campaign in July, but the announcement did not list cash on hand.

- MI-08: Democrat Elissa Slotkin raised $460,000 in the third quarter, per a statement from her campaign. "Slotkin has raised more in a single quarter than the incumbent Rep. Mike Bishop, or any other Democratic challenger, has previously raised in the central Michigan district," a campaign announcement said, but it did not release her cash on hand total.

- VA-07: Democrat Dan Ward, a veteran who's running against GOP Rep. Dave Brat, raised $260,000 in the third quarter, along with $227,000 in cash on hand, per a statement from his campaign.

- FL-27: Democratic state Rep. David Richardson raised more than $500,000 in the third quarter, with $441,000 in cash on hand, per a statement from his campaign.

DAILY ROLL TIDE - "Roy Moore's Facebook page shared inflammatory memes, article praising Russia's anti-gay laws," by CNN's Andrew Kaczynski and Nathan McDermott: "The Facebook page belonging to Roy Moore, the Republican nominee for US Senate in Alabama, in February included a shared image of a group of black men standing on a destroyed police car during the 2015 Baltimore riots. Overlaying the image was text that read, 'Want to stop riots? Play the National Anthem. They'll all sit down.' The post - originally shared by Moore's wife with the caption 'I doubt it with these people-but worth a try?' - is one of many inflammatory posts shared on the Republican nominee's Facebook, which is now used to promote his Senate campaign." **Full story.**

STAFFING UP - Engstrom forms consulting firm: U.S. Chamber of Commerce political director Rob Engstrom has been named chief political strategist for the American Bankers Association, according to a release: "In his new role, Engstrom will oversee the critical

components of ABA's political engagement operations: the Fund for Economic Growth, BankPac, grassroots and the ABA-State Association alliance ... Engstrom is forming a consulting firm that will allow him to carry out his new ABA responsibilities while also continuing to provide political direction to the U.S. Chamber."

CALL YOUR OFFICE - "Sen. Murphy Used Las Vegas Massacre In Fundraising Appeal," by the Hartford Courant's Russell Blair: "U.S. Sen. Chris Murphy is facing criticism for a fundraising solicitation he sent by email this week - days after the deadliest mass shooting in modern U.S. history - that directed donations to three gun violence prevention organizations but also to his own re-election campaign. ... By Wednesday morning, half a day after the email had been sent, the form no longer directed donations toward Murphy's campaign. Republicans accused Murphy, who has been an outspoken advocate of stricter gun control laws and this week said he plans to reintroduce legislation to strengthen gun background checks, of fundraising off of the tragedy in Las Vegas." **Full story.**

- From Heller's opponent: Danny Tarkanian, the Republican running against Nevada Sen. Dean Heller, has logged a series of radio and television appearances to talk about the shooting, including one where he promoted his forthcoming book.

QUOTE OF THE DAY: "I will do something else like wave signs or march around and yell stuff or something that doesn't require registering or reports." - an excerpt from the termination report a super PAC, Kill Senate Democrats' Political Careers, filed recently with the FEC. (H/t POLITICO's Matt Dixon.)

Summaries

AIR
2008 Ozone NAAQS State Implementation Plans
AIR

Notice of the EPA announces the submission of a continuing information collection request to the OMB regarding state implementation requirements of the 2008 ozone NAAQS adopted under a March 15, 2015, final rule (80 FR 12264). The collection addresses information from 17 states with 30 areas designated nonattainment for the 2008 eight-hour NAAQS, including state submissions of attainment demonstrations, request for proposal plans, and reasonably available control technology determinations. Comments are due Nov. 1, 2017. Contact: Lynn Dail; EPA, Air Quality Policy Division; 919-541-2363; dail.lynn@epa.gov. Citations 40 CFR 50, 51

82 FR 45843 (10/02/2017)

Regulatory Update

AIR
Ambient Air Monitoring Reference and Equivalent Methods
AIR

Notice of the EPA announces the designation of one new ambient air monitoring reference method for measuring concentrations of carbon monoxide (CO). The method is the Sabio Model 6050 Ambient CO Analyzer, an automated method utilizing a measurement principle based on nondispersive infrared analysis. The application was filed by the Sultron Corp., of Round Rock, Texas. Contact: Robert Vanderpool; EPA, National Exposure Research Laboratory; 919-541-7877; Vanderpool.Robert@epa.gov. Citations: 40 CFR 53, 58

82 FR 45842 (10/02/2017)

Regulatory Update

AIR

New Mexico SIP/Regional Haze Progress Report for Albuquerque and Bernalillo County

AIR

Proposed rule of the EPA would approve portions of revisions to the New Mexico SIP for the city of Albuquerque and Bernalillo County. The rule would approve revisions concerning the city and county's regional haze five-year progress report as meeting applicable regional haze requirements and the determination that the current regional haze SIP is adequate to meet the state's 2018 reasonable progress goals. Comments are due Nov. 1, 2017. Contact: James Grady; EPA Region 6; 214-665-6745; grady.james@epa.gov. Citations: 40 CFR 51.309, 52

82 FR 45762 (10/02/2017)

Regulatory Update

ENDANGERED SPECIES

California/Naval Base Point Loma Pier Replacement Project

ENDANGERED SPECIES

Notice of the National Marine Fisheries Service announces the issuance of an incidental harassment authorization request to the U.S. Navy to take nine species of marine mammals incidental to demolition and pile installation activities associated with a multiyear pier replacement project at Naval Base Point Loma in San Diego. The authorization allows take in the form of Level B harassment for one year. The authorization is effective Oct. 8, 2017, and expires Oct. 7, 2018. Contact: Laura McCue; NMFS, Office of Protected Resources; 301-427-8401; ITP.McCue@noaa.gov

82 FR 45811 (10/02/2017)

Regulatory Update

ENDANGERED SPECIES

Connecticut/Marine Mammal Incidental Take

ENDANGERED SPECIES

Notice of the National Marine Fisheries Service announces the receipt of a request from the U.S. Navy for authorization to take marine mammals incidental to noise exposure resulting from pier construction activities at the Navy Submarine Base New London in Groton, Conn. The authorization would allow the take of harbor and gray seals by Level A and B harassment during in-water construction and demolition over a five-year period beginning October 2018. Comments are due Nov. 1, 2017. Contact: Shane Guan; NMFS, Office of Protected Resources; 301-427-8401

82 FR 45828 (10/02/2017)

Regulatory Update

ENDANGERED SPECIES

Utah/Deseret Milkvetch Delisting

ENDANGERED SPECIES

Proposed rule of the U.S. Fish and Wildlife Service would remove the Deseret milkvetch, found in

Utah, from the list of endangered and threatened plants. The rule also includes the agency's 12-month finding on a petition to delist the milkvetch. The agency requests information regarding reasons why the delisting should or should not occur; threats; efforts to protect or conserve the species; range, distribution, and population size; and post-delisting monitoring. Hearing requests are due Nov. 16, 2017. Comments are due Dec. 1, 2017. Contact: Larry Crist; USFWS, Utah Ecological Services Field Office; 801–975–3330. Citations: 50 CFR 17.12

82 FR 45779 (10/02/2017)

Regulatory Update

FOOD SAFETY
Food Labeling/Nutrition and Supplement Facts Labels, Serving Size
FOOD SAFETY

Proposed rule of the FDA would extend the compliance dates for revised requirements for Nutrition Facts and Supplement Facts labels and require that all containers, including containers of products with large reference amounts customarily consumed (RACCs) containing less than 200 percent of the RACC be labeled as a single-serving container (81 FR 33742, 81 FR 34000; 05/27/2016). The current rule would extend the compliance date for manufacturers with $10 million or more in annual food sales to Jan. 1, 2020, and the compliance date for manufacturers with less than $10 million in annual food sales to Jan. 1, 2021. The extension is intended to ensure that manufacturers covered by the final rules have guidance from the FDA to address certain technical questions received after publication of the final rules and are able to complete and print updated Nutrition Facts labels for their products before they are expected to be in compliance with the final rules. Comments are due Nov. 1, 2017. Contact: Paula Trumbo; FDA, Center for Food Safety and Applied Nutrition; 240-402-2579. Citations: 21 CFR 101.9, 101.12, 101.30, 101.36

82 FR 45753 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Arizona/Apache-Sitgreaves National Forests Motorized Travel Management Plan
GENERAL ENVIRONMENT AND SAFETY

Notice announces the intention of the U.S. Forest Service to prepare a revised draft environmental impact statement for the public motorized travel management plan for the Apache-Sitgreaves National Forests in Apache, Coconino, Greenlee, and Navajo counties in Arizona. The plan will designate a system of roads, trails, and areas for motorized use as well as motorized access for dispersed camping and for big game retrieval. The revised EIS updates an Oct. 29, 2010 draft EIS (75 FR 66756) by addressing new information, including changed conditions due to the Wallow Fire of 2011, the 2015 land management plan for the Apache-Sitgreaves National Forests, and changes in aquatic and terrestrial species status. It also addresses more accurate road mapping based on light detection and ranging data and aerial photography, and USFS decisions made under the National Environmental Policy Act since the 2010 draft EIS. The revised draft EIS is expected to be available in the summer of 2018 and the final EIS is expected in the winter of 2019. Comments are due 45 days after the publication of the revised draft EIS in the Federal Register. Contact: Jennie O'Connor Card; USFS; 406-522-2537; jennieoconnorcard@fs.fed.us

82 FR 45800 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
California/Elk Creek Watershed Project
GENERAL ENVIRONMENT AND SAFETY

Notice announces the intention of the U.S. Forest Service to prepare an environmental impact statement for the Elk Creek Watershed Project in the Klamath National Forest in California. The project is intended to address the need to manage forest stands to be more resilient to future disturbances, improve water quality to maintain and restore riparian and aquatic habitat, improve terrestrial habitat for northern spotted owl and Roosevelt elk, reduce fuel accumulations, and improve cultural resources. The project would include eight types of vegetation treatments and various recreation improvements. The draft EIS is expected to be available in June 2018 and the final EIS is expected to be available in February 2019. Comments are due Nov. 16, 2017. Contact: Dock Chastain; USFS; 530-493-1742; jchastain@fs.fed.us

82 FR 45797 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
California/Sites Reservoir Project
GENERAL ENVIRONMENT AND SAFETY

Notice of the Bureau of Reclamation announces an extension of the comment period and rescheduling of meetings on a draft environmental impact report/environmental impact statement and draft feasibility report for the Sites Reservoir Project in Colusa and Glenn counties in California (82 FR 39454, 08/18/2017). The project would consist of a new offstream surface storage reservoir with two main dams, up to nine saddle dams, and up to three recreation areas. The reservoir would be filled via two Sacramento River diversions/canals and a new inlet/outlet structure and pipeline to allow for diversion of excess river flows. The project also would include modifications to an existing diversion facility at the Red Bluff Pumping Plant in Tehama County. Meetings now are scheduled for Dec. 5 and 7, 2017, in Sacramento and Maxwell, Calif., respectively. Comments now are due Jan. 15, 2018. Contact: Michael Dietl; Bureau of Reclamation; 916-978-5070; mdietl@usbr.gov

82 FR 45887 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Classification of the High Intensity Ultrasound System for Prostate Tissue Ablation
GENERAL ENVIRONMENT AND SAFETY

Final rule of the FDA codifies a final order to classify the high intensity ultrasound system for prostate tissue ablation into class II (special controls). The order is issued in response to a de novo application submitted by SonaCare Medical LLC of Charlotte, N.C., regarding the Sonablate® 450 device. The prescription device transmits high intensity therapeutic ultrasound energy into the prostate to thermally ablate a defined and targeted volume of tissue, performed

under imaging guidance. The classification was applicable on Oct. 9, 2015. The order is effective Oct. 2, 2017. Contact: John Baxley; FDA, Centers for Devices and Radiological Health; 301-796-6549; john.baxley@fda.hhs.gov. Citations: 21 CFR 876.4340

82 FR 45725 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Control of Yellow Toadflax
GENERAL ENVIRONMENT AND SAFETY

Notice of the Animal and Plant Health Inspection Service announces the availability of a draft environmental assessment regarding control of yellow toadflax, an invasive plant in pastures and crops, particularly in the northern prairies of North America. The EA addresses the proposed issuance of permits for the field release of the stem gall weevil into the continental U.S. for classical biological control of yellow toadflax. Comments are due Nov. 1, 2017. Contact: Colin Stewart; APHIS; 301-851-2327; Colin.Stewart@aphis.usda.gov

82 FR 45796 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Department of Transportation Regulatory Review
GENERAL ENVIRONMENT AND SAFETY

Notice of the Transportation Department announces a review of existing regulations and other agency actions, as required by the DOT's regulatory policies and procedures, Section 610 of the Regulatory Flexibility Act, and multiple Executive Orders. The review is intended to ensure agency regulations continue to meet the needs for which they originally were designed, remain cost-effective and cost-justified, and promote clean and safe development of energy resources while avoiding regulatory burdens. The notice provides a list of economically significant rules issued between Oct. 16, 2008, and Dec. 8, 2016, and seeks public comment on burdens related to these rules or others. The list includes rules concerning motor vehicle safety standards, pipeline safety standards, greenhouse gas emissions and average fuel economy standards, air traffic control, positive train control systems, tank car standards for high-hazard flammable trains, and commercial drivers. A meeting may be announced at a later date. Comments are due Nov. 1, 2017. Contact: Jonathan Moss; DOT; 202-366-4723; jonathan.moss@dot.gov. Citations: 4 CFR Chapters I, II, III; 23 CFR Chapters I, II, III; 46 CFR Chapter II; 48 CFR Chapter 12; 49 CFR Chapters I, II, III, V, VI, VII, VIII, X, XI

82 FR 45750 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Display Devices for Diagnostic Radiology
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces the availability of a final guidance for industry regarding display

devices for diagnostic radiology. The guidance addresses the types of information that should be provided in premarket notification submissions for display devices intended for diagnostic radiology with product code PGY. Such products are class II devices that are used in controlled viewing conditions for primary image interpretation. The guidance replaces a May 2008 guidance regarding display accessories for full-field digital mammography systems-premarket notification (501(k)) submissions. Comments may be submitted at any time. Contact: Robert Ochs; FDA, Center for Devices and Radiological Health; 301-796-6661. Citations: 21 CFR 807, Subpart E; 892.2050

82 FR 45853 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Electronic Study Data Submission Standards
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces support for version 1.1 of the Clinical Data Interchange Standards Consortium Analysis Data Model Implementation Guide (ADaM IG V1.1), an update to the FDA Data Standards Catalog for electronic study data provided in new drug applications (NDAs), abbreviated NDAs, biologics license applications, and investigational NDAs. The FDA encourages sponsors and applicants to use ADaM IG V1.1 in investigational study data provided in regulatory submissions to the Center for Drug Evaluation and Research. The transition date for support of the new version is March 15, 2018, but it will be required in submissions for studies that start after March 15, 2019. Comments may be submitted at any time. Contact: Ron Fitzmartin; FDA, Center for Drug Evaluation and Research; 301-796-5333; CDERDataStandards@fda.hhs.gov

82 FR 45858 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Equivalence of Complex Products Workshop
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces a workshop concerning demonstration of equivalence of generic complex drug substances and formulations relating to advances in characterization and in vitro testing. The workshop is intended to address evaluation and characterization of critical quality attributes for complex drug substances and formulations and innovative approaches for development and review of equivalent products. The workshop also will serve to collect input from stakeholders on how to conduct and assess critical quality attribute measurements to demonstrate equivalence of complex drug products. The workshop is scheduled for Oct. 6, 2017, in Silver Spring, Md., and via videocast. Comments are due Nov. 10, 2017. Contact: Xiaohui Jiang; FDA, Center for Drug Evaluation and Research; 240-402-4468; Xiaohui.Jiang@fda.hhs.gov

82 FR 45856 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
First Responder Network Authority/South Region

GENERAL ENVIRONMENT AND SAFETY

Notice of the National Telecommunications and Information Administration, First Responder Network Authority (FirstNet), announces the availability of the final programmatic environmental impact statement for the south region of the proposed nationwide public safety broadband network. The PEIS addresses deployment and operation of the network in the south region consisting of Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas. Once a record of decision is signed, the proposed FirstNet projects will submit site-specific environmental documentation to determine whether individual projects have been adequately evaluated in the PEIS or instead warrant a categorical exclusion, environmental assessment, or environmental impact statement. Contact: Amanda Pereira; NTIA, First Responder Network Authority, 571-665-6072

82 FR 45806 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Idaho/Lolo Insect and Disease Project
GENERAL ENVIRONMENT AND SAFETY

Notice of the U.S. Forest Service announces a revised notice of intent to prepare an environmental impact statement for the Lolo Insect and Disease Project in the Nez Perce-Clearwater National Forests in Idaho. The project consists of forest management and watershed improvement activities within the Lolo Creek watershed near Kamiah to achieve a range of age and size classes with species diversity that is resistant and resilient to change agents such as insects, diseases, and wildfires. The notice reinitiates the NEPA process initiated under an April 25, 2013, notice of intent (78 FR 24718) by updating the purpose and need, proposed action, expected dates of the draft EIS (January 2018) and final EIS (August 2018), and contact and agency information. Comments are due Oct. 17, 2017. Contact: Sara Daugherty; USFS; 208-926-6404; sddaugherty@fs.fed.us

82 FR 45798 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Marketing Clearance of Diagnostic Ultrasound Systems and Transducers
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces the availability of a draft guidance for industry and agency staff regarding marketing clearance of diagnostic ultrasound systems and transducers. The guidance provides recommendations for manufacturers seeking such marketing clearance and is intended to supersede a 2008 FDA guidance on the subject. The guidance also addresses when a device modification to a diagnostic ultrasound device can be made without the need for submission of a premarket notification submission. Comments are due Jan. 2, 2018. Contact: Shahram Vaezy; FDA, Center for Devices and Radiological Health; 301-796-6242. Citations: 21 CFR 892.1550, 892.1560, 892.1570

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Material Threat Medical Countermeasure Priority Review Voucher Fee
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces a user fee rate of approximately $2.8 million for material threat medical countermeasure (MCM) priority review vouchers for fiscal year 2018. The notice also describes the payment procedures for such fees, which apply to certain applications for review of human drug products that use a material threat MCM priority review voucher. The rate is effective Oct. 1, 2017, and expires Sept. 30, 2018. Contact: Robert Marcarelli; FDA, Office of Financial Management; 301-796-7223

82 FR 45859 (10/02/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Quantitative Modeling and Simulations in Generic Drug Development Workshop
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces a workshop regarding the conduct of quantitative modeling and simulations in generic drug development. The workshop will address scientific approaches and applications and include discussions concerning opportunities and knowledge gaps to inform regulatory decision-making through the product lifecycle. The agency intends to utilize the information to support product-specific guidance development, improve preabbreviated new drug applications interactions with applicants, increase the quality and efficiency of regulatory reviews, and specify a next generation modeling and simulation toolset for complex and locally acting products. The workshop is scheduled for Oct. 2-3, 2017, in Silver Spring, Md. Comments are due Nov. 3, 2017. Contact: Lanyan Fang; FDA, Center for Drug Evaluation and Research; 301-796-5005; lanyan.fang@fda.hhs.gov

GENERAL ENVIRONMENT AND SAFETY
Wyoming/Kemmerer Grazing and Rangeland Vegetation Management Project
GENERAL ENVIRONMENT AND SAFETY

Notice of the U.S. Forest Service announces revisions to a notice of intent (73 FR 67835; 11/17/2008) to prepare an environmental impact statement to analyze the effects of continued authorization for the Kemmerer Grazing and Rangeland Vegetation Management Project in the Bridger-Teton National Forest in Wyoming. The existing project consists of 181,227 acres of grazing on 17 sheep allotments. The EIS will update domestic sheep grazing and rangeland vegetation management plans and consider a no livestock grazing alternative. The revisions update and supplement the previous notice and add the Trespass Creek Allotment. The issuance of a draft EIS is scheduled for June 2018, and the issuance of a final EIS is scheduled for June 2019. Comments are due Nov. 1, 2017. Contact: Aaron Zobell; USFS, Kemmerer Ranger District; 307- 828-5100; richardazobell@fs.fed.us

GENERAL ENVIRONMENT AND SAFETY
Wyoming/Rawlins Processing Plant
GENERAL ENVIRONMENT AND SAFETY

Notice of FERC announces the filing of an application by Colorado Interstate Gas Co., of Colorado Springs, Colo., for authorization to abandon certain facilities related to the Rawlins Processing Plant in Carbon County, Wyo. The facilities include the lean oil processing and fractionation plants, natural gas liquids truck off-loading facilities, and natural gas liquids interconnecting facilities that tie into the Overland Pass Pipeline of the Overland Pass Pipeline Co., of Cheyenne, Wyo. The applicants also request authorization to abandon by sale natural gas liquids pipelines, associated natural gas liquids measurements facilities, and natural gas liquids rail loading facilities to Sinclair Wyoming Refining Co., of Sinclair, Wyo. The agency will complete an environmental assessment or issue a notice of schedule of environmental review by Dec. 26, 2017. Comments are due Oct. 17, 2017. HAZARDOUS WASTE MANAGEMENT
Texas/Samsung Austin Semiconductor Hazardous Waste Delisting Petition
HAZARDOUS WASTE MANAGEMENT

Final rule of the EPA conditionally excludes the copper filter cake (F006) wastewater treatment sludge generated by Samsung Austin Semiconductor, of Austin, Texas, from the lists of hazardous waste under RCRA. Samsung will be permitted to generate the sludge, which is produced during the electroplating process, at a maximum rate of 750 cubic yards annually. The delisting is effective only in states subject to the federal RCRA delisting program. The rule also requires Samsung to perform specified analytical testing, to submit testing data, and to provide notification to the relevant state regulatory agency before transporting the delisted waste. The rule is effective Oct. 2, 2017. Contact: Michelle Peace; EPA Region 6; 214-665-7430; peace.michelle@epa.gov. Citations: 40 CFR 261.31, 261.32, Appendix IX

Subject: Senate confirms trio of DOE nominees

By Darius Dixon

11/02/2017 05:32 PM EDT

The Senate cleared two Energy Department undersecretaries as well as the agency's chief fossil fuel energy official this afternoon.

Paul Dabbar and Mark Menezes were confirmed as undersecretaries of science and energy, respectively.

Dabbar is a former U.S. Navy nuclear submarine officer who has been managing director for mergers and acquisitions at JPMorgan Chase. Menezes most recently worked as vice president for federal relations at Berkshire Hathaway Energy.

Both men cleared the Senate Energy and Natural Resources Committee on a voice vote in August.

The chamber also approved Steven Winberg to be assistant secretary for fossil energy. Winber, who cleared the Energy committee in early October, is a program manager at the Battelle Memorial Institute, and had headed up R&D for CONSOL Energy. Winberg has been a member of DOE's National Coal Council and chaired the FutureGen Industrial Alliance, which backed an unsuccessful carbon capture project in Illinois.

Subject: Morning Energy: Electric grid weathers total eclipse of the sun — Big biodiesel ruling expected today — Taking stock of California's climate situation

By Anthony Adragna | 08/22/2017 05:41 AM EDT

With help from Eric Wolff, Lauren Gardner, Alex Guillén and Esther Whieldon

PASSED WITH FLYING COLORS: Solar panels across a swath of the U.S. went dark Monday as the first domestic total solar eclipse since 1979 transfixed the country, but the electric grid appeared to weather the disruption easily. Applying lessons Europe learned during its own 2015 eclipse, utilities leaned more heavily on alternate supplies to fill in gaps in solar generation. As Pro's Esther Whieldon reports , Eric Schmitt, California ISO's vice president of operations, told reporters about 3,000 megawatts to 3,500 megawatts of solar generation stopped during the eclipse, but hydropower and natural gas power supplies filled in that gap. "We didn't have any major challenges on the system, even minor challenges," he said. "We're very pleased with how smooth it went. All the resources performed the way they were supposed to perform."

How'd others do? The PJM Interconnection, the grid operator for more than a dozen Mid-Atlantic and Midwestern states saw a decrease of about 520 megawatts utility scale solar during the eclipse, which is not even a drop in the bucket for the system that has 185,000 megawatts of power on call. Duke Energy estimates it saw a drop of 1,700 megawatts-worth of output from utility-scale solar generation in North Carolina. (The grid's success did not extend to traffic where numerous apocalypses were reported after the eclipse passed).

Cabinet secretaries took a break. Interior Secretary Ryan Zinke tweeted it was a "pretty cool view" from his agency's rooftop, while EPA Administrator Scott Pruitt said his staff enjoyed a "great view" from headquarters. Energy Secretary Rick Perry said the total eclipse "rocks" and linked to National Renewable Energy Laboratory staff enjoying the view.

Away from Washington, senior lawmakers did as well. Senate EPW Chairman John Barrasso "really enjoyed watching the eclipse" from Casper, Wyo. (where the totality lasted more than two-and-a-half minutes). Senate Energy Chairman Lisa Murkowski was underground in a " permafrost tunnel" near Fairbanks, Alaska, at peak eclipse, but later caught a glimpse from visiting Deputy Energy Secretary Dan Brouillette.

WELCOME TO TUESDAY! I'm your host Anthony Adragna, and SEIA's Christopher Mansour was first to name Italy as the spot with two other independent countries within its borders (San Marino and Vatican City). For today (in honor of Monday's incredible eclipse): What is the only major U.S. city (more than 500,000 people) that enjoyed more than two minutes of totality? Send your tips, energy gossip and comments to aadragna@politico.com, or follow us on Twitter @AnthonyAdragna, @Morning_Energy and @POLITICOPro.

THE MITCH MCCONNELL CONNECTION: Anthony Pugliese exited the Department of Transportation to join FERC as its chief of staff, Transportation Pro's Lauren Gardner scooped

for Pros. He was DOT's senior White House adviser — a role that was intended to help 1600 Pennsylvania Ave. keep tabs on their goings-on. In this case he served next to Cabinet Secretary Elaine Chao, wife of Senate Majority Leader Mitch McConnell , and the two didn't appear to have gotten along. POLITICO reported in May how Pugliese informed Chao that he expected her to check in with him on all policy moves, a declaration that got a chilly reception.

Now Pugliese has a job as the top staffer for newly anointed FERC chairman Neil Chatterjee — for years McConnell's top energy policy aide — despite limited energy experience. The FERC announcement says Pugliese learned energy matters from his time working for Pennsylvania Gov. Tom Corbett, where he spent a year working for the department of Community and Economic Development, and as a consultant for Pugliese Associates, a Pennsylvania lobbying shop founded by Pugliese's father, Rocco. The company's website shows that it's energy clients included Tesla Motors, a filling station chain, and an energy efficiency non-profit. Pugliese's lobbying disclosure form for the state of Pennsylvania show his only energy client was Tesla.

BIODIESEL PRODUCERS CROSSING FINGERS FOR COMMERCE TRADE RULING TODAY: The Commerce Department is expected to issue a preliminary ruling today on whether to impose a tax on Argentine and Indonesian imports of biodiesel to counter those two countries' subsidies. Biodiesel exporters have been arguing for months that biodiesel feedstocks in Argentina and Indonesia are underwritten by their governments so they can sell into the U.S. market.

RFS credits in discord: Today's decision could drive up the biofuel credits that oil refiners use to comply with the Renewable Fuel Standard, because it would potentially shink supplies and increase the price of biodiesel. Those biodiesel credits can be used for compliance with the ethanol part of the program, too. But Tom Kloza, a founder of the oil tracking service OPIS, says RIN prices have been buffeted by "cross winds" since a court ruling last week that let some small refiners out of the program. "There's a little uneasiness about this small refinery exemption," he said. Today's "ruling isn't as big as the anti-dumping. It would probably provide an upward lift, but right now you have this downdraft related to small refinery exemption."

Just the first step in the trade dispute tango: A victory today for domestic producers would signal what may be a larger victory in October, when Commerce will rule on whether the two countries dumped biodiesel on the U.S. market in an effort to undermine U.S. production. Kloza said that one could potentially rattle biofuel markets. Neither decision will likely be finalized until next year.

A PRIZE PODCAST: This week's episode of Global POLITICO podcast features Dan Yergin, the Pulitzer-winning historian and expert on the geopolitics of energy, as well as Angela Stent, a former U.S. national intelligence officer for Russia, discussing the current "frigid, antagonistic, confrontational" relationship between U.S. and Russia. Yergin also discusses the dissolution of Trump's advisory council of business leaders last week, which he called very much "a comment about what's happening to our politics."

CALIFORNIA'S CLIMATE PUSH FUELS ECONOMIC GROWTH: Since the adoption of landmark climate legislation in 2006, California's gross domestic product growth has nearly

doubled what's been seen at the U.S. more broadly, but the rate of the state's emissions reductions have slowed recently due to a spike in transportation-related emissions, according to a new report out from the nonpartisan group Next 10. "Transportation sector emissions vastly outweigh other carbon-producing areas of California's economy, and the recent spike should alert policy-makers that despite our best efforts, more must be done," Adam Fowler, an economist at Beacon Economics, which prepared the report, said in a statement. Among the other findings: Energy-related carbon dioxide emissions in California were down 12.5 percent in 2016 from their 2006 levels and renewable energy made up 21.9 percent of total electricity generation in the state.

CHECK OUT THAT HASHTAG: Zinke's wife Lola raised a few eyebrows around Washington with a tweet of her and the secretary on a run to the Capitol that included the hashtag #senaterun. ME readers likely remember the Montana congressman was considered a likely Senate candidate against Democrat Jon Tester — who's up for reelection next year — prior to being tapped by the Trump administration for the Interior slot.

MAIL CALL! SCHATZ CRIES FOUL OVER EPA GRANT POLICY: Hawaii Democratic Sen. Brian Schatz sent a letter Monday to EPA's Pruitt urging him to reverse course on a new directive in which a political appointee — John Konkus within the Office of Public Affairs — now will evaluate grant solicitations. "I fail to understand the beneficial role a political appointee, without any meaningful scientific background, could have in the grant review process," Schatz wrote. He added the new policy appeared to be in "direct conflict" with the agency's scientific integrity policy.

THERE'S A HEARING! It may be August recess, but the Senate EPW Subcommittee on Superfund, Waste Management and Regulatory Oversight, chaired by Mike Rounds, today holds a field oversight hearing at his former office — the South Dakota state capitol. It'll examine efforts from the Army Corps of Engineers to manage the Missouri River to "make certain the agency is working in an appropriate and responsible manner." More information here.

DEMOCRATS TOUT ECONOMIC BENEFITS OF MONUMENTS: Ahead of Interior's Zinke's Thursday deadline to issue recommendations on the fate of nearly two dozen national monuments, the Joint Economic Committee Democrats released a series of fact sheets highlighting what they say are the substantial economic benefits the sites provide to local communities. "Removing designation in whole or in part from national monuments, as the Trump administration has proposed, would eliminate this economic engine," Sen. Martin Heinrich , the committee's ranking Democrat, said in a statement.

PUT UP YOUR DUKES: The nomination of one of their own, former New Jersey Rep. Scott Garrett, to run the Export-Import Bank has emerged as the latest battle in the Republican Party's civil war, POLITICO's Zachary Warmbrodt reports . Business groups are expected to ramp up efforts to block his appointment, while opponents of the bank are warning the Senate Banking Committee about the consequences of failing to advance Garrett's nomination."The divides among congressional Republicans appear to be deepening, and I am left with the sense that for some issues, the GOP is closer to a coalition government than a unified party," Compass Point analyst Isaac Boltansky said.

TAKE A GLANCE! DISSECTING NEW YORK'S ENERGY GOALS: The Manhattan Institute is out with a report today arguing, among other findings, New York's goal of reducing greenhouse gas emissions 80 percent from 1990 levels by 2050 is "unrealistic, unobtainable, and unaffordable." In addition, meeting renewable energy and GHG goals will mean shifting to electric-powered equipment across most sectors of the state's economy "adding many billions of dollars in costs in both the private and public sectors," the report argues. Lower-income New Yorkers would bear more of the brunt of those policies to hit the interim reduction goals, it says.

NOT A FAN: German Chancellor Angela Merkel slammed her predecessor Gerhard Schroeder for taking a high-paying post at Russian oil company Rosneft, POLITICO Europe's Victor Brechenmacher reports. "I do not find what Mr. Schroeder is doing appropriate," Merkel told German daily BILD. Schroeder has drawn criticism in Germany for his involvement in the Russian energy sector and his friendship with Russian President Vladimir Putin. He already holds a leadership role at Nord Stream AG, a gas-pipeline consortium set up by Gazprom, to transport Russian gas across the Baltic Sea and into Germany.

LET THERE BE REGIONAL ADMINISTRATOR! A former Alabama environmental regulator will serve as EPA's Region 4 Administrator, Pro's Alex Guillén reports. Trey Glenn was director of the Alabama Department of Environmental Management from 2005 through 2009 and has owned an engineering consulting firm in Birmingham for the last eight years. Alabama's ethics commission found "probable cause" back in 2007 that Glenn may have violated ethics laws but a grand jury in 2009 concluded there were no "provable violations." Regional administrators do not require Senate confirmation.

COURT REVIVES DUGONG SUIT: The 9th Circuit Court of Appeals has revived an environmentalist lawsuit dating back to 2003 alleging a plan to place a U.S. Marine Corps air base in Okinawa, Japan, threatens a local population of dugongs, which are similar to manatees. A lower court previously said the green groups did not have standing to bring the case, and the suit raised "political questions" the court could not answer. But the 9th Circuit reversed that Monday, saying the case must be heard. The green groups will now get to present their case that the new military base will threaten the Okinawa dugong, which is listed as endangered in the U.S. and Japan. However, they may still fail to change anything about the base; the 9th Circuit said the green groups "may face challenges in securing relief on the merits." The base construction has been controversial for reasons beyond dugongs, with the prefecture government taking Japan's central government to court this summer to halt work on seawalls and new land.

LOTS OF FREE TIME? Sebastian Gorka, Trump's deputy assistant, posted the personal phone number and other contact information of a blogger after he put up a post detailing how Gorka's son made an environmental documentary, Death and Taxes reports. The video at issue, made by 18-year-old Paul Gorka, looks at how plastic pollution contributes to water quality issues.

REPORT: NUCLEAR NEEDS CONGRESSIONAL HELP: Kirk Lippold, an energy policy expert who served as commanding officer of USS Cole, is out with a new report arguing Congress must extend a nuclear production tax credit for the U.S. to remain a worldwide leader in that energy sector. "It is incumbent for that leadership to continue through public support of

this clean energy source in order for it to remain a reliable power backbone for decades into the future," he writes in the paper for the Electric Reliability Coordinating Council.

Stories from POLITICO Pro

California grid emerges from solar eclipse unscathed Back

By Esther Whieldon | 08/21/2017 03:53 PM EDT

The California grid survived today's total solar eclipse without a hitch, California Independent System Operator officials said.

About 3,000 megawatts to 3,500 megawatts of solar generation stopped producing power during the eclipse, and the grid operator was able to cover that loss largely with hydropower and natural gas power supplies, Eric Schmitt, ISO vice president of operations, told reporters.

The grid operator had expected to lose up to 4,600 megawatts of utility scale solar during the eclipse and about 1,300 megawatts of residential rooftop solar.

Schmitt said months of planning had enabled the grid operator to accommodate the solar event.

"We didn't have any major challenges on the system, even minor challenges," he said. "We're very pleased with how smooth it went. All the resources performed the way they were supposed to perform."

Electricity prices were normal, peaking in the low $20s per megawatt-hour. But as the eclipse abated, they then went negative — meaning generators would need to pay to ship their power — as the solar power plants began to come online, Schmitt said.

WHAT'S NEXT: The ISO expects to release more details about how the grid performed during the solar eclipse, such as how much battery storage was used and how much rooftop solar went offline, at a later time.

DOT adviser jumps to FERC Back

By Lauren Gardner | 08/21/2017 12:33 PM EDT

Anthony Pugliese has left DOT to become the Federal Energy Regulatory Commission's chief of staff, POLITICO has learned.

Brigham McCown, a former Republican DOT official who worked on the Trump administration's transition team with Pugliese, confirmed the move.

Pugliese was the department's senior White House adviser, a role that Cabinet secretaries across the administration have chafed against.

A FERC spokesman confirmed the move. DOT didn't respond to a request for comment.

Court says EPA overstepped in denying small refiners RFS exemption Back

By Alex Guillén | 08/15/2017 02:09 PM EDT

The Obama administration in 2016 wrongly forced two small refineries in Wyoming to comply with the Renewable Fuel Standard, a federal court ruled today.

The Sinclair Oil-owned facilities had requested exemptions from the RFS, citing language in the law that allows EPA to spare small refiners from the program's biofuel blending requirements if they would experience "disproportionate economic hardship." While DOE recommended granting them a 50 percent waiver, EPA in October 2016 said both facilities were profitable enough to bear the RFS's costs and thus would have to comply fully with the program.

However, a split panel from the 10th Circuit Court of Appeals today said EPA overstepped its authority by concluding that the exemption could only be granted if complying with the RFS presented a long-term, "existential threat" to the refineries' survival.

EPA "chose a definition of economic hardship plainly at odds with Congress's statutory command," concluded the two majority judges, Timothy Tymkovich, a George W. Bush appointee, and Nancy Moritz, an Obama appointee. They sent the matter back to EPA for further action.

In a dissent, Carlos Lucero, a Clinton appointee, said he believed EPA had relied on "a more nuanced analysis" than the majority said which may have been permissible.

The decision comes just weeks after the D.C. Circuit ruled in a separate case that the Obama EPA had misappropriated a broader waiver authority under the RFS to require using less corn ethanol in 2016 than Congress required.

WHAT'S NEXT: EPA must review the refineries' petitions in light of the ruling. The agency could find further reasons for denying the petitions or it may grant Sinclair the sought-after exemptions.

2018 showdown looms: House Republicans vs. Democratic senators Back

By Elana Schor and Burgess Everett | 11/18/2016 05:22 AM EDT

As Democratic senators weigh when to fight and when to compromise with Donald Trump, Republicans on the other side of the Capitol are watching — with 2018 in mind.

Several of the 10 Democrats up for reelection in states that Trump won are likely to face off against members of the House Republican Conference. And on Thursday, one of those potential Senate hopefuls, Montana Rep. Ryan Zinke, fired a warning shot at his possible rival, Democratic Sen. Jon Tester.

"What I'm hoping, quite frankly, is that Sen. Tester moves rapidly to the middle," Zinke said of the two-term incumbent he is considering taking on. "His votes have not been consistent with

Montana."

Zinke said he's preparing "to get a lot of pressure" to run against Tester, who chaired the Democratic Senatorial Campaign Committee during a disappointing 2016 election cycle for his party. The two-term congressman has met with Senate Majority Leader Mitch McConnell (R-Ky.) and Sen. Tom Cotton (R-Ark.) about a possible bid.

Tester would be "a formidable opponent, should I run," Zinke added. "I'm in no hurry to make a decision."

Democrats had hoped to defeat Zinke this year to kill off the Senate prospects of the affable former Navy SEAL. But despite Tester's personal attention to the campaign of Democrat Denise Juneau, who challenged Zinke for Montana's at-large House seat, the Republican coasted to an 18-point victory.

Tester said Thursday he'd bet a steak dinner that Zinke will run against him. No matter what, the Democrat is girding for a fight.

"They're going to get someone tough," Tester said Thursday.

Sen. Steve Daines (R-Mont.), who was elected in 2014 in the increasingly red state, said it was "too soon" to say definitively how much trouble Tester might be in.

"Every election has a different dynamic," Daines said. "You saw what happened last cycle. It was assumed we were going to lose the majority."

Beyond Montana, Sen. Heidi Heitkamp (D-N.D.) could face a strong challenger in Rep. Kevin Cramer (R-N.D.). Like Zinke, Cramer was an early backer of Trump's presidential bid even as the Republican establishment chafed at the New York developer.

Cramer often appears on short lists to lead Trump's Department of Energy, though one source working on the president-elect's transition said the two-term Republican is expected to take on Heitkamp rather than join the administration.

Sen. Cory Gardner (R-Colo.), the former House member chairing the National Republican Senatorial Committee for 2018, praised Cramer as a "tireless advocate."

"He puts the people of North Dakota before everything else, and that's what people want in their elected member of the Senate," Gardner said. "And obviously, in the 2018 election cycle, we just have to plan on winning every race. And of course, he'd be very good at it."

Heitkamp has long made clear that she expects a bruising reelection battle and plans to remind voters of her work with the GOP.

"My whole purpose in being here is trying to bridge some of these partisan divides and try and get things done," Heitkamp said. "I don't care what their label is. When I agree with them, we're

going to do business. When I disagree with them, we're going to have a conversation."

Democrats are expecting a challenge to Sen. Joe Manchin (D-W.Va.) from either Rep. Evan Jenkins (R-W.Va.) or state Attorney General Patrick Morrisey. Manchin is hoping for a repeat performance of this year's election, when his state installed a Democratic governor at the same time it overwhelmingly voted for Trump.

"It's a very good sign. Basically people look at the individual," Manchin said. Voters "know who I am."

Still, Manchin acknowledged that his next campaign is "going to be more challenging." He joined an expanded Senate Democratic leadership slate on Wednesday, giving him a chance to make his case for making deals with Trump — but also potentially allowing Republicans to directly tie Manchin to any Democratic obstructionism.

Given how quickly his state has gone from blue to red, it's unclear how effective Manchin's earlier campaign strategies for governor and senator might be.

"I've been in office since 2001, the state has dramatically changed its politics," said Sen. Shelley Moore Capito (R-W.Va.), who added: "Every election's a challenge and he knows that, I think. He's up for the challenge. He's a very intuitive politician."

In Missouri, which Trump carried by 19 points, several GOP House members are seen as potential challengers to Democratic Sen. Claire McCaskill: Reps. Vicky Hartzler, Ann Wagner, or Billy Long. Incumbent GOP Sen. Roy Blunt just survived a nimble challenge in the state by Democrat Jason Kander.

In Indiana, meanwhile, Republican Rep. Luke Messer could end up squaring off against Democratic Sen. Joe Donnelly. Trump won the Hoosier State by a staggering 28 points.

Historically the party in power has lost ground during the first midterm election under a new president. In 2010, Democrats lost the House and relinquished six Senate seats as voters recoiled at some of Barack Obama's early initiatives, especially his health care law.

The 2018 Senate map gives the GOP a buffer to weather that trend. But if the country doesn't like what the next two years out of Washington brings, Republicans won't be able to shirk the blame.

Sen. Mike Rounds (R-S.D.) said he and other Republicans who were elected to the Senate in 2014 ran as outsiders vowing to shatter the status quo. Asked if Republicans will have to retool that message after they take the wheel in Washington, he said, "That depends on whether or not we actually deliver on what we said we were going to do. So the first 100 days with the new president are going to be critical."

GOP divided over Trump's Ex-Im Bank nomination Back

By Zachary Warmbrodt | 08/21/2017 02:30 PM EDT

President Donald Trump's nomination of former Rep. Scott Garrett to lead the Export-Import Bank has opened up yet another front in the Republican Party's civil war.

Pro-business trade groups, free-market advocates and even social conservatives and gay-rights activists are targeting GOP senators with competing lobbying efforts as they clash over Garrett's past attempts to shut down the bank and his controversial views on LGBT issues.

The issue could come to a head this fall if Senate Republicans move forward with a hearing and confirmation votes for Garrett. Some of the leading groups opposed to the credit export agency are warning the Senate Banking Committee about the consequences of failing to advance the nomination. Meanwhile, business groups are expected to ratchet up efforts to block Garrett's appointment.

That has raised the political stakes around the New Jersey Republican's confirmation and underscored divisions that have contributed to the GOP's lack of success in pushing major legislation through Congress.

"The logjam over the Ex-Im Bank is just the most recent battle in the ongoing ideological war within the GOP between its pro-business wing and the free-market absolutists," Compass Point analyst Isaac Boltansky said. "The divides among congressional Republicans appear to be deepening, and I am left with the sense that for some issues, the GOP is closer to a coalition government than a unified party."

Outside groups are stepping up their efforts as the Trump administration gives Garrett a chance to sell his nomination, which has been under fire since the president announced his pick in April.

At least three Senate Republicans — the number it would take to block his confirmation if Democrats uniformly were to oppose him — have indicated they are on the fence.

Businesses that rely on the Export-Import Bank are stepping up their drive to rally opposition to Garrett because of his attempts to kill the agency when he served in Congress. In 2015, he said the bank "embodies the corruption of the free enterprise system" by promoting crony capitalism.

The bank, which offers loan guarantees to foreign buyers of U.S. exports, hasn't been able to back deals that exceed $10 million since 2015, when its authorization temporarily lapsed and it lost a needed quorum of board members. Though its charter was renewed by Congress in December of that year, the lack of a quorum continues today.

U.S. manufacturers including Boeing and GE view it as a critical financial backstop.

As Garrett met with senators on Capitol Hill earlier this month, he offered a friendlier public message than he had while in Congress. He said he backed the president's desire to have a "functional" agency and that his job would be to "fulfill the administration's agenda of creating more jobs and helping manufacturing in this country."

But his pitch left a bipartisan group of senators less than satisfied.

"He lost his reelection bid last year, and he's now saying lots of things to try to get a new job," said Hamilton Place Strategies partner and former Bush administration official Tony Fratto, who represented a business coalition that supported the Export-Import Bank.

In response to the industry lobbying, outside groups that have worked for years to close the bank are jumping in to help push Garrett's nomination.

On Aug. 7, the Club for Growth and Heritage Action for America were among the conservative organizations that sent a letter to Senate Banking Chairman Mike Crapo (R-Idaho) warning that they would oppose any appointments to the agency's board if Garrett's name did not move forward.

Even after rushing to Garrett's defense, the bank's opponents would still like the agency to be shuttered. And if he ends up saying he's now in favor of reauthorizing the bank as part of his attempt to win confirmation, "it's politics, pure and simple," said Andrew Roth, Club for Growth's vice president of government affairs.

"The fact remains, if the bank is going to have a president, the only person out there that's capable of reforming the bank or reducing its size is Scott Garrett," Roth said.

Another issue dogging Garrett among Republicans is his record on gay rights.

His views attracted controversy in July 2015, when POLITICO reported that he told a group of fellow Republicans that he had refused to pay National Republican Congressional Committee dues because it recruited gay candidates.

Garrett later denied that he was against gay candidates and said his concern was with support for same-sex marriage. But the political fallout contributed to his failed 2016 reelection bid and is becoming a more prominent issue in his Senate confirmation.

American Unity Fund, a pro-LGBT conservative group founded in 2013, plans to aggressively lobby to defeat his nomination if it proceeds, said Tyler Deaton, a senior adviser for the organization.

Deaton said nominating someone with Garrett's record of "vilifying gay Americans" is like "throwing a wrench into something that's already complicated."

"We've shared our concerns with the White House," he said. "They've not even tried to defend

Mr. Garrett's anti-gay behavior."

The White House declined to comment on Garrett's LGBT record.

The Family Research Council, the conservative Christian nonprofit that describes homosexuality as "unhealthy and destructive," has come to Garrett's defense. The group has also been critical of the Export-Import Bank.

In a post last month, the group said Garrett's views on sexuality had "absolutely nothing" to do with his résumé.

"Scott Garrett's got a strong history of supporting not only free markets but fighting against government largess," said David Christensen, the Family Research Council's vice president for government affairs, in an interview. "He would be good at leading the Ex-Im bank. We also think it's unfair for some groups to try to raise his stance on social issues as a weapon against him."

Pruitt picks ex-Alabama regulator for regional chief Back

By Alex Guillén | 08/21/2017 04:57 PM EDT

EPA Administrator Scott Pruitt has appointed a former Alabama environmental regulator as the agency's Region 4 Administrator, EPA announced today.

Trey Glenn was director of the Alabama Department of Environmental Management from 2005 through 2009. For the last eight years, Glenn has owned an engineering consulting firm in Birmingham.

Glenn "will help us carry out President Trump's vision of creating a more streamlined and efficient EPA that focuses on the Agency's core mission, while also providing more regulatory certainty to our nation's businesses," Pruitt said in a statement.

Alabama's ethics commission in 2007 found "probable cause" that Glenn, in his prior job as director of the state Office of Water Resources, may have violated ethics laws to land the ADEM position. But a grand jury in 2009 concluded there were no "provable violations," according to local news reports.

EPA's 10 regional administrators are political appointees but do not require Senate confirmation. EPA's Region 4 covers Kentucky, Tennessee, Mississippi, Alabama, Florida, Georgia, South Carolina and North Carolina.

Subject: BREAKING NEWS: Trump warns against authoritarian regimes in U.N. speech

President Donald Trump warned of "rogue regimes" on Tuesday, speaking before the United Nations General Assembly during what he described as "a time of both immense promise and great peril."

"Terrorists and extremists have gathered strength and spread to every region of the planet. Rogue regimes represented in this body not only support terrorists but threaten other nations and their own people with the most destructive weapons known to humanity," Trump said. "Authority and authoritarian powers seek to collapse the values, the systems and alliances that prevented conflict and tilted the world toward freedom since World War II."

The president touted his administration's success but added that international criminal networks traffic drugs, weapons and people, and threaten America's borders and menace its citizens with new technology.

"To put it simply," he said, "we meet at a time of both immense promise and great peril. It is entirely up to us whether we lift the world to new heights or let it fall into a valley of disrepair."

Subject: WIDESPREAD PRAISE FOR MATT LEOPOLD

WIDESPREAD PRAISE FOR MATT LEOPOLD

Leopold Nominated as EPA General Counsel

WASHINGTON (September 2, 2017) Yesterday, President Donald J. Trump announced his intent to nominate Matt Leopold to serve as general counsel for the U.S. Environmental Protection Agency. Mr. Leopold previously served as general counsel for Florida Department of Environmental Protection from March 2013 to February 2015 and as an attorney for the United States Department of Justice Environment and Natural Resources Division from January 2007 to February 2013. He is currently of counsel for Carlton Fields Jorden Burt, P.A. focusing on environment, energy, water law, and litigation.

His nomination is receiving high accolades from environmental leaders across the country:

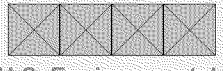
Marco Rubio, United States senator: "Matt Leopold's experience and knowledge will serve EPA well, and I'm glad the president nominated a Floridian who understands the importance of our state's vast ecosystems to our economy and residents' quality of life."

Pam Bondi, attorney general of Florida: "Matt Leopold was a great asset to the Florida Department of Environmental Protection and I look forward to him working together with my friend Scott Pruitt."

Adam Putnam, Florida commissioner of agriculture: "I'm thrilled to see another Floridian joining President Trump's Administration. After eight years of increased regulations and fees under President Obama, with little to nothing to show for it, I'm grateful for folks like Matt Leopold, who bring a wealth of expertise and experience to Washington, as well as a common sense approach to protecting our environment, while enabling our economy to grow and thrive."

John Cruden, president-elect of the American College of Environmental Lawyers and Assistant Attorney General, Environment and Natural Resources Division, U.S. Department of Justice (12/2014-1/2017): "Matt Leopold was a valued colleague of mine at the Department of Justice. He is committed to the rule of law and can be counted on to give sound and candid advice to EPA decision makers."

Eric Draper, executive director, Florida Audubon: "He has a good legal mind, strong leadership skills and knows how to work with different interests to bring resolution to complicated issues. During Mr. Leopold's tenure at the Florida Department of Environmental Protection, I worked closely with the department on resolution of Everglades water quality issues necessary to settle federal litigation. Being directly involved, I saw that the state was successful in negotiating with USEPA a plan that allowed agreement on, and eventual legislative approval of, a plan called 'Restoration Strategies' to create remedies to meet Everglades water quality criterion."



Eric Eikenberg, chief executive officer, The Everglades Foundation: "Few attorneys in America are as familiar with the legal issues – and importance – of Everglades restoration as is Matt Leopold,

and I heartily applaud his nomination to be the next general counsel of EPA. Our paths have crossed often in the 12 years since I first met Matt. I respect him as an attorney and a person of integrity. He understands the importance of America's Everglades and the critical need for restoration. Matt will serve Florida and our nation well, and I look forward to working with him and EPA to ensure America's Everglades are protected and restored."

Ethan Shenkman, EPA deputy general counsel (05/2014-01/2016) and DOJ deputy assistant attorney general, Environment and Natural Resources Division (03/2010-05/2014): "During the Obama Administration, I served in the DOJ environmental division and then at EPA. During that time, I had the opportunity to work closely with Matt Leopold on a number of environmental issues, where we crafted creative and responsible legal solutions to protect the environment, especially relating to the State of Florida where Matt served as general counsel of the Florida Department of Environmental Protection. In addition to his legal acumen and broad knowledge of environmental law, I believe Matt's previous experience as a well-respected career attorney at ENRD will serve him well should he be confirmed, and will enable him to foster a productive working relationship with the talented and dedicated career staff in EPA's legal shop."

Herschel Vinyard, co-chair, Gulf Coast Ecosystem Restoration Council; secretary, Florida Department of Environmental Protection (01/2011-12/2014): "The first thing that the nation will learn about Matt Leopold is his unassailable integrity. The second thing the nation will learn about Matt Leopold is his unwavering commitment to following the law. I have seen firsthand how he brings those two key traits to the table, applies common sense and arrives at the ideal solution to complex problems. Kudos to the Trump Administration and Administrator Pruitt for making this selection."

Driving the Day

Good Thursday morning. BANNON SPEAKS ... TWO Steve Bannon interviews in the last 48 or so hours.

-- NYT: "Trump's Embrace of Racially Charged Past Puts Republicans in Crisis," by Jeremy Peters, Jonathan Martin and Jack Healy: "Stephen K. Bannon, the president's chief strategist, said in an interview that if Democrats want to fight over Confederate monuments and attack Mr. Trump as a bigot, that was a fight the president would win. 'President Trump, by asking, 'Where does this all end' - Washington, Jefferson, Lincoln - connects with the American people about their history, culture and traditions,' he said. 'The race-identity politics of the left wants to say it's all racist,' Mr. Bannon added. 'Just give me more. Tear down more statues. Say the revolution is coming. I can't get enough of it.'" http://nyti.ms/2fN5ShN

-- THE BIG WHAMMY -- READ THIS: "Steve Bannon, Unrepentant: Trump's embattled strategist phones me, unbidden, to opine on China, Korea, and his enemies in the administration," by Robert Kuttner in the American Prospect: "Needless to say, I was a little stunned to get an email from Bannon's assistant midday Tuesday, just as all hell was breaking loose once again about Charlottesville, saying that Bannon wished to meet with me. I'd just published a column on how China was profiting from the U.S.-North Korea nuclear brinkmanship, and it included some choice words about Bannon's boss. ...

"Far from dressing me down for comparing Trump to Kim, he began, 'It's a great honor to finally track you down. I've followed your writing for years and I think you and I are in the same boat when it comes to China. You absolutely nailed it.' 'We're at

economic war with China,' he added. 'It's in all their literature. They're not shy about saying what they're doing. One of us is going to be a hegemon in 25 or 30 years and it's gonna be them if we go down this path. On Korea, they're just tapping us along. It's just a sideshow.' ...

"Contrary to Trump's threat of fire and fury, Bannon said: 'There's no military solution [to North Korea's nuclear threats], forget it. Until somebody solves the part of the equation that shows me that ten million people in Seoul don't die in the first 30 minutes from conventional weapons, I don't know what you're talking about, there's no military solution here, they got us.' ...

"'I'm changing out people at East Asian Defense ; I'm getting hawks in. I'm getting Susan Thornton [acting head of East Asian and Pacific Affairs] out at State.' But can Bannon really win that fight internally? 'That's a fight I fight every day here,' he said. 'We're still fighting. There's Treasury and [National Economic Council chair] Gary Cohn and Goldman Sachs lobbying.' ...

"I asked Bannon about the connection between his program of economic nationalism and the ugly white nationalism epitomized by the racist violence in Charlottesville and Trump's reluctance to condemn it. ... He dismissed the far right as irrelevant and sidestepped his own role in cultivating it: 'Ethno-nationalism-it's losers. It's a fringe element. I think the media plays it up too much, and we gotta help crush it, you know, uh, help crush it more.' 'These guys are a collection of clowns,' he added." http://bit.ly/2w4q0lW

OK, LET'S REVIEW. This is super juicy. **BANNON** dumped on colleagues and contradicted the president on North Korea. There are two positions here: Axios's Jonathan Swan writes Bannon did not know he was giving an interview. **@jonathanvswan:** "You might read some takes tomorrow saying Bannon is playing 5D chess & this was part of a devious strategy. Those takes will be wrong." (***Read Swan's piece for more*** http://bit.ly/2i9eMqL). Bannon has told people he did not believe this was an on-the-record call. Kuttner, who wrote the piece, said he and Bannon never discussed it being off the record. Generally speaking, that's a conversation you have if you want your remarks kept private. To believe Bannon is to believe that he was caught off guard after calling the reporter, forgot the rules of conventional journalism or believed a left-wing reporter would keep his incendiary remarks private.

-- THE ALTERNATE VIEW: Bannon is an incredibly savvy political operator who talks to reporters all the time, and did these interviews for some reason. Yes, Bannon, who is a top adviser to the president who harps on leaking, is constantly gabbing with journalists. He gave two interviews over the course of roughly 48 hours. His job was on the line, then he found himself aligned with the president over protests in the south. He used the Prospect to dump on Gary Cohn, the president's economic adviser, with whom he has clashed, and to get his views heard on China. Whatever his motivation was, he felt like he should dial up some reporters and get his take out there.

THE BIG PICTURE -- MIKE SHEAR, MAGGIE HABERMAN and **GLENN THRUSH:** "The president's top advisers described themselves as stunned, despondent and numb. Several said they were unable to see how Mr. Trump's presidency would recover, and others expressed doubts about his capacity to do the job. In contrast, the president told close aides that he felt liberated by his news conference. Aides said he seemed to bask afterward in his remarks, and viewed them as the latest retort to the political establishment that he sees as trying to tame his impulses. Mr. Trump's venting on Tuesday came despite pleas from his staff, including his daughter Ivanka Trump and her husband, Jared Kushner. ...

"Mr. Bannon, whose future in the White House remains uncertain, has been encouraging Mr. Trump to remain defiant. Two White House officials who have been trying to moderate the president's position suggested that Mr. Bannon was using the crisis as a way to get back in the good graces of the president, who has soured on Mr. Bannon's internal machinations and reputation for leaking stories about West Wing rivals to conservative news media outlets. Many in the White House said they still held on to the hope, however slim, that the new White House chief of staff, John F. Kelly, could impose order on the disarray even as Mr. Trump hopscotches from one self-destructive episode to the next. Mr. Kelly, who watched the president's performance on Tuesday with his head hung low, grimacing at some of Mr. Trump's remarks, is frustrated, according to people inside the White House." http://nyti.ms/2i7LnwM

THE PRESIDENT at 6:19 a.m.: "Publicity seeking Lindsey Graham falsely stated that I said there is moral equivalency between the KKK, neo-Nazis & white supremacists.....and people like Ms. Heyer. Such a disgusting lie. He just can't forget his election trouncing.The people of South Carolina will remember!"

-- WE NEVER REALLY hear Graham talk about the presidential primary, which he dropped out of nearly two years ago (Dec. 2015). **ALSO:** Graham won his last election by 15 points, and won his last primary by 41 points.

-- NANCY COOK and **JOSH DAWSEY:** "'In some ways, Trump would rather have people calling him racist than say he backed down the minute he was wrong,' one adviser to the White House said on Wednesday about Charlottesville. 'This may turn into the biggest mess of his presidency because he is stubborn and doesn't realize how bad this is getting.' For Trump, anger serves as a way to manage staff, express his displeasure or simply as an outlet that soothes him. Often, aides and advisers say, he'll get mad at a specific staffer or broader situation, unload from the Oval Office and then three hours later act as if nothing ever occurred even if others still feel rattled by it. Negative television coverage and lawyers earn particular ire from him. White House officials and informal advisers say the triggers for his temper are if he thinks someone is lying to him, if he's caught by surprise, if someone criticizes him, or if someone stops him from trying to do something or seeks to control him." http://politi.co/2wbZSWB

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)** : If you know only one fact about rising drug costs, know this one: drug makers set prices

for prescription drugs. To help manage nearly double-digit price increases, employers, unions and government programs use PBMs to negotiate lower net prices to help curb costs for employers and patients. Learn more at affordableprescriptiondrugs.org ******

MORE FALLOUT -- "Mitch McConnell's secret fury over Charlottesville response highlights GOP's Trump dilemma," by USA Today's Heidi Przybyla: "There was a reason why it took Senate Majority Leader Mitch McConnell an entire night to respond to President Trump's chaotic news conference equating counter protesters with the Nazis they came to resist. He was livid. Two sources close to the senator, speaking under condition of anonymity to describe private conversations, said the pro-civil rights Republican who lived through the 1960s in Kentucky closely deliberated on the best way forward." https://usat.ly/2x5LTyj

-- WHAT MNUCHIN THINKS, per Bloomberg's Saleha Mohsin, Justin Sink, and Margaret Talev: "As Treasury Department aides filtered in for a routine meeting on Wednesday, there was one main issue to be discussed: Secretary Steven Mnuchin does not stand with Donald Trump on the topic of neo-Nazis. Mnuchin, like other officials, had no idea the president would inflame the Charlottesville controversy by equating white supremacists to counter-protesters, the staff was told, according to two people familiar with the meeting.

"He stood beside Trump at the president's news conference in New York, the one that devolved into a shouting match with reporters over race, but not with the intent of endorsing his remarks on the issue. And now the message was that it's time to move on. The team was encouraged to look beyond the chaos of the past several days and instead focus on advancing Trump's economic agenda, the two people said." https://bloom.bg/2w4vj4Q

-- "Former CIA director slams Trump's 'despicable' comments in letter to CNN anchor," by CNN's Zachary Cohen: "Former CIA director John Brennan slammed President Donald Trump's 'dangerous' and 'ugly' comments on the deadly violence at a white supremacist rally in Charlottesville, Virginia -- writing a personal letter to CNN's Wolf Blitzer after 'The Situation Room' anchor spoke publicly about the fact that he lost all four grandparents to the evils of Nazism. ... 'If allowed to continue along this senseless path, Mr. Trump will do lasting harm to American society and to our standing in the world. By his words and his actions, Mr. Trump is putting our national security and our collective futures at grave risk.'" ***With the whole letter*** http://cnn.it/2uRYRid

--"Apple's Tim Cook 'disagrees' with Donald Trump's take on neo-Nazi violence in Charlottesville," by Recode's Tony Romm and Kara Swisher: "Apple CEO Tim Cook on Wednesday called for an 'unequivocal' denouncement of the recent neo-Nazi demonstration in Charlottesville, Virginia, stressing he disagreed with comments by President Donald Trump that attributed the violence there to 'many sides' - and not white supremacists. In a note to Apple's employees, obtained Wednesday night by Recode, Cook also announced the company would donate $1 million each to the Southern Poverty Law Center and the Anti-Defamation League. Apple plans to match its

employees donations to human rights groups -- on a 2-for-1 basis -- until Sept 30, while setting up a new system in iTunes, its music software, to 'offer users an easy way to join us in directly supporting the work of the SPLC,' Cook said." http://bit.ly/2w4TUXi

-- YASHAR ALI: "Rabbi That Oversaw Ivanka Trump's Conversion to Judaism Slams Trump on Charlottesville Response" http://nym.ag/2fNDCeS

NEW STRIKING TIME COVER - The magazine devotes its issue to a special report on Charlottesville, with essays by Nancy Gibbs, Eddie S. Glaude Jr., John Grisham, Jon Meacham, Ilhan Omar, and Tavis Smiley. The cover shows a figure wearing an American flag giving a Nazi salute. ***See the cover:*** http://bit.ly/2uJpFp1

-- **MICHAEL SCHERER** will be on "Morning Joe" this morning at 7:40 a.m. to discuss the cover story.

THE COMING BATTLE -- @CoryBooker: "I will be introducing a bill to remove Confederate statues from the US Capitol building. This is just one step. We have much work to do."

COMING ATTRACTIONS -- "House Homeland Security Committee to hold hearing on domestic terror threats after Charlottesville," by Washington Examiner's Josh Siegel: "Rep. Michael McCaul, chairman of the House Homeland Security Committee, announced Wednesday his panel will host a hearing next month focused on domestic terrorism threats, including that of white supremacist groups, following the weekend clash in Charlottesville at a rally organized by white nationalist groups. The Sept. 12 hearing was previously scheduled as part of an annual review of worldwide terrorist threats. But McCaul, R-Texas, said the hearing will be broadened to also address domestic threats." http://washex.am/2i906I4

WAPO'S ASHLEY PARKER and **BOB COSTA** on **JOHN KELLY -- "Trump's lack of discipline leaves new chief of staff frustrated and dismayed":** "The uproar -- which has consumed not only the White House but the Republican Party -- left Kelly deeply frustrated and dismayed just over two weeks into his job, said people familiar with his thinking. The episode also underscored the difficult challenges that even a four-star general faces in instilling a sense of order around Trump, whose first instinct when cornered is to lash out, even self-destructively. ...

"This portrait of the White House under Kelly comes from interviews with 17 West Wing aides, informal advisers, Republican lawmakers and Trump confidants, many speaking on the condition of anonymity to offer a more candid assessment....Kelly has largely improved staff morale, and implemented a rigor and order that has made West Wing aides feel both more optimistic and less mistrustful of one another, several White House aides said. ...

"Kelly has transformed the West Wing from a political Grand Central Station - with aides and hangers-on cycling through the Oval Office - into an actual place of business.

One outside adviser recalls stopping by the White House to say hello to his friends on days he had free time. Under Kelly, he said, approvingly, 'If you're coming, now it's, 'Why are you coming? Who are you coming to see? And why does the White House care about what you have to say?" ...

"Late last week in Bedminster, he gathered at Trump's clubhouse restaurant for a relaxed, social dinner with the senior staff members. ... As they reminisced about the campaign and told jokes, Kelly offered a quip. 'The best job I ever had was as a sergeant in the Marine Corps,' he said with a laugh, 'and after one week on this job, I believe the best job I ever had is as a sergeant in the Marine Corps.'" http://wapo.st/2wcJWU6

NYT'S MIKE SCHMIDT and **MATT APUZZO: "Trump Lawyer Forwards Email Echoing Secessionist Rhetoric":** "President Trump's personal lawyer on Wednesday forwarded an email to conservative journalists, government officials and friends that echoed secessionist Civil War propaganda and declared that the group Black Lives Matter "has been totally infiltrated by terrorist groups."

"The email forwarded by John Dowd, who is leading the president's legal team, painted the Confederate general Robert E. Lee in glowing terms and equated the South's rebellion to that of the American Revolution against England. Its subject line - 'The Information that Validates President Trump on Charlottesville' - was a reference to comments Mr. Trump made earlier this week in the aftermath of protests in the Virginia college town. 'You cannot be against General Lee and be for General Washington,' the email reads, 'there literally is no difference between the two men.' ...

"'You're sticking your nose in my personal email?' Mr. Dowd told The Times in a brief telephone interview. 'People send me things. I forward them.' He then hung up." ... The email's author, Jerome Almon, runs several websites alleging government conspiracies and arguing that the F.B.I. has been infiltrated by Islamic terrorists. He once unsuccessfully sued the State Department for $900 million over claims of discrimination." http://nyti.ms/2vLd8OX

WHAT TRUMP IS READING -- "Republican Congressman Meets With WikiLeaks Founder Julian Assange," by Daily Caller's Alex Pfeiffer: "After TheDC broke the news of the meeting, Rohrabacher put out a statement in which he said Assange 'emphatically stated that the Russians were not involved in the hacking or disclosure of [Hillary Clinton's] emails.' The three met for three hours and Rohrabacher is the first congressman to have visited the WikiLeaks founder. A press release from the California congressman's office stated that Rohrabacher 'plans to divulge more of what he found directly to President Trump.'" http://bit.ly/2fMsDSS

--WE HAD HEARD earlier this week that Rohrabacher was planning on trying to meet up with Assange. When we emailed his spokesman Ken Grubbs to ask what Rohrabacher was going to do in London, he told us on Monday night: "[H]e's on his way to meet up with his wife to celebrate their 20th anniversary."

NIMBY -- "Mayors taking swift action to avoid becoming the next Charlottesville," by WaPo's Janell Ross, Mark Berman and Joel Achenbach: "City officials across the country are nervously trying to figure out how to avoid becoming the next Charlottesville as alt-right leaders and white nationalist groups vow to stage more rallies in coming days. A group claiming it is advocating free speech has planned a rally for Saturday on the historic Boston Common, with a group advocating racial justice planning its own gathering in opposition. Boston officials said they have laid down strict conditions, including no sticks, weapons or backpacks. ... A rally scheduled for Aug. 26 in San Francisco has prompted House Minority Leader Nancy Pelosi (D) and several California lawmakers to urge the National Park Service to rescind the permit to gather on federal park land there." http://wapo.st/2i8kEjL

-- PHOENIX MAYOR WANTS TRUMP TO DELAY -- by Arizona Republic's Yvonne Wingett Sanchez: "Phoenix Mayor Greg Stanton wrote in a statement Wednesday he was disappointed to learn of Trump's visit so close to the violent events in Charlottesville. The mayor called on Trump to delay the visit. 'If President Trump is coming to Phoenix to announce a pardon for former Sheriff Joe Arpaio, then it will be clear that his true intent is to inflame emotions and further divide our nation,' the statement said." http://bit.ly/2w1CI4N

SCOOP -- "Trump Set to Roll Back Obama-Era Contraception Rule," by WSJ's Michelle Hackman and Louise Radnofsky: "The Trump administration is poised to issue a rule unwinding an Obama-era requirement that employee health benefits include contraception, which will spark a fresh round of litigation over an issue that has been before courts for six years. Federal health officials are expected to finalize a regulation that would allow employers with religious or moral objections to birth control to omit coverage for contraception from their workers' plans ... The Trump administration rule would allow a much broader set of employers to opt out of offering coverage for birth control, making moot a 'workaround' designed by the Obama administration that allowed women in some cases to obtain coverage even if their employers had declined to offer it directly." http://on.wsj.com/2i8MgFH

FIRST IN PLAYBOOK - WHAT A.G. JEFF SESSIONS WILL SAY TODAY -- Sessions is speaking about gang violence today at 11:30 a.m. to local and federal law

enforcement from North Carolina at the Gangs Across the Carolinas Training Symposium in Winston-Salem, North Carolina: "According to the FBI's most recent National Gang Report, approximately half of the gang investigators they surveyed said that gang membership and gang activity were increasing. Approximately one third of jurisdictions reported an increase in threats to law enforcement. ... Whether it is MS-13, the Bloods, or Outlaw Motorcycle Clubs, gangs are targeting our youth and law-abiding citizens. But I have news for these vicious criminals: WE ARE TARGETING YOU. ...

"President Trump is serious about supporting our state and local law enforcement. That is why he sent my Department three executive orders when I took office. One directs us to be supportive of law enforcement. A second declared that our mission is to reduce crime. And the third requires us to dismantle transnational criminal organizations. These are our goals and we are getting after them. ... Since the beginning of this year, the Department of Justice has secured more than 1,200 convictions against gang members. ... We will not let up. We will combat this threat, take the fight to them, and devastate these criminal enterprises. I refuse to cede one more block, one more street corner, one more inch to these gangs."

FOR YOUR RADAR -- REUTERS: "China military criticizes 'wrong' U.S. moves on Taiwan, South China Sea: "The 'wrong' actions of the United States on Taiwan, its South China Sea patrols and deployment of an advanced anti-missile system in South Korea have had a large, negative influence on military trust, a senior Chinese officer said on Thursday. Fan Changlong, a vice chairman of China's powerful Central Military Commission, told Joseph Dunford, chairman of the U.S. Joint Chiefs of Staff, that mutual trust mechanisms between the two militaries had continued to improve, China's defense ministry said. 'But wrong actions on the Taiwan issue, the United States deploying the THAAD system around China, U.S. ships and aircraft's activities in the South China Sea, the United States close-in surveillance in the sea and air near China have had a large, negative influence on bilateral military ties and mutual trust,' Fan added." http://reut.rs/2uScduN

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)** : Pharmacy benefit managers negotiate the lowest net price for prescriptions on behalf of employers and other health care purchasers; however, the list price - the important starting point for those negotiations -- continues to rise, at a rate of nearly ten percent in 2016 alone. Increased competition, faster reviews of generics and biosimilars and ending anti-competitive practices can also bring down the cost of medications for patients. Learn more at affordableprescriptiondrugs.org ******

CASH DASH -- "Lawmakers raise cash off Trump-Russia probe," by Austin Wright and Darren Samuelsohn: "Rep. Eric Swalwell's campaign website features ominous photos of President Donald Trump, Donald Trump Jr. and Jared Kushner. It warns about Russia's attacks on last year's presidential election and asks visitors to sign a petition demanding that a bipartisan commission investigate. Those who sign are then asked to contribute $5, $10, $25 or more to the California Democrat. Swalwell is one of the junior members of the House Intelligence Committee, which has long had an

unspoken rule against engaging in partisan fundraising related to the panel's secretive work.

"But the panel's high-profile Russia investigation is now putting that rule to the test, and experts are warning that some committee members' recent appeals for campaign cash could undermine everyone's credibility. ... Fundraising appeals from Intelligence Committee members have so far avoided detailed references to the panel's investigation, but there is undoubtedly a connection. And these fundraising appeals come as outside groups, including some with ties to the Trump administration, are capitalizing on the highly charged issue to bolster their own war chests." http://politi.co/2uSeLsQ

BEHIND THE SCENES -- "The 48 Frantic Hours Before CEOs Broke With Trump," by Bloomberg's Melissa Mittelman, Jennifer Kaplan, Jing Cao and Zachary Tracer: https://bloom.bg/2vL2Z4Q

LIKE A PHOENIX -- "Rahm Emanuel rehabs his national profile," by Natasha Korecki and Kristen East: "Rahm Emanuel's bungling of the Laquan McDonald shooting case in 2015 so sunk his stature with the African-American community, Hillary Clinton wouldn't be seen with him during her campaign stops in his city. With one crisis of violence in minority neighborhoods and another with police department morale, he had all but been silenced on national politics. But 18 months after fighting off resignation calls and protests in the streets, the Chicago mayor has rediscovered his national voice - and with Donald Trump in the White House, he's as emboldened as ever to use it. He's on CNN. He's on The New York Times' op-ed pages. He's dispensing advice to top House Democrats on national campaign strategy. He's jetting off to Milan and London to forge mayoral alliances while brashly picking fights with New York. The biggest headlines have come from Emanuel's decision to become the first big-city mayor to legally challenge Trump's immigration policies." http://politi.co/2x6J8ws

MEDIAWATCH -- "Jennifer Steinhauer Named Editor of Live Journalism/D.C." at the New York Times http://bit.ly/2w4sa4S

NYT BRINGS EVENTS TO D.C. -- "The New York Times announced today that its celebrated TimesTalks event series will expand into the arena of politics, policy and current events with a provocative three-part series this fall in Washington D.C. TimesTalks/D.C. will feature Times journalists as they explore the most pressing issues of the day in conversations with leaders who are shaping our world. The inaugural event will feature a conversation between House Speaker Paul Ryan and The Times's deputy Washington editor Jonathan Weisman on tax policy reform discussions in Congress and the legislative agenda. Speaker Ryan will provide insight on his party strategy and goals. This TimesTalks/D.C. conversation will take place the morning of Thursday, September 7 at the Newseum." http://politi.co/2uLgLar

PLAYBOOK INBOX -- Richard Viguerie, "A call to action re Steve Bannon": "Dear Conservative Leader: The campaign against our friend and fellow conservative Steve

Bannon has reached a fever pitch, and it is urgent that you join me in letting President Trump know just how deeply it would divide his winning coalition if he were to cave-in to those who wish to derail his agenda by removing Steve Bannon from the White House staff. ... I believe that the campaign to remove Steve Bannon from the White House staff is part of a well-thought-out effort to isolate the President from his conservative - populist base, stymie our conservative - populist agenda and to make Donald Trump a one-term President." ***The full letter*** http://politi.co/2vLDPDo

-- ANN SELZER emails: "I'm writing to let you know that after eight years of working exclusively with Bloomberg on their national political polling, my firm is now available to work with other clients as Bloomberg takes a hiatus for this off-election year. This is not necessarily a permanent arrangement. We both like each other and foresee we will work on projects together again one day. This means I can take on new polling-related projects, collaborations, and consultative relationships with clients that were not possible while I held an exclusive arrangement with Bloomberg News. If you or someone you know might be interested in working with me, please be in touch."

VALLEY TALK -- "Apple Readies $1 Billion War Chest for Hollywood Programming," by WSJ's Tripp Mickle: "Apple has set a budget of roughly $1 billion to procure and produce original content over the next year, according to people familiar with the matter-a sign of how serious the maker of iPhones is about making a splash in Hollywood. Combined with the company's marketing clout and global reach, the step immediately makes Apple a considerable competitor in a crowded market, where both new and traditional media players are vying for original shows. ... Apple could acquire and produce as many as 10 television shows." http://on.wsj.com/2w4rOeHe

Subject: Interior draft plan pushes energy development, omits climate change

By Esther Whieldon

10/25/2017 01:39 PM EDT

A leaked draft of the Interior Department's five-year strategic plan omits any references to climate change and emphasizes increasing energy production on federal lands, generating revenues, speeding up infrastructure approvals, increasing outdoor recreation opportunities and securing the U.S.-Mexico border.

The draft plan for 2018 through 2022, which is dated Sept. 27 and was first reported by The Nation, doesn't mention climate change, and instead calls for using the best available science to conserve water and land and to "safeguard communities against natural hazards."

The report stands in stark contrast to the Obama Interior's plan for 2014 through 2018, which mentioned climate change more than 40 times and included concrete targets for promoting solar and wind generation. The new draft report mentions renewables in the context of the agency's "all of the above" energy priorities and as part of the agency's review of rents and royalty rates.

On energy and infrastructure development, Interior is creating an "executive committee for expedited permitting" to help carry out Interior Secretary Ryan Zinke's related directive. And by Sept. 30, 2019,, the Bureau of Land Management aims to eliminate its backlog of oil and gas drilling permit applications and to have processed 80 percent of expressions of interest for public land leases.

And the plan would have the Fish and Wildlife Service inform all of its Endangered Species Act listing designations using "input from state fish and wildlife agencies" that opt to participate in the process by the end of fiscal 2018.

Subject: California sues EPA for Pruitt ethics docs

By Alex Guillén

08/11/2017 04:45 PM EDT

California Attorney General Xavier Becerra today sued EPA for documents related to Administrator Scott Pruitt's ethics agreements.

EPA has not yet responded to a request Becerra made in April under the Freedom of Information Act for the documents, according to the suit. The case was filed in U.S. District Court for D.C.

Becerra specifically requested details about Pruitt's "compliance with federal ethics regulations and obligations." Pruitt has recused himself from working on a number of lawsuits related to rules he sued over, including the Clean Power Plan and Waters of the U.S., although Pruitt said he is not barred from working on regulatory rollbacks or replacements of those rules.

Becerra also asked for the agency's "policies and procedures for determining who (if anyone) can assume the powers of the Administrator if he is recused or disqualified from participating in a matter."

WHAT'S NEXT: Becerra asked the court to force EPA to reply to his April public records request. The court will give EPA a chance to respond.

Air Pollution

Axing Power Plan Health Benefits May Signal EPA's New Tack

The Trump administration downplayed the health benefits of reducing power plant emissions in its proposal to rescind the Obama EPA's signature climate change regulation, a policy shift that could have implications for various air pollution control programs.

Climate Regulation

Clean Power Plan Only First Target for Foes of Climate Rules

Scrapping an Obama-era plan to cut carbon emissions from power plants doesn't prevent the EPA from revisiting its authority even to regulate greenhouse gases, conservative opponents of climate regulation said.

Climate Regulation

Coal Gets Nod Over Renewables in Repeal of Clean Power Plan

The Trump administration began the process Oct. 10 of repealing former President Barack Obama's plan to cut greenhouse gas emissions from power plants, opening a small window for a revival of coal while prolonging uncertainty over the U.S. electricity mix.

Climate Regulation

Trump Plays Down Health Hazard in Justifying Climate Rule Repeal

When President Barack Obama unveiled his plan to pare emissions from U.S. power plants two years ago, he stressed the long-term health benefits: 3,600 fewer premature deaths, 90,000 fewer asthma attacks in children and a decline in hospital visits.

Energy

British Columbia Shuns Oil Tankers in Favor of Gas Exporters

British Columbia's opposition to Kinder Morgan Inc.'s $5.8 billion oil pipeline expansion won't stop Canada's westernmost province from welcoming natural gas exporters.

International Climate

Timing of Power Plan Repeal a Message to Global Climate Talks

Scrapping carbon dioxide limits from U.S. power plants should be viewed as "a provocation"

to more than 190 countries just weeks before they meet in Bonn, Germany, to advance an international climate change pact, a defender of the EPA's actions told Bloomberg BNA.

Oil & Gas

Oil and Gas Companies Rebuild Their Financial Houses

Oil and gas companies are coming out of a phase of bankruptcy turnarounds with the help of asset sales, new capital infusions, new ownership, and strengthened cost controls.

Renewable Energy

Green Power a Victim of Own Success Down Under as Costs Plunge

Plummeting costs for renewable energy in Australia may tilt the government toward scrapping subsidies designed to encourage use of the technology.

Renewable Energy

Pruitt Seeks End to Wind Tax Credits to Help Coal Survive

Tax incentives for the wind industry should be eliminated, Environmental Protection Agency administrator Scott Pruitt said Oct. 9.

Shareholder Proposals

Investors Eye Climate Risk, Diversity for Coming Proxy Season

Board diversity and climate change will be prominent themes in shareholder proposals for the 2018 proxy season, corporate attorneys and proponents told Bloomberg BNA.

Sustainability

Australia Allows Buildings, Precincts to Be Certified Carbon-Neutral

Office-block tenants, real estate trusts and local governments are likely to be among the first to take advantage of changes to Australia's federal carbon-neutral certification program that now extend to buildings and precincts.

Energy and Climate Report

To: Jackson, Ryan[jackson.ryan@epa.gov]
From: POLITICO
Sent: Sun 9/10/2017 4:08:07 PM
Subject: How U.S. News college rankings promote economic inequality on campus

A POLITICO review shows that the criteria used in the U.S. News rankings - a measure so closely followed in the academic world that some colleges have built them into strategic plans - create incentives for schools to favor wealthier students.

POLITICO interviewed more than 20 current and former college presidents, administrators and federal education officials, and all agreed, often in fiery terms, that the lack of economic diversity is a critical problem. Many cited a common culprit - the U.S. News rankings, which began in 1983 and quickly grew to become, in the magazine's own words, "the 800-pound gorilla of American higher education."

"I think U.S. News has done more damage to the higher education marketplace than any single enterprise that's out there," said F. King Alexander, president of Louisiana State University.

Arizona

AIR
Motor Fuels and Petroleum Products, Gasoline Vapor Control
Arizona AIR

Final rule of the Department of Agriculture, Weights and Measures Services Division, amends regulations under R3-7-101 through -1013 (nonconsecutive) and repeals regulations under R3-7-706 and -709 to update division standards, including requirements for motor fuels and petroleum products and for gasoline vapor control. The rule reduces classroom and examination requirements for vapor recovery testers to once every three years. The rule also updates fuel-related standards for consumer postings, fuel quality requirements, and dispenser equipment requirements. In addition, the rule revises requirements for production, supply, and blending of biofuels and removes the deadline for submitting alternate decommissioning plans to allow flexibility to gas stations required to remove Stage II vapor recovery equipment by Sept. 30, 2018. Finally, the rule updates citations and other requirements to reflect the transfer of the Department of Weights and Measures to the Department of Agriculture. The rule is effective Oct. 2, 2017. AIR
Refinery Fenceline and Community Air Monitoring
California Regions AIR

Proposed rule of the South Coast Air Quality Management District adopts regulations under Rule

1180 to require petroleum refineries that have the permitted capacity to process more than 10,000 barrels of crude oil per day to install and operate continuous, real-time fenceline and community air monitoring systems. The rule requires refinery operators to submit written plans for establishing and operating such systems, including specifying equipment to be used, the method for disseminating data to the public, and audit procedures. The rule also requires refinery operators to notify the district of downtime for planned maintenance and unplanned equipment failures that impact monitoring data. In addition, the rule requires refinery operators to maintain monitoring records for five years and exempts refinery operators that comply with a cost-recoverable community air monitoring agreement. A comment due date is not specified. Contact: South Coast ACMD; 909-396-2000

WATER

Sacramento and San Joaquin River, Tulare Lake Basin Water Quality Control Plans

California Regions WATER

Notice of the Central Valley Regional Water Quality Control Board announces a resolution (R5-2017-0088) amending the water quality control plan for the Sacramento and San Joaquin river basins and the Tulare Lake Basin. The amendments establish a regionwide municipal and domestic supply (MUN) beneficial use evaluation process in agriculturally dominated surface water bodies. The amendments also establish implementation and monitoring requirements when the MUN beneficial use is modified in agriculturally dominated surface water bodies. In addition, the amendments establish a limited MUN beneficial use applicable to agriculturally dominated water bodies with inherent limiting conditions. Finally, the amendments also remove the MUN beneficial use from 231 constructed or modified agriculturally dominated surface water bodies within the San Joaquin River Basin. The resolution is effective Aug. 11, 2017. Contact: Central Valley RWQCB; 916-464-3291

Pennsylvania

WATER
Safe Drinking Water
Pennsylvania WATER

Proposed rule of the Environmental Quality Board amends regulations under 25 PAC 109.1 through .1307 (nonconsecutive) and adopts regulations under 25 PAC 109.1401 through .1413 concerning safe drinking water. The rule clarifies source water assessment and protection program requirements; updates treatment technique requirements for pathogens; and establishes requirements for filtration plant alarms, shutdown capabilities, and auxiliary power. The rule also requires certain public water systems to consult with the department prior to making significant changes to disinfection practices, updates submission requirements for new source permit applications, and updates design and construction standards for certain public water systems. In addition, the rule updates requirements for community water systems, increases permit fees and establishes annual fees, and addresses corrective action. Finally, the rule establishes the regulatory basis for issuing general permits; clarifies that noncommunity water systems require a permit or approval from the Department of Environmental Protection prior to construction and operation; and updates monitoring, reporting, and tracking requirements for back-up sources of supply. Comments are due Sept. 25, 2017. Contact: Lisa Daniels; DEP, Bureau of Safe Drinking Water; 717-787-9633; RegComments@pa.gov

August 8, 2017

Today on Climate Beat . . .

. . . we got scientific, bringing you news of a draft federal climate science report that directly contradicts Trump administration statements casting doubt on mainstream climate science. The report, the latest draft of which was obtained by the *New York Times*, is currently undergoing White House review before final publication.

The climate science report has already become a political talking point for Democrats. We brought you some initial Democratic reaction to the report, including concerns that the Trump administration will dismiss or suppress the report's conclusions.

And out in West Virginia, Gov. Jim Justice, who recently returned to the Republican Party, is suggesting the Trump administration provide a $15 per ton subsidy to utilities that purchase coal-fired power from the Appalachian region -- citing a national security rationale.

Subject: Morning Energy: EPA to assess climate report — EPA to include 2021 auto emissions 2022-25 in model year review — Methane stay rejected again

By Esther Whieldon | 08/11/2017 05:41 AM EDT

With help from Emily Holden and Alex Guillén

EPA TO GRADE THE CLIMATE REPORT: Scott Pruitt says EPA will review the upcoming federal climate change research report compiled by 13 agencies "and evaluate the merits and demerits and the methodology and accuracy of the report." Emily Holden reports that the EPA chief told a Texas radio show on Thursday the scientific section of the upcoming National Climate Assessment "ought to be subjected to peer-reviewed, objective-reviewed methodology and evaluation. Science should not be politicized. Science is not something that should be just thrown about to try to dictate policy in Washington, D.C."

Pruitt also dismissed the discussions in Washington about carbon emissions and the links to climate change as "political," but said his planned debate over climate science was good for the country. Asked by the radio show host why there's a "preoccupation with CO2" in Washington, Pruitt said because it "serves political ends."

"Frankly, the last several years the past administration used the CO2 issue as a wedge issue, and that's why we talked about it this much," he said. "Why aren't we celebrating what we're achieving with respect to CO2 ... why do we continue to engage in this political football?"

A draft of the science assessment Pruitt was referring to was cited this week by The New York Times, which said some of the report's authors were worried the Trump administration would suppress its findings. That draft brought together peer-reviewed work of dozens of scientists within the federal government and concluded it is "extremely likely" human activity is the main cause of global warming since the mid-20th century, and it projects more intense heat waves, extreme droughts and severe flooding.

Pruitt's comments came just as the National Oceanic and Atmospheric Administration issued a separate report Thursday confirming that 2016 was the warmest year on record, surpassing the records set in each of the two previous years.

EPA TO INCLUDE 2021 AUTO EMISSIONS IN 2022-25 MODEL YEAR REVIEW: EPA will expand its review of 2022-2025 model year vehicle greenhouse gas emissions standards to include 2021 model year standards, Alex Guillén reports . The move mirrors a reconsideration of that year's fuel economy standards by the National Highway Traffic Safety Administration, which must set its Corporate Average Fuel Economy standards in blocks of up to five years, meaning it is only just starting to write rules for 2022-2025. EPA announced earlier this year that it will reopen the midterm review of the 2022-2025 standards after the Obama administration, in its final days in office, certified those standards as achievable. EPA has until April 1, 2018, to decide whether to weaken or keep the Obama administration levels. Any change to EPA's

standards would require a formal rulemaking.

METHANE STAY REJECTED AGAIN: The full D.C. Circuit Court of Appeals on Thursday shot down renewed attempts to revive EPA Administrator Scott Pruitt's 90-day stay of the methane rule for new oil and gas wells, Alex reports . A three-judge panel last month said Pruitt's stay was unlawful and the full court later reinstated the rule. With a vote of 8-3 Thursday, the court denied requests by industry groups and Republican state officials for a full court review of the decision. The court has effectively squashed hopes of further appeals since seeking Supreme Court review would take more time than would have been left on the stay, which would have expired Aug. 31. However, Pruitt is likely to have a longer-term stay in place soon.

TRUMP SCOFFS AT CLIMATE CHANGE: President Donald Trump on Thursday responded to questions about the nation's nuclear posture toward North Korea by somewhat strangely reiterating his disagreement with the past administration on climate change. Speaking at his New Jersey golf course, Trump told reporters that "Nuclear to me, number one, I would like to 'de-nuke' the world. I know that President Obama said global warming is the biggest threat. I totally disagree...I'd like to de-nuke the world. I would like Russia, the United States and China and Pakistan and many other countries that have nuclear weapons get rid of them. But until such time that they do, we will be the most powerful nuclear nation on earth, by far."

Welcome to Friday! I'm your guest host, Esther Whieldon, congratulating Dwight Miller of Parametrix Inc., who was the first to answer that Lavinia "Vinnie" Ream was the first female artist commissioned by the government to sculpt a statue. Ream was hired as a teenager in 1866 to sculpt the standing statue of President Abraham Lincoln, which resides in the Capitol building's rotunda. Ream, who is buried in Arlington Cemetery, also has another claim to fame: She may have convinced Sen. Edmond G. Ross, who boarded at her house, to cast the vote that saved President Andrew Johnson from being removed from office. Today's trivia question returns to Arlington Cemetery where yours truly spent many college summer days giving tours on TourMobile buses: Name the Pulitzer Prize-winning female journalist who covered World War II and the Korean and Vietnam wars and is buried in Arlington Cemetery. Send us your guesses, tips, energy gossip and comments at ewhieldon@politico.com and aadragna@politico.com and follow us on Twitter @esthernow, @aadragna, @bjlefebvre, @Morning_Energy, and @POLITICOPro.

JUDGE SENDS MURRAY-OLIVER CAT FIGHT BACK TO STATE COURT: Coal magnate Bob Murray's lawsuit against comedian John Oliver has been sent out of federal court and back down to a state court . There was some debate about whether the lawsuit over Oliver's June TV segment about Murray and his coal companies was a dispute between parties from different states, but it turns out both Murray's companies and HBO and its affiliates are all incorporated in Delaware, which means technically there is no interstate battle. However, the case will not be heard in the First State; instead, it will move forward in the Circuit Court of Marshall County, W. Va., where some of Murray's coal interests are located.

REPORT PROBES IMPACT OF SHALE BOOM ON EDUCATION: Economic research organiziation Resources for the Future is out with a new report that concludes that the oil and gas boom in recent years has had mixed results, but has generally not hurt student learning. Based on

existing literature and interviews with teachers and others across six oil and gas producing states — Pennsylvania, Ohio, West Virginia, North Dakota, Montana and Colorado — the paper found the impacts of the boom had different effects in each region. For example, student enrollment was statistically higher in boom districts in North Dakota, but Marcellus Shale districts saw a decline in student enrollment compared to neighboring areas.

NORTHERN PASS LINE ONE STEP CLOSER TO GREEN LIGHT: DOE issued its final environmental impact statement Thursday for Eversource's 192-mile-long high-voltage transmission line that would deliver more than 1,000 megawatts of hydropower from Canada to New England. The move queues up the agency to potentially issue a presidential permit for the project later this year, although Northern Pass is still awaiting approvals from the Forest Service and Army Corps of Engineers. The project's route through New Hampshire calls for adding another 52 miles of underground line to the original proposal to reduce the chances of it spoiling the view along the Appalachian Trail. That change that will add about $1.41 billion to the project's cost. Eversource aims to bring the project online in 2020.

COMPANY PROPOSES SOLAR PROJECT ON BLM LAND: Utility-scale developer SolarReserve has filed for a right-of-way grant with the Bureau of Land Mangement for its proposed 1,600 megawatt Sandstone Solar Energy project in Nevada, the company said in a notice to Nevada utility regulators. The company, which declined to provide a copy of its BLM filing, ultimately aims to use about 20,000 acres for eight solar towers in Nye county and hopes to finish the project by 2022. Sandstone project's is not inside any of the solar energy zones BLM created several years ago in the state, according to a company spokeswoman. The Sandstone project appears to be among the first proposed following the rule BLM issued last year that allows the agency to seek competitive bids for leases.

EPA STAFFER AMONG CYBER EXPERTS LEAVING GOVERNMENT: Sean Kelley, EPA's chief information security officer, is one of four senior cybersecurity officials that are leaving U.S. government posts, according to BuzzFeed. The article says the exodus of top leaders raises concerns they could be leaving agencies more vulnerable to cyber attacks. Kelley is taking a job in the private sector after working at EPA for just a few months.

Stories from POLITICO Pro

Pruitt: EPA will review climate findings in scientific report Back

By Emily Holden | 08/10/2017 09:35 PM EDT

EPA Administrator Scott Pruitt told hosts of a Texas radio show on Thursday his agency will review an upcoming federal climate change research report compiled by 13 agencies "and evaluate the merits and demerits and the methodology and accuracy of the report."

Pruitt also dismissed the discussions in Washington about carbon emissions and the links to climate change, saying they were "political."

"Frankly this report ought to be subjected to peer-reviewed, objective-reviewed methodology and evaluation. Science should not be politicized. Science is not something that should be just thrown about to try to dictate policy in Washington, D.C. It ought to be objectively measured. We ought to be able to inform our citizens about what we know and what we do not know," Pruitt said in the interview.

Pruitt was referring to a portion of the National Climate Assessment, a comprehensive climate report issued by the federal government every four years. His comments came just as the National Oceanic and Atmospheric Administration issued a separate report Thursday confirming that 2016 was the warmest year on record, surpassing the records set in each of the two previous years.

Pruitt plans to launch his own debate of climate science, which both his detractors and supporters have said would be an unnecessarily politicized exercise.

The EPA chief said Wednesday that "this debate, this discussion, I think it's good and healthy for this country."

The Trump administration is required by law to issue the National Climate Assessment and its Climate Science Special Report next year.

The draft of the science assessment cited this week by The New York Times consolidated the peer-reviewed work of dozens of scientists within the federal government. It establishes that it is "extremely likely" human activity is the main cause of global warming since the mid-20th century. It projects more intense heat waves, extreme droughts and severe flooding, ranking effects based on a range of confidence levels.

Staff from EPA and other agencies have previously approved the report, but Pruitt and the White House have one last opportunity to make changes.

Asked by the radio show host why there's a "preoccupation with CO2" in Washington, Pruitt said because it "serves political ends."

"Frankly, the last several years the past administration used the CO2 issue as a wedge issue, and that's why we talked about it this much," he said. "Why aren't we celebrating what we're achieving with respect to CO2 ... why do we continue to engage in this political football?"

"Let's just focus on getting the job done through innovation and technology instead of trying to create wedge issues," he said.

Pruitt also weighed in on the New York Times story about the draft report, which said scientists were worried the Trump administration might interfere with its publication. Report authors told POLITICO they've yet to see any sign that might happen, although Trump's stance that climate change is a "hoax" had raised concerns.

"The New York Times out there saying they had to release this report because it's going to be suppressed is just simply legendary. It's just made up news trying to create a distraction from the real work that's being done in Washington, D.C.," he said.

Pruitt praised news stories that were critical of The New York Times for saying it had obtained an unreleased version, even though the report had been available on one website. The New York Times subsequently corrected the statement that the report had not been previously available and published a more recent draft that it obtained.

Alex Guillén contributed to this report.

2016 confirmed as planet's hottest year Back

By Emily Holden | 08/10/2017 01:02 PM EDT

Last year was Earth's warmest on record, according to an international climate report issued Thursday by the National Oceanic and Atmospheric Administration that documents other record-breaking global warming trends of 2016.

The report is the most comprehensive assessment of the effects of climate change released by the Trump administration, and it could make it easier to refute efforts from the president and his Cabinet members to publicly discount climate science as they have frequently done in the past. However, the annual report does not detail the link between climate change and human activities such as burning coal or gasoline. Those conclusions are drawn in a separate draft portion of the National Climate Assessment highlighted by The New York Times earlier this week.

The "State of the Climate" publication, which confirms findings released before President Donald Trump was sworn in, outlines the observed outcomes of swiftly rising temperatures. They include the highest sea levels ever recorded, extremes in rain cycles and declines in global ice and snow cover. The nearly 500 authors convened by NOAA explain the effects that are due both to long-term global warming and shorter-term weather events like El Niño.

Last year was the third in a row to break global temperature records, the report found. It includes science from nearly 60 countries and will appear in the Bulletin of the American Meteorological Society and on NOAA social media feeds.

"This is basically like an annual physical of the climate system," said report co-editor Deke Arndt, NOAA's climate monitoring chief.

It "compiles the facts the data the observations from around the climate system and puts it in an annual manuscript," he said.

Trump has referred to climate change as a "hoax," and his environment and energy secretaries have plans to host a public debate of the science that have generated outcry among some climate scientists who say the human-caused climate change is definitely happening. EPA chief Scott Pruitt said his review could happen as soon as this fall.

"The American people deserve an honest, open, transparent discussion about this supposed threat to this country," Pruitt said on a North Dakota radio show Wednesday.

NOAA and NASA in January combined their data to announce 2016 was the hottest year so far, but the new report backs that finding up with science from around the world. NOAA, which is under the Commerce Department, stands out among other federal agencies. NOAA earlier this year released its annual Greenhouse Gas Index. The EPA, on the other hand, has removed climate change information from its website.

NOAA said last year's heat record is "from the combined influence of long-term global warming and a strong El Niño early in the year."

"Several markers such as land and ocean temperatures, sea level and greenhouse gas concentrations in the atmosphere broke records set just one year prior," NOAA said.

Ardnt explained that NOAA doesn't specify what warming is from climate change and what is from weather events.

"The long-term climate change is like riding up an escalator over time, and things like El Niño and La Niña are like jumping up and down on that escalator," Arndt said.

The Times reported that some scientists are worried the Trump administration could suppress or interfere with climate science reports like the National Climate Assessment, which is required by law to be issued next year. Authors of the subsection of that report, however, said they've seen

no sign that might happen. Arndt, who has been working on the NOAA annual report for eight years, said it includes the "same general material," and underwent the "same general process."

Brenda Ekwurzel, the director of climate science for the Union of Concerned Scientists who was not involved with the report, said it is "almost at the level of the daily weather report you get." NOAA releases monthly data, too.

"This is typical, and it's ironic that people make a big ado about the big reports that kind of tie it all together," she said.

Ekwurzel said the government has a responsibility to inform people of the risks of man-made climate change.

Among its findings:

— Greenhouse gas concentrations are higher than ever recorded. Between 2015 and 2016, carbon dioxide concentrations saw their biggest annual increase in the 58 years on record, reaching peaks not seen in the last 800,000 years of ice core measurements.

— Global surface temperatures are the highest on record.

— Sea levels are the highest they've ever been since recordkeeping began. Global seas are about 3.25 inches higher than the 1993 average when satellite recording began. 2016 marks the sixth year that sea levels have risen.

— Precipitation cycles are becoming more extreme.

— The Arctic is warming faster than the rest of the world.

— Antarctic sea ice levels are lower than ever recorded.

— Alpine glaciers have declined for 37 consecutive years. Glaciers shrunk an average of 2.8 feet.

— There were more tropical cyclones, with 93 storms in 2016, compared to an average of 82 between 1981 and 2010.

EPA will review 2021 auto emissions rule alongside later years Back

By Alex Guillén | 08/10/2017 04:43 PM EDT

EPA will expand its review of 2022-2025 model year vehicle greenhouse gas emissions standards to include 2021 model year standards, the agency announced today.

The development mirrors a reconsideration of that year's fuel economy standards by the National Highway Traffic Safety Administration. NHTSA must set its Corporate Average Fuel Economy standards in blocks of up to five years, meaning it is only just starting to write rules for 2022-2025, and the agency said last month that it will also review its rule for 2021.

Because NHTSA is reviewing its own 2021 standard, EPA will do the same, according to a pre-publication notice signed today by EPA Administrator Scott Pruitt and Transportation Secretary Elaine Chao. It asks for input on the "availability and effectiveness of technology," costs and impacts on consumers, auto manufacturers and automobile safety, among other things.

EPA announced earlier this year that it will reopen the midterm review of the 2022-2025 standards after the Obama administration, in its final days in office, certified those standards as achievable. EPA has until April 1, 2018, to decide whether to weaken or keep those standards.

Any change to EPA's standards, either for 2021 or for the midterm review period of 2022-2025, would require a formal rulemaking process and would be open to legal challenges.

WHAT'S NEXT: The agencies will take public comments for 45 days once the notice is published in the Federal Register.

Court rejects effort to revive Pruitt's methane rule stay Back

By Alex Guillén | 08/10/2017 05:05 PM EDT

The full D.C. Circuit Court of Appeals today by a vote of 8-3 rejected attempts to revive EPA Administrator Scott Pruitt's 90-day stay of the methane rule for new oil and gas wells.

A three-judge panel last month said Pruitt's stay was unlawful, and the full court later reinstated the methane rule. Today, it said it will not grant the en banc appeal requests made by industry groups and Republican state officials. The Trump administration itself did not seek an appeal.

The rejection effectively ends any further appeal efforts; seeking Supreme Court review would take more time than would be left on the stay, which would have expired Aug. 31. However, Pruitt is likely to have a longer-term stay in place soon.

Three of the circuit's 11 active judges voted to hear the appeal: Karen LeCraft Henderson, Janice Rogers Brown and Brett Kavanaugh. All three are Republican appointees.

WHAT'S NEXT: The public comment period on Pruitt's proposed stay that would last through 2019 closed on Wednesday. That longer-term stay could be in place in a matter of weeks.

Subject: POLITICO's Morning Transportation: Senate confirms DOT, DHS nominees before vamoosing — Sanctuary cities targeted — Get some rest before a hectic fall

By Stephanie Beasley and Brianna Gurciullo | 08/04/2017 10:00 AM EDT

DONEZO: You smell that, our loyal MT readers? That's the smell of lingering jet fumes in the air. The Senate confirmed more than 60 nominations Thursday afternoon - including David Pekoske to be TSA administrator, Mark Buzby to be MARAD administrator and Robert Sumwalt to be NTSB chairman - before lawmakers took off for recess.

Baptism by fire: Pekoske, previously vice commandant of the Coast Guard, will now be sworn in as the 13th administrator of the 16-year-old TSA. His confirmation by voice vote comes days after John Kelly left DHS to be White House chief of staff. As Steph reports for Pros, "Pekoske will likely work closely with Acting Secretary Elaine Duke to oversee implementation of a directive DHS issued in June ordering 180 airlines to work with partner airports around the globe to update security for flights to the United States."

Excluded from the en bloc confirmations? Steven Bradbury to be DOT general counsel and Ron Batory to be FRA administrator. Bradbury just squeaked out of committee on a party-line vote, with Democrats questioning his past work for Takata and his part in helping pen the so-called torture memos during the George W. Bush administration. The nominations of Bradbury and Batory - as well as Derek Kan, to be undersecretary of Transportation for policy, and Adam Sullivan, to be assistant secretary for governmental affairs - will have to wait until after recess.

Also of note: The Senate on Thursday confirmed Kay Bailey Hutchison to be the United States' ambassador to NATO. A former senator from Texas, Hutchison served for years on the Senate Commerce Committee.

GOTTA GET DOWN ON FRIDAY: Thanks for tuning in to POLITICO's Morning Transportation, your daily tipsheet on all things trains, planes, automobiles and ports. We at MT wish you a happy weekend. But before you duck out of the office today, please send along tips, feedback and lyrics to sbeasley@politico.com or @Steph_Beasley and bgurciullo@politico.com or @brigurciullo.

"Hitchhiker, praying to the headlights / You don't slow down, not this night / Cactus shadows, in the blue moonlight / Let's not get fooled, fool, with view high in sight / Dessert has oh no night / First things first she sighed / Shut up and drive." (h/t Michael Sievers at Hunton & Williams)

GET LISTENING: Follow MT's playlist on Spotify. What better way to start your day than with tunes (picked by us and readers) that are all about flying, driving, commuting and sailing?

TWEET DU JOUR: From POLITICO's Jake Sherman: "Kelly has totally changed trump. Much more disciplined, tighter etc." (Jake was referring to this tweet from President Donald Trump: "Our relationship with Russia is at an all-time & very dangerous low. You can thank Congress,

the same people that can't even give us HCare!")

SAFETRACK SOUNDTRACK: On WAMU's The Kojo Nnamdi Show, musician Jason Mendelson talked about his years-long mission to write a song for every station in Washington's Metrorail system. Although, he confessed that he hasn't been to all 91 stations yet. Listen here.

SANCTUARY CITIES TARGETED: Republican Sens. John Cornyn of Texas, John Barrasso of Wyoming, Ron Johnson of Wisconsin and Thom Tillis of North Carolina introduced legislation that would block sanctuary cities from receiving federal funds if they don't comply with federal immigration enforcement requests. The lawmakers said the bill would take a "zero tolerance" approach to immigrants who commit crimes or violate immigration laws, in an effort to increase public safety. The legislation also proposes to allocate $15 billion to tighten security at the U.S.-Mexico border, but none of it would go toward fulfilling Trump's campaign promise to build a standalone border wall, POLITICO's Seung Min Kim and Ted Hesson write.

MORE, MORE, MORE: It's been 10 years since a law H.R. 1 (P.L.110-53) was enacted mandating that DHS adopt 9/11 Commission recommendations to improve national security, but the department is still lagging behind when it comes to tracking travelers' arrivals to and departures from the country and checking cargo entering U.S. ports, according to Rep. Bennie Thompson (D-Miss.). "We still do not have a biometric exit system though the department has a pilot underway," he said in a statement Thursday. CBP also is still allowing maritime cargo to enter the country without scanning all materials, including those that could pose nuclear threats, he added. Thompson, who was chairman of the House Homeland Security Committee when the bill passed the chamber, urged the Trump administration to prioritize those issues and make sure that the legislation was fully enacted "as soon as possible."

ALL THE DEADLINES: The infrastructure initiative Trump promised during the campaign is likely to be idling until late autumn, at the earliest. Rep. Mark Meadows (R-N.C.) thinks Congress needs to send a bill overhauling the tax code to the White House by Thanksgiving. That's what the House Freedom Caucus chairman said Thursday at an Americans for Prosperity event, Aaron Lorenzo reports for Pro Tax. The White House is operating under the optimistic assumption that a tax overhaul will pass the House in October and the Senate will follow up in November, which would give lawmakers about a month to turn to Trump's third priority for 2017: an infrastructure bill.

THEN THERE'S THE MUST-PASS BILLS: The House and Senate will both be in session for only a few days before fiscal 2017 ends, as Pro Day Ahead notes. In that time, lawmakers will not only need to re-up the FAA's authorization, but also increase the debt ceiling, a debate that stands to tear apart Republicans. "The upshot: Congress will return next month from August recess with no clear road map for avoiding the first-ever default on the nation's debt," POLITICO's Seung Min Kim and Rachael Bade report. On top of that, Congress will need to pass a spending bill before the government shuts down at the end of September.

BACK IN THE DAY: Robotics engineers and former government officials sat down with Wired Magazine to reminisce about what it was like to participate in what sounds like a pretty epic 142-mile self-driving vehicle race sponsored by the Pentagon. Despite offering a $1 million

prize to the winner of the 2004 Grand Challenge in the Mojave Desert, Tony Tether, then director of the Defense Advanced Research Projects Agency, said he didn't expect more than 10 people to show up. But on the day of the race, the grounds "teemed with sweaty, stressed, sleep-deprived geeks, desperately tinkering with their motley assortment of driverless Frankencars," Alex Davies writes of the race that is now considered a launching pad for the self-driving car industry.

SHIFTING GEARS: Nicole Hager is leaving Sen. Jim Inhofe's (R-Okla.) office, where she has served as deputy press secretary, to take the same position for the Senate Finance Committee beginning Aug. 21. Hager's last day with Inhofe, for whom she has worked since 2015, was Thursday. In an email to colleagues, she said she will also attend The George Washington University Law School.

THE AUTOBAHN:

- "CSX pains lead to Norfolk Southern gains." The Virginian-Pilot.

- "Toyota to build $1.6 billion U.S. plant with rival Mazda: source." Reuters.

- "Linking public works to local hiring faces a Trump challenge." The New York Times.

- "NTSB arrives at scene of deadly Minneapolis school explosion." NBC News.

- "U.S. judge voids World Trade Center contractor's fraud conviction." Reuters.

- "Smoke, then fire: Uber knowingly leased unsafe cars to drivers." The Wall Street Journal.

- "More than 1 in 5 travelers knowingly or unknowingly carried prohibited items onto aircraft, survey finds." The Washington Post.

- "This summer, PATH, New York's puny train, is on the big stage." The New York Times.

THE COUNTDOWN: DOT appropriations run out in 57 days. The FAA reauthorization expires in 57 days. Highway and transit policy is up for renewal in 1,153 days.

Subject: First Move: 'Glider Kits' Exemption Hearing • EPA and Tweeters • Alaska Refuge's Battles

What you need to know to start your day.

'Glider Kits' Exemption Hearing • EPA and Tweeters • Alaska Refuge's Battles

By Chuck McCutcheon

The EPA, having just come off two days of hearings on its plan to scrap power-sector carbon limits, is about to get an earful on its proposal to eliminate another se of emissions requirements.

The agency will hear public input on Monday on its plans to exempt glider kits from Obama-era greenhouse gas standards for heavy-duty trucks, says Abby Smith, who's been tracking the issue. Glider kits are new truck chassis and cab assemblies built for the installation of a used engine and transmission.

The agency proposed Nov. 9 to roll back emissions limits for the glider kit industry—a move that came after glider kit manufacturers petitioned the EPA on the issue, arguing the regulation would effectively destroy their businesses. But regulating emissions from glider kits is critical not only to limiting greenhouse gases but also to reducing conventional air pollutants, environmental groups say.

Expect to hear much more on these competing cost-versus-public health arguments at Monday's hearing.

Do you sit on a federal advisory board and have an active social media presence? Hold off on snarky tweets, the EPA's pesticide programs office says.

Tiffany Stecker explains that the agency's Office of Pesticide Programs Director Rick Keigwin asked members of a federal advisory committee last month to not tweet critical or negative reaction during a meeting that touched on a number of contentious topics, such as the effects of pesticides on honeybees and the agency's handling of an herbicide linked to widespread soybean damage. The tweeting could discourage committee members from voicing their opinions, he said.

Lori Ann Burd, an attorney with the Center for Biological Diversity and member of the Pesticide Program Dialogue Committee (PPDC), responded on Twitter: "Hey EPA, we the people have the right to tweet our observations during public meetings #FirstAmendment #PPDC," she texted at the Nov. 1 meeting.

At a different advisory committee meeting yesterday, Kevin Keaney, the top EPA official in charge of pesticide regulations to protect farmworkers, brought up the incident, saying it "seemed inappropriate and apparently intimidating for some people."

All About: Alaska Refuge's Many Fights

Thirty-seven years ago this week, President Jimmy Carter signed into law a bill that gave a swath of Alaska land more protections and a new name: the Arctic National Wildlife Refuge. Now—as proponents seek to overcome procedural obstacles—the Senate may be on the verge of allowing drilling there, thanks to language in the Republicans' pending tax overhaul.

An undated photo shows muskoxen at the Arctic National Wildlife Refuge.
Photographer: U.S. Fish and Wildlife Service/Getty Images

Debates about the area predate Alaska's 1959 statehood. In the late 1920s, conservationist Robert Marshall argued for setting aside northern Alaska as permanently wild at a time when military and business groups called for oil exploration there.

After decades of fighting between oil companies and environmentalists, the land that became the refuge was first set aside in 1960. The 1980 law put most of the refuge off-limits, but left it up to future Congresses to decide the fate of the coastal plain and whether drilling could someday be allowed.

The Interior Department sought to open the land for drilling in 1987, during the Reagan administration, provoking an outcry from environmentalists and a rebuff from Congress. In 1991, a provision to allow drilling was included in an energy bill, but dropped after a filibuster.

When Republicans took control of both chambers of Congress in 1995, they included language in a budget package that would have opened ANWR to oil exploration. President Bill Clinton cited that provision when he vetoed the legislation, leading then-Alaska Republican Sen. Ted Stevens to try—unsuccessfully—to attach drilling language to a defense spending bill. An angry Stevens told colleagues, "We know this Arctic. You don't know the Arctic at all."

But both sides have dug in their heels since then. Proponents say it would help wean the U.S. from its dependence on foreign oil; activists have compared it to damming the Grand Canyon for electricity or tapping Yellowstone's Old Faithful for heat.

Subject: Pruitt distances himself from Trump cuts to Great Lakes

By Annie Snider

08/07/2017 01:18 PM EDT

EPA Administrator Scott Pruitt is touting his support for a popular Great Lakes cleanup program, despite the fact the Trump administration's budget proposed zeroing it out.

In a message accompanying a report to Congress on the Great Lakes Restoration Initiative, Pruitt writes he is "proud" that through the initiative "we are fulfilling our mission to restore the health of the water that so many of our communities depend on." The message argues that the program's investments "are making a tremendous difference" across the region.

The Trump administration's fiscal 2018 budget proposed eliminating federal support for all watershed programs, including the Great Lakes program, which is by far the largest at roughly $300 million in annual federal funds. The move drew an outcry from Great Lakes lawmakers, both Republican and Democrat, and the House Appropriations Committee's fiscal 2018 funding measure would restore those funds, although it would eliminate some of the smaller watershed programs.

The Trump budget also would eliminate federal funding for the Chesapeake Bay cleanup program, which Pruitt sued over as Oklahoma's attorney general but which he reversed course on and supported when nominated for the top job at EPA.

Pruitt has been distancing himself from the administration's proposed cuts to the popular watershed programs, telling lawmakers in June, "Honestly, money's important, but I think this leadership role is important as well, and that's going to continue." In July, Pruitt told the Minneapolis Star-Tribune the Great Lakes program is "a continuing need, and we have to see that it's adequately funded."

WHAT'S NEXT: Congress will ultimately determine funding levels for the watershed cleanup programs in its 2018 funding measures.

Subject: BREAKING NEWS: Trump announces military increase in Afghanistan

President Donald Trump is increasing the American military presence in Afghanistan, he announced Monday night at the Fort Myer military base in Arlington, Virginia.

Trump promised a "dramatically" different approach to the war, with future troop levels based on conditions in the country, rather than pre-set timetables.

"A hasty withdrawal would create a vacuum that terrorists, including ISIS and al-Qaeda, would instantly fill," Trump said. "In the end, we will win."

From: Morning Transportation
Sent: Tue 9/19/2017 2:07:40 PM
Subject: POLITICO's Morning Transportation, presented by Auto Alliance: JetBlue CEO slams 'Big Three' over Open Skies — Air marshals in the clear — NTSB investigating NYC bus crash

By Brianna Gurciullo | 09/19/2017 10:00 AM EDT

With help from Stephanie Beasley and Tanya Snyder

JETBLUE CEO SLAMS 'BIG THREE': If United Airlines, Delta Air Lines and American Airlines were really serious about their claims that two Persian Gulf nations are violating the spirit of their Open Skies agreements, "they probably would have followed the established DOT process, filing an official complaint ... and this matter would have been decided years ago," JetBlue Airways' president and CEO, Robin Hayes, said Monday during an address at the Aero Club of Washington. Hayes went on to argue that current Open Skies agreements bring more travelers to the United States, and those travelers then fly domestically on U.S. airlines. Tanya has more for Pros.

Backtalk: Jill Zuckman, the spokeswoman for the Partnership for Open and Fair Skies, said in response to Hayes' remarks: "Perhaps if JetBlue did not financially benefit from Emirates' billions of dollars in illegal subsidies, it would acknowledge that fair trade requires that all parties abide by the rules of international trade agreements." Zuckman also noted that JetBlue's pilots are members of the Air Line Pilots Association, which is part of the Partnership for Open and Fair Skies.

Delta-Aeromexico deal a 'template': During his speech Monday, Hayes also praised DOT for taking what he described as steps to limit the "unchecked power of the Big Three." He said the conditions DOT put on the Delta-Aeromexico joint venture should be a "template" for future deals. DOT put a five-year sunset on their antitrust immunity and required the airlines to give up some slots at Mexico City International Airport - "one of the most challenging airports to serve for new entrants," Hayes said - allowing JetBlue to add more service.

IT'S TUESDAY: Thanks for tuning in to POLITICO's Morning Transportation, your daily tipsheet on all things trains, planes, automobiles and ports. Be sure to send tips, feedback and lyrics my way: bgurciullo@politico.com or @brigurciullo.

"You will see him on TV, any given Sunday / Win the Super Bowl and drive off in a Hyundai."

GET LISTENING: Follow MT's playlist on Spotify. What better way to start your day than with songs (picked by us and readers) that are all about flying, driving, commuting and sailing?

AIR MARSHALS IN THE CLEAR: TSA doesn't need new policies to address misconduct among federal air marshals, according to a new report from the DHS inspector general. The IG said the policies and procedures currently in place are sufficient to address allegations of misconduct or misuse of government resources. The report, which offered no recommendations, concluded that "TSA and FAMS have a systematic and multilayered process for handling FAMS

misconduct issues, which includes review of misconduct by two separate and independent offices."

How timely: TSA employee misconduct has been a concern for lawmakers. The House Homeland Security Committee recently approved legislation (H.R. 1351 (115)) that would give TSA the authority to conduct unannounced inspections to investigate allegations of misconduct. However, committee Democrats opposed the bill, saying it would single out TSA employees from the larger DHS workforce and lower morale.

NTSB INVESTIGATING NYC BUS CRASH: The NTSB said it is investigating Monday's crash in New York City of a charter bus and Metropolitan Transportation Authority bus. The accident left three people dead. Joe Lhota, the chairman of MTA, said speed may have contributed to the crash, CBS New York reports.

NO NEED TO WAIT: Senate Commerce Committee ranking member Bill Nelson (D-Fla.) fired off letters to U.S. airlines Monday asking them to start planning to limit airfares before Hurricane Maria potentially hits the United States. "I urge you to begin the process now for implementing capped airfare and ensuring that refunds are promptly issued for cancelled flights," Nelson wrote. "I also request that your policies on capped airfare be communicated clearly and in writing so that affected residents can evacuate quickly and safely." The letters went to American, United, Delta, JetBlue, Southwest Airlines, Spirit Airlines, Alaska Airlines, Hawaiian Airlines, Frontier Airlines and Allegiant Air.

TARGET ACQUIRED: President Donald Trump's allies are already planning attacks against Democrats who could challenge the president in three years, POLITICO's Gabriel Debenedetti reports. One of those Dems is Sen. Sherrod Brown of Ohio, the ranking member of the upper chamber's Banking Committee who faces reelection next year. Brown has been outspoken on infrastructure and "Buy America" issues. Other targets of interest to the transportation world: Sens. Amy Klobuchar (D-Minn.) and Cory Booker (D-N.J.), both members of the Commerce Committee, and New York Gov. Andrew Cuomo, who has tried hard to depict himself as a leader in investing in infrastructure.

'WHERE'S MY PETER?' White House chief of staff John Kelly's attempts to institute more order at 1600 Pennsylvania Ave. could determine just how much sway Peter Navarro has over Trump when it comes to trade issues. Navarro and Gary Cohn, the director of the National Economic Council, frequently argue over trade, POLITICO's Tara Palmeri and Andrew Restuccia report. In case you could use reminding, Navarro and now-Commerce Secretary Wilbur Ross co-wrote a paper on Trump's infrastructure plan, before the election.

** **A message from Auto Alliance**: Federal action is needed for self-driving cars. Learn More **

MT MAILBAG: Sen. Richard Blumenthal (D-Conn.) sent a letter Monday to Transportation Secretary Elaine Chao, expressing concern about the potential for people to be duped into purchasing cars that got swamped during the recent raft of hurricanes. "One way to address this issue is to bring strong enforcement actions against insurance companies that fail to properly

record the transfer of titles to themselves after they declare a vehicle a total loss, as well as auto auction companies that fail to accurately document a vehicle's ownership history," Blumenthal wrote. He asked for a response from Chao by Oct. 6.

BY THE NUMBERS: Commercial airline passenger traffic rose 3.8 percent last year at airports in North America. Cargo traffic, meanwhile, rose 2.4 percent, according to Airports Council International-North America. Passenger traffic grew 2.6 percent at Hartsfield-Jackson Atlanta International Airport, the busiest airport globally. And Memphis International Airport kept its title as North America's busiest airport for cargo.

A 'HOORAY' FROM AIA: The Aerospace Industries Association on Monday cheered the three new nominations to the Export-Import Bank's board. "For far too long, the Bank has been languishing without a quorum of at least three members on its Board, unable to fulfill its mission or process transactions exceeding $10 million," David Melcher, the president and CEO of AIA, whose members include Boeing, said in a statement. But the organization "continues to oppose the nomination of Scott Garrett as Chairman of the Ex-Im Bank due to his stated opposition to the Bank's mission and we urge President Trump to withdraw his nomination," Melcher added. (The National Association of Manufacturers had a similar reaction.)

ICYMI: Trump nominated Linda Puchala to be a National Mediation Board member until July 2018. Puchala has been a board member for the last eight years. Earlier in her career, she was the international president of the Association of Flight Attendants-CWA, which on Monday praised Puchala's nomination.

SHIFTING GEARS: Ed Gilroy has joined the American Trucking Associations as senior vice president of legislative affairs after serving as the House Education Committee's director of workforce policy. And Jay Lim, most recently counsel to Sen. Susan Collins (R-Maine), is now ATA's vice president of legislative affairs.

THE AUTOBAHN:

- "A shape-shifting car? Patent filings point to auto industry's future." The Wall Street Journal.

- "Trudeau: Canada could stop dealing with Boeing over dispute." The Associated Press.

- "Google's self-driving cars have been using Intel chips this whole time." CNBC.

- "United: Final Boeing 747 flight will be to Hawaii on Nov. 7." USA Today.

- "Uber's fleet of self-driving cars in Pittsburgh back on the road following crash." The Tribune-Review.

- "Wanna stop distracted driving? Make cars that watch their humans." Wired.

- "Americans are right not to trust self-driving cars." The Washington Post (Opinions).

- "Justice Department barred from sharing Volkswagen documents: judge." Reuters.

- "Ryanair faces 20m euro compensation bill over cancellations." BBC.

- "Uber goes on rare legal offensive, suing ad agency for fraud. Bloomberg.

THE COUNTDOWN: DOT appropriations run out in 81 days. The FAA reauthorization expires in 12 days. Highway and transit policy is up for renewal in 1,108 days.

WIDESPREAD PRAISE FROM ENVIRONMENTAL OFFICIALS FOR DAVID ROSS

Ross Nominated to Head EPA Office of Water

WASHINGTON (September 2, 2017) - President Donald J. Trump announced yesterday his intent to nominate David Ross to serve as assistant administrator for the U.S. Environmental Protection Agency's Office of Water. Mr. Ross currently serves as Wisconsin assistant attorney general and director of the Environmental Protection Unit for the Wisconsin Department of Justice. As Wisconsin assistant attorney general, he is responsible for managing the environmental litigation unit which prosecutes violations of state environmental and natural resources laws and defends administrative decisions and rules issued by the Wisconsin Department of Natural Resources. Mr. Ross previously served in the Wyoming Attorney General's Office from 2014-2016 as senior assistant attorney general and as a member of the Water and Natural Resources Division.

His nomination is receiving high accolades from environmental leaders across the country:

David Freudenthal, former governor of Wyoming: "Dave Ross is first and foremost an excellent, pragmatic lawyer. His private practice experience in DC combined with his service in two state environmental protection agencies make him uniquely qualified to implement America's nuanced structure of federal and state environmental protection."

Misael Cabrera, director, Arizona Department of Environmental Quality:"Mr. Ross has exceptional credentials and experience for the role of Water Director. In addition, his views on cooperative federalism are exactly what is needed at US EPA."

Carol Comer, director of the Missouri Department of Natural Resources: "The Missouri Department of Natural Resources would welcome the opportunity to work with Dave on our critical water issues. He has valuable experience with complex, multi-state policy decisions, and he understands the infrastructure challenges and needs of states like Missouri that have a significant number of small communities."

David Glatt, chief, North Dakota Department of Health, Environmental Health Section: "Mr. Ross exhibits an excellent understanding of western water issues and challenges faced by rural states and tribal nations. His knowledge and work experience coupled with his willingness to pursue a renewed approach to cooperative federalism make him an excellent candidate for the position."

Elliott Laws, Crowell and Moring LLP, former assistant administrator of EPA's Office of Solid Waste (Clinton): "I know David Ross to be smart, innovative and practical in all of his professional dealings. I fully expect him to bring those qualities with him to the Office of Water."

Todd Parfitt, director, Wyoming Department of Environmental Quality: "Mr. Ross possesses the necessary tools to effectively and appropriately oversee EPA's Water program in a fair, balanced and practical way. He has demonstrated his ability to objectively analyze and consider inputs from all

points of view and formulate a fair and reasoned approach resulting in clear and concise decisions."

Steve Quarles, attorney at Nossaman LLP, former deputy under secretary of the U.S. Department of the Interior (Carter): "I have worked with Dave for many years as law firm partners. Dave's greatest skill may be leading people with diverse views and interests to common ground. People with such diverse views and interests naturally gravitate to Dave and look to him for leadership. This happens because Dave is highly intelligent, both in mastering issues and devising innovative solutions, and is an excellent listener, encouraging all to participate. He also has exhibited masterful administrative skills – from leading informal cohorts of private attorneys through complex decision making to managing high performing public offices."

Gary Rikard, director, Mississippi Department of Environmental Quality: "I believe Dave Ross would be an excellent addition to EPA's Office of Water. His experience and real world view in working for two different states would enhance this administration's goal of improving cooperative federalism and building relationships between EPA and the states in administering environmental regulations and policy. That perspective, along with his environmental experience and legal background, will be an asset for the Agency."

Matthias Sayer, deputy cabinet secretary, New Mexico Energy Minerals and Natural Resource Department: "We out west are beyond satisfied with the appointment of Mr. Ross as the assistant administrator for Water. Mr. Ross has a full understanding of those statutes aimed at protecting our water, coupled with a full understanding of how those statutes can and do impact state and local communities. Furthermore, through his boots on the ground experience, Mr. Ross has gained an appreciation for the important role states play, both in the east and dryer west, in protecting our water, and he understands that it is by working in cooperation with the states that the greatest degree of success in this important program will be achieved."

John Tippetts, director, Idaho Department of Environmental Quality: "I just recently spoke with David for the first time, but I find him to be a person with significant relative experience, a keen intellect, and a good grasp of the appropriate interplay between states and the federal government as it relates to environmental regulation and enforcement. Additionally, he comes highly recommend to me by others who have worked closely with him. They assure me that he is an excellent choice to serve as assistant administrator for water in the EPA organization.

"More specifically, I can say that I have been impressed with David's candor and with his understanding of the need for EPA to work more cooperatively with the states. He recognizes that states often have a better understanding of how to address environmental issues within their borders than does the federal government, and I am confident we could work collaboratively to improve the positive outcomes we all desire."

Afternoon Briefing - Your Preview of Today's News

The following news provides a snapshot of what Bloomberg BNA is working on today. Read the full version of all the stories in the final issue, published each night.

Utilities Coalesce Around Plan for New Carbon Dioxide Standards

Posted October 03, 2017, 04:06 P.M. ET

By Abby Smith

Ameren Corp. and Entergy are among the utilities urging the EPA to rewrite its carbon dioxide pollution standards for power plants rather than scrapping the rule outright as the Trump administration repeatedly has suggested.

Rolling back the carbon dioxide standards entirely could lead to even more stringent requirements from the next Democratic administration and could open power plants up to lawsuits from environmental groups, utilities fear. The U.S. Chamber of Commerce also is backing utilities' suggestion to replace the Obama administration's ambitious Clean Power Plan with a narrower rule built around ways individual power plants can reduce their carbon dioxide emissions. But environmental groups are skeptical.

The EPA, as soon as this week, could take its first real step toward rescinding the Clean Power Plan, which may include plans for issuing a replacement rule. If so, industry groups already may have a blueprint for its successor. The EPA did not respond to a request from Bloomberg BNA for a comment.

"One early takeaway is there's been pretty good unanimity on what the replacement should look like" among industry groups, Dan Byers, vice president of policy for the U.S. Chamber of Commerce's Global Energy Institute, told Bloomberg BNA. Byers pointed to a recent white paper presented to EPA and White House officials by a group of utilities known as the Coalition for Innovative Climate Solutions, or CICS.

CICS, which includes Ameren Corp., Entergy Corp, and Salt River Project Agricultural Improvement and Power District, presented its initial suggestions for a replacement framework during a Sept. 14 meeting with EPA and White House officials. Megan Berge, an attorney with Baker Botts LLP that represents the group, told Bloomberg BNA the coalition aims to present an option that is "durable and works for all the parties involved."

Bloomberg BNA reached out to several other electric utilities—including Southern Co., Xcel Energy, Dominion Resources, PPL Electric Corp., and Ameren Corp. The companies either declined to talk about the rule or did not respond to requests for comment.

Duke Energy declined to comment on the carbon dioxide regulation, but a spokeswoman touted the company's planned $11 billion investment in clean energy and $25 billion spent on grid modernization over the next decade. Duke has cut its carbon dioxide emissions by 30 percent from 2005 levels and plans to reach a 40 percent cut by 2030, she said.

Individual Power Plants Targeted

CICS' plan would base standards on steps individual power plants could take to reduce emissions from their facilities, whereas the Obama administration's Clean Power Plan was broader in scope and included shifting generation from older coal-fired power plants to natural gas and driving new investments in renewable energy. The utilities also say their framework would give states more leeway to determine how to achieve the required pollution reductions.

"The states are then responsible for achieving those goals through means that work with their energy systems—including renewable energy, energy efficiency, plant retirement, carbon trading, or other strategies," Berge said.

EPA Administrator Scott Pruitt offered a plan in 2014 as Oklahoma attorney general that also focused on steps individual power plants could take to curb their emissions. Pruitt was one of the leading opponents of the Clean Power Plan.

Environmental Groups Seek Deeper Reductions

But environmental groups are prepping to staunchly defend the Clean Power Plan, and they are wary of utilities seeking a replacement rule.

"Most power companies, if not all, recognize the deep, long-term cuts that the power sector is going to need to make to address climate change," Kevin Steinberger, a climate policy analyst with the Natural Resources Defense Council, told Bloomberg BNA. "I think trying to go forward with a rule that really requires minimal emissions reductions reduces the certainty that these power companies would have, rather than increases it."

Steps to reduce emissions at individual power plants, such as improving heat rate, would be insufficient to satisfy the Clean Air Act, environmental advocates say. Even if the agency pursues that narrow approach, the EPA should be looking at co-firing coal power plants with natural gas or installing systems to capture carbon dioxide emissions.

"If they take the technology out there seriously, there are strategies they could use inside the fence that could end up in the same place as the Clean Power Plan or maybe even more stringent," Conrad Schneider, advocacy director at the Clean Air Task Force, told Bloomberg BNA. While environmental advocates favor the Obama administration's broader approach, they argue power plants can do even more to reduce their emissions at their individual facilities.

Schneider also warned that a rule basing standards on minor heat rate improvements could result in an outcome where emissions would increase, because more efficient coal-fired plants would run more often. Such a rule would be blatantly illegal and inconsistent with the air act, he said.

"If anything, trends over the past few years just add to the growing body of evidence and reaffirms EPA's decisions to use the tools that it did" in the Clean Power Plan, Steinberger said.

But the Chamber's Byers said that, for Clean Power Plan supporters, the "shoe's on the other foot this time around."

Supporters of the rule had argued the Clean Power Plan was flexible, but "in our mind, that wasn't the case," Byers said, adding that he anticipates any replacement framework would "truly be flexible for states."

Environmental groups "took up the 'we like flexibility' argument the last time," Byers said. "It will be hard [for them] to say, 'We have a problem with that now.'"

Trump's EPA Asks Drillers, Miners for Advice on Regulating Them

Posted October 03, 2017, 02:57 P.M. ET

By Jennifer A. Dlouhy

President Donald Trump's Environmental Protection Agency is asking miners, oil drillers and manufacturers to collaborate with the government on how to regulate their industries.

The EPA began its new "Smart Sectors" program with an inaugural meeting between agency staff and representatives of its regulated industries Oct. 3 and a promise to work together to "develop sensible approaches that better protect the environment and public health."

The program, modeled after a similar 2003 initiative, follows Trump's vow to end "job-killing regulations" and comes as the administration moves to revise Obama-era rules governing power plant emissions, methane leaks from oil wells, and mining pollution. The meeting convened amid criticism of the agency has taken a pro-business tilt at the expense of environmental issues.

"When we consider American business as a partner, as opposed to an adversary, we can achieve better environmental outcomes," EPA Administrator Scott Pruitt said in a news release. "When industries and regulators better understand each other, the economy, public, and the environment all benefit."

Pruitt said the new program, run by EPA's Office of Policy, "is designed to effectively engage business partners throughout the regulatory process." The program is set to collaborate with 13 specific sectors, including agriculture, autos, chemical manufacturing, mining, oil and utilities.

Although the EPA says additional sectors may be added over time, right now, the program provides no formal role for environmental advocates and public health experts.

'Creative Solutions' Sought

The EPA says the initiative's sector-based, collaborative approach will lower compliance costs, drive "creative solutions" to environmental challenges, better protect the Earth and increase regulatory certainty.

While the "Smart Sectors" program may be a formal effort for EPA to regularly consult with the industries it regulates, Pruitt is already leading that outreach.

Records of Pruitt's calendar from February through May, just disclosed to the liberal watchdog group American Oversight, show an array of meetings with lobbyists and corporate executives,

including representatives of businesses that stand to benefit from the administration's regulatory rollback.

"These calendars show in black-and-white what we already suspected: that Administrator Pruitt has an open-door policy at the EPA for polluters, the fossil fuel industry and other special interests," said Austin Evers, executive director of American Oversight. "Instead of focusing on protecting our families and the environment from pollution, Pruitt has worked in secret to turn the EPA into an ally and tool of the corporations he's supposed to be regulating."

By contrast, Pruitt's predecessor under former President Barack Obama, Gina McCarthy, met more frequently with environmental groups, though she highlighted efforts to consult with electric utilities and oil companies over regulations governing power plants and drilling.

Although Pruitt's calendar is dominated by interactions with industry representatives, it includes at least one meeting with a public health group, the American Academy of Pediatrics, and at least two sessions with environmental activists.

"The truth is: EPA has met with over 25 consumer protection, public health and environmental groups," said agency spokesman Jahan Wilcox in an email.

New York City Climate Plan Calls for Efficient Buildings, Electric Cars

Posted October 03, 2017, 02:26 P.M. ET

By John Herzfeld

New building standards and more electric vehicle fast chargers are part of New York City's new three-year plan to meet Paris Agreement greenhouse gas reductions—even if the country as a whole does not.

Mayor Bill de Blasio (D) issued the plan Oct. 3, calling it "the first Paris Agreement-compliant plan from any city in the world."

Covering energy, transportation, buildings, and solid waste, the plan aligns with the international agreement's goal of pursuing policies to help limit warming to a 1.5 degree Celsius increase (2.7 degrees Fahrenheit) this century.

For new buildings, the city would work to set advanced energy codes in 2019, with energy-use targets growing stricter with each subsequent code cycle. In its procurement and purchasing, the city would aim to use 100 percent renewable electricity for municipal operations as soon as a sufficient supply becomes available.

The plan follows an executive order de Blasio issued in June committing the city to the Paris goals, in response to President Donald Trump's announcement that the U.S. would pull out of the international climate agreement. Advocates for action on climate change have turned to states, cities, and private companies and organizations to take leadership roles in the aftermath of Trump's withdrawal.

'Existential Threat to a Coastal City'

"In the Trump era, cities have to lead the way when it comes to fighting climate change," de Blasio said in a statement. "Hotter summers and powerful storms made worse by climate change are an existential threat to a coastal city like ours, which is why we need to act now."

Other components of the city's climate plan include a rollout of citywide single-stream recycling by 2020, which would do away with sorting recyclables from other trash. Composting of organic trash would be made available citywide by 2018, the mayor said, with some of the waste possibly destined for wastewater treatment plants.

The plan says increased recycling, reduced waste and removing organics from the waste stream will reduce truck traffic and associated emissions from waste collection.

The previously announced electrical vehicle expansion is meant to foster a goal of having those vehicles account for 20 percent of new car registrations by 2025. The city also plans to boost its infrastructure support for bicycles.

New Council Members

De Blasio rounded up statements of support from city council members and other elected officials, but it remains to be seen how the components of his plan requiring legislation will fare with a reconstituted council. Many term-limited council members, including Speaker Melissa Mark-Viverito (D), a de Blasio ally, are due to be replaced in the November election.

New York has had a long-term sustainability plan including carbon reduction goals since 2007, but de Blasio stepped up the city's targets soon after taking office in 2014 to call for an 80 percent reduction in greenhouse gases from 2005 levels by 2050.

Energy Agency Grid Resiliency Rule Gets Three-Week Comment Deadline

Posted October 03, 2017, 10:56 A.M. ET

By Rebecca Kern

Public comments are being taken for three weeks on an Energy Department proposal directing the Federal Energy Regulatory Commission to help coal and nuclear plants in the wholesale energy markets.

FERC said the initial public comments on the proposal are due Oct. 23, according to a Oct. 2 notice.

Separately, 11 energy industry groups, including renewables, oil and natural gas associations, filed a joint motion to FERC Oct. 2 urging the agency to deny the request for an interim final rule, initiate a technical conference, and allow for at least a 90-day comment period for initial comments in this proceeding.

On Sept. 29, the Energy Department invoked rarely used authority under Section 403 of the Department of Energy Organization Act to direct FERC to issue a final rule within 60 days that would allow generators with a 90-day supply of fuel on site—which would include coal and nuclear facilities—to recover their operating costs at "a fair rate of return."

The proposed rule is the first concrete outcome from the Energy Department grid reliability study

issued in August, which said that wholesale energy markets need to do more to compensate plants with on-site fuel supply for their ability to operate around-the-clock and in extreme weather.

Fortum's Bid for Uniper Stake Seen Spurred by Carbon Reform

Posted October 03, 2017, 10:42 A.M. ET

By Mathew Carr

Fortum Oyj's bid for a stake in German utility Uniper SE is partly a bet that the European Union will finally succeed in fixing its environmental policy.

A successful repair of the world's biggest climate trading program would probably see prices surge and boost the value of Uniper's power plants, according to Kari Kankaanpaa, Fortum's senior manager of climate affairs. The Espoo, Finland-based utility agrees with Barclays Plc estimates that a tripling of European emission allowances would add 18 percent, or 965 million euros ($1.1 billion), to the value of Uniper's generation assets by 2020, he said Monday.

Fortum is continuing to press lawmakers to improve their attempt to deal with a glut of EU emission allowances that's suppressed market prices for most of the past decade. One way to do so more quickly would be to require countries with overlapping policies that cut demand for permits to agree on reducing the volume they sell in daily auctions, Kankaanpaa said.

"It could rectify the impact of these other policies," such as renewable-energy subsidies and energy-efficiency rules, he said in an interview at the Carbon Forward conference in London. "It could establish the market balance sooner than otherwise would have happened."

By buying EON SE's 47 percent Uniper stake, Fortum is positioning itself as a utility that'll provide supply even when the sun doesn't shine and the wind has stopped. Should carbon prices surge, the increased value of the utility's cleaner hydro and natural gas plants would more than offset declines in Uniper's coal assets, Mark Lewis, an analyst in Paris at Barclays, said in a Sept. 19 note.

Under a scenario where EU carbon permit prices almost triple to 20 euros a metric ton, the value of Uniper's assets would jump to 6.5 billion euros, according to Lewis. Higher carbon contracts lift traded power prices because they are a cost of fossil-fuel generation.

Barclays is helping to finance Fortum's purchase of Uniper. Uniper shares rose 1.5 percent Monday to 23.54 euros, the highest since its initial public offering in September 2016. Fortum shares rose 0.4 percent to 17.12 euros on Tuesday at 5:04 p.m. in Helsinki, after settling Monday at their highest since July 2015.

For every 1-euro advance in the EU carbon price, Fortum's value increases about 50 euro cents a share, according to Peter Crampton, an analyst at Macquarie Group Ltd. in London. There's the possibility of a "significant rise in European carbon prices," and Fortum shares may advance should lawmakers seal a deal on Oct. 12 to remove a glut in the emissions market, Crampton said Monday in an emailed research note.

Getting the carbon price to 20 euros isn't certain. Renewable-energy incentives and efficiency policies have already hurt the carbon market and will probably reduce demand by another 1 billion tons in the 10 years through 2030, Kankaanpaa said. That's more than half of a full year's supply.

Fortum's latest push for higher carbon prices started before it embarked on the Uniper deal, Kankaanpaa said. The drive for EON's stake is linked to the direction of climate policy "to some extent," he said.

These Suburbanites May Have No Fracking Choice

Posted October 03, 2017, 8:59 A.M. ET

By Catherine Traywick

When Bill Young peers out the window of his $700,000 home in Broomfield, Colo., he drinks in a panoramic view of the Rocky Mountains. Starting next year, he may also glimpse one of the 99 drilling rigs that Extraction Oil & Gas Inc. wants to use to get at the oil beneath his home.

There's little that Young and his neighbors can do about the horizontal drilling. Residents of the Wildgrass neighborhood own their patches of paradise, but they don't control what's under them. An obscure Colorado law allows whole neighborhoods to be forced into leasing the minerals beneath their properties as long as one person in the area consents. The practice, called forced pooling, has been instrumental in developing oil and gas resources in Denver's rapidly growing suburbs. It's law in other states, too, but Colorado's is the most favorable to drilling.

Now fracking is coming to an upscale suburb, and the prospect of the Wildgrass homeowners being made by state law to do something they don't want to do has turned many of them into lawyered-up resisters. "It floors me that a private entity could take my property," says Young, an information security director.

Many states require 51 percent of owners in a drilling area to consent before the others have to join. Pennsylvania doesn't allow forced pooling at all in the Marcellus, one of the most prolific shale gas regions in the country. Texas, the center of the nation's oil production, has strict limits on the practice. Despite its founding cowboy ethos of rugged individualism, Colorado has one of the lowest thresholds. "There's a tension in oil and gas law between allowing private property owners to develop their mineral estates on their own and the state's desire to ensure that ultimate recovery of oil and gas is maximized," says Bret Wells, a law professor at the University of Houston.

The rise of horizontal drilling and hydraulic fracturing over the past decade has ushered in a modest oil boom on Colorado's Front Range by enabling companies to wring crude more cheaply from the stubborn shale that runs beneath Denver's northern suburbs. From 2010 to 2015, Colorado's crude output almost quadrupled. This year the state is pumping more than 300,000 barrels a day, most of it from the Wattenberg oil field beneath Wildgrass and beyond.

Colorado's population is booming, too. As Denver's suburbs bloom northward into oil and gas territory—Wildgrass is about 20 miles north of Denver, not far from Boulder—housing developments are erupting where once there were only drilling rigs and farmland. And because horizontal drilling can reach as far as 2 miles in all directions from a well, companies need underground access to more land to maximize production from each site. The Colorado Oil & Gas Conservation Commission issues hundreds of pooling orders every year. "It's an entirely new issue," says David Neslin, former director of the commission, now an attorney at Davis Graham & Stubbs in Denver. "That's creating some understandable friction with local governments and local communities."

Denver-based Extraction Oil & Gas is at the epicenter of that friction. Almost all its acreage is in populated areas. So the company, like others in the region, has put a lot of energy—and cash—into making its operations more palatable to suburbanites who fear the prospect of a drilling rig sprouting up within sight of their kiddie pools. Extraction almost exclusively uses electric drills, which are quieter than diesel-powered, and a new generation of hydraulic fracturing equipment that cuts noise. "It's incumbent upon us to learn to live with these communities," says Extraction spokesman Brian Cain. "Where we can go the extra mile to minimize impacts, we wish to do so."

The company's latest project involves drilling 99 horizontal wells in Broomfield. That means leasing mineral rights from Wildgrass residents. Letters went out to some of them last year offering a 15 percent royalty and a $500 signing bonus. Some signed, others demurred, and still others organized a campaign aimed at blocking the project. Extraction hasn't applied for a forced pooling order, but Young and his neighbors have come to believe it's inevitable.

The suburb's agitation prompted the city to create a special task force to evaluate Extraction's proposal. The company responded by taking members of the task force on a tour of oil and gas country. It wanted to show how its operations are less disruptive than traditional drill sites.

Ultimately, the company agreed to more stringent environmental standards than the state requires. It will move some wells 1,300 feet from neighborhoods, almost three times farther than the law mandates. It will reduce the number of wells per site, monitor air emissions as well as water and soil quality, and build pipelines to transport oil immediately off-site instead of storing it in the city. "I can see Broomfield turning out to be a new model for how large-scale development gets done," says Matt Lepore, director of the state commission, which will rule on Extraction's applications for siting the wells this month.

Such concessions have smoothed the path for development in many communities. But for some Wildgrass residents, any leasing is unacceptable. They say they fear accidents, such as the April pipeline explosion that killed two people and destroyed a home in Firestone, 20 miles away. Some simply find the terms of the initial lease offer laughable.

"The money is so negligible," says Elizabeth Lario, a health coach who's lived in Wildgrass since 2005. And then there are property values: Homes in Wildgrass range from $500,000 to more than $1 million. "The royalties won't offset the drop in property value," says Stephen Uhlhorn, an engineer who's lived in Wildgrass for four years. Oil development "is now hitting affluent neighborhoods where people have assets and livelihoods that exceed the value of any royalty they're offered."

The bedrock of Colorado's oil and gas policy is a 1951 law that says responsible fossil fuel development is in the public interest. The state, the law says, must protect the public from "waste"—industry parlance for oil that's left in the ground. While Colorado has some of the strictest environmental regulations of any oil-producing state, it gives companies latitude in choosing where to drill. The Colorado Supreme Court has repeatedly held that the state's interest in developing mineral resources preempts any local law that would curb drilling.

Efforts to change the statute have fizzled. State Representative Mike Foote, a Democrat whose district is adjacent to Broomfield's, introduced a bill earlier this year to raise the pooling threshold to 51 percent. It passed the House by a slim margin but died in a Senate committee in a party-line vote, with Republicans opposed.

"The oil and gas industry pretty much controls the capital, particularly in the Senate," Foote says.

"Operators can do whatever they want." Lepore, the head of the state oil commission, concedes the pooling threshold is low compared with other states. "I have no philosophical objection to a 51 percent requirement," he says. "There are intelligent changes that could be made to the forced pooling law."

Young, the Wildgrass resident, received a lease offer last year. Since then he's been working with a lawyer to consider his options, and so far he doesn't like them. "You couldn't put a Walmart where they're putting these wells—no one would approve that zoning," he says. "But for some reason, the industry is completely exempt from everything."

Left Behind by the Shale Boom, Oklahoma Oilmen Fight to Survive

Posted October 03, 2017, 8:00 A.M. ET

By Meenal Vamburkar

Not every oilman is gaining from the U.S. shale boom. Just ask Joe Warren.

Warren, a partner at Brown & Borelli Inc., is caught in a historical hiccup, of sorts. More than a third of the 65 to 70 old-line vertical wells his company operates in Oklahoma are negatively affected by horizontal drilling, he says. The new-style wells can run sideways for miles in a shale play, carrying sand, water and chemicals that can leak into older wells, gumming up the works.

The cost: For Warren's company, it's about $250,000 a year in lost production and $150,000 in added operating expenses, he said. It's an issue spurring rising anxiety among small drillers. Already, several lawsuits are in the works while a group representing old-guard drillers is gathering data, aiming to force legislation guaranteeing compensation when damages occur.

"We should not be sacrificing our property to these guys for horizontal development," Warren said by telephone. "We don't want to stop horizontal development -- we just want to make the rules fair."

Some of Warren's wells saw a slight drop in output while others, hit multiple times, weren't salvageable, he said. Warren hasn't been involved in litigation himself but expects more legal action to occur in the region moving forward, even though cases can be costly and take several years to resolve.

51 Wells

Already, a study by the Oklahoma Energy Producers Alliance, the group representing conventional drillers, has found 451 vertical wells in one county that were negatively affected by horizontal drilling, 80 percent of which were located outside of horizontal well unit boundaries.

The damage can add costs to replace equipment, clean out water or sand, or address environmental damage, according to Mike Cantrell, a board co-chair for the group. It can also kill a well outright, he said.

"I'm afraid when we look into further, we're going to find out it's much worse," he said.

Horizontal drilling has allowed producers to tap into shale reserves more economically. When

explorers tap shale, they are actually drilling into the rocks where the oil feeding those old-line vertical wells was created. Geologists refer to it as "source rock." The technique allows drilling to continue laterally for up to two miles, replacing the need for multiple vertical wells. Kingfisher County, where Warren's well are largely located, is part of the so-called Scoop and Stack region, where drilling has increased since the oil slump.

Oil rigs in that area's Cana Woodford basin have climbed to 62 from 36, just since the start of the year.

Many of the vertical well most affected are so-called stripper wells, which produce a daily average of 15 barrels of oil or less. Though they may be inconsequential to large companies, for small operators, it's a matter of their livelihood, Cantrell said.

In August, a district court ordered Devon Energy Corp. to pay $220,000 after two operators alleged negligence and "subsurface trespass" that led to two damaged wells. Devon inherited the wells in question from Felix Energy LLC, according to the company.

'Safe and Reponsible'

"Devon always seeks to conduct its operations in a safe and responsible manner, with respect for the rights of other well operators," spokesman John Porretto said in an emailed statement. "When evidence shows that Devon's operations may have damaged an existing vertical well, Devon is proactive in attempting to negotiate fair compensation for the affected vertical well owner."

The company also noted, "the jury awarded the vertical well owner an amount that was both significantly lower than what was demanded at trial and less than what Devon had previously offered the well owner as compensation to settle the claim."

The case is indicative of a broader problem, said Matt Skinner, public information officer at the Oklahoma Corporation Commission, a regulatory body. The agency tried and failed to pass a rule to require operators to report incidents even if they didn't cause environmental damage, he said, but couldn't get support from bigger players in the industry.

The main obstacle has been a lack of data, according to Skinner. So now, the commission is focusing on encouraging vertical well operators to report problems. They've confirmed 20 incidents and have at least 55 more pending, Skinner said.

"We know it's happening, we know it's an issue," he said. "We have every reason to think there are more incidents out there than we know of."

Cantrell's organization, meanwhile, is pushing to slow down further development of horizontal drilling until better data is gathered on their effect on existing wells.

"We need to slow this process down until we can get the regulatory regime to keep up with it," he said. "We've applied a vertical regulatory regime to a horizontal world."

Trump Isn't Acting on Verbal Attacks Against Wind, Dong Says

Posted October 02, 2017, 05:35 P.M. ET

By Peter Levring

President Donald Trump's threats against wind energy have so far proven empty, according to an industry giant that expects to grow in the U.S.

Thomas Thune Andersen, the chairman of Dong Energy A/S, says the world's biggest offshore wind developer hasn't seen any actions that have followed Trump's verbal attacks. In fact, he says there are signs that American commitment to the industry might even be growing.

"One thing is Trump getting up and commenting on this," Thune Andersen said in an interview in Copenhagen on Oct. 2. "But he hasn't acted on it. And many of the decisions are made at a state level. They're still pushing this agenda and they may even have accelerated it as part of the political game."

Trump, who has blamed wind turbines for killing bald eagles, has as a businessman unsuccessfully tried to stop offshore parks that spoil the view from his golf course in Scotland. As president, he has dragged the U.S. out of the Paris climate accord, and promoted coal in favor of wind energy, promising to bring back jobs in the process.

But before Trump took office in January, the U.S. congress extended a production tax credit, or PTC, that will give tax breaks to wind producers until 2020.

Focused on East Coast

Dong, which is based in Denmark, this year sold its oil and gas business in order to focus entirely on renewable energy. The company is changing its name—an acronym of Danish Oil and Natural Gas—to Orsted to mark the shift. (H.C. Orsted was a 19th century Danish physicist who discovered electromagnetism.)

Dong is focused on the east coast of the U.S., where it's using existing contacts to achieve growth, according to the chairman.

"It's very important we don't spread our focus too much," Thune Andersen said. "But although the U.S. east coast is a vast area, it's still very much the same people we're talking to."

The company sits on about one-quarter of the global market, "but the market is growing tremendously fast," he said. "We still have an ambition to remain the biggest player, but because the market's been successful, competition is growing."

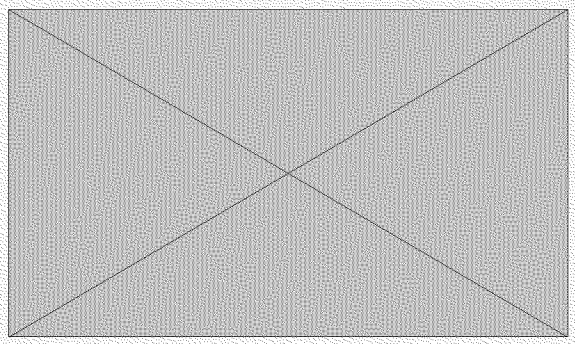
The federal budget faces a problem: the rising cost of Medicare benefits.

AEI's daily publication of independent research, insightful analysis, and scholarly debate



Reuters

Bring Medicare tourism to Puerto Rico. It's win-win.

Andrew G. Biggs | US News & World Report

The federal budget faces a problem: the rising cost of Medicare benefits. At $10,000 per beneficiary per year, Medicare is one of the largest costs facing the US taxpayer — and it's growing as baby boomers retire and their health expenditures increase. At the same time, the US island of Puerto Rico also faces a problem. Its government is effectively bankrupt, and its economy is contracting. But there's a policy that can help

everyone. Not medical tourism, but Medicare tourism.

Reuters

The unhappy paradox of America's Santa-statism (2011)

Arthur C. Brooks | The Wall Street Journal

As Congress stares down another debt-ceiling debate in the coming month, we revisit advice AEI President Arthur Brooks offered during the heated 2011 negotiations. "The public can be forgiven for believing that budget-cutting will always be an exercise in futility," he writes. "Politicians respond with [excuses]. . . . The real problem, however, is that cutting almost anything is impossible when what passes for governing philosophy is little more than a bromide."

Subject: Playbook Power Briefing, presented by Chevron: TROUBLE BREWING on tax reform -- Vanity Fair goes DEEP on Biden -- JEFF GLOR named anchor of CBS Evening News -- CBO score for Alexander/Murray OUT

View online version | Add politicoplaybook@politico.com to your address book.

Today's Playbook Power Briefing presented by Chevron

By ANNA PALMER (anna@politico.com; @apalmerdc), JAKE SHERMAN (sherman@politico.com; @JakeSherman), DANIEL LIPPMAN (daniel@politico.com; @dlippman) and ZACH MONTELLARO (zmontellaro@politico.com; @ZachMontellaro)

NEWS -- INBOX: "JEFF GLOR NAMED ANCHOR OF THE 'CBS EVENING NEWS'" ***The release*** http://bit.ly/2y2LIxT

Good Thursday afternoon. RUPERT MURDOCH will be in Washington tonight for a celebratory launch party for Laura Ingraham's new Fox News show "The Ingraham Angle." Murdoch is hosting the event, which starts at 6 p.m. at Charlie Palmer Steak. There is also a private reception on the 7th floor, according to the invite.

-- SIDENOTE: "Trump gives 16th interview to Fox," by Jason Schwartz: http://politi.co/2i3NWwL

VANITY FAIR: "WHY JOE BIDEN DIDN'T RUN . . . AND WHY HE'S NOT RULING OUT 2020," by David Kamp: "In February, he, Hunter, Joe, and the senior Biden's chief of staff and chief political strategist-respectively, Steve Ricchetti and Mike Donilon-gathered in the library of the Naval Observatory, the official residence of the vice president, to discuss a 22-page memo that Donilon had prepared. The upshot of the memo was that the 2016 election was Biden's to lose. He was the right man to connect with middle-class voters about their frustrations and their aspirations, the argument went, plus he was endearingly real in a manner that seemed to fit the mood of the electorate. As Biden notes in the book, 'My reputation as a 'gaffe machine' was no longer looking like a weakness.'

"Donilon had a plan completely laid out, with speeches in strategic states and a formal announcement in April. But Biden couldn't commit to moving so fast. In that very meeting at the residence, Beau seemed weaker and more quiet than usual-a consequence, perhaps, of his increasingly evident aphasia, which sometimes rendered him unable to summon the words he wanted to say. ...

"Asked for his current state of mind about 2020, Biden ruled nothing out. 'I haven't decided to run,' he said, 'but I've decided I'm not going to decide not to run. We'll see what happens.' He is behaving very much like a probable candidate, having formed a

political-action committee, American Possibilities, in June, and writing opinion pieces in recent months for The Atlantic and The New York Times about Donald Trump's illiberal conduct and the need to reclaim traditional American values." http://bit.ly/2yLIJ5F ... ***Excerpt from his new book*** http://bit.ly/2zPDGjS

WELCOME TO TAX REFORM -- A HEADLINE TRUMP WON'T LIKE: WAPO: "House GOP tax leader threatens to break Trump's promise not to change 401(k) rules," by Damian Paletta: "House Ways and Means Committee Chairman Kevin Brady on Wednesday suggested a tax bill he is preparing to introduce could force changes to 401(k) plans and other retirement accounts, potentially bucking a promise from President Trump that those accounts would be left alone.

"Brady, speaking at a breakfast hosted by the Christian Science Monitor, said 'we think in tax reform we can create incentives for people to save more and save sooner.' He said he was 'working very closely with the president,' but he also said many people who have tax-incentivized retirement accounts contribute $200 per month or less, a level he thought was too low.

"'We think we can do better," he said. He added 'we are continuing discussions with the president, all focused on saving more and saving sooner.'" http://wapo.st/2gDVs0R

THIS IS SIGNIFICANT -- RACHAEL BADE, SARAH FERRIS and **AARON LORENZO SCOOP -- "GOP leaders scramble for tax deduction fix before budget vote":** "House Republican leaders are in a mad dash to resolve a dispute between GOP tax writers and Republicans from high-tax states that has the potential to make Thursday's budget vote a real nail-biter.

"A handful of New York Republicans, along with a New Jersey lawmaker, are threatening to vote against the budget unless GOP leaders retreat from plans to eliminate a key federal deduction that people can take for the state and local taxes they pay.

"Scrapping the deduction would bring in an estimated $1.3 trillion in new tax revenue over a decade, which could be used to cover some of the cost of other tax breaks Republican leaders are eyeing. But Republicans from high-tax districts in New York, California and New Jersey say millions of their constituents rely on the deduction and would face a tax hike without them. Some of those lawmakers say they won't commit to backing the budget until they receive assurances from GOP leaders to protect the benefit. The high-stakes vote on Thursday is the final hurdle to unlocking a filibuster-proof tax overhaul this year.

"'There would need to be more progress made in figuring out the solution on this issue in order for me to vote for the resolution on Thursday,' said Rep. Lee Zeldin, a New York Republican who's close to President Donald Trump. 'As of right now, I don't have enough answers to vote 'yes' on the budget.'" http://politi.co/2gC0ivC

BUT... -- "Brady expects deal on state and local tax deduction," by Aaron Lorenzo: "House Ways and Means Chairman Kevin Brady said Wednesday he expects a compromise on the state and local tax deduction to be announced before a tax overhaul bill is released. 'I do expect to reach an agreement with our high-tax lawmakers,' Brady said at a breakfast hosted by the Christian Science Monitor." http://politi.co/2h7XLdv

-- THE OBVIOUS QUESTION IS will Republicans agree to pass a budget without knowing how this will be resolved. We hear the vote is still on for tomorrow.

MEANWHILE, THE WHITE HOUSE SAYS .... FIRST IN PLAYBOOK: GARY COHN, the director of the National Economic Council, was on Capitol Hill this morning, and met with the Problem Solvers Caucus, a group of a moderate Republicans and Democrats. Multiple sources in the room told us that Cohn downplayed the impact of scrapping the state-and-local-tax deduction, indicating it will remain in the bill, and it will be less controversial than pass-through rates. Multiple GOP leadership sources say they are still working on a fix for the state and local deduction issue.

COHN ALSO TOLD lawmakers they will have a chance to vote to hike the gas tax as part of an infrastructure package in early 2018.

A CBO SCORE SENATORS ARE TOUTING -- "CBO: Bipartisan Obamacare bill would cut deficit, keep coverage stable," by Adam Cancryn and Jen Haberkorn: "A bipartisan bill to stabilize Obamacare would cut the federal deficit by $3.8 billion but wouldn't do much to change health insurance premiums for 2018, according to a new analysis by the Congressional Budget Office. It would not substantially change the number of people who are covered. The report is about the bipartisan bill negotiated by Sens. Lamar Lamar Alexander, (R.-Tenn) and Patty Murray, (D-Wash) which has broad support in the Senate but is unlikely to get a swift vote given opposition from President Donald Trump as well as from House Republicans. CBO said the savings would stem in part from letting states offer so-called copper plans -- or lower cost policies that appeal to healthier enrollees in the Obamacare markets." http://politi.co/2h7PUws ... ***The report*** http://bit.ly/2y4uScJ

****** **A message from Chevron:** Advanced technology is helping us find safer ways to deliver energy. We're piloting a program that uses drones to monitor tanks and pipelines. Watch the video: http://politi.co/2gDPwZl ******

HMM... -- "Trump Data Guru: I Tried to Team Up With Julian Assange," by The Daily Beast's Betsy Woodruff: "Alexander Nix, who heads a controversial data analytics firm that worked for President Donald Trump's campaign, wrote in an email last year that he reached out to Wikileaks founder Julian Assange about Hillary Clinton's missing 33,000 emails.

"Nix, who heads Cambridge Analytica, told a third party that he reached out to Assange about his firm somehow helping the Wikileaks founder release Clinton's missing emails, according to two sources familiar with a Congressional investigation into

interactions between Trump associates and the Kremlin. Those sources also relayed that, according to Nix's email, Assange told the Cambridge Analytica CEO that he didn't want his help, and preferred to do the work on his own. If the claims Nix made in that email are true, this would be the closest known connection between Trump's campaign and Assange. ...

"After publication, Wikileaks editor Julian Assange provided this statement to The Daily Beast: 'We can confirm an approach by Cambridge Analytica and can confirm that it was rejected by WikiLeaks,' Assange said." http://thebea.st/2y4k7ao

ON THE PRESIDENT'S MIND -- @realDonaldTrump at 7:21 a.m.: "'Clinton campaign & DNC paid for research that led to the anti-Trump Fake News Dossier. The victim here is the President.' @FoxNews" ... **at 7:27 a.m.:** "The reason Flake and Corker dropped out of the Senate race is very simple, they had zero chance of being elected. Now act so hurt & wounded!" ... **at 7:30 a.m.:** "The meeting with Republican Senators yesterday, outside of Flake and Corker, was a love fest with standing ovations and great ideas for USA!" ...

... at 7:35 a.m.: "Working hard on the biggest tax cut in U.S. history. Great support from so many sides. Big winners will be the middle class, business & JOBS" ... **at 8:33 a.m.:** "Jeff Flake, with an 18% approval rating in Arizona, said 'a lot of my colleagues have spoken out.' Really, they just gave me a standing O!"

SPOTTED: BEN RHODES around 8:15 a.m. entering the House side of the Capitol Building "with multiple escorts and apologizing for being late," according to our tipster. He appeared in front of the House Intelligence Committee.

ON THE WORLD STAGE -- "Xi Jinping Unveils China's New Leaders but No Clear Successor," by NYT's Chris Buckley: "President Xi Jinping thrust China into a new era of strongman politics on Wednesday, unveiling a leadership team without a likely successor among the six officials who will help him rule for the next half decade. In a nationally televised ceremony, Mr. Xi introduced the new members of China's highest council of power, the Communist Party's Politburo Standing Committee, on the red carpet of the Great Hall of the People in Beijing. In addition to Mr. Xi and China's premier, Li Keqiang, the committee included five new members, all men in their 60s. ...

"The debut was the culmination of a weeklong party congress in Beijing that underlined the breadth of Mr. Xi's political ambitions. On Tuesday, its final day, the congress elevated Mr. Xi to the same exalted status as the nation's founding father, Mao Zedong, by enshrining 'Xi Jinping Thought' in the party's constitution. The five new Standing Committee members are party leaders with long careers in Chinese politics, including one of Mr. Xi's longtime allies and a scholar of international relations. But the party declined to name a younger leader to the committee who might succeed Mr. Xi when his second term as president ends in 2023." http://nyti.ms/2y42Hun

HUGE NEWS IN TEXAS -- "Texas House Speaker Joe Straus won't seek re-

election," by The Texas Tribune's Morgan Smith: "In his statement Straus acknowledged his decision was 'unexpected.' 'It's been decades since someone has left the Speaker's office on his own terms. But we have accomplished what I hoped the House would accomplish when I first entered this office, and I am increasingly eager to contribute to our state in new and different ways.' ...

"As speaker, Straus increasingly clashed with conservative elements within the GOP over issues like private school vouchers and the 'bathroom bill' championed by Lt. Gov. Dan Patrick. He was also openly critical of Gov. Greg Abbott's agenda for the July special session, comparing it to a to 'a room full of horse manure.'" http://bit.ly/2y3BeZG

-- @evanasmith: "Retirement of @SpeakerStraus has strong potential to be a levee breach -- conservative agenda will flood the House like never before #txlege"

NEW WOMEN RULE PODCAST -- "Shaheen on sexual assault: 'We need men to speak up': "Thousands of women around the world have shared deeply personal experiences of sexual harassment and assault using the #MeToo hashtag. Though Senator Jeanne Shaheen (D-NH) sees this as progress, she warns that unless women feel safe and empowered to speak up, Congress alone can't provide one 'silver bullet fix.' 'We need men to speak up and say, 'this is not acceptable. We are not going to allow this in our businesses, in our workplaces, in our sports teams, anywhere.'" http://politi.co/2y4hzcj

THE FED RACE -- "Yellen Finds Unlikely Advocate at White House: Trump," by Bloomberg's Craig Torres and Jennifer Jacobs: "Janet Yellen's only advocate in the White House may be the one person who matters most: President Donald Trump. The incumbent Federal Reserve chair was impressive in an Oval Office interview with Trump on Thursday, several people familiar with the matter said. She made clear to the president that she wants to keep her job, set no preconditions for appointment to a second term, and offered suggestions for the vice chairman position that were welcomed by the Trump team." https://bloom.bg/2zCeLiV

ATTENTION TRAVELERS -- "New screenings for U.S.-bound passengers on global airlines," by the AP's Jon Gambrell: "Five global long-haul airlines will begin new security interviews of all passengers on U.S.-bound flights starting Thursday at the request of American officials, the companies said Wednesday. Long-haul carriers Air France, Cathay Pacific, EgyptAir, Emirates and Lufthansa all said they'd start the screenings. A sixth carrier, Royal Jordanian, said it would begin the new procedures in mid-January after U.S. authorities granted RJ's request for a delay in implementing the measures.

"However, the airlines offered different descriptions of how the interviews would take place, ranging from another form a traveler would have to fill out to actually being questioned by an airline employee. It wasn't immediately clear if other global airlines would be affected, though the Trump administration previously rolled out a laptop ban and travel bans that have thrown the international travel industry into disarray."

http://bit.ly/2zEvXE6

TODAY'S BEYOND THE BELTWAY -- California Democratic gubernatorial candidates focus fire on Trump in debate -- GOP challenger to Warren officially launches campaign http://politi.co/2zD7K18

FIRST PERSON -- CNN'S BRIANNA KEILAR -- "With my husband deployed, covering the news hits home": "As I listen to [White House Chief of Staff John Kelly in the briefing room] all I can picture is my husband's body, packed in ice. I will it to stop. I can't. I am arrested by this horrific looping video image in my mind and I can't control the tears. I ask the floor director for tissues. I listen to Kelly hoping that he will talk for several more minutes and I will have time to compose myself so I can speak evenly when I bring my panel in to discuss Kelly's comments.

"My husband is an Army Special Forces officer who is used to deploying, but this is my first time doing one of these. We got married last December. When we began dating, he was assigned to a policy job in Washington, wearing a suit every day and working in an office. I had hoped he might get another desk job for his new billet this summer, a thought that simultaneously filled me with relief and disappointment.

"He saw me through my constant travels as a campaign correspondent in 2016 and grieved the loss of my mom with me after she died unexpectedly in the middle of the campaign cycle, and it brought us closer. While I want him safely at home, deployments have been such an important and challenging part of his life for the last two decades and without going through one, I may never truly understand what he's sacrificed." http://cnn.it/2h9xXhb

Subject: Judge won't let EPA delay Texas haze deadline

By Alex Guillén

08/31/2017 06:09 PM EDT

A federal judge today rejected the Trump administration's request to delay taking action on Texas pollution that contributes regional haze, saying the state has had plenty of time to act before now.

Texas was supposed to have filed a plan to curb the pollution by 2007, but has yet to do so. A 2012 consent decree between EPA and environmentalists requires the agency to issue a federal plan by Sept. 9. EPA last week asked to push the deadline back through the end of 2018, arguing that the agency and the state have had more "productive" negotiations since the Trump administration took office.

But Judge Amy Berman Jackson of the U.S. District Court in D.C. said she will not give the agency or Texas more time.

"Texas has been under the statutory obligation to comply with the Clean Air Act since at least 2007, and it has been on notice of EPA's finding that it had failed to comply with the requirement to submit a state implementation plan since 2009. So there has been quite a period of time during which 'cooperative federalism' could take hold," she wrote.

"Texas has had ample time to develop, submit, and negotiate a compliant state implementation plan if that was its actual preference." Jackson added. The Clean Air Act does promote cooperation between the federal government and the states, but it also requires EPA to take action if states don't step up, she said.

In a footnote, Jackson noted the awkward timing given the devastation Texas has suffered from Hurricane Harvey, but said her hands were tied.

WHAT'S NEXT: EPA has indicated it can issue a federal plan by the Sept. 9 deadline.

TRUMP'S WEEK -- A FEW HIGHLIGHTS from the White House. **MONDAY:** The president and first lady observe a moment of silence for 9/11 Monday, and go to a ceremony at the Pentagon. VP Mike Pence is going to Shanksville, Pennsylvania. **TUESDAY:** Malaysian Prime Minister Najib Abdul Razak visits the White House. **WEDNESDAY:** Trump is meeting with Sen. Tim Scott (R-S.C.).

FROM THE WHITE HOUSE at 10:11 a.m.: "POTUS spoke to governors of Alabama, Georgia, [South] Carolina and Tennessee this morning. He's spoken numerous times to [Florida] Governor [Rick] Scott and Senator [Marco] Rubio of Florida over the last week as has [Chief of Staff] Gen. [John] Kelly. The Chief of Staff also spoke to Senator [Bill] Nelson of Florida this morning. The President and Vice President are also receiving a briefing this morning."

CONGRESSIONAL LEADERS are closely monitoring the delays and cancellations at Delta's hub, Atlanta's Hartsfield International Airport, as they decide whether they can hold votes tomorrow. Many lawmakers from Florida are going to have a tough time getting to D.C.

Good Sunday morning. THE LIMITS OF BEING A TRUMPOCRAT ... Let's try not to divine whether **PRESIDENT DONALD TRUMP** will continue to work with Democrats at the expense of Republicans. Nobody knows the answer to that. Let's also take a deep breathe and recognize that Trump didn't cut some transformative deal for the history books. He extended the debt limit and government funding by three months and agreed to billions to aid hurricane victims. Barack Obama worked with Republicans to slash government spending. Trump didn't do anything like that. What Trump did do last week, whether he knows it or not, is create a governing coalition of 150 Republicans and all Democrats. This won't work everywhere. Let's explore where insiders think they have a shot, and where they don't:

-- INFRASTRUCTURE: The White House has said nothing about what it would like to do when it comes to a massive infrastructure bill. But Trump has said he wants to spend lots of money. A chunk of Republicans -- the Freedom Caucus and other fiscal conservatives -- won't be interested in a bunch of unpaid-for deficit spending. But there are moderates in the Senate and House GOP who, presented with the right package, could see benefits in a large-scale public works project. Republican lawmakers from upstate New York, the Midwest and even the outer edges of big cities would also likely be on board. The country's crumbling infrastructure has long been an issue that Democrats have tried to take on. Crafted the right way, not only moderate Democrats, but others could also support an infrastructure package. This could be an area where Trump finds natural allies in both parties.

-- HEALTH CARE: It's difficult to truly understand what Trump wants to do when it comes to health care, since he has been on many sides of the issue. But if he wants

Democratic cooperation, he'd have to scrap pushing for Obamacare repeal and back a more limited plan to enact fixes. This would infuriate some Republicans, who are angry enough that, nine months into an all Republican Washington, Obamacare is still ticking. Lawmakers and lobbyists aren't optimistic that Trump can find enough common ground to get Republicans and Democrats on the same page.

-- TAXES: Democrats have been completely shut out of the tax reform discussions. The only people resembling Democrats in the room are Gary Cohn and Steven Mnuchin, two Trump administration officials who have donated to Democrats throughout their lives. It would take a miracle to change course at this point. **A REMINDER:** We are far from tax reform becoming a reality. Both chambers need to pass a budget, and we have not seen a shred of paper from the closed-door tax meetings.

-- BASIC GOVERNANCE AND THE WALL: Democrats and Republicans can keep the lights on together -- that much we've seen. They can lift the debt ceiling, if there are no legislative riders. Here's where Trump could run into a major problem. We're not sure if you've heard but the president wants to build a wall on the border with Mexico. He will not be able to do that with Democrats -- they are a hard no on a border wall. Can he strike some sort of deal to put the DREAM Act into law in exchange for an uptick border security? Sure. But that would be awfully tricky.

MR. PRESIDENT -- YOU STILL HAVE TO BE NICE TO MCCONNELL AND RYAN. Why? Because Democrats are in the minority in both chambers and have extremely limited ability to bring bills to the floor.

FROM 30K FEET -- NYT'S PETER BAKER: "Bound to No Party, Trump Upends 150 Years of Two-Party Rule": "President Trump demonstrated this past week that he still imagines himself a solitary cowboy as he abandoned Republican congressional leaders to forge a short-term fiscal deal with Democrats. Although elected as a Republican last year, Mr. Trump has shown in the nearly eight months in office that he is, in many ways, the first independent to hold the presidency since the advent of the current two-party system around the time of the Civil War.

"In recent weeks, he has quarreled more with fellow Republicans than with the opposition, blasting congressional leaders on Twitter, ousting former party officials in his White House, embracing primary challenges to incumbent lawmakers who defied him and blaming Republican figures for not advancing his policy agenda. On Friday, he addressed discontent about his approach with a Twitter post that started, 'Republicans, sorry,' as if he were not one of them, and said party leaders had a 'death wish.' ...

"None of which means that Mr. Trump has suddenly transformed himself into a center-hugging moderate. More situational than ideological -- critics would say opportunist -- Mr. Trump adjusts to the moment, and his temporary alignment with Democrats could easily unravel tomorrow. The deal he cut, after all, merely postponed a fight over spending and debt for three months. It did not resolve any substantive disagreements." http://nyti.ms/2wigEPH

WAPO'S TAKE -- "'Trump betrays everyone': The president has a long record as an unpredictable ally," by Ashley Parker and Phil Rucker: "President Trump prepared for the pivotal meeting with congressional leaders by huddling with his senior team - his chief of staff, his legislative director and the heads of Treasury and the Office of Management and Budget - to game out various scenarios on how to fund the government, raise the debt ceiling and provide Hurricane Harvey relief. But one option they never considered was the that one the president ultimately chose: cutting a deal with Democratic lawmakers, to the shock and ire of his own party.

"In agreeing to tie Harvey aid to a three-month extension of the debt ceiling and government funding, Trump burned the people who are ostensibly his allies. The president was an unpredictable - and, some would say, untrustworthy -- negotiating partner with not only congressional Republicans but also with his Cabinet members and top aides. Trump saw a deal that he thought was good for him -- and he seized it." http://wapo.st/2wSD91d

-- DESPITE ALL THE GOP HAND-WRINGING, senior GOP aides say that everyone is being too dramatic and that lawmakers need to take a deep breath. This middle-of-the-road stuff is not permanent.

THE LATEST ON HURRICANE IRMA ...

AP'S IRMA LEDEALL -- "'Pray for everybody': Irma begins its assault on Florida," by Tamara Lush and Jay Reeves in St. Petersburg, Florida: "Announcing itself with roaring 130 mph winds, Hurricane Irma plowed into the mostly emptied-out Florida Keys early Sunday for the start of what could be a slow, ruinous march up the state's west coast toward the heavily populated Tampa-St. Petersburg area. ... With an estimated 127,000 huddling in shelters statewide, the storm lashed the low-lying string of islands with drenching rain and knocked out power to over 1 million customers even hundreds of miles from Irma's center.

"About 30,000 people heeded orders to evacuate the Keys as the storm closed in, but an untold number refused to leave, in part because to many storm-hardened residents, staying behind in the face of danger is a point of pride. While the projected track showed Irma raking the state's Gulf Coast, forecasters warned that the entire Florida peninsula - including the Miami metropolitan area of 6 million people - was in extreme peril from the monstrous storm, almost 400 miles wide. Nearly 7 million people in the Southeast were warned to get out of the storm's path, including 6.4 million in Florida alone." http://bit.ly/2xTumcW

-- JOHN DICKERSON speaks with **SEN. MARCO RUBIO (R-FLA.)** on **CBS'S "FACE**

THE NATION": DICKERSON: "Senator, you and I have talked over the years have talked about trust in government and people losing faith in their government. Do you see any of that? I mean are people not taking things seriously because sort of either because of crying wolf or because they lost faith in in voices of authority on these kinds of things?" **RUBIO:** "No I can't say that in this case. I really can't. I think that people have really responded. You see an enormous amount of people have acted. The most massive evacuation I think in the history of the state, millions of people have moved. And I think coming in the aftermath of those images from Harvey people have really jumped on it.

"So I think the bigger concern that we have is we've got -- this is a very unique situation. The whole state is impacted. A lot of the relief efforts are being directed from places that now themselves are in, in the path of, of the storm. And we have a lot of people for example that left South Florida, that drove to Orlando, or Tampa who are now figuring out maybe I need to go back to Miami or something or, or Fort Lauderdale or Palm Beach. This is no time to be on the road. This is a very unique storm because of its size and scope. You usually are able to say that there's some safe place in the state that you can go to. In this particular case, virtually the entire state is being impacted by the storm."

-- @PascoSheriff: "To clarify, DO NOT shoot weapons @ #Irma. You won't make it turn around & it will have very dangerous side effects".

-- "Weather Channel Goes Into Overdrive Covering Back-to-Back Hurricanes," by NYT's David Gelles: "The Weather Channel averaged nearly 1.3 million viewers during prime time over the first half of last week, up sharply from an average of 150,000 viewers during the last week of July, when the weather wasn't a story, according to Nielsen." http://nyti.ms/2ePhA7J

POLITICO INVESTIGATION -- "How U.S. News college rankings promote economic inequality on campus: Once ladders of social mobility, universities

increasingly reinforce existing wealth, fueling a backlash that helped elect Donald Trump," by Benjamin Wermund: "America's universities are getting two report cards this year. The first, from the Equality of Opportunity Project, brought the shocking revelation that many top universities, including Princeton and Yale, admit more students from the top 1 percent of earners than the bottom 60 percent combined. The second, from U.S. News and World Report, is due on Tuesday - with Princeton and Yale among the contenders for the top spot in the annual rankings. The two are related: A POLITICO review shows that the criteria used in the U.S. News rankings - a measure so closely followed in the academic world that some colleges have built them into strategic plans - create incentives for schools to favor wealthier students over less wealthy applicants." http://politi.co/2xXgLIL

FOR YOUR RADAR -- "NATO's Stoltenberg says North Korea's 'reckless behaviour' requires global response," by Reuters: "North Korea's 'reckless behaviour' is a global threat and requires a global response, the head of the NATO military alliance said on Sunday. ... 'The reckless behaviour of North Korea is a global threat and requires a global response and that of course also includes NATO,' NATO head Jens Stoltenberg said in an interview with BBC television. Asked whether an attack on the U.S. Pacific territory of Guam would trigger NATO's Article 5, which requires each member of the alliance to come to the defence of any other, Stoltenberg said: 'I will not speculate about whether Article 5 will be applied in such a situation.'" http://reut.rs/2jfb2Ez

-- "Vast new intelligence haul fuels next phase of fight against Islamic State," by LATimes' W.J. Hennigan: "U.S. intelligence analysts have gained valuable insights into Islamic State's planning and personnel from a vast cache of digital data and other material recovered from bombed-out offices, abandoned laptops and the cellphones of dead fighters in recently liberated areas of Iraq and Syria. In the most dramatic gain, U.S. officials over the last two months have added thousands of names of known or suspected Islamic State operatives to an international watch list used at airports and other border crossings. The Interpol database now contains about 19,000 names. The intelligence haul - the largest since U.S. forces entered the war in mid-2014 - threatens to overwhelm already stretched counter-terrorism and law enforcement agencies in Europe." http://lat.ms/2jfu8dl

INSIDE THE WHITE HOUSE -- "Former Sessions aides chart different paths in Trump's White House," by Andrew Restuccia, Nancy Cook, and Josh Dawsey: "In Donald Trump's White House, there are few tales about power more instructive than the story of Jeff Sessions' two former top aides. Both Stephen Miller, Trump's senior policy adviser, and Rick Dearborn, a White House deputy chief of staff, started out in the same place - as top congressional aides in Jeff Sessions' Senate office. Together, they worked as Trump campaign advisers, and then won senior administration jobs.

"But while Miller has rapidly accumulated power in the West Wing by personally advising the president on high-profile policy questions like immigration and publicly defending Trump on television and in the briefing room, Dearborn has become

increasingly marginalized, having struggled to form a close bond with the president, the new chief of staff and Trump's family

"Their diverging stock in the administration offers a case study in how to thrive in Trump's West Wing. Among the lessons: The president often responds to aides who mirror his big personality, while wallflowers tend to get ignored. And the president deeply values loyalty to himself, with little interest in the relationships top aides and other staffers bring into the West Wing. But getting close to the president has its risks, as the long list of former Trump White House aides shows." http://politi.co/2xdYqD2

SUNDAY BEST ...

SEVERAL SUNDAY SHOWS were preempted due to the storm. NBC's "Meet the Press" and ABC's "This Week" both turned to storm coverage.

JAKE TAPPER speaks with **SEN. JOHN MCCAIN (R-ARIZ.)** on **CNN's "STATE OF THE UNION": TAPPER:** "I hope I don't run this clip for another 50 years, but how do you want the American people to remember you?" **MCCAIN:** "He served his country. And not always right. Made a lot of mistakes. Made a lot of errors. But served his country, and I hope we can add, honorably." ***The clip*** http://snpy.tv/2xXJFSD

-- TAPPER: "You went through chemo and radiation to fight this cancer. When do you find out if it worked?" **MCCAIN:** "On Monday we will take a MRI, but so far all indications are very good. But again I'm not trying to paint this as a rosy picture. This is a very virulent form of cancer, it has to be fought against. We have new technologies ... that make chances much better. But Jake, you know, every life has to end one way or another. I think it was the playwright [William Saroyan] ... he said I always knew that no one could live forever but I thought there might be one exception. You gotta have joy, joy. Listen, those joyful memories of the campaign in 2000 are some of the most enjoyable times of my life. We were the underdogs, we were fighting our way up, we went to Sedona, you remember, everything was so magic about that campaign."

REP JIM JORDAN (R-OHIO) to **CHRIS WALLACE** on **"FOX NEWS SUNDAY": @FoxNewsSunday**: ".@Jim_Jordan on his confidence in @SpeakerRyan: We meet with him every week, no one is talking about changing leadership."

GEORGE STEPHANOPOULOS speaks to **FLORIDA GOV. RICK SCOTT** on **ABC'S "THIS WEEK": STEPHANOPOULOS:** "What is your biggest worry right now?" **SCOTT:** "My biggest worry is the people that didn't evacuate and they don't understand the risk of the storm surge. George, last year, we got storm surge up in the panhandle. And this water just comes in. And it just fills up your house. And then it goes out. And people -- this lady -- I can tell you a story about a lady, she was -- she wanted to stay because of her pets. She was in a one-story house. The water got to three feet, she knew she wouldn't survive. Thank god when she left her house to try to get away, there was a high-water vehicle just leaving and she got -- she survived. Of course, her pets didn't. But, I just hope people understand that this storm surge is just deadly."

THE JUICE ...

NICK AND VAL'S NIGHT -- "Valery Galasso, Nicholas Merrill" -- N.Y. Times: "The bride, 31, is a senior policy adviser in the office of Gov. Andrew M. Cuomo. From 2010 to 2015, she served in the Obama administration in Vice President Joseph R. Biden Jr.'s office of legislative affairs. She graduated from the University of Connecticut and received a master's degree in public policy from Johns Hopkins. ... The groom, 34, is the communications director in the office of Hillary Clinton in New York. He has worked for Mrs. Clinton since 2007, and was the traveling press secretary for her 2016 presidential campaign. He graduated from Skidmore College in Saratoga Springs, N.Y." ***With pic*** http://nyti.ms/2xTK5c0

-- SPOTTED: Hillary Clinton, Huma Abedin, Jon Davidson, Bari Lurie and Jeff Westerberg, Michael Kives, Brian Fallon, Heather Samuelson and Mitch Herckis, Sara Latham (who was in from London), Rachel Kelly, Adrienne Elrod, Angel Urena, Christina Reynolds, De'ara Balenger, Connolly Keigher, Bob Barnett and Rita Braver, Dan Schwerin, Mike Feldman, Tina Flournoy, Opal Vadhan, Rob Russo, Matt McKenna, Kamyl Bazbaz, Jason Rahlan. ***Philippe Reines and Nick's mom Becky hosted the event.***

-- FIRST IN PLAYBOOK: SOUTH BEND, INDIANA, MAYOR PETE BUTTIGIEG is in Des Moines to speak at Progress Iowa's Corn Feed: **HERE IS WHAT HE'LL SAY:** "Nothing about politics is theoretical for me. I've sat with loved ones facing cancer and tried to figure out what we would do if Congress kicks them off Obamacare. I've looked into the eyes of an 8-year old American boy who lost his father to deportation and tried to tell him things were going to be okay. I've called 911 on a young man having an overdose, and rolled him over so he wouldn't choke to death.

"I've stood in a basement flooded by extreme rainfall hitting South Bend in just the way scientists have warned us about for decades. And I've carried a weapon in a foreign land on the orders of an American president. See, when Donald Trump and his sons were working on Season 7 of Celebrity Apprentice, I was driving and guarding convoys outside the wire in Afghanistan.

"I had a lot of different responsibilities , but the job that mattered most was to make sure the men and women in my vehicle got where they were going, alive. And when they got in my vehicle, they didn't care if I was a Democrat or a Republican. They cared about whether I had selected the route with the fewest IED threats, not whether my immigrant father was documented or undocumented. They cared about whether my M-4 was locked and loaded and whether I knew how to use it, not whether I was going home to a girlfriend or a boyfriend. They just wanted to get home safe, like I did." ***The full speech*** http://politi.co/2wSLr9n

KATY TUR on the **SUNDAY N.Y.T. OP-ED PAGE: "The Trump Fever Never Breaks":** "For more than 500 days, I watched as Mr. Trump's campaign grew from an awkward rally around a backyard pool in June 2015 to a raucous, 10,000-person convention center event in November 2016. In that same time, I also watched as Mr. Trump's candidacy survived a procession of death predictions. ...

"When I was out on the road following Mr. Trump, I sneaked in a bit of "Game of Thrones" on my laptop between rallies. What I learned, to paraphrase the show, is that what is dead may never die -- and, in Mr. Trump's case, may only rise stronger....In August 2015, a month after a high-ranking [RNC] operative promised me that America would never tolerate a man with no military service disparaging an American military hero, I was standing on a football field in Mobile, Ala., surrounded by 30,000 screaming Trump fans, an unheard-of turnout six months before a primary. Were they mad about the candidate's words on Mr. McCain? No. The opposite. 'He's not afraid of anybody,' one woman told me." http://nyti.ms/2vNep7x

-- SNEAK PEEK: JILL ABRAMSON reviewed Katy's "Unbelieveable: My Front-Row Seat to the Craziest Campaign in American History" for the Times. The review and book are out Tuesday. It is already the No. 1 election book on Amazon. ... ***$16.19 on Amazon*** http://amzn.to/2vNfRqj

WHAT KEN GROSS IS READING -- "Nestled in House Spending Bill: Campaign Finance Deregulation," by WSJ's Cezary Podkul: "House Republicans are backing several provisions that could reshape campaign finance rules ahead of next year's midterm elections as spending negotiations continue this fall. ... While the House package is unlikely to advance in the Senate, its provisions could become bargaining chips in the negotiations leading up to the next government funding deadline, now Dec. 8. ... If they do, churches may be able to contribute to candidates without fear of losing their tax-exempt status, furthering President Donald Trump's promise to 'get rid of and totally destroy' a law that forbids such activity.

"Corporations would be able to ask their employees to donate to unlimited numbers of trade associations' political action groups instead of limiting employee solicitations to one group per year. Other measures included in the bill would continue to prevent the Internal Revenue Service and the Securities and Exchange Commission from implementing rules that would affect political activities of 501(C)(4) nonprofits and publicly traded corporations, respectively. And the government would again be prohibited from requiring federal contractors to disclose their political contributions and campaign expenditures." http://on.wsj.com/2xlXayw

2020 WATCH -- "How California could jolt the 2020 presidential race," by David Siders and Gabe Debenedetti, with a Los Angeles dateline: "California is pushing forward with a plan to change the state's primary date from June to March, a move that could scramble the 2020 presidential nominating contest and swing the early weight of the campaign to the west. If adopted by the legislature this week - as is widely expected - and signed into law by Gov. Jerry Brown, the early primary would allocate California's massive haul of delegates just after the nation's first contests in Iowa, New Hampshire, Nevada and South Carolina.

"The earlier primary could benefit at least two potential presidential contenders from California - U.S. Sen. Kamala Harris and Los Angeles Mayor Eric Garcetti - while jeopardizing the prospects of other candidates who will struggle to raise enough early money to compete in expensive media markets in the nation's most populous state. 'In all probability, the winner of the California primary would be the nominee,' said Don Fowler, a former Democratic National Committee chairman from South Carolina." http://politi.co/2gUjnJv

TRUMP'S EPA: Agency at a crossroads -- Complete coverage

August 30, 2017

Latest News

In Wake Of Hurricane, CLF Targets Shell To Address Climate Under CWA

Citing the effects of Hurricane Harvey, a New England environmental group is stepping up its novel campaign to force industrial facilities to address the impacts of climate change under the Clean Water Act (CWA), filing new litigation against oil major Shell that charges it failed to address climate impacts in a mandatory stormwater plan for a Rhode Island facility.

Seeking Second Rewrite, Split SAB Again Rejects Advice On Biomass CO2

For the second time in less than two years, EPA's Science Advisory Board (SAB) has again rejected draft advice from a special panel on how the agency should estimate carbon dioxide emissions from biomass power, deciding to revise language addressing the time frame over which emissions impacts are measured, an issue that has long stymied the effort.

Amidst Uncertainty, Lawmakers Float Array Of EPA Spending Bill Riders

House lawmakers are proposing a barrage of amendments targeting or protecting EPA programs in advance of scheduled floor consideration next week of spending legislation for EPA and other agencies, though the ultimate impact of any of the policy proposals is unclear given the fluid state of spending negotiations for fiscal year 2018.

Texas Floats Arsenic Cancer Risk Value, Providing Model For Revising EPA's

Texas Commission on Environmental Quality (TCEQ) is proposing a cancer risk estimate for arsenic that -- while using EPA's strict default linear method for cancer risk calculation -- produces a much weaker value than the agency's controversial 2010 proposal, providing a model for how the Trump administration may revise EPA's if it seeks to do so.

Environmentalists Cite Water Law, Air Act Cases To Fight Utility ELG Delay

Environmentalists are urging a federal district judge to preserve their suit over EPA's

delay of an Obama-era effluent rule for power plants by arguing the Clean Water Act (CWA) allows district court cases over suspension of water rules, while citing two high-profile Clean Air Act (CAA) cases to undermine the agency's basis for the stay.

Appellate Decisions Will Guide Future Of EPA's SO2 NAAQS Designations

Two recent decisions by federal appeals courts will guide the future of EPA's issuance of designations for which areas are attaining the 2010 sulfur dioxide (SO2) air standard, with one court agreeing to hear a suit over four existing designations while a separate circuit court has approved EPA's timetable for issuing other designations.

Daily Feed

Wisconsin DNR chief picked as Region 7 deputy administrator

Cathy Stepp's selection is likely to please regulated industries but draw fire from environmentalists who have criticized her tenure at the helm of the state environmental agency.

Another top Trump EPA official faces ethics concerns

Albert Kelly, the former banker who is leading Administrator Scott Pruitt's Superfund reform task force, is barred from future banking activities for violating federal financial rules.

Environmentalists resist EPA standing claims in landfill methane suit

“EPA is simply wrong to suggest that Petitioner's member declarants have not demonstrated specific harm from emissions regulated by the Rules,” environmentalists' says.

RFA seeks to expand EPA fuel rule waiver in wake of Harvey

Seeking approval for E15, the Renewable Fuels Association says EPA could help ease gas prices by expanding already-issued fuel standard waivers beyond Texas and Louisiana to include the entire United States.

Ewire: Harvey's effects on EPA

EPA is “leaning forward” in its response to Harvey. Plus, Pruitt plans to return to deregulatory agenda after storm response.

EPA seeks to pause cleanup-related ESA suit

EPA is seeking a stay of Endangered Species Act litigation over cleanup at a Superfund site in order to complete a biological analysis that could lead to dismissal of the suit.

News

Climate Change

Federal Scientists Say Climate Change No Hoax, Disputing Trump

Less than a week after President Donald Trump notified the United Nations of his intent to exit from the Paris climate accord, his government's chief science agency released a report demonstrating that global warming is real and getting worse.

Coal Mining

Coal Miner Contura Scraps Public Offering, Citing Weak Interest

Contura Energy Inc., which inherited some of Alpha Natural Resources Inc.'s best coal mines during that company's bankruptcy, has withdrawn a plan for an initial public offering amid lackluster demand from potential investors.

Coal-Fired Power Plants

America's Power Plant Jobs, Ignored by Politicians, Are Dying

A couple months ago, Donald Trump was cheering a new coal mine in Pennsylvania that will put 70 people to work—good news for a president whose pledge to revive the industry helped get him elected. But a bigger group of coal workers has already suffered sweeping job cuts, and it's bracing for more.

Coal-Fired Power Plants

Trump Is Said to Be 'Really Interested' in Payments for Coal Use

West Virginia Governor Jim Justice said Donald Trump is "really interested" in his plan to prop up Appalachian mining by giving federal money to power plants that burn the region's coal.

Energy

National Grid Seeks January OK for Massachusetts Electricity Plan

National Grid hopes to receive Massachusetts' approval in January on its plan to dramatically change electricity service for customers under a broad grid-modernization plan, but the state's attorney general says the company may have to wait longer.

Energy

Pipelines Among Priorities as Energy Regulator Gets Quorum

The Federal Energy Regulatory Commission can proceed to vote on a backlog of key natural gas pipeline projects, contested rate filings, and enforcement actions now that its long-waited quorum has been restored.

Motor Vehicles

Auto Mileage Rules Could Change Earlier Than Planned

The EPA is seeking comment on whether mileage standards for the 2021 model year vehicles are appropriate, a sign the agency is open to changing the fuel efficiency rules for passenger cars and light trucks one year sooner than planned.

Motor Vehicles

World's Biggest Coal Shipper Talks a Lot About Electric Cars

Glencore Plc might be the world's biggest exporter of coal, the dirtiest fuel, but the mining giant is increasingly excited about electric cars.

Natural Gas

$900 Million New York Natural Gas Plant at Critical Juncture

Competitive Power Ventures Inc. is at a critical juncture in its plan to operate a 680-megawatt natural gas power plant 75 miles northwest of New York City.

Oil & Gas

British Columbia Vows Legal Challenge to Kinder Morgan Pipeline

British Columbia's new government vowed to use "every tool" to thwart Kinder Morgan Inc.'s $5.8 billion oil pipeline expansion, saying it plans to join legal opposition to Canadian federal approval of the project.

Oil & Gas

Oil and Gas Industry Loses Again in Methane Court Battle

The oil and gas industry lost another round in its fight to nullify an EPA regulation on methane emissions, as a federal appeals court decided against reconsidering the case.

AIR
Commercial and Industrial Solid Waste Incinerator Mercury Emission Limit
Alabama AIR

Proposed rule of the Department of Environmental Management, Air Division, amends regulations under AAC 335-3-3-.05 regarding the incineration of commercial and industrial solid waste. The rule allows commercial and industrial solid waste units in the waste-burning kiln subcatoegory to comply with an equivalent production-based mercury emission limit of 58 pounds of mercury per million tons of clinker produced instead of the concentration-based emission limit. The rule also includes additional monitoring and recordkeeping requirements applicable to waste-burning kilns that choose to comply with the equivalent production-based mercury emission limit. A hearing is scheduled for Sept. 6, 2017, in Montgomery. Comments are due Sept. 8, 2017. Contact: Larry Brown; DEM; 334-271-7878

—Alabama Administrative Monthly (07/31/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Department of Environmental Management/Ethics and Conflicts of Interest
Alabama GENERAL ENVIRONMENT AND SAFETY

Proposed rule of the Department of Environmental Management amends regulations under AAC 335-1-1-.03 regarding the department's organization and duties of department subdivisions and personnel. The rule includes requirements that department personnel meet state ethics requirements and federal requirements involving disclosure of potential conflicts of interest. The rule will be submitted to the EPA as a revision to the state implementation plan. A hearing is scheduled for Sept. 6, 2017, in Montgomery. Comments are due Sept. 8, 2017. Contact: Ronald Gore; DEM; 334-271-7868

Subject: Playbook Power Briefing, presented by the Coalition for Affordable Prescription Drugs (CAPD): TRUMP to head back to New York next week -- BUZZ: KAYLEIGH MCENANY joining the RNC -- PETER THIEL waffling on POTUS

View online version | Add politicoplaybook@politico.com to your address book.

Today's Playbook Power Briefing presented by the Coalition for Affordable Prescription Drugs (CAPD)

By JAKE SHERMAN (sherman@politico.com; @JakeSherman), ANNA PALMER (anna@politico.com; @apalmerdc), DANIEL LIPPMAN (daniel@politico.com; @dlippman), ZACH MONTELLARO (zmontellaro@politico.com; @ZachMontellaro)

Good Monday afternoon. NEWS -- KAYLEIGH MCENANY is joining the RNC as its national spokesman, bringing in house a prominent supporter of President Donald Trump. McEnany is expected be a major presence on television for the GOP. She recently left CNN, where she was a contributor.

WITH TRUMP dumping all over Sen. Richard Blumenthal (D-Conn.) this morning, it got us questioning how he will work with Democrats this fall when the debt limit needs to be lifted and government needs to be funded. Republicans will definitely need Democratic votes for must-pass legislation like lifting the nation's borrowing limit. Sources tell us Trump has not had substantive conversations with Democratic Hill leaders in some time. House Minority Leader Nancy Pelosi and Senate Minority Leader Chuck Schumer haven't been to the White House in some time.

NEWS , per pooler Peter Baker of the NYT: Cabinet secretaries are expected at Bedminster over the next few days and VP Mike Pence will also come up. "Jared Kushner and Ivanka Trump have been here all weekend and are still here. John Kelly has been here all weekend and will be here during the week. Rick Waddell, the deputy national security adviser, is here. Kellyanne Conway will be coming. Elaborating on the presidential tweet from earlier this morning, Walters says Potus will spend part of the first half of next week in New York. Details to come." ...

... TRUMP spoke with Secretary of State Rex Tillerson and Chief of Staff John Kelly for an hour to talk about Tillerson's trip to Asia and North Korea, per Baker.

FROM BEDMINSTER -- TWEETS IN THE JOHN KELLY ERA -- @realDonaldTrump at 6:38 a.m.: "The failing @nytimes, which has made every wrong prediction about me including my big election win (apologized), is totally inept!" ... **at 6:58 a.m.:** "The Trump base is far bigger & stronger than ever before (despite some phony Fake News polling). Look at rallies in Penn, Iowa, Ohio....." .... **at 7:04 a.m.:** "...and West Virginia. The fact is the Fake News Russian collusion story, record Stock Market, border security, military

strength, jobs....." ... **at 7:09 a.m.:** "... Supreme Court pick, economic enthusiasm, deregulation & so much more have driven the Trump base even closer together. Will never change!" ... **at 7:18 a.m.:** "Hard to believe that with 24/7 #Fake News on CNN, ABC, NBC, CBS, NYTIMES & WAPO, the Trump base is getting stronger!" ... **at 7:32 a.m.:** "Working hard from New Jersey while White House goes through long planned renovation. Going to New York next week for more meetings." ...

... **at 7:47 a.m.:** "Interesting to watch Senator Richard Blumenthal of Connecticut talking about hoax Russian collusion when he was a phony Vietnam con artist!" ... **at 7:52 a.m.:** "Never in U.S.history has anyone lied or defrauded voters like Senator Richard Blumenthal. He told stories about his Vietnam battles and...." ... **at 8:01 a.m.:** "...conquests, how brave he was, and it was all a lie. He cried like a baby and begged for forgiveness like a child. Now he judges collusion?"

-- THE NEW YORK TIMES did not apologize. The information Trump is using to criticize Blumenthal for came from a New York Times story!

BLUMENTHAL RESPONDS -- @SenBlumenthal: "Mr. President: Your bullying hasn't worked before and it won't work now. No one is above the law."

-- A REMINDER: In the 1990s, Trump tried to acquire the Empire State Building from Blumenthal's wife's family, which owned the New York City landmark for years. http://n.pr/2vbXRIg

-- @KFILE: "Something that's always struck me as under-reported is Trump's misleading statements about how he avoid Vietnam. I've listened to lifetime archival footage of Trump - for years he always mentioned attributed 'high lottery number' never deferments."

PHOTO OF THE DAY -- @jacobkornbluh: "Netanyahu met today with Democratic congressional delegation headed by @WhipHoyer in Jerusalem - photo by Amos Ben Gershom GPO" http://bit.ly/2hBzA9U

PLAYBOOK ON THE ROAD -- With everyone headed out of town on vacation, or back to their districts, we are starting a new August feature: Playbook on the Road. Send us a photo of yourself, or others reading Playbook during your travels this month and we will feature five photos every Friday. Participating Playbookers will automatically be entered into a drawing to win a signed cartoon by POLITICO's Pulitzer winning cartoonist Matt Wuerker. Email photos to Daniel at daniel@politico.com. Or, Tweet them to @playbookplus with the hashtag #PlaybookLoyal.

SPOTTED -- RUTH BADER GINSBURG dining at La Piquette in Cleveland Park Sunday night.

VALLEY WATCH -- "Peter Thiel Has Been Hedging His Bet On Donald Trump," by BuzzFeed's Ryan Mac: "Donald Trump's most prominent Silicon Valley supporter has

distanced himself from the president in multiple private conversations, describing at different points this year an 'incompetent' administration, and one that may well end in 'disaster.' Peter Thiel's unguarded remarks have surprised associates, some of whom are still reeling from his full-throated endorsement of Trump at the Republican National Convention. And while the investor stands by the president in public -- 'I support President Trump in his ongoing fight,' he said in a statement to BuzzFeed News -- his private doubts underscore the fragility of the President's backing even from his most public allies. ...

"Thiel's views remain private -- but various disparaging comments were recounted to BuzzFeed News by three separate sources, and others who subsequently confirmed those accounts. These people requested anonymity for fear of damaging personal relationships and possible retribution. While Thiel told Trump that he is off to a 'terrific start' at a White House event in June, his previous statements to friends and associates did not reflect that sentiment. In half a dozen private conversations with friends that were described to BuzzFeed News dating from spring 2016 to as recently as May, Thiel, who served on the Presidential Transition Team Executive Committee, has criticized Trump and his administration and developed increasingly pessimistic feelings about the president." http://bzfd.it/2uzbvBC

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)**: If you know only one fact about rising drug costs, know this one: drug makers set prices for prescription drugs. To help manage nearly double-digit price increases, employers, unions and government programs use PBMs to negotiate lower net prices to help curb costs for employers and patients. Learn more at affordableprescriptiondrugs.org ******

A BIG DEAL -- THE POST AND COURIER'S GLENN SMITH: "Emails: South Carolina AG coordinated with key figure in statehouse probe on letter booting special prosecutor off case": " South Carolina Attorney General Alan Wilson enlisted the help of a central figure in the Statehouse corruption probe in an attempt to sideline the case's special prosecutor just as the investigation was about to zero in on Wilson's close allies, according to emails obtained by The Post and Courier.

"It's a highly unusual move that legal observers say raises serious questions about the allegiances of the state's chief law enforcement official and his willingness to meddle in matters in which he had already revealed a potential conflict. Wilson, however, painted the emails as an innocent exchange with a trusted adviser with better grammar skills. The emails, obtained through a Freedom of Information Act request, show Wilson used his private account to coordinate with his embattled political consultant Richard Quinn on an October 2014 letter aimed at derailing the investigation being conducted by Wilson's handpicked special prosecutor, David Pascoe.

"The exchange came as Pascoe prepared to dig deeper into a State Law Enforcement Division report detailing alleged misdeeds by sitting lawmakers. Named in that document were Quinn and his son, state Rep. Rick Quinn, who was also identified as a potential target of the probe. Just a few weeks earlier, Wilson had told his chief

deputy he had a potential conflict and needed to be 'firewalled' on the matter.

"But that didn't stop the attorney general from seeking advice from the elder Quinn on phrasing a letter to pull Pascoe off the case, the email chain shows. 'Letter 1 is the longer one I read to you tonight. Letter 2 is a slightly shorter version,' Wilson wrote to the elder Quinn. 'I will be working on these tomorrow with Bob. Let me know what you think.' Quinn returned a revised draft to the Attorney General's Office the following day, noting that it contained 'a few new edits.' That same day, Pascoe was informed that Wilson's office would be handling the investigation from there on." http://bit.ly/2vetL5k

THE WINTER WHITE HOUSE -- "'Apply by fax': Before it can hire foreign workers, Trump's Mar-a-Lago Club advertises at home -- briefly," by WaPo's David Fahrenthold and Lori Rozsa: "President Trump's Mar-a-Lago Club needs to hire 35 waiters for this winter's social season in Palm Beach, Fla. Late last month, the club placed an ad on page C8 of the Palm Beach Post, crammed full of tiny print laying out the job experience requirements in classified ad shorthand. '3 mos recent & verifiable exp in fine dining/country club,' the ad said. 'No tips.'

"The ad gave no email address or phone number. 'Apply by fax,' it said. The ad also provided a mailing address. It ran twice, then never again. This was an underwhelming way to attract local job-seekers. But that wasn't the point. The ads were actually part of Mar-a-Lago's efforts to hire foreign workers for those 35 jobs." http://wapo.st/2uivnOv

ABOUT THOSE NOMINATIONS -- "Warren Blocks Trump's Pick for Antitrust Chief," by Bloomberg's Sara Forden and Billy House: "Democratic Senator Elizabeth Warren put a 'hold' on the confirmation of Makan Delrahim, President Donald Trump's nominee to run the Justice Department's antitrust division, delaying a vote until at least September, according to two people familiar with the matter. The delay means Delrahim remains on the outside as Justice Department lawyers wrap up their investigation of AT&T Inc. and Time Warner Inc.'s proposed $85.4 billion merger and start early talks with company representatives about possible conditions that could secure approval. AT&T's bid for the owner of CNN and HBO would reshape the media landscape and has drawn fire from Trump." https://bloom.bg/2uidQFP

DAVID BAILEY, a member of Steve Scalise's police detail who was injured in the attack, "has been placed on administrative leave due to his injuries, and during the investigation of the events of June 14, 2017. As a result of the injuries sustained, Agent Bailey has incurred financial burdens." *Donate* http://bit.ly/2wAmNql

PLAYBOOK BEYOND THE BELTWAY -- Cuomo mulls running for a third term -- 'Barack Obama Day' declared in Illinois http://politi.co/2uiRhAW

SPORTS BLINK -- "A dream and a reality, the 2028 Olympics give Los Angeles a chance to imagine its future," by the LA Times' Thomas Curwen: "Los Angeles is famous for its ability to court both dreamers and pragmatists. For every eccentric ambition, there is a broken sidewalk needing repair. For every point of pride, a darkened

shadow. But the city is too easily rendered in either utopian or dystopian terms, as if each is mutually exclusive. Will the 2028 Games be fiscally wise or foolish? Will they be politically popular or a political blunder?" http://lat.ms/2uyRaN9

AWARDS CIRCUIT -- Venezuelan human rights activist and attorney Alfredo Romero has been named the 2017 winner of the Robert F. Kennedy Human Rights Award. ***Full release*** http://bit.ly/2uzbTQA

MEMO FROM MARTY KADY TO THE POLITICO NEWSROOM -- "First, we're thrilled to announce that Jane Norman, a veteran policy editor who has spent the past eight years at CQ, will be joining Pro as a multi-vertical editor, with primary oversight of our Pro Education team, as well as senior editing oversight of the Budget and Appropriations team. Jane is currently the policy editor managing budget and appropriations coverage at CQ, and she has edited multiple policy areas in the past....

"[W]e have a big hire on the Pro Agriculture team. Christine Haughney, who has spent more than 15 years working for newspapers including The New York Times, The Wall Street Journal and The Washington Post, will join the team as the primary Morning Agriculture newsletter writer. Christine has developed a specialty in food and agriculture policy in recent years, and just spent the past year developing a six-part investigative television series about global food safety that is streaming in early 2018."

HOT JOB -- Senior Social Media Coordinator - New York, NY -- for Ivanka Trump's company: "We're looking for a smart, experienced and motivated Senior Social Media Coordinator-a digital native who understands the unique needs and capabilities of each social channel and can navigate them seamlessly while growing our reach. In partnership with the Senior Marketing Manager and under the guidance of the VP of Marketing & Brand Strategy, this person will be responsible for concepting, creating, managing and analyzing content across all social media platforms. This person will be constantly connected and uniquely tasked with understanding our brand's vision and voice. We are looking for an innovative, creative thinker who's a team player and eager to dive head-first into an exciting, constantly evolving and rapidly" *One of the responsibilities:* - "Engage with our online networks-responding to comments, retweeting and reposting where applicable" http://bit.ly/2vcqvJl

WELCOME TO THE WORLD - Brian Faler, senior tax reporter at Politico and a Bloomberg alum, and **Amanda Lahan** , director of membership affairs at the U.S.-Russia Business Council, recently welcomed David Lahan Faler. ***Pic*** http://politi.co/2vFJa13

****** **A message from the Coalition for Affordable Prescription Drugs (CAPD)** : The high prices that drug makers set for prescription drugs can put financial strain on patients, employers, unions and others who provide health care coverage to more than 50 percent of Americans. Pharmacy benefit managers negotiate the lowest net price for prescriptions on behalf of employers, unions and government programs. But, as list prices - the starting point for those negotiations -- continue their nearly double-digit

increases, the effects ripple throughout the system. The key to ensuring greater access and affordability lies in fostering greater competition. Facilitating faster reviews of generics and biosimilars, identifying off-patent drugs with little or no generic competition, and ending anti-competitive practices that keep safe, effective alternatives out of the market are also key to abating rising drug costs for patients. Learn more at affordableprescriptiondrugs.org ******

Leading the News

Coal Mining
Trump Administration Halts Study of Surface Mining Health Effects
Coal industry supporters are hailing the Trump administration's decision to nix a study on the health effects of surface coal mining, saying it's not necessary and likely wouldn't have yielded reliable conclusions.

News

Climate Change
Trump Administration Disbands Climate Advisory Panel
The Trump administration has disbanded a broad federal advisory panel formed to critique the government's National Climate Assessment.

EPA
Former Alabama Regulator to Lead EPA Southeast Region
A former Alabama environmental regulator will be sworn in Aug. 28 to lead the Environmental Protection Agency's Southeast region.

Energy
Former Lobbyist Named Energy Commission Chairman's Chief of Staff
Anthony Pugliese, a former Pennsylvania energy lobbyist, was named Aug. 21 as new Federal Energy Regulatory Commission Chairman Neil Chatterjee's chief of staff.

Energy
Germany's IBC Gets Power Contract for 20 MW Indian Solar Plant
German solar developer IBC Solar AG signed a power-purchase agreement with the Solar

Energy Corp. of India, a government enterprise, to buy electricity from its 20-megawatt plant in the state of Odisha.

Environmental Reviews

Norway Streamlines Impact Assessments, Enforces Strict Penalties

Norwegian companies will have to follow new rules for assessing the impacts that development projects have on the environment or human health or face tougher sanctions that could mean fines or prison for offenders.

Mergers and Acquisitions

Rosneft, Trafigura Finalize $12.9 Billion Deal for Essar Oil

Rosneft PJSC and partners including Trafigura Group finalized their $12.9 billion purchase of India's Essar Oil Ltd.

Mining

Chile's Environment Ministry Rejects Andes Iron Mine Project

Mining company Andes Iron failed to obtain an environmental license for its Dominga iron-ore and copper mine as the Chile's Ministerial Committee for Sustainability voted 3–2 to reject the $2.5 billion project Aug. 21.

Oil & Gas

Atlantic Governors Seek Continued Federal Oil and Gas Leasing Ban

North Carolina Gov. Roy Cooper (D) is urging federal regulators to continue the current ban on oil and gas drilling off his state's coast, joining Republican and Democratic governors in East Coast states who don't want the Atlantic included in the government's next five-year drilling plan.

Oil & Gas

Crestone Peak's Colorado Oil Drilling Plan Faces Hurdles

Crestone Peak Resources is seeking permission to use horizontal drilling and hydraulic fracturing in Boulder County, Colo., the first new oil and gas activity since a five-year drilling moratorium expired there.

Regulatory Policy

Federal Redo of Leave Rules May Implicate Chemical Safety Board

A pending Office of Personnel Management regulation could shake up a long-running personnel dispute at the Chemical Safety Board, potentially freeing up more resources for ongoing investigations or internal reforms impacting oil, chemical and mining companies that could be subject to agency probes.

Subject: POLITICO's Morning Score: Top Gun, Ironstache: House candidates try to go viral — DCCC tops NRCC in August fundraising, as NRCC brings in $3.8M — AAN out with new digital ads on tax reform

By Elena Schneider | 09/19/2017 10:00 AM EDT

With Zach Montellaro and Daniel Strauss

The following newsletter is an abridged version of Campaign Pro's Morning Score. For an earlier morning read on exponentially more races - and for a more comprehensive aggregation of the day's most important campaign news - sign up for Campaign Pro today. (http://www.politicopro.com/proinfo)

ABOUT THAT AD - "Democratic House candidates seek viral boost in primaries," by Campaign Pro's Elena Schneider: Dan Helmer is one of nearly a dozen Democrats elbowing their way for the chance to take on Virginia Rep. Barbara Comstock, one of the most vulnerable Republicans in the country. And now, thousands of people know him as the guy who poorly sang a "Top Gun" parody to a Comstock impersonator . And that's the point. Helmer got a dose of teasing on social media; one Twitter user called his video 'worryingly bad.' A Democratic consultant said using pop culture references is 'overwrought and tortuous,' adding that the ad 'doesn't make any sense in the context of the plot of the movie.' But with Democrats piling into House primaries by the dozen in districts across the country, some candidates are looking to boost their campaigns by releasing the must-watch ad of the week, attracting critical attention and donations from a tuned-in Democratic base - even if their ads don't meet traditional standards or have a big TV buy behind them. VoteVets Chairman Jon Soltz shot back against the critics of Helmer's web video, saying that 'the fact that everyone is writing about it is a win - whether they like it or not, that's irrelevant.'" **Full story.**

FIRST IN SCORE - NRCC raises $3.8M in August, versus $6.2M for the DCCC: The DCCC topped the NRCC in last month's fundraising by a $2.4 million margin. But the NRCC continues to lead with a cash on hand advantage, finishing the month with $36.3 million in the bank, while the DCCC has just under $25 million. In 2017, the NRCC has brought in $67.7 million, while the DCCC has raised $72.4 million over the last year.

NEW NUMBERS IN VIRGINA - TIGHTENING RACE - A new poll from Suffolk University in Boston has Democrat Ralph Northam and Republican Ed Gillespie deadlocked in the Virginia gubernatorial race, with each candidate receiving 42 percent of likely Virginia voters polled. The libertarian candidate has 3 percent, and the remaining 12 percent are undecided. Meanwhile, a second poll from the University of Mary Washington gives Northam a slight lead among likely voters. He is up over Gillespie 44-39, which is within the poll's margin of error.The most recent poll before yesterday's polls tracked by RealClearPolitics was one from Roanoke College that was in the field in mid-August. It gave Northam a 7 point edge.

- More numbers out of Virginia: "A new poll from the University of Mary Washington gives

Democratic Lt. Gov. Ralph Northam a 5-point lead over Republican Ed Gillespie in Virginia's gubernatorial race. Among likely voters, Northam earns 44 percent of the vote to Gillespie's 39 percent. Libertarian Cliff Hyra gets 3 percent." **Full story.**

- "Megadonors pour money into Virginia governor's race ahead of home stretch," by Campaign Pro's Kevin Robillard: "Tom Steyer, the Koch brothers and other megadonors in both parties are pouring millions of dollars into Virginia this month, hoping to set the tone in the most symbolic political race of 2017: the state's gubernatorial contest. That race hits the home stretch Tuesday when Democratic Lt. Gov. Ralph Northam and Republican Ed Gillespie engage in a high-profile debate, seven weeks before voters choose between them in a contest that has often been a political bellwether for presidents one year into their terms and foreshadowed the results of the next year's midterm elections. ... Steyer, the Democratic megadonor whose group NextGen America is investing millions in Virginia including heavy spending on registering and organizing college students and immigrants, described the governor's race as 'the most important political race in America in 2017.' 'This will be perceived as a test of where Americans want to go,' he said in an interview." **Full story.**

HACK ATTACK - "Political campaigns prep for battle with hackers," by Campaign Pro's Daniel Strauss and Scott Bland: "Candidates are quizzing prospective campaign managers on anti-hacking plans. Democratic committees like the Democratic Congressional Campaign Committee, which was breached last year, have switched from email to encrypted messaging apps internally. And both parties are feverishly trying to spread advice and best practices to new campaigns before they become targets. The political world is officially obsessed with cybersecurity in 2017 - especially the Democrats burned by the hacking of their committees and operatives during the 2016 election. Much of the Democratic Party's permanent apparatus has already changed its day-to-day operations as a result, while beginning the slow process of persuading its decentralized, startup-like campaign ecosystem to follow suit. House Democrats' top strategists have urged consultants working on their campaigns to start using Wickr, the end-to-end encrypted messaging app used inside the DCCC - but the consulting community has been slow to give up email and embrace the program, say three Democratic consultants involved in House races. Security measures vary widely from race to race, leaving many still vulnerable to hacking, and members of both parties say they are still seeking centralized clearinghouses of anti-hacking information and services."

- "... The [DCCC] ran seminars with outside Democratic operatives teaching them to use Wickr - but many are still using email on their campaigns. ... Party committees have a particularly strong interest in securing their communications that individual campaigns may not share, said another consultant. Later in the 2018 election cycle, the DCCC will ask candidates to share their own highly sensitive "self-research" - opposition research done against themselves to help the campaign and the party prepare for attacks. Hackers stole some of that delicate information from the DCCC's central file during the last election." **Full story.**

Days until the 2017 election: 49.

Days until the 2018 election: 413

Thanks for joining us! You can email tips to the Campaign Pro team at sbland@politico.com, eschneider@politico.com, krobillard@politico.com, dstrauss@politico.com and mseverns@politico.com.

NEW THIS MORNING - AAN out with new digital ads on tax reform: American Action Network Middle Class Growth Initiative released a new round of digital ads today in 41 Republican-controlled House districts, "urging lawmakers to prioritize tax cuts for working families and small businesses," per a memo from the group. The ad buy totals $500,000. The ad asks Congress to pass a "simpler, fairer tax code." **Watch the ad here. Check out the list of lawmakers here.**

DAILY WAR EAGLE - "Pence to campaign for Luther Strange next Monday," by Campaign Pro's Daniel Strauss and Matt Nussbaum: "Vice President Mike Pence will campaign for Sen. Luther Strange next Monday in Alabama, a senior administration official and two top political operatives involved in the Alabama Senate race confirmed to POLITICO. Pence's appearance in Alabama will come a day before the runoff between Strange and former Alabama chief Judge Roy Moore. President Donald Trump tweeted over the weekend that he planned to hold a rally in Huntsville the Saturday before Pence's appearance in support of Strange. Pence will headline a get-out-the-vote rally for Strange." **Full story.**

- "Donald Trump And His Allies Take A Surprisingly Larger Role In The Alabama Senate Race," by Buzzfeed's Henry Gomez: "A political nonprofit loyal to President Donald Trump will spend nearly $500,000 to boost interim Alabama Sen. Luther Strange in a high-stakes Republican runoff election next week. America First Policies will pay for pro-Strange digital ads, direct mail pieces, and get-out-the-vote phone calls between now and next week's vote, a spokesperson confirmed to BuzzFeed News." **Full story.**

- "Moore laments racial division between 'reds and yellows,'" by The Hill's Ben Kamisar: "Alabama Senate candidate Roy Moore, one of two Republicans competing in a primary runoff next week, appeared to use racially insensitive terms to describe Native Americans and Asians during a campaign speech." **Full story**.

SWITCHEROO - "Epstein drops out of Michigan Senate race; will run for MI-11," via Campaign Pro's Kevin Robillard: "Republican businesswoman Lena Epstein is dropping out of the GOP primary to take on Michigan Democratic Sen. Debbie Stabenow and will instead run to replace retiring Rep. Dave Trott in the House. Epstein, a 35-year-old who served as co-chair of President Donald Trump's winning campaign in the state, said she was switching races to ensure Republicans hold on to Trott's seat." **Full story.**

ANOTHER ONE - "Baltimore County Executive Kevin Kamenetz joins Democratic race for governor," by The Baltimore Sun's Pamela Wood: "Kamenetz, 59, said his experience running Maryland's third-largest jurisdiction will translate to success running the state. 'As county executive, I've gotten real results,' Kamenetz told The Baltimore Sun. 'I've created jobs.

I've improved schools. I've protected the environment - all without raising the tax rates.'" **Full story.**

WEB WARS - NRCC targets 10 House Democrats with digital ads: "The NRCC is targeting 10 House Democrats in a six-figure digital ad buy "for their weak position on national security," per a statement from the committee. ...The ads go after Rep. Tom O'Halleran (AZ-01); Rep. Collin Peterson (MN-07); Rep. Rick Nolan (MN-08); Rep. Stephanie Murphy (FL-07); Rep. Josh Gottheimer (NJ-05); Rep. Carol Shea-Porter (NH-01); and Rep. Peter DeFazio (OR-04). The ads will also air in three open seats, Minnesota's 1st District, Nevada's 3rd District and Florida's Republican-held 27th District." **Full story.**

- "Democrats urge FCC to look into reports of Russia's Sputnik's election meddling," via POLITICO's Ashley Gold: "House Democrats asked FCC Chairman Ajit Pai to investigate whether the Russian government used U.S. airwaves to influence the 2016 presidential election. The lawmakers cite a New York Times Magazine report suggesting Sputnik, a news outlet funded by the Russian government, was used to sway voters in the election. They write that suggests that the U.S. radio station airing Sputnik is "directly violating the public interest standard of the Communications Act."

QUOTE OF THE DAY: "We cultivate the pheasants." - Excerpts from the Menendez trial, POLITICO reported.

Subject: Official: FERC will take 'appropriate action' on DOE pricing rule within 60 days

By Darius Dixon

10/03/2017 04:22 PM EDT

FERC intends to act on the Energy Department's resiliency pricing rulemaking proposal within the 60 days Energy Secretary Rick Perry directed last week, FERC General Counsel James Danly told lawmakers this afternoon. But his comments left plenty of room for interpretation.

"Right now, the commission is internally reviewing the notice of proposed rulemaking that was put forward by the secretary," Danly told members of a Senate Energy and Natural Resources subcommittee, while noting that FERC has already requested comments on the proposal.

"We're reviewing the options that are available and we are in the process of building the record by soliciting these comments and reply comments," he said. "Once they're assembled, we're going to review them and take the appropriate action within the 60-day timeframe established by the NOPR."

The law that Perry is using to initiate the rulemaking at FERC directs regulators to take "final action" within a reasonable timeframe, but it's unclear what FERC might consider a final action. Similarly, Danly's phrase "appropriate action" could represent a number decisions by FERC.

WHAT'S NEXT: FERC has asked for comments on the proposal to be submitted by Oct. 23 and for reply comments by Nov. 7. DOE has also not yet published its proposal in the Federal Register, which will kick off the 60-day countdown clock.

Subject: Morning Media: So, who's WH comms director now? -- Steve Bannon's surprise interview -- The press conference, a day later

By Alex Weprin | 08/17/2017 05:43 AM EDT

With Cristiano Lima

SO, WHO'S WHITE HOUSE COMMS DIRECTOR NOW? It's Hope Hicks, who led communications during President Trump's campaign, and had been serving as director of strategic communications in the White House. Her role as White House communications director is not permanent, with the official announcement adding that the White House will "make an announcement on a permanent communications director at the appropriate time." Credit where it's due, The Daily Caller was first to report the news.

- But really, is there any doubt who really runs comms for the White House? It's President Trump. He made the decision to veer off script at his impromptu press conference on Tuesday (more on that below), and he even used Twitter to get ahead of another story on Wednesday.

- According to The Wall Street Journal, members of the president's Strategic and Policy Forum held a conference call in which they voted to disband in the wake of Trump's statements Tuesday. After the call, but before the CEOs on that panel could release statements announcing the change, the president took to Twitter to provide his own spin and get ahead of the story. "Rather than putting pressure on the businesspeople of the Manufacturing Council & Strategy & Policy Forum, I am ending both. Thank you all!"

NEW YORK TIMES EDITORIAL PAGE EDITOR TESTIFIES IN PALIN SUIT: James Bennet said during a deposition on Wednesday that he did not intend to imply a "causal link" between a targeted map of electoral districts circulated by Sarah Palin's political action committee and the 2011 Arizona shooting that injured Rep. Gabrielle Giffords. Bennet testified Wednesday in a defamation lawsuit in which the former vice presidential nominee accuses the paper's opinion section of having "violated the law and its own policies" by linking her to the violent episode. Bennet added that he "did not know if the map incited" the shooter into acting, but was instead "looking for a very strong word to write about the political climate because I wanted to get our readers' attention." Read more from our own Laura Nahmias, here.

Good morning and welcome back to Morning Media! With Hadas off to join CNN, I'll be helming Morning Media for the time being. Morning Media is produced with help from **Cristiano Lima (clima@politico.com / @ludacristiano)**. **Archives**. **Subscribe.**

THAT PRESS CONFERENCE, CONT'D: A day after it happened, President Trump's Tuesday news conference continued to reverberate across the media landscape. Here are a few

observations about that coverage.

- People watched. During the 4 p.m. hour that the presser took place, approximately 3.3 million watched live on MSNBC, CNN and Fox News. In prime time that evening, the ratings swelled for all three channels peaking at 9 p.m. and 10 p.m., when an average of 7.1 million people tuned in. Millions more likely saw all or part of the presser on the broadcast networks or online.

- That Vice News documentary was everywhere. Cable news channels and network news shows played clips from the doc, which had access to the white supremacists that others did not have. On Facebook, the doc had more than 25 million views. On YouTube, it had nearly three million. As CNN's Brian Stelter wrote, it was a "breakthrough moment" for Vice News.

- Fox News coverage changed somewhat. While the prime-time shows the night of the presser tended to mirror Trump's point of view, or cover other stories altogether, many of the channel's shows on Wednesday took on the president's comments directly. Here's news anchor Shepard Smith [video]: "Our booking team - and they're good - reached out to Republicans of all stripes across the country today. Let's be honest, Republicans often don't really mind coming on Fox News Channel. We couldn't get anyone to come and defend him here, because we thought, in balance, someone should do that. We worked very hard at it throughout the day, and we were unsuccessful." Fox Business anchor Melissa Francis teared up while discussing Trump's remarks. There was also a memorable segment yesterday morning featuring Abby Huntsman .

Of course, during the prime-time opinion shows last night, many of the viewpoints once again were more aligned with the president's line of thinking. "As the media pines for unity, they foment friction," Greg Gutfeld said on "The Five." Likewise, Sean Hannity led off his program at 10 p.m. with a monologue about "the media" distorting the president's comments.

- In the wake of the presser, one of President Trump's personal lawyers sent an email to a number of people - including journalists at Fox News, The Wall Street Journal and The Washington Times - "that echoed secessionist Civil War propaganda," according to The New York Times.

- Here's how NBC News got that video of White House chief of staff John Kelly that was widely shared after the presser.

- A man misidentified as the driver that killed one and injured 19 in Charlottesville plans to sue some "alt-right" sites, including GotNews, that laid the blame for the attack on him. In fact, the man identified on those sites was not even in the state of Virginia.

HOW ABOUT THAT STEVE BANNON INTERVIEW? Bannon's interview with The American Prospect, released Wednesday evening, was the most shocking interview to come from an administration official since, well, since then-White House comms director Anthony Scaramucci's conversation with The New Yorker last month. The Prospect's website was down for much of last night, having a hard time with the deluge of traffic. "The question of whether the phone call was on or off the record never came up," wrote The American Prospect's Robert Kuttner. "This is also puzzling, since Steve Bannon is not exactly Bambi when it comes to

dealing with the press. He's probably the most media-savvy person in America."

- According to Axios' Jonathan Swan, Bannon didn't realize his comments would be published: "Apparently Bannon never thought that the journalist might take his (very newsworthy) comments and turn them into a story. It's Anthony Scaramucci all over again (minus the curse words.)"

THAT BREITBART PROFILE: Breitbart was the subject of a splashy New York Times Magazine profile. It is a must-read, both for its access and for its detail. Still, as The Hill's Will Sommer and others on Twitter pointed out, the profile did not mention a few notable things. For example: There was not one mention of Matt Boyle, the Breitbart staffer with arguably the closest relationship to the White House and Steve Bannon.

- Here's Breitbart's take on the profile: "The New York Times Magazine acknowledges in an exhaustive feature that Breitbart News - and more pointedly, its editor-in-chief Alex Marlow - has amassed a news and editorial staff with more racial and gender diversity than most American media outlets."

BUZZFEED, DECISION DESK TEAM UP FOR ELECTION RESULTS COVERAGE: BuzzFeed and Decision Desk HQ, the election tracking organization, announced Wednesday they're expanding their partnership to provide election coverage on House, Senate, special election and gubernatorial races through 2018, Poynter reports. The deal will not only provide BuzzFeed with access to the organization's robust data operation, but will also feature the teams joining up to provide election-night broadcasts dissecting races. The move also bolsters BuzzFeed's rapidly expanding live video programming, which will include a new early morning show slated to launch in September.

A WHITE SUPREMACIST WEBSITE IS FACING ONLINE ROADBLOCKS in response to its coverage of the violence in Charlottesville. The Daily Stormer, a prominent white supremacist outlet linked to neo-Nazis and other hate groups, is facing a wave of backlash over its attacks on Charlottesville victim Heather Heyer. Twitter on Wednesday began suspending accounts linked to the site, which also saw its domain taken down by online registrars, forcing it to take on a Russian domain name. The Stormer is also facing a defamation suit from a Muslim comedian for its claim that he was behind the Manchester bombing.

MORE ON VERIZON'S "OATH": Joe Pompeo, who wrote this newsletter up until a couple of months ago, has a great deep dive into "Oath," the rebranded Verizon unit that includes HuffPost, Yahoo News and other media properties. Lots of newsy bits to chew on.

REVOLVING DOOR:

-Bustle has named Karine Jean-Pierre contributing editor, focusing on "the people, organizations, and movements powering the resistance, providing thoughtful analysis about the most important demonstrations and policies coming out of the Trump administration." Jean-Pierre is senior advisor and national spokesperson for MoveOn.org.

- NBC Peacock Productions president Sharon Scott is leaving the network after 27 years.

- The New York Times' Jennifer Steinhauer has been named Editor of Live Journalism/D.C, where she'll launch a series of TimesTalks events tied to politics, current events and the Trump administration. She will continue writing on culture and politics in Washington.

- FiveThirtyEight announced the additions of CNN and POLITICO alum Hilary Krieger as its new Washington editor and Andrea Jones-Rooy as its new quantitative researcher.

- Village Voice staff writer Alex Neason will be joining the Columbia Journalism Review as a senior writer next month.

SOUNDBITE: "But, frankly, look, the bottom line: The story's true. I'm not doing anything. I barely show up to work and I've been caught." -- A spokesman for New York's state court system, in a voicemail left after accidentally butt-dialing a New York Post reporter who was working on a story about him. [The New York Post]

CLARIFICATION: Yesterday's Morning Media left the impression that the AP's guidance on using the term "alt-right" was first issued after the Charlottesville protests and attack. In fact, the guidance was issued last November. The AP did add "anti-Semitism" to its alt-right guidance in the wake of the latest news.

EXTRAS:

- One year after John McLaughlin died, "The McLaughlin Group" returned for a special episode, on YouTube. [TVNewser]

- A new study out of Harvard says that coverage of President Donald Trump's 2016 election campaign skewed toward policy, rather than his public statements. "Clinton's coverage was focused on scandals, while Trump's coverage focused on his core issues," a summary of the findings out of the Berkman Klein Center stated. [Berkman Klein Center at Harvard]

- Sen. Al Franken is set to return to Bill Maher's "Real Time" on Friday after dropping out of a scheduled appearance in June following the host's controversial use of a racial epithet. [The Hollywood Reporter]

- A new study tackles the "delayed promise of newsroom diversity" and the potentially grim prospects for media inclusion. [Columbia Journalism Review]

- Fox News host Eboni K. Williams talks about receiving death threats after her criticisms of President Trump on Tuesday [Variety]

Subject: Today on Climate Beat

August 31, 2017

Today on Climate Beat . . .

. . . we looked at the options, reporting that former Rep. Henry Waxman (D-CA) is backing environmentalists' efforts to curb corn ethanol production, saying that aggressive Obama-era vehicle fuel efficiency rules that the Trump administration is threatening to weaken are a better mechanism for curbing greenhouse gases than EPA's renewable fuel standard.

In other biofuel news, EPA has expanded the scope of its emergency clean fuel waivers to address the impacts of Hurricane Harvey to several Southeastern and Mid-Atlantic states, a move the renewable fuel sector says partially grants its request for a broader waiver that would allow for the sale of higher-volume ethanol blends.

And our daily news roundup looked at the link between climate change and hurricanes. EPA chief Scott Pruitt says such talk is "misplaced," but climate scientists disagree.

Subject: POLITICO's Morning Transportation: Infrastructure council bites the dust — Terrorism strikes Barcelona — An ultimatum for Chao

By Brianna Gurciullo and Stephanie Beasley | 08/18/2017 10:00 AM EDT

INFRASTRUCTURE COUNCIL BITES THE DUST: The group of industry reps that was supposed to be advising President Donald Trump on infrastructure policy is kaput. A White House spokeswoman told our Lauren Gardner on Thursday afternoon that the council, steered by Richard LeFrak and Steven Roth, "will not move forward." The previous day, Trump's business and manufacturing councils were also scrapped as members were withdrawing en masse over the president's remarks on violence in Charlottesville, Virginia.

Another departure: Valarie Long, the executive vice president of the Service Employees International Union, on Thursday quit the National Advisory Committee on Travel and Tourism Infrastructure, which the FAST Act required the executive branch create. Long said in a letter to other members of the committee that they had only met one time -- at the end of the Obama administration, and urged other members to leave the panel too.

Shadow advisory: While corporate executives might not be posing for photos with the president anytime soon, they aren't planning to give up the opportunity to help shape his tax overhaul, infrastructure or health care policies, POLITICO's Nancy Cook reports. Instead of working through advisory councils and meetings, some companies' advisers and lobbyists still plan to plan to engage with top White House officials like Vice President Mike Pence and political appointees at agencies.

TERRORISM STRIKES BARCELONA: Spanish authorities are still investigating a terrorist attack that occurred in Barcelona on Thursday where a van plowed through a crowd of pedestrians in the city's Las Ramblas District. At least 13 people were killed and nearly 100 injured in an attack for which ISIS claimed responsibility, POLITICO Europe's Stephen Brown and Christian Oliver report. Police have yet to confirm any ties to ISIS, though they have arrested two men in connection to the incident.

Trump's reaction: Trump offered words of support as details of the van-ramming incident emerged Thursday afternoon. "The United States condemns the terror attack in Barcelona, Spain, and will do whatever is necessary to help. Be tough & strong, we love you!" he tweeted. But he quickly assumed a more threatening tone when he appeared to make reference to a widely panned account of Army General John "Black Jack" Pershing's execution of Muslim prisoners using bullets dipped in pigs' blood during the early 20th century. You can find more details about the historical inaccuracies in this story from Newsweek's Tim Marcin.

DHS monitoring: A White House official said Chief of Staff John Kelly was following developments and keeping the president "abreast," according to a pool report. Kelly's former second-in-command at DHS, Elaine Duke, was also reported to be monitoring the situation closely. "DHS has reached out to Spanish authorities, and the department is standing by to

support our allies as they respond to and recover from this horrendous attack," a DHS spokeswoman said.

HAPPY FRIDAY: Thanks for tuning in to POLITICO's Morning Transportation, your daily tipsheet on all things trains, planes, automobiles and ports. Brianna is taking a trip to Canada next week, but Steph will be here driving the MT bus. Please send along tips, feedback, lyrics and recommendations for things to check out in Toronto, Montreal and Quebec City to sbeasley@politico.com or @Steph_Beasley and bgurciullo@politico.com or @brigurciullo.

"If you need a friend / I'm sailing right behind / Like a bridge over troubled water / I will ease your mind."

GET LISTENING: Follow MT's playlist on Spotify. What better way to start your day than with songs (picked by us and readers) that are all about flying, driving, commuting and sailing?

WHITE HOUSE: COHN HERE TO STAY: Gary Cohn isn't going anywhere, the White House said Thursday, even though reports were swirling that the National Economic Council director was upset over what Trump has said about Charlottesville. Cohn, who is involved in the Trump administration's infrastructure plans, "is focused on his responsibilities as NEC Director and any reports to the contrary are 100% false," a White House official said. "Nothing has changed."

In related news: Rep. Steve Cohen (D-Tenn.), a member of the House Transportation Committee, said Thursday that he would introduce articles of impeachment because of Trump's remarks. "President Trump has shown time and time again that he lacks the ethical and moral rectitude to be president of the United States," Cohen said in a statement.

TAKE A LOOK: POLITICO's Jeremy C.F. Lin and Lily Mihalik mapped out the U.S. roads, highways and bridges that commemorate the Confederacy across the country. "From General Lee Avenue in Brooklyn, New York, to Jefferson Davis Highway in San Diego, California, nearly 500 roads, highways and bridges memorialize the Confederacy," Jeremy and Lily write.

AN ULTIMATUM FOR CHAO: Nine Asian American organizations are pushing Transportation Secretary Elaine Chao to "make a public statement supporting fellow immigrants who rely" on Deferred Action for Childhood Arrivals and Temporary Protected Status - or step down. They also knocked Chao for standing next to Trump during his comments Tuesday about Charlottesville. The Anne Frank Center for Mutual Respect made a similar criticism this week via Twitter . A DOT spokesperson defended Chao as "one of the strongest forces in advancing the Asian American community" and someone who has dedicated her professional life to helping minorities achieve success. That sentiment was echoed by a coalition of 16 Asian advocacy groups, including the U.S. Asia Center, who expressed "unequivocal support" for Chao.

HOURS OF SERVICE SMACKDOWN: FMCSA is revoking the license of a commercial truck driver whose "egregious violation" of federal work rules led to a crash that killed a Fairfax County football coach. The Washington Post's Faiz Siddiqui reports that FMCSA has declared Carlos Alberto Garcia, who was charged with reckless driving in June, a public safety hazard

after discovering that he'd driven 103 hours over an eight-day period with "minimal breaks." Commercial truck drivers are required to take a 10-hour break for every 11 consecutive hours of driving, per FMCSA's hours-of-service regulations. They also must take at least 34 hours off after driving 60 hours in seven days or 70 hours in eight days.

KEEP YOUR EYE ON THE BALL: Leaders at ICAO are pushing Asia-Pacific members to improve air traffic management and increase the number of new air routes to help boost the market and also to provide more reliable transport in times of crisis. "While the Asia-Pacific presently leads the world in terms of traffic growth, it also faces attendant challenges with respect to managing and sustaining it, safely, securely and efficiently," ICAO Council President Olumuyiwa Benard Aliu said at an event in Ulaanbaatar, Mongolia, this week. He added that a "reliable network of air links within and among island countries, and to major air transport hubs, is essential to the viability of these countries from humanitarian, political and economic perspectives."

Security concerns: ICAO Secretary Fang Liu also encouraged members to "evolve a common security approach" in the Asia-Pacific region that would be both streamlined and unobtrusive to passenger and cargo transport. TSA is currently working with airlines and airports globally to establish a more uniform security regime for flights to the United States. That will include updates such as the use of explosive trace detection equipment at checkpoints as well as preclearance screening areas for travelers flying to the United States.

ASSOCIATIONS ASSEMBLE: The American Highway Users Alliance, the Automotive Service Association and the Association for Unmanned Vehicle Systems International have joined the Coalition for Future Mobility, which advocates for legislation that "fosters the continued growth" of self-driving cars.

SLICE OF PI: Hagir Elawad, the director of legislative affairs for the United Arab Emirates' embassy in Washington, will switch to handling those same duties as an outside consultant with Hagir Elawad and Associates (operating under the name UAE Strategies) starting in September. Her new title will be "lead congressional liaison." She will report directly to UAE Ambassador Yousef Al Otaiba in Washington. According to disclosure forms, the UAE has also hired several additional Washington firms, including Akin Gump Strauss Hauer and Feld, DLA Piper and the Harbour Group. On a related note, the UAE has reportedly created a "slush fund" to funnel domestic economic development project money to the Middle East Institute, a D.C. think tank, The Intercept's Alex Emmons writes. The UAE has given the group $20 million in grant funding so far, an amount that surpasses the think tank's annual budget. (h/t POLITICO Influence).

MT MAILBAG: The Agricultural Transportation Working Group - which includes the American Farm Bureau Federation, the National Farmers Union and others - sent a letter Thursday to the Surface Transportation Board griping about CSX's service issues. The group suggested that the STB release a recap of its weekly calls with CSX, hold a public hearing on the service issues and get back to work on "reciprocal switching" rules.

By the way: Hunter Harrison, the head of CSX, wrote to the Rail Customer Coalition, which had called for a formal investigation into the railroad's issues. Harrison wrote that the members of the

coalition made "unfounded and grossly exaggerated" claims, according to Reuters.

THE AUTOBAHN:

- "The incredible shrinking airline seat." Bloomberg.

- "EPA will review parts of Phase 2 truck emissions rule." POLITICO Pro Energy.

- "Hyundai unveils new fuel cell SUV with longer travel range." The Associated Press.

- "Carper flies drone, rides a quadski at August recess lab visit." Roll Call.

- "Overdoses on the road: Drugged driving rises as a menace." The Associated Press.

- "Veteran lobbyists see hard road for tax reform." POLITICO.

- "Drones will fly into the path of the eclipse to study weather." Popular Science.

- "Delta jets clip 2 planes, truck in 24 hours at JFK Airport." Bloomberg.

THE COUNTDOWN: DOT appropriations run out in 43 days. The FAA reauthorization expires in 43 days. Highway and transit policy is up for renewal in 1,139 days.

Leading the News

Energy
Pipelines Among Priorities as Energy Regulator Gets Quorum
The Federal Energy Regulatory Commission can proceed to vote on a backlog of key natural gas pipeline projects, contested rate filings, and enforcement actions now that its long-waited quorum has been restored.

Motor Vehicles
Auto Mileage Rules Could Change Earlier Than Planned
The EPA is seeking comment on whether mileage standards for the 2021 model year vehicles are appropriate, a sign the agency is open to changing the fuel efficiency rules for passenger cars and light trucks one year sooner than planned.

Solid Waste
States Get More Leeway Under EPA's Coal Ash Guidance
States now have details on how to develop EPA-approved coal ash disposal programs, but environmental groups worry that the agency's flexibility will allow utilities to dictate disposal.

News

Chemicals
Clock Starts Ticking to Keep Chemicals in Commerce
Chemical makers and importers that want to keep their products on the market must notify the EPA by February 2018 about the chemicals they have made during the past decade.

Chemicals
Ford Sued Over Chemicals Seeping Into Michigan Groundwater

More than 130 residents of Livonia, Mich. are suing Ford Motor Co. for alleged damages caused by the release of cleaning chemicals from a company plant.

Climate Change

Federal Scientists Say Climate Change No Hoax, Disputing Trump

Less than a week after President Donald Trump notified the United Nations of his intent to exit from the Paris climate accord, his government's chief science agency released a report demonstrating that global warming is real and getting worse.

Coal Mining

Coal Miner Contura Scraps Public Offering, Citing Weak Interest

Contura Energy Inc., which inherited some of Alpha Natural Resources Inc.'s best coal mines during that company's bankruptcy, has withdrawn a plan for an initial public offering amid lackluster demand from potential investors.

Coal-Fired Power Plants

America's Power Plant Jobs, Ignored by Politicians, Are Dying

A couple months ago, Donald Trump was cheering a new coal mine in Pennsylvania that will put 70 people to work—good news for a president whose pledge to revive the industry helped get him elected. But a bigger group of coal workers has already suffered sweeping job cuts, and it's bracing for more.

Coal-Fired Power Plants

Trump Is Said to Be 'Really Interested' in Payments for Coal Use

West Virginia Governor Jim Justice said Donald Trump is "really interested" in his plan to prop up Appalachian mining by giving federal money to power plants that burn the region's coal.

Contribution

Asarco Superfund Claims Revived on Appeal

Asarco LLC may proceed with Superfund contribution claims against Atlantic Richfield Co. over contamination at a smelter site in Montana, the Ninth Circuit ruled Aug. 10 (Asarco, LLC v. Atl. Richfield, 9th Cir., No. 14-35723, 8/10/17).

Energy

National Grid Seeks January OK for Massachusetts Electricity Plan

National Grid hopes to receive Massachusetts' approval in January on its plan to dramatically change electricity service for customers under a broad grid-modernization plan, but the state's attorney general says the company may have to wait longer.

Motor Vehicles

World's Biggest Coal Shipper Talks a Lot About Electric Cars

Glencore Plc might be the world's biggest exporter of coal, the dirtiest fuel, but the mining giant is increasingly excited about electric cars.

Natural Gas

$900 Million New York Natural Gas Plant at Critical Juncture

Competitive Power Ventures Inc. is at a critical juncture in its plan to operate a 680-megawatt natural gas power plant 75 miles northwest of New York City.

Oil & Gas

British Columbia Vows Legal Challenge to Kinder Morgan Pipeline

British Columbia's new government vowed to use "every tool" to thwart Kinder Morgan

Inc.'s $5.8 billion oil pipeline expansion, saying it plans to join legal opposition to Canadian federal approval of the project.

Oil & Gas

Oil and Gas Industry Loses Again in Methane Court Battle

The oil and gas industry lost another round in its fight to nullify an EPA regulation on methane emissions, as a federal appeals court decided against reconsidering the case.

Pesticides

Disclosing Monsanto Messages Could Cost Lawyers in Lawsuit

Lawyers for cancer victims suing Monsanto could be booted from the case after disclosing confidential documents detailing the pesticide manufacturer's communications with regulators and scientists.

Regulatory Policy

Judge Questions 'Shadow' Process in Challenge to Regulatory Order

President Donald Trump's executive order requiring agencies to eliminate two regulations for each new regulation issued and offset the cost of each new rule is "fundamentally different" than previous executive orders guiding agency rulemaking, a federal judge said Aug. 10.

Sustainability

Brazilian Bank Issues Record Grant Money to Guard Amazon

Brazil's Development Bank issued a public call Aug. 9 for projects eligible to receive an unprecedented 150 million reais (US $47.5 million) in grants from a fund dedicated to preserving the Amazon rainforest.

Toxic Substances

Navy Hazmat Dumping Claim Revived in Landowner Suit

A Maryland man may pursue damages claims against the U.S. Navy for its alleged dumping of hazardous waste on his private property abutting a military facility, the District of Maryland ruled Aug. 9 (Baker v. United States, D. Md., No. 17-cv-00546, 8/9/17).

TRUMP'S EPA: Agency at a crossroads -- Complete coverage

December 1, 2017

Latest News

EPA Deferral To States' Enforcement May Bolster 'Cooperative Federalism'

The Environmental Council of the States' (ECOS) outgoing executive director says a recent EPA letter announcing the agency will defer more heavily to states on enforcement inspections and other work could bolster EPA's push for "cooperative federalism" that seeks to elevate states' authority over environmental protection.

Sharply Criticizing Obama EPA, Pruitt Pledges 'Lots Of Rollback' Of Rules

EPA Administrator Scott Pruitt is underscoring what he sees as the failures of the agency under the Obama administration, sharply criticizing a host of regulations and signaling that his administration will continue its aggressive program to roll back a host of measures he believes create industry uncertainty.

Mining Sector, States Wage 11th-Hour Bids To Sway EPA Assurance Policy

Mining industry groups and states representing mining compacts are waging 11th-hour bids to sway the outcome of EPA's imminent first-of-its-kind rule governing financial responsibility requirements for the hardrock mining sector under the Superfund law, pitching ideas for the rule at a series of meetings with agency and White House officials.

DOJ Guidance Curbs Signal Trump Push To Target 'Sub-Regulatory' Policy

A recent memo by Attorney General Jeff Sessions barring the Department of Justice (DOJ) from issuing "binding" mandates by guidance could mark a new effort in the Trump administration's deregulatory push, sources say, suggesting that EPA and other agencies could expand their efforts to target not just regulations but also guidance and other "sub-regulatory" policy documents.

State, Local Officials Urge EPA To Adapt RMP Program For CWA Hazards

State and local emergency response officials are urging EPA to drop plans for a voluntary information collection effort intended to inform a Clean Water Act (CWA) rulemaking to prevent and contain chemical spills, saying the agency should instead

adapt its existing facility safety Risk Management Plan (RMP) program using existing data.

Final EPA RFS For 2018 Prompts Criticism From Refiners, Biofuels Groups

EPA has met its Nov. 30 deadline for issuing the final 2018 renewable fuel standard (RFS) blending targets for alternative and renewable fuels, prompting criticism from all sides as refiners argue that goals are too high and show why Congress should reform or repeal the RFS while biofuels groups say the targets are too low.

Daily Feed

Environmentalists defend suit over 'vague' CRA terms

Environmentalists are urging the court to preserve their suit that challenges the Congressional Review Act's limits on agencies replacing rules that Congress scraps under the law.

NOAA pick agrees humans are 'main' cause of climate change

The administration's pick to lead NOAA goes much further in acknowledging human contributions to climate change than most Trump administration officials, including EPA Administrator Scott Pruitt.

Ewire: House panel poised to codify Trump's deregulatory orders

A House committee is voting Nov. 30 on legislation to codify President Donald Trump's deregulatory orders.

D.C. Circuit urged to 'clarify' AFO reporting mandate

Environmentalists are insisting that EPA's exemption of animal feeding operations from some emissions reporting requirements is unlawful “final agency action.”

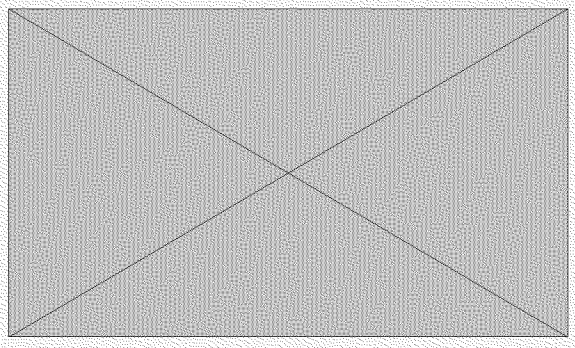
Subject: AEI Today: The good and bad of the GOP tax plan

Corporate tax reform is long overdue in the U.S.

AEI's daily publication of independent research, insightful analysis, and scholarly debate

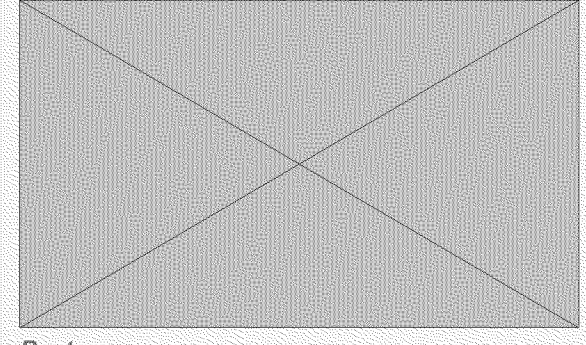


Reuters

The good and bad of the GOP tax plan

Aparna Mathur | The Hill

Corporate tax reform is long overdue in the US. Our high rates are a burden not only on businesses but also on our workers and our economy as a whole. To that extent, the new tax reform outline from the "Big Six" proposes far more drastic changes to business taxes than individual taxes. While Aparna Mathur is optimistic about the long-run effects of moving toward a more competitive corporate tax code, she urges politicians to proceed with caution.

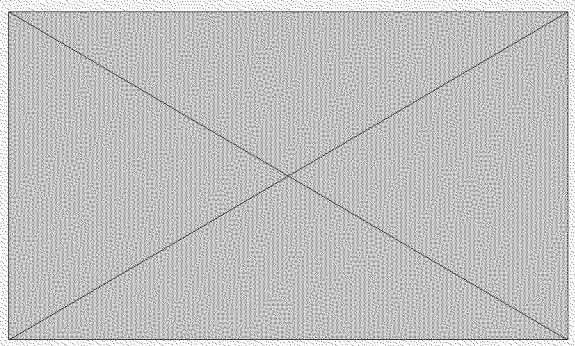


Reuters

What would actually deter North Korea?

Dan Blumenthal | Foreign Policy

There is a new piece of conventional wisdom on North Korea in Washington: the idea that the United States should “recognize” North Korea as a nuclear state and move toward a policy of containment and deterrence. To be sure, this may be the only option left, but many who are advocating the policy don’t seem to be thinking through its military requirements, possible regional consequences, and optimistic rationality of Kim Jung Un.



Reuters

Lessons from 'Blade

Runner' on corporate power

Jonah Goldberg | National Review Online

The Wall Street Journal recently reported on the "Blade Runner" curse. The movie “conjured a Los Angeles of 2019 whose steamy streets teem with flying cars and neon advertising,” writes Don Steinberg. “Then came the curse: Many of the robust brands shown thriving in the cinematic future ran into financial troubles in the real world.” And yet, many companies are lining up to appear in the forthcoming sequel, "Blade Runner 2049". Why is this?

Reuters

Why the Iran nuclear deal may not be worth saving

John R. Bolton | The Wall Street Journal

President Trump will soon decide whether to fulfill his campaign promise to extricate America from the Obama administration’s nuclear deal with Iran. Last week at the UN, he lacerated the deal as an “embarrassment.” Fearing the worst, however, the deal’s acolytes are actively obscuring this central issue, arguing that it is too arduous and too complex to withdraw cleanly. This strategy is just a ploy to block withdrawal, says John Bolton.

Subject: EPW reschedules vote on nominees at EPA, NRC, DOT

By Alex Guillén

10/20/2017 03:46 PM EDT

The Senate Environment and Public Works Committee will vote next Wednesday on several EPA nominees whose advancement was temporarily imperiled this week by a fight between EPA and several Republican senators over the Renewable Fuel Standard.

Sen. Joni Ernst (R-Iowa) threatened to withhold her vote on EPA's air nominee, William Wehrum, until she received a written guarantee from the Trump administration on key points, forcing EPW leaders to postpone the vote that was scheduled for this week. The agency issued a letter making those promises on Thursday, and Ernst agreed to let the nominees move forward.

Aside from Wehrum, the panel will also vote on Michael Dourson to head EPA's chemicals office, David Ross to run the water office and Matthew Leopold to be general counsel.

The committee will also vote on Jeff Baran's re-nomination to the Nuclear Regulatory Commission and Paul Trombino to run the Federal Highway Administration.

The vote will take place Oct. 25 at 10 a.m. in Dirksen 406.

Subject: POLITICO's Morning Energy, presented by the Nuclear Energy Institute: Climate talk looms throughout U.N. meetings — Senate Energy panel moves nominees today — Steyer hits Trump over climate

By Anthony Adragna | 09/19/2017 10:00 AM EDT

With help from Ben Lefebvre

CLIMATE TALK PROMINENT IN U.N. MEETINGS: Look for talk of climate change and the Paris climate agreement to continue to pop up throughout the United Nations General Assembly today, but any fog around the White House's position appears to be clearing. President Donald Trump reiterated his view that the landmark international accord was unfair to the U.S. during a Monday meeting with French President Emmanuel Macron, according to a White House official. "The President talked through that he believes it's just simply unfair - that he thought other countries, particularly China, received a better deal than the United States negotiated," State Department policy planning director Brian Hook said. "He does not believe that the Paris Agreement is a framework to achieve those goals around clean energy, protecting the environment, and promoting economic growth."

Chicago to host climate conference: Chicago Mayor Rahm Emanuel announced Monday his city would host a two-day conference to discuss how cities around the world are addressing climate change and implementing the Paris agreement. And former U.N. climate chief Christiana Figueres said in a statement the Dec. 4-5 event would "provide an opportunity for mayors to continue acting on the political will demonstrated in Paris, showing that local action is being taken to fulfill commitments." Participants will include Paris' Anne Hidalgo, Montreal's Denis Coderre, Austin's Steve Adler and Atlanta's Kasim Reed, among others.

MOVE ALONG, MOVE ALONG: It should be a quick and easy process for five FERC, DOE and Interior nominees to get through the Senate Energy and Natural Resources Committee this morning. On the agenda are votes on the selections of Kevin McIntyre for chairman of FERC, Richard Glick for FERC commissioner, David Jonas for DOE general counsel, and Ryan Nelson and Joseph Balash for solicitor and assistant secretary for land and minerals management at DOI, respectively. The vote is set for 9:30 a.m. in Dirksen 366. Watch here.

FIGHT AGAINST DOURSON HEATS UP: Outside groups are ramping up what's expected to be an intense push against the nomination of Michael Dourson to head up EPA's chemicals office (and the lead role in implementing the revamped Toxic Substances Control Act). Clean Air Moms Action is out with an ad hitting him for being a "toxicologist-for-hire for corporate clients" who minimized the dangers of second-hand smoke and dangerous chemicals. The Environmental Defense Fund and Environmental Working Group are holding their own press call today to draw attention to Dourson's past work.

WELCOME TO TUESDAY! I'm your host Anthony Adragna, and LCV's Gene Karpinski was first up to identify former EPA chief Doug Costle as the unsuccessful Senate candidate in

Vermont. For today: Which Supreme Court justice once hosted the prime-time Emmys? Send your tips, energy gossip and comments to aadragna@politico.com, or follow us on Twitter @AnthonyAdragna, @Morning_Energy and @POLITICOPro.

MURKOWSKI ENERGY BILL BACK ON ICE? Congressional GOP lawmakers consider the bill S. 1460 (115) Sen. Lisa Murkowski introduced in June "too moderate" and don't expect it to move until next spring at the earliest, energy lobbyist and GOP sources tell ME. Republicans want to see language paring back DOE's role in approving LNG export projects in any energy bill package, sources said. One item lobbyists and Senate and House aides said would help jumpstart its chances would be adding language similar to the bills Republicans Ted Cruz and Bill Cassidy also introduced in June that would require DOE automatically approve LNG export applications to any country that isn't on a U.S. sanctions list.

But even with that included, the legislation could languish as the energy industry focuses its attention on the White House, said one GOP staffer familiar with the bill's negotiations. "I think something will happen this Congress, but there's no appetite to get anything done anytime soon. Spring sounds about right," the aide said.

** **A message from the Nuclear Energy Institute**: Nuclear is doing more than ever before. It's powering the grid, boosting the economy by billions, creating jobs, propelling space travel and even helping doctors. It's moving us forward in ways we never thought possible. Explore all nuclear energy is doing at discovernuclear.com. **

MORE CLIMATE LUMINARY CHATTER TODAY (AND LEO ALERT!): John Kerry's climate change summit is back for another packed day of action at Yale. First up at 10:30 a.m.: A session on what non-federal entities are doing to tackle the problem, featuring Govs. Jerry Brown and Jay Inslee, World Bank President Jim Yong Kim and Paris Mayor Anne Hidalgo. After that comes a panel at 2:30 p.m. on "potential new avenues for bipartisanship" with former Secretary of State James Baker and recorded video remarks from Sens. Lindsey Graham and John McCain .

Bringing it home: Kerry closes his summit at 5:00 p.m. along with remarks from actor/activist Leonardo DiCaprio. Watch all the events online here.

EXPECT MORE OF THESE! The Sierra Club filed a lawsuit Monday in the U.S. District

Court for the District of Columbia seeking to compel EPA to release a host of records about the activities of Administrator Scott Pruitt, including his schedule, list of meetings and records of communications with outside parties, your ME hosts report . The legal actions comes after the group filed Freedom of Information Act requests in June and the agency has not yet produced responsive records nor provided any indication of when it might be able to.

BISHOP SEEKS INVESTIGATION ON MONUMENT REPORT LEAK: As Democrats and outside groups condemned the leak of Zinke's recommendations on national monument (and threatened immediate legal action), House Natural Resources Chairman Rob Bishop said its release warranted investigation. "The fact this was leaked is troubling and merits an immediate and thorough investigation," Bishop said. "The President should have the time to evaluate the Secretary's review and develop actions without the encumbrance of incomplete information being leaked to the press."

CLINTON TO FEDERAL WORKERS: DON'T QUIT: Hillary Clinton urged federal employees to remain in their posts if possible, arguing their experience is needed more now than ever, POLITICO's Gabriel Debenedetti reports . "I don't want us to lose the decades - really, if you added it all up, the thousands of years - of experience in the EPA, in the State Department, in the Labor Department, in a lot of the places being targeted by the administration," Clinton said at an event at the Warner Theatre in Washington. "At some point they're going to need you, and the country is going to need you. And I hope you're still there."

VIRGIN ISLANDS NOT READY FOR HURRICANE: Utility restoration efforts are now on pause with Hurricane Maria bearing down, but the U.S. Virgin Islands lack adequate basic supplies like drinking water and electric generators, POLITICO's Sarah Ferris reports, citing internal FEMA briefing documents.

EXAMINING VEGETATION MANAGEMENT: The Senate Energy committee will hear testimony regarding "the vegetation management requirements for electricity assets located on federal lands." Witnesses include representatives from the Forest Service, BLM, the Wilderness Society, Arizona Public Service and a Montana electric cooperative. "I fully recognize that the fires burning in Montana today were all lightning sparked. But, for me, these fires serve as a vivid reminder and warning of what could occur as a result of long delays in permit approvals and inconsistent application of policies by federal land managers," Mark Hayden, Missoula Electric Cooperative general manager, will say.

STEYER HITS TRUMP OVER CLIMATE: Billionaire environmentalist Tom Steyer is criticizing Trump over his failure to act on climate in a full-page ad appearing today in *The New York Post,* one of the president's preferred papers. "The most dangerous part of a hurricane isn't the wind or the surge," the ad says. "It's a President who fails to act on climate change."

MAIL QUESTION! INTERIOR ORDER QUESTIONED: House Natural Resources Ranking Member Raul Grijalva sent a letter Monday seeking additional information on an Interior order setting page and time limits on National Environmental Policy Act reviews. Grijalva argues the agency failed to provide adequate evidence that NEPA analyses are indeed overly complex or that they have caused infrastructure project delays.

LEAKED EPA MEMO MANDATES ANTI-LEAK TRAINING: All federal agency employees this week will undergo a one-hour training course for employees on preventing leaks, according to a EPA memorandum slipped under the door to ME. "As federal government employees and federal contractors, we have a responsibility to properly protect this information from unauthorized disclosure," Donna J. Vizian, acting assistant administrator for EPA's Office of Administration and Resources Management, wrote. The agency didn't respond to request for comment.

RUFFALO SENDING CLIMATE PLEA: Actor Mark Ruffalo is emailing the Progressive Change Campaign Committee's 1 million members today, urging them to donate to Hurricane Irma relief and fight back against Pruitt. "As we help hurricane victims, we need to stay true to our progressive values," he'll say. "This means acknowledging climate change and remembering that marginalized communities who are least equipped to escape are hardest hit in crises like this."

SCIENTIST PAC ROLLS OUT ENDORSEMENTS: 314 Action, which backs scientific professionals seeking public office, announced endorsements of four House hopefuls Monday: Mai-Khanh Tran against Rep. Ed Royce; Joseph Kopser against House Science Chairman Lamar Smith; RD Huffstetler against Rep. Tom Garrett; and Kathie Allen, who's seeking to replace former Rep. Jason Chaffetz. The group also endorsed Ralph Northam's run for Virginia governor.

REPORT: ASSESSING RISKS TO RATEPAYERS: Oil Change International is out today with a report in partnership with Public Citizen and the Sierra Club arguing FERC offers little meaningful analysis of market need for new gas pipelines. "FERC fails ratepayers when it takes at face value pipeline company estimates of future gas demand while the momentum behind clean energy's disruption of fossil fuel markets is accelerating," Lorne Stockman, senior research analyst at Oil Change International, said in a statement.

REPORT: 15 PLACES LIKELY FOR ENERGY DEVELOPMENT: The Wilderness Society is out with a report today examining 15 places on public lands seen as likely targets for drilling, mining and other energy development by the Trump administration. "Some places are simply too wild to drill," Jamie Williams, president of The Wilderness Society, said in a statement. "The federal government must resist pressure from energy companies and other special interests to open up our last remaining wild places for development."

ZINKE'S 'HAVING A BALL': Interior Secretary Ryan Zinke invoked his well-known love of Teddy Roosevelt and said he was "having a ball" running his agency in a Monday interview with the Washington Examiner. "No one loves public land more," Zinke said. "Roosevelt, who've I've admired since I was a Boy Scout, had it right. He carved the path of putting under federal protection millions of acres and and beginning our experience of our public lands, unique to the U.S." The secretary added that Trump "has got a lot of Roosevelt in him, in that he's a man of action."

MOVER, SHAKER: Todd Snitchler has joined the American Petroleum Institute as group

director for the association's market development department. He previously chaired both the Public Utilities Commission and the Power Siting Board of Ohio.

SPOTTED: At the Capitol last night, STARZ screened "Age of Consequences," a new documentary examining how climate change is affecting U.S. national security and global stability. Sen. Sheldon Whitehouse delivered opening comments before the screening, which was followed by a panel discussion featuring David Titley, founding director of the U.S. Navy's Task Force on Climate Change and the film's executive producer Sophie Robinson. The documentary premiered on STARZ Monday.

Subject: BREAKING NEWS: Trump to seek $7.85 billion for initial Harvey recovery efforts

The federal government is burning through cash even faster than the White House estimated in responding to Hurricane Harvey, prompting the Trump administration to revamp its emergency funding request.

The White House is sending a formal plea to lawmakers this evening seeking $7.85 billion as a down payment in aid for areas ravaged by the superstorm - nearly $2 billion more than the administration estimated earlier in the day.

The White House is warning that the additional funding could be in jeopardy if Congress doesn't act quickly to raise the debt limit.

Improved Desalination Technology Seeks to Quench World's Thirst

Posted October 03, 2017, 7:15 A.M. ET

By Adam Allington

Desalination, long rebuffed as a costly energy guzzler with a heavy carbon footprint, could become a cheaper, cleaner, more energy-efficient solution to the global water crisis— provided initial cost barriers can be overcome.

The U.S. Department of Energy plans to allocate $15 million in funding for projects aimed at making solar desalination technologies more cost-effective, it announced recently. The agency said solar methods represent the best chance to recover freshwater from otherwise unusable water resources in remote areas.

The money will be divided among "seven to 10 projects that explore early-stage technologies with the prospect of significantly reducing the cost of desalination through solar thermal energy," according to the department's Office of Energy Efficiency and Renewable Energy.

"The biggest barrier facing desalination is really cost," said Avi Shultz, program manager for DOE's Concentrating Solar Power team. "Desalination is expensive technology, especially here in the U.S., where it has to compete with conventional water sources."

'Reverse Osmosis'

Despite the cost, several U.S. states—California in particular—already have invested billions of dollars in desalination technology. The current state-of-the art is a system of "reverse osmosis," in which massive pumps send pressurized seawater through a membrane filter.

The process requires huge amounts of electricity, meaning the treatment plants must be connected to a sufficiently sized power grid. That makes it unfeasible to develop outside of large urban areas.

If a method is developed to run the desalination process away from the grid infrastructure, "that

opens up the potential for a variety of other applications," Shultz said. That could, for instance, purifying the massive amounts of wastewater created by hydraulic fracturing or agriculture.

"We hope to develop systems that can be used without being connected to an electric grid, perhaps even making them small enough to be portable," he said. "In this context, we could see them being used in disaster relief situations."

That might include, for instance, a situation such as in Puerto Rico, which is facing a months-long rebuild of its electricity infrastructure in the wake of Hurricane Maria.

Tapped Out

The world is facing a growing water crisis, but the underlying facts are not new: We use more water than the ecological systems can replenish.

According to the United Nations, water scarcity affects more than 40 percent of the global population and is projected to rise.

"It is estimated that 783 million people do not have access to clean water and over 1.7 billion people are currently living in river basins where water use exceeds recharge," according to U.N. data.

The worst drought in over half a century is currently hitting parts of the Horn of Africa, where close to 17 million people need humanitarian aid due to drought, including 2.6 million in Kenya and 3.2 million in Somalia, according to the U.N.

Resource managers point out that confronting the double-threat posed by climate change and population growth means that water resources are becoming increasingly stressed. That has forced cities, farmers, and other users to tap formerly overlooked sources including seawater, brackish groundwater, and various forms of wastewater.

"Desalination of seawater is the only hope we can come up with for meeting human needs," Leon Awerbuch, of the International Desalination Association (IDA), said.

Reverse osmosis is currently the most efficient method of desalination in use today, requiring 3.5 kilowatt hours per 1,000 liters of water produced, Awerbuch said.

Globally, the growth in desalination capacity is now sufficient to produce 100 billion liters per day—enough for roughly 15 liters for every person in the world, per day, he said. "But that still accounts for only 1-2 percent of global use per day," he said.

The total number of desalination plants worldwide is 19,372 in 2017, up from 18,983 last year, according to the IDA.

Wherever the Sun Shines

Thermal desalination, by comparison, involves basically heating the saltwater and capturing the steam, leaving behind the salt and other impurities. The method has been used extensively in the Middle East, where large fossil-fuel power plants located on the coasts use the excess heat created to power thermal systems. It works, but it's not very portable, and relies heavily on fossil fuels as the source of energy.

Putting up the kind of solar infrastructure necessary to power a major desalination plant comes with a number of built-in challenges besides the technology and cost—such as finding sufficient land on densely-populated coastal areas. But given technological innovations, other applications apart from municipal drinking water may be the best first use for small-scale solar desalination.

“Can you build smaller scale plants cost effectively?” asked John Lienhard, a Massachusetts Institute of Technology professor of mechanical engineering. “We have pretty good evidence that we can do it with photovoltaics,” or electricity derived from solar panels.

Lienhard has researched technologies for desalination of seawater and brackish water. In some cases, he said, certain factors are more favorable for the adoption of solar-thermal desalination technology.

“Many arid parts of the world, that are interested in desalination, also tend to have a pretty big solar capacity,” he said.

Likewise, Lienhard said, the oil and gas industry is under increasing pressure to find a cost-effective method of water purification. In Oklahoma, re-injecting fracking water back in the earth has been linked to increases in seismic activity and earthquakes.

“There is lot of opportunity to think of small scale systems in places like” Oklahoma or other shale-oil states to “take advantage of the sun or wind to process wastewater on site,” he said. “You may have heard, West Texas is a very sunny place.”

Desalination Business Growth

Since water is a commodity, the cost for desalination is a major barrier, as along as cheaper sources of water can be found elsewhere. But many entrepreneurs point out that new technologies often are able to enter the market despite higher costs, as long as they offer compelling benefits.

Rooftop solar panels and electric vehicles are two examples of products that were both able to grow in market share, despite lower-priced alternatives. Researchers say the same scenario also may apply to solar desalination.

Aaron Mandell is co-founder and chairman of WaterFX, a California-based company which developed a concentrated solar thermal collector capable of producing 65,000 gallons of freshwater per day.

“Sixty-seven percent of the planet is expected to have severe water shortages by 2025,” Mandell said. “That’s only eight years away, so the need for cheaper desalination is as big as it gets.”

Mandell’s company has developed a $30-million modular system, a “solar still,” to recover tainted irrigation runoff in California’s Panoche Water and Drainage District.

Providing California with the water it needs to maintain its position as the largest producer of fruits and vegetables for domestic consumption, he said, will ultimately hinge on desalination technology.

“There are only two ways to solve this problem: water conservation and water generation. And we can’t conserve our way to economic growth. So generation, through affordable desalination, is absolutely critical,” Mandell said.

California's Projects

In California, Mandell said solar desalination is quickly approaching an inflection point where it could become less expensive than the marginal cost of developing new natural freshwater sources.

Two years ago, the city of Santa Barbara, Calif., brought a mothballed desalination system back online to alleviate the state's ongoing drought. Since then, other plants were added in San Diego, as well as one planned for Huntington Beach, Calif.

In 2016, however, substantial storms brought by El Nino gave California its best rainfall totals in five years. Gov. Jerry Brown (D) then declared the state's six-year drought over.

But the way forward with desalination, both solar and reverse osmosis, is not to think of them as a replacement for natural water sources, MIT's Lienhard said. He said that often what's needed "is something to provide a hedge to help meet demand during drought times, but one that doesn't take up massive resources to build."

A multipronged approach ultimately will be the final answer to cope with the impact of climate change and population growth on water resources, he said.

"Desalination is part of the answer," he said, "Being more efficient and finding new methods to reuse the water we do have" is also necessary.

"Addressing the water shortage is going to require all three," he said.

Trump's EPA Asks Drillers, Miners for Advice on Regulating Them

Posted October 03, 2017, 02:57 P.M. ET

By Jennifer A. Dlouhy

President Donald Trump's Environmental Protection Agency is asking miners, oil drillers and manufacturers to collaborate with the government on how to regulate their industries.

The EPA began its new "Smart Sectors" program with an inaugural meeting between agency staff and representatives of its regulated industries Oct. 3 and a promise to work together to "develop sensible approaches that better protect the environment and public health."

The program, modeled after a similar 2003 initiative, follows Trump's vow to end "job-killing regulations" and comes as the administration moves to revise Obama-era rules governing power plant emissions, methane leaks from oil wells, and mining pollution. The meeting convened amid criticism of the agency has taken a pro-business tilt at the expense of environmental issues.

"When we consider American business as a partner, as opposed to an adversary, we can achieve better environmental outcomes," EPA Administrator Scott Pruitt said in a news release. "When industries and regulators better understand each other, the economy, public, and the environment all benefit."

Pruitt said the new program, run by EPA's Office of Policy, "is designed to effectively engage business partners throughout the regulatory process." The program is set to collaborate with 13 specific sectors, including agriculture, autos, chemical manufacturing, mining, oil and utilities.

Although the EPA says additional sectors may be added over time, right now, the program provides no formal role for environmental advocates and public health experts.

'Creative Solutions' Sought

The EPA says the initiative's sector-based, collaborative approach will lower compliance costs, drive "creative solutions" to environmental challenges, better protect the Earth and increase regulatory certainty.

While the "Smart Sectors" program may be a formal effort for EPA to regularly consult with the industries it regulates, Pruitt is already leading that outreach.

Records of Pruitt's calendar from February through May, just disclosed to the liberal watchdog group American Oversight, show an array of meetings with lobbyists and corporate executives, including representatives of businesses that stand to benefit from the administration's regulatory rollback.

"These calendars show in black-and-white what we already suspected: that Administrator Pruitt has an open-door policy at the EPA for polluters, the fossil fuel industry and other special interests," said Austin Evers, executive director of American Oversight. "Instead of focusing on protecting our families and the environment from pollution, Pruitt has worked in secret to turn the EPA into an ally and tool of the corporations he's supposed to be regulating."

By contrast, Pruitt's predecessor under former President Barack Obama, Gina McCarthy, met more frequently with environmental groups, though she highlighted efforts to consult with electric utilities and oil companies over regulations governing power plants and drilling.

Although Pruitt's calendar is dominated by interactions with industry representatives, it includes at least one meeting with a public health group, the American Academy of Pediatrics, and at least two sessions with environmental activists.

"The truth is: EPA has met with over 25 consumer protection, public health and environmental groups," said agency spokesman Jahan Wilcox in an email.

EPA Opts for Pollution Trading Over Emissions Controls in Texas

Posted October 03, 2017, 02:31 P.M. ET

By Nushin Huq

Eight Texas coal-fired plants can join an air pollution trading program rather than installing expensive new sulfur dioxide controls, the EPA said as part of a rule aimed to improve visibility in the state.

Joining the trading program could prove to be a boon for utilities such as Luminant Generation that had said installing the required pollution controls would have been cost prohibitive and forced some of the power plants to close. The companies that own the eight affected coal-powered power plants include Luminant, Xcel Energy, and Dynegy.

Instead, the plants may participate in a newly created, yet-to-be-finalized, intrastate emissions trading program, the agency said in its final rule approving portions of Texas' plan to improve visibility in national parks and wilderness areas, including Big Bend National Park. The regulation, signed by EPA Administrator Scott Pruitt Sept. 29, was released by environmental advocates Oct. 3.

Many coal plants across the country already have updated their pollution controls, and the new trading program will not ensure a decrease in emissions, Elena Saxonhouse, senior attorney for the Sierra Club, told Bloomberg BNA. She expects that the environmental group will challenge the final rule in court.

The Sierra Club has received funding from Bloomberg Philanthropies, the charitable organization founded by Michael Bloomberg, founder of Bloomberg L.P. Bloomberg BNA is an affiliate of Bloomberg L.P.

Luminant declined to comment.

New York City Climate Plan Calls for Efficient Buildings, Electric Cars

Posted October 03, 2017, 02:26 P.M. ET

By John Herzfeld

New building standards and more electric vehicle fast chargers are part of New York City's new three-year plan to meet Paris Agreement greenhouse gas reductions—even if the country as a whole does not.

Mayor Bill de Blasio (D) issued the plan Oct. 3, calling it "the first Paris Agreement-compliant plan from any city in the world."

Covering energy, transportation, buildings, and solid waste, the plan aligns with the international agreement's goal of pursuing policies to help limit warming to a 1.5 degree Celsius increase (2.7 degrees Fahrenheit) this century.

For new buildings, the city would work to set advanced energy codes in 2019, with energy-use targets growing stricter with each subsequent code cycle. In its procurement and purchasing, the city would aim to use 100 percent renewable electricity for municipal operations as soon as a sufficient supply becomes available.

The plan follows an executive order de Blasio issued in June committing the city to the Paris goals, in response to President Donald Trump's announcement that the U.S. would pull out of the international climate agreement. Advocates for action on climate change have turned to states, cities, and private companies and organizations to take leadership roles in the aftermath of Trump's withdrawal.

'Existential Threat to a Coastal City'

"In the Trump era, cities have to lead the way when it comes to fighting climate change," de Blasio said in a statement. "Hotter summers and powerful storms made worse by climate change are an existential threat to a coastal city like ours, which is why we need to act now."

Other components of the city's climate plan include a rollout of citywide single-stream recycling by 2020, which would do away with sorting recyclables from other trash. Composting of organic trash would be made available citywide by 2018, the mayor said, with some of the waste possibly destined for wastewater treatment plants.

The plan says increased recycling, reduced waste and removing organics from the waste stream will reduce truck traffic and associated emissions from waste collection.

The previously announced electrical vehicle expansion is meant to foster a goal of having those vehicles account for 20 percent of new car registrations by 2025. The city also plans to boost its infrastructure support for bicycles.

New Council Members

De Blasio rounded up statements of support from city council members and other elected officials, but it remains to be seen how the components of his plan requiring legislation will fare with a reconstituted council. Many term-limited council members, including Speaker Melissa Mark-Viverito (D), a de Blasio ally, are due to be replaced in the November election.

New York has had a long-term sustainability plan including carbon reduction goals since 2007, but de Blasio stepped up the city's targets soon after taking office in 2014 to call for an 80 percent reduction in greenhouse gases from 2005 levels by 2050.

Trump Isn't Acting on Verbal Attacks Against Wind, Dong Says

Posted October 03, 2017, 7:49 A.M. ET

By Peter Levring

President Donald Trump's threats against wind energy have so far proven empty, according to an industry giant that expects to grow in the U.S.

Thomas Thune Andersen, the chairman of Dong Energy A/S, says the world's biggest offshore wind developer hasn't seen any actions that have followed Trump's verbal attacks. In fact, he says there are signs that American commitment to the industry might even be growing.

"One thing is Trump getting up and commenting on this," Thune Andersen said in an Oct. 2 interview in Copenhagen. "But he hasn't acted on it. And many of the decisions are made at a state level. They're still pushing this agenda and they may even have accelerated it as part of the political game."

Trump, who has blamed wind turbines for killing bald eagles, has as a businessman unsuccessfully tried to stop offshore parks that spoil the view from his golf course in Scotland. As president, he has dragged the U.S. out of the Paris climate accord, and promoted coal in favor of wind energy, promising to bring back jobs in the process.

But before Trump took office in January, the U.S. congress extended a production tax credit, or PTC, that will give tax breaks to wind producers until 2020. Shares in Dong have risen 36 percent this year, more than four times the gain in the Stoxx Europe 600 index over the same period.

Dong, which is based in Denmark, this year sold its oil and gas business in order to focus entirely on

renewable energy. The company is changing its name —an acronym of Danish Oil and Natural Gas—to Orsted to mark the shift. (H.C. Orsted was a 19th century Danish physicist who discovered electromagnetism.)

Dong is focused on the east coast of the U.S., where it's using existing contacts to achieve growth, according to the chairman.

"It's very important we don't spread our focus too much," Thune Andersen said. "But although the U.S. east coast is a vast area, it's still very much the same people we're talking to."

The company sits on about one-quarter of the global market, "but the market is growing tremendously fast," he said. "We still have an ambition to remain the biggest player, but because the market's been successful, competition is growing."

These Suburbanites May Have No Fracking Choice

Posted October 03, 2017, 8:59 A.M. ET

By Catherine Traywick

When Bill Young peers out the window of his $700,000 home in Broomfield, Colo., he drinks in a panoramic view of the Rocky Mountains. Starting next year, he may also glimpse one of the 99 drilling rigs that Extraction Oil & Gas Inc. wants to use to get at the oil beneath his home.

There's little that Young and his neighbors can do about the horizontal drilling. Residents of the Wildgrass neighborhood own their patches of paradise, but they don't control what's under them. An obscure Colorado law allows whole neighborhoods to be forced into leasing the minerals beneath their properties as long as one person in the area consents. The practice, called forced pooling, has been instrumental in developing oil and gas resources in Denver's rapidly growing suburbs. It's law in other states, too, but Colorado's is the most favorable to drilling.

Now fracking is coming to an upscale suburb, and the prospect of the Wildgrass homeowners being made by state law to do something they don't want to do has turned many of them into lawyered-up resisters. "It floors me that a private entity could take my property," says Young, an information security director.

Many states require 51 percent of owners in a drilling area to consent before the others have to join. Pennsylvania doesn't allow forced pooling at all in the Marcellus, one of the most prolific shale gas regions in the country. Texas, the center of the nation's oil production, has strict limits on the practice. Despite its founding cowboy ethos of rugged individualism, Colorado has one of the lowest thresholds. "There's a tension in oil and gas law between allowing private property owners to develop their mineral estates on their own and the state's desire to ensure that ultimate recovery of oil and gas is maximized," says Bret Wells, a law professor at the University of Houston.

The rise of horizontal drilling and hydraulic fracturing over the past decade has ushered in a modest oil boom on Colorado's Front Range by enabling companies to wring crude more cheaply from the stubborn shale that runs beneath Denver's northern suburbs. From 2010 to 2015, Colorado's crude output almost quadrupled. This year the state is pumping more than 300,000 barrels a day, most of it from the Wattenberg oil field beneath Wildgrass and beyond.

Colorado's population is booming, too. As Denver's suburbs bloom northward into oil and gas territory—Wildgrass is about 20 miles north of Denver, not far from Boulder—housing developments are erupting where once there were only drilling rigs and farmland. And because horizontal drilling can reach as far as 2 miles in all directions from a well, companies need underground access to more land to maximize production from each site. The Colorado Oil & Gas Conservation Commission issues hundreds of pooling orders every year. "It's an entirely new issue," says David Neslin, former director of the commission, now an attorney at Davis Graham & Stubbs in Denver. "That's creating some understandable friction with local governments and local communities."

Denver-based Extraction Oil & Gas is at the epicenter of that friction. Almost all its acreage is in populated areas. So the company, like others in the region, has put a lot of energy—and cash—into making its operations more palatable to suburbanites who fear the prospect of a drilling rig sprouting up within sight of their kiddie pools. Extraction almost exclusively uses electric drills, which are quieter than diesel-powered, and a new generation of hydraulic fracturing equipment that cuts noise. "It's incumbent upon us to learn to live with these communities," says Extraction spokesman Brian Cain. "Where we can go the extra mile to minimize impacts, we wish to do so."

The company's latest project involves drilling 99 horizontal wells in Broomfield. That means leasing mineral rights from Wildgrass residents. Letters went out to some of them last year offering a 15 percent royalty and a $500 signing bonus. Some signed, others demurred, and still others organized a campaign aimed at blocking the project. Extraction hasn't applied for a forced pooling order, but Young and his neighbors have come to believe it's inevitable.

The suburb's agitation prompted the city to create a special task force to evaluate Extraction's proposal. The company responded by taking members of the task force on a tour of oil and gas country. It wanted to show how its operations are less disruptive than traditional drill sites.

Ultimately, the company agreed to more stringent environmental standards than the state requires. It will move some wells 1,300 feet from neighborhoods, almost three times farther than the law mandates. It will reduce the number of wells per site, monitor air emissions as well as water and soil quality, and build pipelines to transport oil immediately off-site instead of storing it in the city. "I can see Broomfield turning out to be a new model for how large-scale development gets done," says Matt Lepore, director of the state commission, which will rule on Extraction's applications for siting the wells this month.

Such concessions have smoothed the path for development in many communities. But for some Wildgrass residents, any leasing is unacceptable. They say they fear accidents, such as the April pipeline explosion that killed two people and destroyed a home in Firestone, 20 miles away. Some simply find the terms of the initial lease offer laughable.

"The money is so negligible," says Elizabeth Lario, a health coach who's lived in Wildgrass since 2005. And then there are property values: Homes in Wildgrass range from $500,000 to more than $1 million. "The royalties won't offset the drop in property value," says Stephen Uhlhorn, an engineer who's lived in Wildgrass for four years. Oil development "is now hitting affluent neighborhoods where people have assets and livelihoods that exceed the value of any royalty they're offered."

The bedrock of Colorado's oil and gas policy is a 1951 law that says responsible fossil fuel development is in the public interest. The state, the law says, must protect the public from "waste"—industry parlance for oil that's left in the ground. While Colorado has some of the strictest environmental regulations of any oil-producing state, it gives companies latitude in choosing where

to drill. The Colorado Supreme Court has repeatedly held that the state's interest in developing mineral resources preempts any local law that would curb drilling.

Efforts to change the statute have fizzled. State Representative Mike Foote, a Democrat whose district is adjacent to Broomfield's, introduced a bill earlier this year to raise the pooling threshold to 51 percent. It passed the House by a slim margin but died in a Senate committee in a party-line vote, with Republicans opposed.

"The oil and gas industry pretty much controls the capital, particularly in the Senate," Foote says. "Operators can do whatever they want." Lepore, the head of the state oil commission, concedes the pooling threshold is low compared with other states. "I have no philosophical objection to a 51 percent requirement," he says. "There are intelligent changes that could be made to the forced pooling law."

Young, the Wildgrass resident, received a lease offer last year. Since then he's been working with a lawyer to consider his options, and so far he doesn't like them. "You couldn't put a Walmart where they're putting these wells—no one would approve that zoning," he says. "But for some reason, the industry is completely exempt from everything."

Left Behind by the Shale Boom, Oklahoma Oilmen Fight to Survive

Posted October 03, 2017, 8:00 A.M. ET

By Meenal Vamburkar

Not every oilman is gaining from the U.S. shale boom. Just ask Joe Warren.

Warren, a partner at Brown & Borelli Inc., is caught in a historical hiccup, of sorts. More than a third of the 65 to 70 old-line vertical wells his company operates in Oklahoma are negatively affected by horizontal drilling, he says. The new-style wells can run sideways for miles in a shale play, carrying sand, water and chemicals that can leak into older wells, gumming up the works.

The cost: For Warren's company, it's about $250,000 a year in lost production and $150,000 in added operating expenses, he said. It's an issue spurring rising anxiety among small drillers. Already, several lawsuits are in the works while a group representing old-guard drillers is gathering data, aiming to force legislation guaranteeing compensation when damages occur.

"We should not be sacrificing our property to these guys for horizontal development," Warren said by telephone. "We don't want to stop horizontal development -- we just want to make the rules fair."

Some of Warren's wells saw a slight drop in output while others, hit multiple times, weren't salvageable, he said. Warren hasn't been involved in litigation himself but expects more legal action to occur in the region moving forward, even though cases can be costly and take several years to resolve.

51 Wells

Already, a study by the Oklahoma Energy Producers Alliance, the group representing conventional drillers, has found 451 vertical wells in one county that were negatively affected by horizontal

drilling, 80 percent of which were located outside of horizontal well unit boundaries.

The damage can add costs to replace equipment, clean out water or sand, or address environmental damage, according to Mike Cantrell, a board co-chair for the group. It can also kill a well outright, he said.

“I’m afraid when we look into further, we’re going to find out it’s much worse,” he said.

Horizontal drilling has allowed producers to tap into shale reserves more economically. When explorers tap shale, they are actually drilling into the rocks where the oil feeding those old-line vertical wells was created. Geologists refer to it as “source rock.” The technique allows drilling to continue laterally for up to two miles, replacing the need for multiple vertical wells. Kingfisher County, where Warren’s well are largely located, is part of the so-called Scoop and Stack region, where drilling has increased since the oil slump.

Oil rigs in that area’s Cana Woodford basin have climbed to 62 from 36, just since the start of the year.

Many of the vertical well most affected are so-called stripper wells, which produce a daily average of 15 barrels of oil or less. Though they may be inconsequential to large companies, for small operators, it’s a matter of their livelihood, Cantrell said.

In August, a district court ordered Devon Energy Corp. to pay $220,000 after two operators alleged negligence and “subsurface trespass” that led to two damaged wells. Devon inherited the wells in question from Felix Energy LLC, according to the company.

‘Safe and Reponsible’

“Devon always seeks to conduct its operations in a safe and responsible manner, with respect for the rights of other well operators,” spokesman John Porretto said in an emailed statement. “When evidence shows that Devon’s operations may have damaged an existing vertical well, Devon is proactive in attempting to negotiate fair compensation for the affected vertical well owner.“

The company also noted, “the jury awarded the vertical well owner an amount that was both significantly lower than what was demanded at trial and less than what Devon had previously offered the well owner as compensation to settle the claim.“

The case is indicative of a broader problem, said Matt Skinner, public information officer at the Oklahoma Corporation Commission, a regulatory body. The agency tried and failed to pass a rule to require operators to report incidents even if they didn’t cause environmental damage, he said, but couldn’t get support from bigger players in the industry.

The main obstacle has been a lack of data, according to Skinner. So now, the commission is focusing on encouraging vertical well operators to report problems. They’ve confirmed 20 incidents and have at least 55 more pending, Skinner said.

“We know it’s happening, we know it’s an issue,” he said. “We have every reason to think there are more incidents out there than we know of.“

Cantrell’s organization, meanwhile, is pushing to slow down further development of horizontal drilling until better data is gathered on their effect on existing wells.

"We need to slow this process down until we can get the regulatory regime to keep up with it," he said. "We've applied a vertical regulatory regime to a horizontal world."

Costly Coal Ash Cleanup Order at Gallatin Spurs TVA Appeal

Posted October 03, 2017, 02:18 P.M. ET

By Andrew M. Ballard

The estimated $2 billion it could cost the Tennessee Valley Authority to dig up and move coal ash from its Gallatin, Tenn., site, as required by a federal court, has prompted the power authority to challenge a court order.

The TVA asked the U.S. Court of Appeals for the Sixth Circuit in Cincinnati to review an Aug. 4 order by Waverly D. Crenshaw Jr., chief judge of the U.S. District Court for the Middle District of Tennessee. Responding to a lawsuit filed by conservation groups in April 2015 alleging violations of the Clean Water act from the coal plant, the judge said that, although the "burden of closure by removal may be great, it is the only resolution" (Tenn. Clean Water Network v. Tenn. Valley Auth., M.D. Tenn., No. 3:15-cv-00424, notice of appeal 10/2/17).

Complying with the August 2017 order to remove the ash and dispose of it in a lined landfill "is a significant investment in time and resources on behalf of consumers of TVA power," Scott Brooks, a spokesman for the power authority, told Bloomberg BNA Oct. 3. "We feel it is important for TVA to exercise our legal option to appeal the ruling."

If TVA is forced to move the ash to a storage area offsite, it will cost about $2 billion, according to Brooks. Another potential option—lined storage at another onsite location—would cost some $550 million, he said.

The ultimate approach requires court approval and either option would take about 24 years to complete, Brooks said.

TVA Will Comply

Judge Crenshaw said the excavation is necessary because he said the storage ponds onsite were unlined and leaking and shouldn't have been located in "karst terrain immediately adjacent to a river."

Brooks said overturning Crenshaw's decision would allow the power authority to consider other approaches to comply with federal requirements including "closure in place" or removal.

"We have not studied a preference at Gallatin because of the pending litigation," he said.

While the appeal is pending, the power authority will continue to comply with the district court's order, Brooks told Bloomberg BNA.

"We are beginning an extensive site selection process which will look at locations both onsite and offsite as possible storage locations, pending approval from the court," Brooks said.

Federal regulations require some type of ash management at Gallatin and "capping and closure in place is our preferred option at our other coal sites," he added.

Cost, Time Estimates Questioned

Beth Alexander, an attorney with the Southern Environmental Law Center in Nashville who is representing conservation groups in the matter, questioned TVA's offsite storage cost and timeline estimates.

"Utilities in other states are accomplishing that for much less money and a much shorter time frame," Alexander told Bloomberg BNA.

TVA should "do the right thing" and excavate the coal ash for disposal in a lined landfill as leaks at Gallatin's storage ponds have and continue to cause water pollution, Alexander said.

Global Summit Warns Against Mercury Use in Small-Scale Mining

Posted October 03, 2017, 02:35 P.M. ET

By Bryce Baschuk

The first global meeting of countries devoted to stamping out mercury in the environment ended with incremental progress, but left unanswered questions about how to tackle one of the largest contributors to global mercury poisoning—artisanal and small-scale gold mining.

The conference of the parties to the Minamata Convention on Mercury, the world's first legally binding global treaty aimed at controlling mercury emissions in the environment, produced several new guidelines last week in Geneva, Switzerland, at a meeting of representatives from 165 countries.

United Nations officials said the conference brought greater attention to the difficulty of regulating a global industry that supports 15 million miners in poor and underdeveloped nations.

"It was really revealing to see the challenges that countries are having on the ground to handle the problem with respect to artisanal gold mining," said Rolph Payot, executive secretary of the joint secretariat of the Basel, Rotterdam, and Stockholm Conventions. "I think it provided more clarity on what priorities and which areas we need to work together to address the issue," and that will be taken up at a later meeting in 2018.

But the first annual conference made limited progress on implementing the agreement. And rather than imposing new restrictions on mercury use in artisanal gold mining, delegates argued over the procedural question of where the secretariat of the convention should be located.

Small-Scale Gold Mining

Miners in poor countries often use mercury to extract gold from ore in a process that can create toxic mercury vapors that are inhaled or leach into water sources.

Mercury can have toxic effects on the nervous, digestive, and immune systems, including the brain, according to the World Health Organization. WHO considers mercury one of the top 10 chemicals or

groups of chemicals of major public health concern.

Minamata parties agreed that any countries that have a "more than insignificant" artisanal and small-scale gold mining industry should notify the secretariat of the convention and develop a national action plan. The plan is to include a snapshot of the situation on the use of mercury in gold mining, and a plan for how to address the problem, according to a spokesperson from the United Nations Environment Program.

Switzerland to Host

Minamata parties agreed to locate the secretariat of the convention in Geneva following a robust debate over continuing Swiss exports of recycled mercury.

Switzerland is not a member of the European Union's mercury export ban and the alpine nation accepted imports of mercury in 2011 from the waste management company DELA GmbH in Germany, according to a recent U.N. report.

"There are Swiss industries that are currently exporting mercury and it seems to be getting more visibility for the mere fact that the Swiss would like to host the secretariat," said Bjorn Beeler, a general manager at the environmental advocacy group IPEN in San Francisco.

Doris Leuthard, president of the Swiss Confederation, said the country will soon ensure that all its mercury will be responsibly stored and exported "for only specific time-limited uses as required by the convention."

"We are strongly encouraging the Swiss government to find solutions to sourcing gold from illegal mining where mercury is used," Erik Solheim, executive director of the U.N. Environment Program, told Bloomberg BNA. "That is a critical issue."

Switzerland agreed to support the Minamata Convention with an annual contribution of 1 million Swiss francs ($1,026,000) that it said would help implement the treaty and host the secretariat.

Energy Agency Grid Resiliency Rule Gets Three-Week Comment Deadline

Posted October 03, 2017, 10:56 A.M. ET

By Rebecca Kern

Public comments are being taken for three weeks on an Energy Department proposal directing the Federal Energy Regulatory Commission to help coal and nuclear plants in the wholesale energy markets.

FERC said the initial public comments on the proposal are due Oct. 23, according to a Oct. 2 notice.

Separately, 11 energy industry groups, including renewables, oil and natural gas associations, filed a joint motion to FERC Oct. 2 urging the agency to deny the request for an interim final rule, initiate a technical conference, and allow for at least a 90-day comment period for initial comments in this proceeding.

On Sept. 29, the Energy Department invoked rarely used authority under Section 403 of the Department of Energy Organization Act to direct FERC to issue a final rule within 60 days that

would allow generators with a 90-day supply of fuel on site—which would include coal and nuclear facilities—to recover their operating costs at "a fair rate of return."

The proposed rule is the first concrete outcome from the Energy Department grid reliability study issued in August, which said that wholesale energy markets need to do more to compensate plants with on-site fuel supply for their ability to operate around-the-clock and in extreme weather.

Fortum's Bid for Uniper Stake Seen Spurred by Carbon Reform

Posted October 03, 2017, 10:42 A.M. ET

By Mathew Carr

Fortum Oyj's bid for a stake in German utility Uniper SE is partly a bet that the European Union will finally succeed in fixing its environmental policy.

A successful repair of the world's biggest climate trading program would probably see prices surge and boost the value of Uniper's power plants, according to Kari Kankaanpaa, Fortum's senior manager of climate affairs. The Espoo, Finland-based utility agrees with Barclays Plc estimates that a tripling of European emission allowances would add 18 percent, or 965 million euros ($1.1 billion), to the value of Uniper's generation assets by 2020, he said Monday.

Fortum is continuing to press lawmakers to improve their attempt to deal with a glut of EU emission allowances that's suppressed market prices for most of the past decade. One way to do so more quickly would be to require countries with overlapping policies that cut demand for permits to agree on reducing the volume they sell in daily auctions, Kankaanpaa said.

"It could rectify the impact of these other policies," such as renewable-energy subsidies and energy-efficiency rules, he said in an interview at the Carbon Forward conference in London. "It could establish the market balance sooner than otherwise would have happened."

By buying EON SE's 47 percent Uniper stake, Fortum is positioning itself as a utility that'll provide supply even when the sun doesn't shine and the wind has stopped. Should carbon prices surge, the increased value of the utility's cleaner hydro and natural gas plants would more than offset declines in Uniper's coal assets, Mark Lewis, an analyst in Paris at Barclays, said in a Sept. 19 note.

Under a scenario where EU carbon permit prices almost triple to 20 euros a metric ton, the value of Uniper's assets would jump to 6.5 billion euros, according to Lewis. Higher carbon contracts lift traded power prices because they are a cost of fossil-fuel generation.

Barclays is helping to finance Fortum's purchase of Uniper. Uniper shares rose 1.5 percent Monday to 23.54 euros, the highest since its initial public offering in September 2016. Fortum shares rose 0.4 percent to 17.12 euros on Tuesday at 5:04 p.m. in Helsinki, after settling Monday at their highest since July 2015.

For every 1-euro advance in the EU carbon price, Fortum's value increases about 50 euro cents a share, according to Peter Crampton, an analyst at Macquarie Group Ltd. in London. There's the possibility of a "significant rise in European carbon prices," and Fortum shares may advance should lawmakers seal a deal on Oct. 12 to remove a glut in the emissions market, Crampton said Monday in an emailed research note.

Getting the carbon price to 20 euros isn't certain. Renewable-energy incentives and efficiency policies have already hurt the carbon market and will probably reduce demand by another 1 billion tons in the 10 years through 2030, Kankaanpaa said. That's more than half of a full year's supply.

Fortum's latest push for higher carbon prices started before it embarked on the Uniper deal, Kankaanpaa said. The drive for EON's stake is linked to the direction of climate policy "to some extent," he said.

Peru's Dream of Usurping Copper King Chile Faces Roadblocks

Posted October 03, 2017, 10:10 A.M. ET

By Laura Millan Lombrana

The biggest obstacle to Peru's dream of some day supplanting Chile as the world's biggest copper producer may be Peru itself.

Despite higher-grade ores and lower mining costs than neighboring Chile, the Peruvian government says the country's potential in copper is being restricted by too much bureaucracy. Mine owners also complain about weak infrastructure and strong opposition to projects from people who fear increased environmental risks and disruption to their communities.

President Pedro Pablo Kuczynski, who was elected last year, is pushing expansion of the mining industry as a key to stimulating growth and reducing poverty. His government wants to exploit ore reserves that are the third-largest in the world. While copper output has been rising in the past two years, it remains well below the amount produced in Chile.

"We are not saying it will be easy," Peru Mines and Energy Minister Cayetana Aljovin said in an interview, referring to matching Chile's output. "We can reach those levels if Peru keeps sending positive signals. We need to create the necessary conditions for mining to grow in our country so the government can invest in basic services, healthcare, education and infrastructure."

Peru already is the second-largest producer in the world. Last year it boosted output by 35 percent, driven by increases at the Las Bambas mine, run by Chinese-owned MMG Ltd., and by gains at Phoenix-based Freeport-McMoRan Inc.'s Cerro Verde, the largest copper mine in the Andean country. Based on data from the first eight months of 2017, Peru already has surpassed Chile as the largest supplier of mined copper to China, the world's No. 1 metals buyer.

The Peruvian government sees more growth ahead, with $51 billion of new projects slated to start in the next few years as demand from China grows and commodities prices recover. Copper on the London Metal Exchange has rallied 38 percent since the end of 2015, halting a three-year slide, though prices still remain well below their 2011 peak.

Peru's production last year of 2.3 million tons of refined copper lagged behind its southern neighbor Chile, which supplied 5.5 million tons. Plus Chile remains an "attractive" place to invest, said Erik Heimlich, a copper analyst at CRU Group.

But if Peru can overcome obstacles such as local antipathy to mining, its growth possibilities are huge. "Peru's potential in terms of resources is unquestionable," Heimlich said last week by phone.

Three-Pronged Plan

To get there, Minister Aljovin says the country has a three-pronged plan:

• Reduce regulations and the number of permits required to mine

• Create a single government department where companies can request all required mining permits at once

• Create a fund the government can use to invest in social programs in areas that may be affected by mining

At the moment, mining companies operating in Peru need to abide by 265 different rules and regulations, compared with 12 in 2001, the minister said. Of these, only 10 percent are under the Mines and Energy Ministry, with the rest under the aegis of a host of other governmental organizations, according to Luis Marchese, who runs the local assets held by Anglo American Plc and serves as head of Peru's mining association.

"This has an impact on the country's competitiveness and affects issues such as informal miners," Marchese said. "How are you going to bring them into the system if there's such a legal tangle?"

General Zeal

The bigger challenge, says Luis del Carpio, a professor at Pontificia Universidad Catolica del Peru's business school, will be getting the general populace to join in the government's zeal for mining.

"Bureaucracy doesn't stop projects," Del Carpio said by phone. "Community relations remain our Achilles' heel. That's the main reason why many projects are on the waiting list."

Peruvian citizens living close to mines tend to oppose them, while citizens living far away tend to favor them, according to research by the International Council on Mining and Metals.

"It's exactly the other way around in other mining countries," Tom Butler, ICMM's chief executive officer, said at the recent Perumin mining conference in Arequipa, Peru. "A high proportion of Peruvians reject mining, and the situation around the issue remains highly polarized because people living close to the operations don't feel empowered."

Road Blocks

MMG's Las Bambas was the latest mining operation to face disruptions because of community protests. The company has agreements with villages around the mine, but some communities along the road oppose the traffic of heavy trucks that transport copper concentrate to Pacific ports. Five people have died in protests since 2015 and supply has been interrupted three times in the past year.

"We have been engaging with each of those communities and we are involved with the government," Suresh Vadnagra, head of MMG's South American operations, said in an interview. "We have made some real advances, but this is a long-term game."

Infrastructure is a challenge in a country where road and rail links can be antiquated and some of the largest deposits are in the Andes, several thousands of meters above sea level and hundreds of kilometers from the sea. Despite government commitments to invest in remote regions, no projects have been made public yet.

"We are not seeing great changes in infrastructure investment that can lead us to think the situation will be different in five years' time," Del Carpio said. "Mining companies are developing their own infrastructure, but this means they need to invest more and projects become less competitive."

Still, the example of Las Bambas provides hope. The only copper mine to start operating in Latin America last year, it became Peru's second-largest mine within its first year of operation. MMG compared the deposit's potential with the world's largest copper mine, BHP Billiton Ltd.'s Escondida in Chile.

"To MMG, Peru is a strategic destination," Vadnagra said. "Las Bambas is a platform for growth for the company, and we want to use that to grow more locally and at a regional level."

Subject: Morning Energy: Desperately seeking Zinke's attention — Wyoming v. West Virginia in coal feud — More time for comments on WOTUS repeal

By Anthony Adragna | 08/17/2017 05:40 AM EDT

With help from Alex Guillén and Adam Behsudi

EVERYONE WANTS ZINKE'S EAR: It may be August recess for much of Washington, but Interior Secretary Ryan Zinke has a bunch of deadlines coming up in the next couple of weeks and lots of people looking to grab his attention. Today's the last day for public comments on BOEM's push to write a new five-year offshore drilling plan (submit yours here). Nearly 51,000 comments have already poured in as President Donald Trump's administration is expected to begin the two-to-three year process of writing a plan that would open parts of the Gulf of Mexico and Atlantic Ocean as well as Alaska's Chukchi Sea, Beaufort Sea and Cook Inlet areas to drilling opportunities.

A group of 69 House Democrats, led by Rep. Jared Huffman, urged Zinke in a letter Wednesday not to expand drilling opportunities in the Arctic and Atlantic saying "the risks are simply too high, and the consequences too severe." But more than 110 other House lawmakers, led by Natural Resources Chairman Rob Bishop, said in their own letter it was "imperative" to open as much of the Outer Continental Shelf as possible "to ensure opportunities are not missed" to expand U.S. energy independence. Meanwhile, the administration of Trump ally Gov. Chris Christie voiced opposition to including any of the area off the coast of New Jersey in the new plan in its own comments. And a coalition of environmental organizations warned opening Atlantic waters to drilling posed "a direct threat to the fragile and unique ecosystems of the southeast coast and to the millions of people whose livelihoods depend on our clean coastal resources."

Separately, Zinke is nearing the end of his national monument review, and more than 400 executives from the outdoor apparel, footwear and equipment sectors are urging him not to make any changes to nearly two dozen designations under the Antiquities Act currently being examined. "As business leaders, we simply ask that your final report remain true to the Teddy Roosevelt values we share with you — to maintain the national treasures Presidents of both parties have protected, to defend the integrity of the monument-making process and to assure these majestic places remain accessible for all Americans, sustaining healthy communities and a healthy economy," they wrote. Among those signing the letter are Adidas Outdoors, Burton, L.L. Bean, Orvis, The North Face, REI and YETI.

Monument backers got some good news Wednesday when Zinke announced he would recommend no changes to California's existing Sand to Snow National Monument. "The land of Sand to Snow National Monument is some of the most diverse terrain in the West, and the monument is home to incredible geographic, biologic, and archaeological history of our nation," he said in a statement. Former President Barack Obama created it back in February 2016.

MORE TIME GIVEN ON WOTUS REPEAL: Interested parties now have until Sept. 27 to comment on the EPA's efforts to repeal the previous administration's Waters of the U.S. regulation after the agency extended the public comment period by a month, Pro's Annie Snider reports . Administrator Scott Pruitt wants to author his own version of the rule defining which marshes, bogs and creeks are subject to regulation under the Clean Water Act, though backers of the Obama rule have criticized the length of time the Trump administration gave for public comment.

Speaking of WOTUS, Pruitt appeared in a video released Wednesday for the National Cattlemen's Beef Association urging farmers and ranchers to make sure they formally submitted comments before the deadline. "This record being made is so important because it helps us make informed decisions," Pruitt said, being careful not to specify what the comment should sound like.

IT'S THURSDAY! I'm your host Anthony Adragna, and Faegre Baker Daniels' Andrew Wheeler was first up to identify Wednesday as the 40th anniversary of Elvis' death. For today: What's the only country located in all four hemispheres? Send your tips, energy gossip and comments to aadragna@politico.com, or follow us on Twitter @AnthonyAdragna, @Morning_Energy, and @POLITICOPro.

WELCOME TO THE GOP, GOV. JUSTICE! Wyoming's all-Republican congressional delegation is decidedly not a fan of West Virginia Gov. Jim Justice's proposed $15-per-ton subsidy for utilities to buy coal from Appalachian mines instead of those in Western states. "We strongly urge you not to take actions, such as adopting the subsidy policy proposed by Governor Justice, that would repeat the mistakes of the last eight years," Sens. John Barrasso and Mike Enzi, as well as Rep. Liz Cheney, wrote in a letter to Trump. "Now is the time to remove distortions in our energy markets. We should not be imposing new ones." Justice's proposal would have to go through Congress, where Barrasso chairs the Environment and Public Works Committee, and Enzi holds the Budget Committee gavel, and where the Freedom Caucus, which tends to oppose any overt energy subsidies, holds substantial sway in the House.

GREENS CONDEMN CHARLOTTESVILLE RALLY: A coalition of more than 110 environmental and public interest groups issued a statement Wednesday condemning the white nationalist rally and associated violence from last weekend in Charlottesville, Va. "President Trump and all political leaders, no matter their party affiliation, have an obligation to stand up against such hate groups immediately and unequivocally," they said. "Their voices and words — and lack thereof — matter." Among those signing the statement are Citizens Climate Lobby, Earthjustice, Natural Resources Defense Council, Sierra Club and Physicians for Social Responsibility.

HEITKAMP LANDS A CHALLENGER: Wealthy potato farmer and Republican state Sen. Tom Campbell threw his hat into the ring to face Democratic Sen. Heidi Heitkamp Wednesday, Campaign Pro's Kevin Robillard reports. He's given enough personal money to launch an advertising blitz , which heavily focuses on his potato farming business that employs hundreds of people in the state. His first ad includes this pretty witty line: "It's time for a leader who knows how to grow something besides government."

ADVISER NO MORE: A spokesman said Wednesday Daniel Yergin, vice chairman of consulting agency IHS Markit, "fully supports" the decision to disband Trump's Strategic and Policy Forum that he sat on, Pro's Ben Lefebvre reports. Yergin, who advises many of the country's largest energy companies and helps organize the industry's largest annual conference, sat on the White House forum with the heads of GM, JPMorgan Chase and other major companies. Dow Chemical's Andrew Liveris also voiced support for the decision to disband the Manufacturing Council. "In discussions I had with the White House earlier today, I indicated that in the current environment it was no longer possible to conduct productive discussions under the auspices of the Initiative," he said in a statement. "And so, as proud as I am of the efforts we were taking on behalf of the American worker, disbanding the Manufacturing Jobs Initiative was the right decision." More from POLITICO's Dan Diamond on the corporate revolt here.

Meanwhile, the American Technology Council, a government committee with advisers from the tech industry, will keep going, Pro Tech's Steven Overly and Nancy Scola report, citing a White House official. The group was distinct from the other business groups that disbanded in that it was designed to convene government officials such as the secretary of Defense and head of OMB, rather than business executives. But it convened a summit in June that included heavy-hitters like Apple's Tim Cook, Amazon's Jeff Bezos and venture capitalist John Doerr, a major greentech backer.

MAIL CALL! PROTECT CLEAN ENERGY IN NAFTA TALKS: The Business Council for Sustainable Energy sent a letter to U.S. Trade Representative Robert Lighthizer urging the protection of clean energy technologies as the Trump administration begins to renegotiate the North American Free Trade Agreement. "Giving attention to items such as a zero tariff for goods produced in North America, promoting U.S. codes and standards, and updating language to reflect the growing impact of information technology on all sectors, will ensure that NAFTA supports the continued growth of clean energy and the benefits it provides to the U.S. economy," Lisa Jacobson, the group's president, wrote. That comes as multiple environmental groups slammed the administration for kicking off negotiations in private.

BATHROOM BILLS OPPOSED BY ENERGY SECTOR KILLED: Texas lawmakers failed to pass several bills by the end of a special session that would have limited transgender individuals' access to bathrooms in public places and schools, BuzzFeed reports. The bills, which divided state Republicans and the business community, were opposed by leaders of major energy companies, including BP America, Chevron, Dow Chemical Co., Exxon Mobil and Halliburton.

TRADE REMEDY CORNER: BIODIESEL INDUSTRY SAYS AD EXTENSION NOT A BIG DEAL: The Commerce Department this week announced a delay in its preliminary antidumping duty determination on imports of biodiesel from Argentina and Indonesia. The U.S. industry which is seeking relief says it's no big deal. The National Biodiesel Board, which is petitioning for the duties, requested an extension to the anti-dumping probe last month. The Commerce investigation is expected to issue preliminary countervailing duties by Aug. 22, which is also an extended deadline.

"It is evident from market reaction that some in the industry are not familiar with this legal

process and the fact that nearly every trade case, from steel to cased pencils, includes these routine extensions," said Doug Whitehead, chief operating officer of the National Biodiesel Board. "This in no way impacts the schedule or the fact that unfairly traded imports are hurting American companies and the employees who serve this industry. We remain confident that both the DOC and ITC will find in American biodiesel producers' favor."

SEND IN REINFORCEMENTS: NYU School of Law is launching the State Energy and Environmental Impact Center, backed by a $6 million grant from Bloomberg Philanthropies, to help state attorneys general fight Trump administration efforts to roll back environmental regulations or climate change policies, the Washington Post reports. David J. Hayes, deputy Interior secretary under President Obama, will be executive director for the nascent group.

PARK BOTTLE BAN AXED: Amid news it removed a Bikeshare station installed during the Obama administration from White House grounds, the Trump administration on Wednesday also killed off its predecessors effort to stop the sale of disposable water bottles on National Park Service grounds. "While we will continue to encourage the use of free water bottle filling stations as appropriate, ultimately it should be up to our visitors to decide how best to keep themselves and their families hydrated during a visit to a national park," Acting National Park Service Director Michael T. Reynolds said. The change in policy, which axes a 2011 Interior memorandum, takes effect immediately.

NEW ENERGY INFRASTRUCTURE COALITION LAUNCHED: The Energy Equipment and Infrastructure Alliance launched a new campaign Wednesday to tout "the importance and benefits of energy infrastructure and its ongoing development." Entitled Energy Builders, the effort comes in response to expanding pipeline protest movement and aims to highlight local economic benefits and jobs that come from infrastructure projects. "The extremists pushing to 'keep it in the ground' don't appreciate what these projects mean to wage earners and their families, not to mention the power they provide for America's homes and businesses now and in the future," Terry O'Sullivan, general president of the Laborers' International Union of North America, said in a statement.

REPORT: YES WE CAN (LIMIT TEMPERATURE INCREASES): The Rocky Mountain Institute released a report Wednesday arguing limiting temperature increases to 2 degrees Celsius is both practical and possible. "Today, many experts doubt that energy systems can decarbonize fast enough to prevent this scenario," the report says. "But this belief is both dangerous and wrong." Among the shifts needed are rapid and economic scaling of clean energy technologies; foundational changes to emissions within agriculture, forestry and other land-use behaviors and coordinated market and policy incentives globally.

HOW TO TAKE AN AX TO EPA: Former Trump EPA transition leader Myron Ebell issued a report Wednesday offering suggestions for how to radically reduce the size of the agency. Among his recommendations: Eliminate the enforcement office; abolish the 10 regional offices and push their emergency response functions to FEMA; stop the environmental justice programs; and overhaul how the agency approaches its scientific work. Ebell also calls for greater disclosure from the agency on its discretionary spending on functions not formally designated by Congress.

BIG SALE! Exxon Mobil, Chevron, Total and two dozen other companies bid on 76 million Gulf of Mexico acres, drawing more than $121 million in winning bids Wednesday from oil and gas companies, Pro's Ben Lefebvre reports. The bidding comes up short of the $247 million generated from a Gulf of Mexico lease sale last March.

ENVIRONMENTAL JUSTICE TOOL UPDATED: EPA issued an annual update Wednesday to EJSCREEN, its geographic tool for exploring environmental justice issues. According to EPA, the update includes new data on public schools and housing; a new way to view surface water pollution; and the ability to view cities as distinct areas, like with states. EPA will host three training webinars in the coming weeks. Click here for a blog post on the update from Matthew Tejada, director of EPA's Office of Environmental Justice. The Trump administration's proposed 2018 budget sought to zero out EPA spending on environmental justice, though Hill appropriators have not taken that route.

EPA extends public comment period for WOTUS repeal Back

By Annie Snider | 08/16/2017 04:05 PM EDT

EPA is giving the public another month to comment on its move to repeal the Obama

administration's Waters of the U.S. rule.

The agency announced today that it will extend the public comment period by 30 days, giving environmental groups, industry advocates and the public until Sept. 27 to weigh on its proposed rule to repeal the Obama-era regulation.

Supporters of the Obama rule, which increases the number of streams and wetlands that receive automatic federal protection, had criticized the length of time the Trump administration gave for public comment. The repeal rule was originally opened for 30 days of comment, although it was public for about a month before the comment period formally opened. The original Obama rule, also called the Clean Water Rule, was open for more than 200 days. Issues raised through the public comment process help lay the groundwork for future legal challenges.

EPA Administrator Scott Pruitt has pushed to swiftly repeal the contentious regulation and draft his own rewrite defining which marshes, bogs and creeks are subject to regulation under the Clean Water Act.

WHAT'S NEXT: Comments on the Trump administration's rule to repeal the WOTUS regulation are due by Sept. 27.

GOP state senator Campbell jumps in against Heitkamp Back

By Kevin Robillard | 08/16/2017 11:49 AM EDT

Republican Tom Campbell, a North Dakota state senator and wealthy potato farmer, officially launched a campaign against Democratic Sen. Heidi Heitkamp on Wednesday and is launching a major advertising buy to kick off his effort.

Campbell is the first entrant into the race against Heitkamp, who won her seat by just 3,000 votes over Republican Rick Berg in 2012. Heitkamp is considered one of the most vulnerable Democrats in the country in 2018, after President Donald Trump won the state by nearly 36 points in 2016.

"I'm going to be throwing my hat in the ring and running for United States Senate," Campbell said on a local radio show. "The next generation is losing the American Dream. Politicians in Washington right now have lost touch with what made America great."

Heitkamp has raised money at a brisk pace this year, bringing in more than $3 million for her campaign committee. Meanwhile, Campbell has given his campaign enough personal money to launch an early TV ad blitz, beginning with a 60-second biographical spot. The ad tells the story of Campbell starting a custom combine business when he was just 16 and later launching a

potato farming business, which employs hundreds of people in the state.

"Today, what Tom Campbell started with a combine and a prayer is a true North Dakota success story," the narrator says in the ad. "Hardworking. Conservative. Outsider. Exactly what North Dakota needs in Washington."

Watch the ad here.

Republican Rep. Kevin Cramer is also weighing a run against Heitkamp.

Yergin supports ending Trump policy advisory forum Back

By Ben Lefebvre | 08/16/2017 03:41 PM EDT

Daniel Yergin, an energy expert who sat on President Donald Trump's Strategic and Policy Forum, "fully supports" the forum's decision to disband, his spokesman told POLITICO.

"As our members have expressed individually over the past several days, intolerance, racism and violence have absolutely no place in this country and are an affront to core American values," forum members said in a prepared statement. "We believe the debate over forum participation has become a distraction from our well-intentioned and sincere desire to aid vital policy discussions on how to improve the lives of everyday Americans. As such, the president and we are disbanding the forum."

Yergin, vice chairman of consulting agency IHS Markit, advises many of the country's largest energy companies and helps organize the industry's largest annual conference. He sat on the White House forum with the heads of General Motors, JPMorgan Chase and other major companies. An IHS spokesman said he supported the forum's decision to disband.

A steady stream of CEOs and other executives had left the forum and a separate White House manufacturing council in recent days to protest Trump's claim that both sides were responsible for violence at a white supremacist march in Charlottesville, Va., last weekend that left three people dead.

As the defections mounted today, Trump said he was disbanding both groups of business advisers.

Trump dumps CEOs before more could abandon him Back

By Dan Diamond | 08/16/2017 12:50 PM EDT

Some of America's top CEOs were preparing to issue a statement criticizing the president — so he effectively fired them from a White House council first.

President Donald Trump on Wednesday announced he was ending two business advisory councils amid a stampede of defections and after one of the groups had decided to disband over the president's much-criticized response to the weekend's violence in Charlottesville, Va.

A person close to Trump's Strategic and Policy Forum said the group had already told the White House it had resolved to disband and condemn the president's Tuesday claims that "both sides" were responsible for violence at a white supremacist and neo-Nazi gathering and that some "very fine people" were among the marchers defending a Confederate statue.

The group in a statement presented the decision as mutual with Trump, though EY CEO Mark Weinberger tweeted Wednesday that "we made the right call." Members of the separate Manufacturing Council — which had already lost eight members this week — were due to hold their own call Wednesday.

"Rather than putting pressure on the businesspeople of the Manufacturing Council & Strategy & Policy Forum, I am ending both. Thank you all!" Trump wrote on Twitter Wednesday afternoon, ending the debate.

The split likely won't change Trump's agenda — the long-time real estate developer still intends to slash corporate taxes and regulations. And the White House said a separate group of government officials called the American Technology Council, which met with top Sillicon Valley executives and Trump in June, will keep working. Still, the break-up of the two high-profile CEO groups shows increasing pressure on business leaders to distance themselves from the White House and could hurt Trump's standing with the pro-business, establishment wing of voters and donors in the Republican Party.

"There is no room for equivocation here: the evil on display by these perpetrators of hate should be condemned and has no place in a country that draws strength from our diversity and humanity," JPMorgan CEO Jamie Dimon said in a statement Wednesday after Trump disbanded the Strategic and Policy Forum to which he belonged. Dimon had weighed in on the events in Charlottesville over the weekend but had not criticized the president directly.

"It is a leader's role, in business or government, to bring people together, not tear them apart," he said.

Executives historically have clamored to belong to White House business councils, which give them an opportunity to pitch the president behind closed doors.

Merck's Kenneth Frazier — the first CEO to announce he was leaving Trump's manufacturing council this week — repeatedly pressed Trump in private on reforming tax laws. Dow Chemical CEO Andrew Liveris was initially granted a private sit-down with EPA head Scott Pruitt as the agency weighed a key regulation, though the meeting was trimmed down to a brief greeting.

In return, the executives served as surrogates for a White House trying to sell its pro-business message. Council members regularly flanked the president at a series of announcements and executive order signings. Executives like Campbell's Soup CEO Denise Morrison told reporters they were optimistic about Trump's effect on the economy. Dow donated about $1 million for the president's inauguration.

The corporate backlash started Monday with Merck's Frazier — the only African-American CEO on Trump's manufacturing council — who said he was quitting "to take a stand against intolerance and extremism." Within a day, the CEOs of Under Armour and Intel said they were leaving too.

The president on Tuesday called them "grandstanders" on Twitter and lashed out at Merck specifically. He claimed the defections wouldn't hurt him.

"For every CEO that drops out of the Manufacturing Council, I have many to take their place," Trump tweeted on Tuesday morning. However, no other CEOs publicly stepped forward to join the council, and five more leaders said they were leaving.

On Tuesday — before Trump's news conference but after he took heat Saturday for blaming "many sides" for violence in Charlottesville — Morrison of Campbell's said she planned to remain on the manufacturing council. Social media campaigns in response called the company a "Soup Nazi" in reference to the television show Seinfeld; another circulated altered photos of fake Campbell's products called "Cream of Complicity" and "Swastika Soup."

On Wednesday, Morrison said she couldn't serve on the council any longer. "Racism and murder are unequivocally reprehensible and are not morally equivalent to anything else that happened in Charlottesville," Morrison said in a statement.

Others also flipped their stances. "The President's most recent statements equating those who are motivated by race-based hate with those who stand up against hatred is unacceptable and has changed our decision to participate in the White House Manufacturing Advisory Council," Johnson & Johnson CEO Alex Gorsky said on Wednesday — less than 24 hours after telling reporters he planned to stay on the council so J&J would have a voice in high-level discussions.

Activists said the overnight campaigns and threats of boycotts motivated executives. Progressive groups have also pushed payment processing companies to cut ties with hate groups, collecting thousands of signatures on petitions, though Discover, Visa and Mastercard told POLITICO they had limited ability to force banks to cut off merchants conducting legal businesses.

"The collapse of the CEO councils is not due to an outbreak of conscience," said Robert Weissman, president of Public Citizen. "Instead, it is public pressure — pressure for the CEOs to

evidence a measure of decency — that is driving them off the councils. That's not exactly the most inspiring example of moral leadership. No profiles in courage here."

Silicon Valley executives such as Amazon's Jeff Bezos and Apple's Tim Cook also met with Trump in June through the administration's American Technology Council, which is technically made up of government employees. Still, activists like Weissman are calling on the affiliated executives to condemn Trump's comments too.

Until this week, Trump had spent months praising the same executives who are now rebuking him.

"I want to thank these great business leaders," Trump said in February, when Merck's Frazier, J&J's Gorsky, Campbell's Morrison and other CEO advisers joined him for a signing ceremony on an executive order on regulatory reform. "They're helping us sort out what's going on, because ... it's been disastrous for business. This is going to be a place for business to do well and to thrive."

Lorraine Woellert, Nancy Scola and Steven Overly contributed to this report.

Trump fallout with business leaders could chill relations with tech industry Back

By Steven Overly and Nancy Scola | 08/16/2017 06:45 PM EDT

The fallout between President Donald Trump and business executives this week is likely to chill his already icy relationship with tech industry leaders, even as the White House pushes ahead with plans to enlist their help in modernizing federal technology.

A White House official said Wednesday that the American Technology Council, a government committee with advisers from the tech industry, plans to carry on despite the dissolution of two separate councils composed of CEOs. And while some firms that advise the American Technology Council signaled they would continue to assist the administration, those that were already wary of this administration are likely to be more so after the week's tumult, which included the president tweeting his anger at one of the executives who quit.

"Tech CEOs will remain engaged with policymakers on the Hill and executive branch as they always have, working through industry groups such as the Business Roundtable and Technology CEO Council rather than specific presidential councils and commissions," said Bruce Mehlman, a Republican lobbyist and executive director of the Technology CEO Council, which includes Oracle, Xerox, Dell and Intel.

The CEOs, some of whom met with Trump at Trump Tower during the presidential transition or

appeared with him at the White House to tout corporate announcements, could also avoid Trump's presidential photo ops that make their engagement so public, instead working with the federal government through agencies and lobbying the administration through associations and advocacy groups.

Oracle said Wednesday it will continue to advise the administration on technology issues.

Intel CEO Brian Krzanich was among those to depart the president's Manufacturing Jobs Initiative, saying that the political climate was not conducive to getting work done. "I hope this will change, and I remain willing to serve when it does," he wrote in a blog post. The company declined to say whether he would engage the administration in other capacities.

IBM CEO Ginni Rometty wrote in a memo to employees that CEOs on the president's Strategy and Policy Forum terminated the group because it "can no longer serve the purpose for which it was formed." She added, however, that IBM has a legacy of working with all administrations. "IBM will continue to work with all parts of the government for policies that support job growth, vocational education and global trade, as well as fair and informed policies on immigration and taxation," she wrote.

Other companies that have participated in American Technology Council activities — Alphabet, Microsoft, Apple, Qualcomm, Amazon and Adobe — either declined to comment or did not respond to questions.

Their silence isn't surprising. Most in the tech industry were already tempering talk about their engagement with the Trump administration. A parade of high-profile executives attended a White House summit in June, for example, but most declined to confirm their participation until the very last minute. Many have also insisted that their participation in such events is not an endorsement of Trump's policies — with some of those policies drawing the ire of Silicon Valley's liberal occupants.

It's reflective of the challenge that has persisted since their pick for president, Democrat Hillary Clinton, lost to Trump in November. The executives are pulled to assist the government and promote policies favorable to their businesses, but also want to keep distance from a president whose demeanor and political positions have galled many in the industry.

Trump's already precarious relationship with business leaders frayed quickly this week after he failed to place blame for a violent rally in Charlottesville, Va., squarely on white supremacists. Merck CEO Kenneth Frazier was the first to step down from Trump's manufacturing advisory council as a result, prompting a series of other business executives and labor leaders to follow suit.

Trump called them "grandstanders" and defiantly declared he could replace them easily. But on Wednesday, in a single tweet, Trump disbanded two CEO-level advisory committees that had been his most direct outreach to the nation's business leaders. "Rather than putting pressure on the businesspeople of the Manufacturing Council & Strategy & Policy Forum, I am ending both. Thank you all!" he wrote.

But the American Technology Council is different. Unlike those two groups, the ATC was created as a convening body of government officials — including the secretary of Defense, the director of OMB and the U.S. chief information officer — rather than of corporate leaders.

The council, though, has engaged with tech industry executives via a high-profile White House summit in June led by senior presidential adviser Jared Kushner that was attended by, among others, Apple's Tim Cook, Amazon's Jeff Bezos, Microsoft's Satya Nadella and Eric Schmidt of Alphabet (Google's parent company), as well as a follow-up call with corporate officials earlier this month.

"The American Technology Council is solely made up of government employees," a White House official said. "The council is full steam ahead on its work assisting the modernizing of government IT, which is primarily being done through internal government resources. The council will continue to occasionally consult with the private sector on specific issue areas like improving cloud rollout, cybersecurity and digital services for vets."

The official also pointed out that, aside from the June meeting, the group's consultation with corporate leaders is remote, via emails and calls, and that there are no plans for further in-person events or meetings.

BOEM Gulf of Mexico offshore lease sale yields $121M Back

By Ben Lefebvre | 08/16/2017 05:23 PM EDT

BOEM's latest auction of offshore acreage in the Gulf of Mexico drew more than $121 million in winning bids today from oil and gas companies.

Exxon Mobil, Chevron, Total and two dozen other companies bid on 76 million acres, which Interior said was the largest amount of Gulf acreage ever offered in a single lease auction. The bidding fell short of the $247 million generated from a Gulf of Mexico lease sale last March, however.

President Donald Trump and Interior Secretary Ryan Zinke have touted offshore drilling as a way for the U.S. to achieve "energy dominance." But with oil prices hovering below $50 a barrel, oil and gas companies have been wary of committing to new offshore projects, which can take several years and billions of dollars to carry out.

Interior slashed the royalty rate that companies have to pay on the oil and gas they produce to 12.5 percent for leases in less than 200 meters of water depth, down from the 18.5 percent originally advertised for the sale.

WHAT'S NEXT: Public comments are due Thursday on Interior's review for a new five-year offshore lease plan.

Subject: Federal Insider: Uncle Sam is a slacker in policing sexual misconduct in agencies

Uncle Sam is a slacker in policing sexual misconduct in agencies

By Joe Davidson

ADVERTISEMENT

Rep. Trey Gowdy (R-S.C.), chairman of the House Oversight and Government Reform Committee. (Alex Brandon/AP)

Amid a growing number of scandals involving serial sexual misconduct cases comes word that Uncle Sam is a real slacker in policing his workforce.

The federal workplace might have a better record than a Hollywood casting couch — or it might not. It's hard to know the extent of sexual misconduct in the federal government because of Sam's poor and inconsistent disciplinary practices and record-keeping. Sometimes he even neglects to list sexual misconduct as an offense.

A House Oversight and Government Reform Committee report says eight agencies have no table of penalties at all, including the Office of Personnel Management (OPM), which should be the role model for a government that thinks itself a model employer. A table of penalties is a list of suggested disciplinary actions for various forms of staff misconduct. The government's

ADVERTISEMENT

largest federal employee union, however, argues against overuse of tables of penalties, likening them to rigid mandatory minimum sentences in the criminal justice area.

"Sexual misconduct is a challenge the federal government must aggressively and consistently address to ensure the well-being and safety of its workforce. Employees should feel safe and protected at work," said Rep. Trey Gowdy (R-S.C.), the oversight committee's chairman. "The American people deserve a workforce and a work environment reflective of the law, their high standards for appropriate conduct, and conducive with maximum productivity."

But that challenge is not specifically recognized by seven agencies that "have a Table of Penalties, but do not expressly mention sexual misconduct," according to the report, which was issued by the majority Republican staff.

Citing a Justice Department inspector general's study on "the dangers associated with the lack of a Table of Penalties," the House document said the department's "Civil Division's handling of sexual misconduct allegations was not consistent, penalties were not consistent for high-performing employees, and employees received performance awards even while the subject of ongoing sexual harassment or misconduct investigations or while disciplinary actions were in effect."

At the other end of the spectrum are the U.S. Agency for International Development and the Federal Aviation Administration (FAA), which has "the most developed list of sexual misconduct categories."

The FAA list has "10 distinct categories of sexual misconduct," said the House report, including:

- "Sexual teasing, jokes, remarks, questions;
- "Suggestive looks or gestures of a sexual nature; and
- "Threat or act of reprisal for refusal to provide sexual favors."

In some agencies, managers received harsher punishments for sexual misconduct, but sometimes the opposite is true. In the Civil Division, an upper level manager decided against suspending a senior official because that "would unnecessarily deprive the government" of the official's services.

Among other items, the House report recommended:

Kidder added that "what is missing from the entire labor workforce is the lack of agency ability for individuals committing acts of sexual misconduct and the OPM development and response to the agency's following one of these instances.

- Agencies without a table of penalties should create one.

The American Federation of Government Employees (AFGE) said it has "no reason to believe that sexual misconduct is any more common among the federal workforce than it is in the private sector."

When AFGE testimony, provided to Federal Employee News Watch (FEW), said the agencies "agree with the findings of the report that the lack of use of the Tables of Penalties and that agency tables of penalties often can contribute to the government's inability to hold employees accountable for misconduct." Enforcement is also difficult when supervisors are unaware of the actions that can be taken to prevent and eliminate sexual harassment; that is, they should publicize penalties and encourage assertive actions on the part of employees who are targets of unwanted sexual attention. Civil service protections weaken the fight against sexual harassment.

"Efforts underway in this Congress to roll back union rights and hamstring unions will make it more difficult for the union to help police workplace sexual misconduct," the union statement said. "This whole area is a prime example why workers' rights and union rights should be strengthened in the federal sector, not weakened."

Questions for Federal Insider readers: How pervasive is sexual harassment in the federal government? If you have been the target of sexual harassment, please tell us the circumstances, what form the harassment took, whether it was reported, what was done about it and whether the perpetrator was disciplined. We will use this information for a future column. In certain cases we can print your comments without identification. Please send your comments to joe.davidson@washpost.com with "sexual misconduct" in the subject line.

Driving the Day

Good Wednesday morning. CONGRESSIONAL LEADERSHIP is going to the White House next Wednesday at 11 a.m. for a meeting with President Donald Trump. We hear this will be the Big Four: Paul Ryan, Nancy Pelosi, Mitch McConnell and Chuck Schumer.

REPUBLICANS say this will be a critical touch-the-gloves moment as they enter a brutal month. **DEMOCRATIC LEADERSHIP AIDE:** "The Republicans are in charge, from the White House to the Hill so the onus of governing is squarely on them. We expect to hear their proposal for getting done all that we have to get done in September." **IN OTHER WORDS:** Ball is in your court, guys.

NEW -- THE THROW-IT-ALL-TOGETHER STRATEGY: One of the new leading theories among Senate and House Republicans in Washington is that Congress will combine a three-month stopgap spending bill to keep the government open, the first installment of hurricane relief for Texas and Louisiana and an increase of the federal debt limit. The idea is this package would create an undefeatable constituency across the Capitol. Here are a few things to understand:

-- FEMA HAS ENOUGH MONEY right now for its immediate response to Harvey. We were told by multiple sources involved in the talks the agency has roughly $1.3 billion in its coffers. But Congress will need to act on disaster funding in September to give them more.

-- THE STATE OF TEXAS AND THE WHITE HOUSE have to work quickly to estimate how much more money they'll need. This will impact the contours of the debate. The damage in Texas is so extensive and unknown that no one knows how much money the

government will have to shell out. **THE LIKELIHOOD:** Congress will need to insert disaster relief money into a stopgap bill in September -- the CR, or continuing resolution -- and then appropriate more money as part of an omnibus spending bill in December. That omni would keep government open until Oct. 2018.

-- SMART MONEY IS ON -- NO SHUTDOWN IN SEPT., BUT POSSIBLE IN DECEMBER. The thinking is this will put off the shutdown debate until the last month of the year. Capitol Hill will be far more interested in figuring out how to get America's fourth-largest city out from underwater than in building a border wall, multiple sources told us. It's unclear whether President Donald Trump will force the issue.

-- ON THE DEBT LIMIT ... BULLET COULD BE DODGED. This package, if crafted carefully, could be just the mix of good and bad that it would get widespread bipartisan support in both chambers. Who could vote against helping the second-largest state in America rebound from a disaster? Key Republicans involved with planning told us they would be willing to lift the debt limit past the 2018 elections.

REMEMBER: THE FAA's authority needs to also be renewed in September.

A WORD OF CAUTION -- It makes sense that GOP leaders want to find a way to take care of all of the "must-pass" legislation in one package and tie it up neatly in a bow. Lawmakers haven't come back yet. Expect at least one or two hiccups along the way. Typically whatever leadership starts with isn't the package that ends up passing, particularly in the House.

BULLETIN at 4:59 a.m.: "CAMERON, La. (AP) - National Hurricane Center: Tropical Storm Harvey makes 2nd landfall just west of Cameron, Louisiana."

HOUSTON CHRONICLE A1 -- "EPIC FLOODING SHOWS NO MERCY"
http://bit.ly/2vryWIN

THE LATEST ON HARVEY -- HOUSTON CHRONICLE, story updated at 3:45 a.m. **-- "Harvey begins to push out of Houston as curfew set and new shelter opens,"** by Brooke A. Lewis, Brian Rogers, Margaret Kadifa, Susan Carroll, and Andrew Kragie: "Hordes of new shelters began to open up across the city as more residents were ordered to evacuate from their flooded homes. Harris County Judge Ed Emmett confirmed Tuesday evening that NRG Center [where the Texans play] will provide the next major shelter for area residents affected by Hurricane Harvey. ...

"Houston Mayor Sylvester Turner issued a curfew Tuesday in effect from midnight to 5 a.m. During a press conference late Tuesday, the mayor said it was necessary for public safety. He originally said the curfew would begin at 10 p.m., but an hour later he changed it to midnight, tweeting that moving it later would allow volunteers and others to continue doing their work." http://bit.ly/2wi6QbD

--NYT's JACK HEALY, RICHARD PEREZ-PENA and ALAN BLINDER: "Local officials

in Texas said at least 30 deaths were believed to have been caused by the storm through Tuesday, up from eight a day earlier. ... Parts of the Houston area broke the record for rainfall from a single storm anywhere in the continental United States, with a top reading on Tuesday afternoon, since the storm began, of 51.88 inches in Cedar Bayou, east of Houston, the National Weather Service reported. The previous record was 48 inches in Medina, Tex., from Tropical Storm Amelia in 1978, and with the rain still falling along the Gulf Coast, Harvey could top the 52 inches recorded in Kauai, Hawaii in 1950 from Hurricane Hiki." http://nyti.ms/2x4d13K

--"Photos: Trump visits hurricane-ravaged Texas" -- *19 pix* http://politi.co/2x38cHM

-- "Harvey triggers spike in hazardous chemical releases," by Ben Lefebvre: "Hobbled oil refineries and damaged fuel facilities along the Gulf Coast of Texas from Tropical storm Harvey have released more than two million pounds of dangerous chemicals into the air this week, adding new health threats to Houston's already considerable woes. The big spike in releases, which include carcinogenic benzene and nitrogen oxide, will add an environmental and long-term health risk to the region that's struggling with the massive flooding that Harvey has brought to the country's energy capital, according to environmental watchdogs. The jump in emissions has been noticed on the ground in Houston, where residents have taken to Twitter to report a stronger-than-normal chemical smell in some areas." http://politi.co/2xLcd0W

-- "Houston's 'Wild West' growth," by WaPo's Shawn Boburg and Beth Reinhard: "Houston calls itself 'the city with no limits' to convey the promise of boundless opportunity. But it also is the largest U.S. city to have no zoning laws, part of a hands-off approach to urban planning that may have contributed to catastrophic flooding from Hurricane Harvey and left thousands of residents in harm's way. Growth that is virtually unchecked, including in flood-prone areas, has diminished the land's already-limited natural ability to absorb water, according to environmentalists and experts in land use and natural disasters. And the city's drainage system -- a network of reservoirs, bayous and, as a last resort, roads that hold and drain water -- was not designed to handle the massive storms that are increasingly common." http://wapo.st/2iHTJvD

NEXT UP: "Western Louisiana in crosshairs as Harvey moves back to land," by AP's Jeff Amy and Michael Kunzelman in Lake Charles, Louisiana: "Western Louisiana residents braced for more wind and water Wednesday as Tropical Storm Harvey headed their way after dumping record rainfall on Texas. National Weather Service meteorologists expect the deadly storm to make another landfall early Wednesday in southwestern Louisiana, after it lingered over Texas for days before meandering back into the Gulf of Mexico.

"Forecasters say another 5 to 10 inches of rain could fall in western Louisiana. 'We are starting to get down to the end of the tunnel of all this rain,' Meteorologist Roger Erickson said. Erickson warns that some coastal rivers won't be able to drain effectively because Harvey's winds are pushing in storm surge, aggravating flooding in areas already drenched by more than 20 inches of rain. Gusts up to 50 mph are predicted for

coastal areas and up to 40 mph in Lake Charles and along the Interstate 10 corridor." http://bit.ly/2vljayo

GLENN THRUSH in the NYT, **"Harvey Gives Trump a Chance to Reclaim Power to Unify":** "Hurricane Harvey was the rarest of disasters to strike during the Trump presidency -- a maelstrom not of Mr. Trump's making, and one that offers him an opportunity to recapture some of the unifying power of his office he has squandered in recent weeks. ... [H]urricanes in the post-Katrina era are also political events, benchmarks by which a president's abilities are measured. Mr. Trump is behaving like a man whose future depends on getting this right. ...

"The president, who prefers to skim rather than delve, has seldom been more engaged in the details of any issue as he is with Harvey, according to several people involved in disaster response. Mr. Trump, one aide said, was fascinated by the long-term effect of water damage on structures in the Gulf Coast, peppering FEMA and National Security Council briefers with detailed questions about the flooding in Houston and Galveston. As the extent of the projected devastation became apparent over the weekend during a meeting at Camp David, he shook his head in disbelief and compared the situation to problems he experienced when managing his family's apartment buildings in New York. 'Water damage is the worst,' he told one staff member, 'tough, tough, tough.'" http://nyti.ms/2x2qHwn

JOSH DAWSEY in Corpus Christi: "It was a presidential trip to a deluged state where the president didn't meet a single storm victim, see an inch of rain or get near a flooded street. But the daylong visit, during which President Donald Trump spent far more time in the air than on the ground, gave the optics-obsessed president some of the visuals he wanted, as he checked in on the government apparatus working on relief efforts and was buoyed by a roaring crowd of locals.

"And it showed that the president, who often obsesses about crowd size and fame while speaking in hyperbolic superlatives, would not drop those traits even amid hurricane cleanup. He praised his [FEMA] administrator, Brock Long, for becoming 'famous' during his frequent TV appearances, talked repeatedly about the historic nature of the storm and marveled at adoring Texas residents who greeted him." http://politi.co/2vE6n0u

****** **A message from the American Bankers Association:** America's small businesses most often turn to banks when looking for financing. Banks have responded by increasing small business loans each of the past six years, reaching $331 billion in credit as of January. Learn more: http://politi.co/2wchpez ******

HEELGATE -- "Melania's stiletto sideshow: As the first lady departed to see storm fallout in Texas, Twitter erupted with critiques of her shoe choice," by Annie Karni: "The emblematic first image of the first lady heading off to visit a hurricane in heels -- a moment that the president has seized on as an opportunity to project strength and show off decisive leadership -- instead became another symbol of a White House that can

often seem out of touch. ... On board Air Force One to Corpus Christi, as the picture of the delicate heels ricocheted across the Internet, Melania Trump changed into a pair of bright, white sneakers, which looked fresh out of the box. She wasn't the only female member of the Trump delegation wearing questionably appropriate footwear -- two other women were spotted on Air Force One wearing pumps and suede heels." http://politi.co/2goqCN3

-- WAPO'S ROBIN GIVHAN: "There was no pretense about Melania Trump's heels. But sometimes, a little pretense helps": "Trump's fashionable ensemble was defined by its contradictions. She was wearing a working man's jacket but it was juxtaposed with sexy limousine shoes. The trousers and the top were basic black -- utilitarian. The oversize aviator sunglasses were Hollywood. It's an image that would have been at home in any fashion magazine, which is so often the case with the first lady. She knows fashion. She knows her angles. ...

"It was also an image that suggested that Trump is the kind of woman who refuses to pretend that her feet will, at any point, ever be immersed in cold, muddy, bacteria-infested Texas water. She is the kind of woman who may listen empathetically to your pain, but she knows that you know that she is not going to experience it. So why pretend?

"Well, sometimes pretense is everything. It's the reason for the first lady to go to Texas at all: to symbolize care and concern and camaraderie. To remind people that the government isn't merely doing its job, that the government is engaged with each and every individual. Washington hears its citizens. That's what the optics are all about. Sitting around a conference table and talking into a speaker phone are not good optics. A politician has to get on the ground in work boots and a windbreaker. Rolled-up sleeves. Galoshes. Baseball caps." http://wapo.st/2whj3x6

SNEAK PEEK -- NICK CONFESSORE'S NEW NYT MAGAZINE COVER STORY - "How to Get Rich in Trump's Washington: His presidency has changed the rules of influence in the nation's capital - and spawned a new breed of lobbyist on K Street" (print headline: **"I Can Teach YOU How to Influence the President:** The Art of Lobbying in Trump's Washington" with a pic of Corey Lewandowski): "Like virtually every other candidate for president, Trump campaigned against this thicket of money and influence, positioning himself as an outsider who would 'drain the swamp.' This pledge would soon prove more rhetorical than real, but it contained a grain of truth. Trump arrived in Washington with a relatively short baggage train of Beltway relationships and obligations. He didn't read policy briefs; he barely had policies.

"His inner circle was a hodgepodge of Breitbart alumni, nominally Democratic financiers, Trump Organization employees on loan, the odd reality-show star and Republicans who would have been unemployable in almost any other administration. The smart money in Washington - K Street and K Street's clients, the big corporations and trade associations - didn't quite know what to expect. But mostly, they didn't know whom to call." ***With cameos by Robert Stryk, Brad Gerstman, Brian Ballard, Bruce***

Mehlman, Stuart Jolly, and Barry Bennett http://nyti.ms/2gpGQFx ... ***The cover*** http://politi.co/2xw2Oe3

FOR YOUR RADAR -- "NKorea leader urges more missile launches targeting Pacific," by AP's Foster Klug and Kim Tong-Hyung in Seoul, South Korea: "North Korean leader Kim Jong Un called for more weapons launches targeting the Pacific Ocean to advance his country's ability to contain Guam, state media said Wednesday, a day after Pyongyang for the first time flew a ballistic missile designed to carry a nuclear payload over Japan. Tuesday's aggressive missile launch - likely the longest ever from North Korea - over a close U.S. ally sends a clear message of defiance as Washington and Seoul conduct annual military drills. The Korean Central News Agency said the launch was a 'muscle-flexing' countermeasure to the Ulchi Freedom Guardian joint exercises that conclude Thursday. Pyongyang views the drills as invasion rehearsals and often conducts weapons tests and escalates its rhetoric when they are held." http://bit.ly/2wnxZbH

-- REUTERS: "The Trump administration plans to name a former White House official, Victor Cha, as the next U.S. ambassador to South Korea, according to an administration official. Cha served as deputy head of the U.S. delegation in multilateral talks with North Korea over its nuclear programme during the administration of President George W. Bush." http://reut.rs/2wIoLcD

IMPORTANT STORY -- ANNIE KARNI -- "Trump's shrinking West Wing": "When President Donald Trump asked Hope Hicks to step into the role of communications director, his longtime aide hesitated before taking on a management position overseeing more than 40 staffers who work in White House media relations.

"It was Hicks who insisted on 'interim' being part of her new job title before accepting the post, according to a person familiar with the negotiations. But since her appointment on Aug. 16 - when Ivanka Trump went on Twitter to congratulate her 'talented friend & colleague Hope Hicks on being named WH Communications Director,' leaving out any mention of the 'interim' part - no active search has been launched to find a more permanent successor to the short-lived Anthony Scaramucci era. After a summer of distracting staff churn, the communications director job is just one of a number of top-level West Wing positions that has ultimately been filled by an existing staffer - or not filled at all - after an official has quit or been let go.

"Interviews with six White House staffers and people close to the president attribute Trump's shrinking West Wing to three factors: chief of staff John Kelly's careful review process, which has led to the paring down of an organization that many inside have complained was top-heavy; the chilling factor of five open-ended Russia investigations hanging over the White House, making it hard to attract new talent; and the president's own dark mood this summer, which has left him increasingly isolated and in the mood to hunker down, not hire up." http://politi.co/2vrydB5

NEW POLITICO/MORNING CONSULT POLL -- "Poll: Voters split on Afghanistan

troop increase, oppose shutdown for border wall," by Steven Shepard: "Voters are divided on President Donald Trump's plans to send more American troops to Afghanistan, according to a new POLITICO/Morning Consult poll. Forty-five percent of voters support increasing U.S. troop levels in Afghanistan, the poll shows - only slightly greater than the 41 percent who oppose the plan. The other 14 percent have no opinion.

"While support for Trump's plan marginally outpaces opposition, the 20 percent of voters strongly opposed to a troop increase are slightly greater than the 17 percent who strongly support it. Backing for a troop increase is greater among Republicans than Democrats or independents. Sixty-eight percent of self-identified GOP voters support increasing the number of troops in Afghanistan, but only 30 percent of Democratic voters and 35 percent of independents agree." http://politi.co/2gor7GI

WHAT TRUMP'S POLITICAL TEAM IS READING -- "Pittsburgh focus group tanks Trump," by Isaac Dovere: "'Outrageous,' 'disastrous,' 'abject disappointment,' 'unique,' 'off the scale,' 'contemptible,' 'crazy': Donald Trump seems to have lost Pittsburgh, at least based on a focus group, sponsored by Emory University, held in the city Tuesday night. The group, a mix of people who'd voted for Trump and Hillary Clinton (plus one Jill Stein voter), came down hard on the president and Vice President Mike Pence-three people called him a 'puppet,' and several used variations of 'waiting in the wings,' though he was also called 'quiet' and 'reasonable.'

"To a lesser degree, the voters also complained about Senate Majority Leader Mitch McConnell, House Speaker Paul Ryan and Senate Minority Leader Chuck Schumer. Asked to grade Congress, participants gave a collection of Cs, Ds and Fs, with most complaining that nothing is getting done. Not many knew much about special counsel Robert Mueller, who's leading the Russia investigation, but several singled out Jared Kushner, the president's son-in-law and senior adviser, as a problem due to his inexperience." http://politi.co/2vJ5Zgl

HAPPENING TODAY -- "Trump to seize populist mantle for pitching messy tax overhaul," by Ben White and Tara Palmeri: "President Donald Trump will launch a major push for a sweeping tax overhaul with a speech Wednesday in Missouri aimed at convincing his base - and the rest of the nation - that he has a fresh vision for 'unrigging' the American economy and isn't just repackaging the trickle-down economics of past Republican presidents.

"It could be a tough sell for the president as he fights with saturation coverage of Hurricane Harvey and as Democrats prepare to frame Trump's approach as a giveaway to corporate fat cats and the nation's richest taxpayers. Wednesday's speech in Springfield is being built around the sale of tax reform as a populist policy, according to five senior administration officials. The tax speech is being drafted by senior White House aide Stephen Miller, a leader of the nationalist wing of the administration. In Trumpian style, he'll try out new phrases for selling the policy like 'Jump-start America' and 'Win again.'" http://politi.co/2wQST5K

-- ATTENDING TODAY'S EVENT: Treasury Secretary Steven Mnuchin, Commerce Secretary Wilbur Ross, NEC Director Gary Cohn, SBA Administrator Linda McMahon, Missouri Sen. Roy Blunt, Gov. Eric Greitens, Lt. Gov. Mike Parson, Republican Reps. Ann Wagner, Blaine Luetkemeyer, Vicky Hartzler, Sam Graves, Billy Long and Jason Smith.

-- REPUBLICANS WE SPOKE TO YESTERDAY are happy Trump is going on the road, but worried that one off-topic comment will undermine anything positive he does.

-- KEVIN ROBILLARD in Branson, Missouri: "Why Claire McCaskill Is Holding Her Fire: President Trump has already taken shots at the vulnerable Democratic senator but she's determined not to anger the rural voters who put him in office": http://politi.co/2wh2xxa

THE JUICE ...

NOT BAD -- OBAMA LOOKING FOR MVY SPOT -- BOSTON GLOBE'S MARK SHANAHAN: "Chicago will always be President Obama's hometown -- that's where the Obama Presidential Center is being built -- but it looks like he may be spending a lot more time on Martha's Vineyard in the future. Word around the island is that the Obamas, who've rented a place on the Vineyard for the past several summers, are looking to buy ... The 44th president and his wife, Michelle, are believed to be focused 'up island,' looking at homes or buildable lots in the rural communities of Aquinnah, Chilmark, and West Tisbury. ...

"No one's talking, least of all realtors, but we're told that one property that may be getting a long look is a magnificent waterfront outpost in Aquinnah owned by Caroline Kennedy and her husband, Edwin Schlossberg. A few years ago, the couple, who inherited from Jacqueline Kennedy Onassis the 377-acre Red Gate Farm overlooking the Atlantic Ocean, subdivided the property and put two parcels on the market." http://bit.ly/2wQdaZg

-- **"Bill and Hillary Clinton's Hamptons Summer Rental Sells,"** by WSJ's Katy McLaughlin: "A Hamptons mansion that served as a summer vacation rental for Bill and Hillary Clinton has sold for $29 million. The Clintons stayed in the home for part of August in both 2011 and 2012, said Apolonia Baptiste, assistant to seller Elie Hirschfeld; she declined to say what the Clintons paid. Current listing agent Rebekah Baker of Sotheby's International Realty in the Hamptons said that in recent years the property has rented for between $350,000 and $500,000 for the summer, or for about $150,000 a month. ... The roughly 10,000-square-foot shingled house has 8 bedrooms, all of which have en suite bathrooms, a formal dining room and six fireplaces." http://on.wsj.com/2wHpavC

-- "Sean Spicer finally gets to meet Pope Francis," by America Magazine's Michael J. O'Loughlin: "A group of legislators and politicians from around the world gathered in Italy this week for a meeting of the International Catholic Legislators Network, where

they were received by Pope Francis at the Vatican. Among those gathered was Sean Spicer, the former White House press secretary who was ... left off the list of U.S. officials who accompanied the president to the Vatican. ... A photo posted to the Vatican Radio Facebook page shows Mr. Spicer using his cell phone to snap a photo of Pope Francis, who in an address to the group urged cooperation and bridge-building. Several other images posted to the Vatican's photo service page show Mr. Spicer greeting the pope personally." ***With a pic of Sean and the Pope*** http://bit.ly/2vCLWBd

Playbook Reads

PHOTO DU JOUR: Volunteer Elizabeth Hill, 8, plays with evacuee Skyler Smith, 7, at a shelter at St. Thomas Presbyterian Church in west Houston as Tropical Storm Harvey continues to affect the area on Aug. 29. | Jay Janner/Austin American-Statesman via AP

COMING ATTRACTIONS -- "Trump at war with himself over 'Dreamers,'" by Andrew Restucci and Eliana Johnson: "The president has waffled between his campaign pledge to kill the policy known as Deferred Action for Childhood Arrivals, or DACA, and his sympathy for the nearly 800,000 people whose lives could be upended if it's repealed, aides say.

"As an unofficial Sept. 5 deadline looms, there are growing signs that Trump will decide to phase out the program. But administration officials say he remains conflicted, trying to find a middle ground that balances his instinct to be tough on immigration and his personal feelings. Trump's final decision could drastically change the lives of the country's 'Dreamers.' Participants in the program -- which permits some people who were brought to the United States as children to live and work in the country temporarily -- worry they could lose their jobs or be subject to possible deportation if the program is suddenly ended." http://politi.co/2xxvLGz

-- MANY REPUBLICANS WE TALK TO say they believe there's a border wall/DACA deal to be made in the coming months.

POLITICO SCOOP -- "Virginia received DHS warning before Charlottesville rally," by Josh Meyer: "The Department of Homeland Security issued a confidential warning to law enforcement authorities three days before the deadly Aug. 12 Charlottesville protest rally, saying that an escalating series of clashes had created a powder keg that would likely make the event 'among the most violent to date' between white supremacists and anarchists. The 'law enforcement sensitive' assessment, obtained by POLITICO and reported for the first time, raises questions about whether Charlottesville city and Virginia state authorities dropped the ball before, and during, a public event that was widely expected to draw huge crowds of armed, emotional and antagonistic participants from around the country." http://politi.co/2gofe3R

BEYOND THE BELTWAY -- "Report: 'Anti-protester' bills gain traction in state legislatures," by USA Today's Heidi M. Przybyla: "Republican legislators in 20 U.S. statehouses have proposed -- and six legislatures approved -- new restrictions on the right to assemble and protest so far this year, according to a new report by the Democrat-aligned State Innovation Exchange. ... Among the states approving what SiX calls 'anti-protester' legislation were Arkansas, Oklahoma, North Dakota, Georgia and South Dakota. Arkansas, for instance, has passed a new 'anti-loitering' bill that makes it an offense if a person 'lingers, remains or prowls in a public place or the premises of another without apparent reason and under circumstances that warrant alarm or concern for the safety of persons or property in the vicinity.'" https://usat.ly/2gnM5FL

THE RUSSIA PROBE -- "Special counsel subpoenas Manafort's former attorney and spokesman," by CNN's Evan Perez: "The subpoenas seeking documents and testimony were sent to Melissa Laurenza, an attorney with the Akin Gump law firm who until recently represented Manafort, and to Jason Maloni, who is Manafort's spokesman ... It's unclear what specific information the Mueller investigators believe Laurenza and Maloni may have. But issuing subpoenas to a lawyer of someone under investigation is unusual, in part because it raises potential attorney-client privilege issues that prosecutors tend to try to avoid. Maloni, as a public relations representative, doesn't have the same attorney-client privilege protections." http://cnn.it/2vHDQGx

-- "Donald Trump Jr. set to testify before Senate Judiciary panel," by Ali Watkins and Josh Dawsey: "The Senate Judiciary Committee has reached an agreement and set a date for Donald Trump Jr. to testify behind closed doors to the panel, the committee confirmed on Tuesday. The committee would not divulge the exact date, but another source familiar with the matter said the testimony would likely occur in the 'next few weeks' Trump Jr. is expected to be grilled about his meeting with a Kremlin-linked lawyer during his father's presidential campaign in which he was promised compromising information on Hillary Clinton. ... Sens. Chuck Grassley (R-Ia.) and Dianne Feinstein (D-Calif.), the panel leaders, said in July that they still intend to hold a public hearing with Trump Jr. after speaking with him privately, and would subpoena him to appear in open session if necessary." http://politi.co/2vpLfiK

****** **A message from the American Bankers Association:** America's banks play a critical role in generating economic growth while delivering safety and convenience for customers. The two million women and men who work for America's banks safeguard $12.9 trillion in deposits and originate $2.4 trillion in home loans. They provide $331 billion in loans to small businesses and $175 billion in loans to farmers and ranchers. Banks' fraud protection measures stop at least $11 billion in attempted fraud each year. And thousands of banker volunteers deliver financial literacy lessons annually to millions of young Americans to help them become financially successful adults. Find out more at www.aba.com/AmericasBanks, #AmericasBanks ******

IN THE BATTLEFIELD -- "Mattis allows transgender troops to serve as Pentagon studies Trump's ban," by Bob Hillman: "Defense Secretary Jim Mattis said Tuesday transgender troops will continue serving in the military while the Pentagon studies the

issue. Mattis said he'll establish a 'panel of experts serving within the Departments of Defense and Homeland Security' to provide advice and recommendations on the implementation of President Donald Trump's order to bar transgender individuals from serving in the military.

"In the interim, Mattis said, 'current policy with respect to currently serving members will remain in place' with interim guidance from him, including 'any necessary interim adjustments to procedures to ensure the continued combat readiness of the force until our final policy on this subject is issued.'" http://politi.co/2vqGPIp

VALLEY TALK - "Uber Faces Investigation of Possible Foreign-Bribery Law Violations," by WSJ's Douglas MacMillan and Aruna Viswanatha: "The Justice Department has taken preliminary steps to investigate whether managers at Uber Technologies Inc. violated a U.S. law against foreign bribery, according to people familiar with the matter. The agency has begun to review allegations that Uber may have violated the Foreign Corrupt Practices Act, which bans the use of bribes to foreign officials to get or keep business ... Based on what it finds, the Justice Department may or may not decide to open a full-fledged FCPA investigation into Uber. It is unclear whether U.S. authorities are focused on one country or examining activities in multiple countries where the company operates." http://on.wsj.com/2xLj1LQ

MEDIAWATCH -- "In the Trenches of Trump's Leak War: How the administration has changed the game between investigative reporters and their government sources," by Vanity Fair's Joe Pompeo: "On July 6, the Senate Committee on Homeland Security and Governmental Affairs issued a scathing report detailing what the Committee characterized as a seething epidemic of classified information making its way into the press. Titled, 'State Secrets: How an Avalanche of Media Leaks Is Harming National Security,' the 23-page document cites 'at least 125 stories' between Inauguration day and May 25 'with leaked information potentially damaging to national security.' ... Consternation about the report was particularly high in The Washington Post's newsroom, not only because 33 of its journalists' stories were in the crosshairs, but also because 'State Secrets' was being promoted on Twitter by one of their own.

"Jerry Markon was a longtime Post reporter who covered the Department of Homeland Security until February, when he left the paper to work for the Committee on Homeland Security as senior policy adviser to its chairman, Senator Ron Johnson. When the report landed, along with six retweets from Markon touting its findings, jaws hit the floor. At least one of Markon's former colleagues, according to people with knowledge of the matter, e-mailed him to ask if he'd written the report himself. Adam Goldman, who worked with Markon at the Post and even shared some bylines with him, was blunt in his assessment. 'Many former colleagues at the Post were disappointed,' Goldman told me. 'It was a betrayal.' (I reached out to Markon through the Committee's press office but he was not made available.) A Johnson aide emphasized that Johnson's 'concern is about the leakers and the national-security threats their leaks pose, not individual journalists.'" http://bit.ly/2iHDWgi

Subject: BREAKING NEWS: Curtis elected to replace Chaffetz in House

Republican John Curtis has won the special election to replace former Rep. Jason Chaffetz in the House.

Curtis, the mayor of Provo, Utah, had 59 percent of the vote to Democrat Kathie Allen's 26 percent when The Associated Press called the race. Third-party candidate Jim Bennett, the son of former Republican Sen. Bob Bennett, had 9 percent. Chaffetz resigned from Utah's heavily Republican 3rd District on June 30, triggering a special election.

Subject: POLITICO's Morning Energy: Scott Pruitt's campaign in waiting? — Comments pour in on offshore drilling plan — Oregon lawmakers back Suniva solar petition

By Anthony Adragna | 08/18/2017 10:00 AM EDT

With help from Emily Holden

IS SCOTT PRUITT PLAYING THE LONG GAME? Ostensibly to gather feedback on rolling back an Obama-era water rule, EPA Administrator Scott Pruitt's 10-state trek this summer - jam-packed with local media hits - is raising eyebrows around the Beltway that the former Oklahoma attorney general is laying the groundwork for a political campaign once he leaves President Donald Trump's Cabinet, Pro's Emily Holden reports. "Whatever he may claim to be, he is a politician with campaign experience," one GOP strategist said, noting EPA likely won't be "his career culmination goal."

It's not immediately clear what office Pruitt, 49, could seek but speculation has focused on the Senate seat held by Jim Inhofe - should the 82-year old fifth-term senator decide to retire or not seek reelection in 2020. If he does seek elected office, Pruitt could be the first EPA chief to make that jump. His inner circle is dominated by key personnel with links back to Oklahoma, though state strategists say they haven't heard of any campaigns on the horizon: "I can tell you that I have not heard anybody in Oklahoma talk about a Senate run for Scott Pruitt," Oklahoma GOP political strategist Pat McFerron told Emily.

But what's clear to former Republican EPA chiefs is Pruitt has an entirely different focus than past administrators. Former George W. Bush EPA chief Christine Todd Whitman noted he's spending more time on television and away from headquarters. "You've got plenty on your plate. You really don't have a lot of time to go and do the kinds of stuff he's doing," said Whitman, a former New Jersey governor. EPA declined to comment on Pruitt's future plans but defended his trips. "Unlike the previous administration which imposed its regulatory regime from Washington, Administrator Pruitt is taking the conversations directly to the states," said EPA spokesman Jahan Wilcox.

History lesson: Former GOP-appointed EPA Administrator Bill Ruckelshaus said Pruitt "clearly has not bought into the mission of EPA," and is "more interested in reducing the regulatory impact." Though Pruitt's often compared to Anne Gorsuch, who Reagan appointed to EPA to ease environmental regulations, Ruckelshaus argued the Oklahoman might be more effective at shrinking the agency's profile than Gorsuch who didn't successfully dismantle much. "They weren't as knowledgeable about the laws ... the people they brought in were not very skilled," he said. "What this administration is doing is bringing in somebody who has been suing the agency for a long time, although never very successfully." He said Pruitt and his staff, comprised of Hill staffers, are familiar enough with the statute to be "skillful at unraveling the agency's system." Ruckelshaus added that other news from the administration is distracting from Pruitt's rollbacks.

TGIF AND WE MADE IT EVERYONE! I'm your host Anthony Adragna, and the Senate

Energy Committee's Sean Solie was first to identify Kiribati as the only country in all four hemispheres (though France may as well depending on how you count its land overseas). For today: What's the world's only remaining grand duchy? Send your tips, energy gossip and comments to aadragna@politico.com, or follow us on Twitter @AnthonyAdragna, @Morning_Energy, and @POLITICOPro.

LIFELINE SOUGHT FOR GEORGIA NUCLEAR PROJECT: Southern Co. and Oglethorpe Power Corp. are in talks with the Energy Department to potentially increase the record $8.3 billion loan guarantee for the two troubled new reactors under construction at Plant Vogtle in Georgia, Bloomberg reports. "We have filed an application to potentially increase the amount of funds available for the Vogtle project under our DOE loan guarantee agreement to keep all options open for customers," Georgia Power spokesman Jacob Hawkins told the wire service. People familiar with the discussions say the project's growing costs may mean the companies can qualify for additional government support. DOE spokeswoman Shaylyn Hynes said the agency "continues to have daily conversations with our borrowers about the status of Plant Vogtle."

LET IT (CONTINUE TO) FLOW: Both the Trump administration and the company behind the Dakota Access pipeline argued in briefs filed late Thursday the pipeline should continue to operate while the Army Corps of Engineers revisits an environmental review a federal court ruled earlier this was inadequate. Dakota Access LLC said in its brief "the extremely low likelihood of any harm if the pipeline remains operational" and the "the certain disruption should the Court order otherwise" justified keeping the project running. A federal judge back in June found the Army Corps used flawed risk and environmental justice analysis when clearing the pipeline operator to finish construction.

LET THOSE DRILLING COMMENTS FLOW: Interior officials have plenty of information - 56,000 comments - to weigh as they begin the arduous process of crafting a new five-year offshore drilling plan after Thursday's comment deadline. Some input that caught ME's eyes:

-**Virginia Gov. Terry McAuliffe** asked for his state to not be included after previously expressing openness to the idea provided the state got a cut of drilling revenues. "The program as proposed does not adequately protect Virginia's interests and we hope you will heed our request to exclude our coastal areas," he wrote.

-**Major energy associations** called the drilling plan's expansion to also include new areas in the Atlantic, Eastern Gulf of Mexico, Beaufort and Chukchi seas of Alaska and Pacific. "The decisions made now will have long-lasting impacts on U.S. energy policy," nine trade groups, including the American Petroleum Institute, National Ocean Industries Association and Independent Petroleum Association of America, wrote. "To continue our march towards greater energy independence, bold, forward-looking decisions need to be made."

-**Thirty Democratic senators, led by Oregon's Jeff Merkley,** urged Interior Secretary Ryan Zinke in a letter to maintain existing protections and exclusions in the current 2017-2022 offshore drilling plan. "We believe the existing program correctly excludes areas from the leasing program that pose significant environmental, economic, and cultural risk, as well as face

strong community opposition. We urge you to maintain the protections and exclusions outlined in the current 2017-2022 Program," they wrote.

-**More than 1,500 veterans** wrote Zinke that expanding offshore drilling was not compatible with military readiness. And a coalition of green groups, including Natural Resources Defense Council, the Sierra Club, Earthjustice, Oceana, Greenpeace and the Center for Biological Diversity, said more than 370,000 people were opposed to any drilling expansion. "There are no new facts to consider," the groups said in a statement. "The public opposes this reckless step and there is no need in the United States for the limited energy that would be produced."

TRUMP, SCOTT TALK DIKE FUNDING: Maybe not your ordinary lunch chatter, but Trump and Florida Republican Gov. Rick Scott heavily focused on the state's push to get money to repair a federally operated dike around Lake Okeechobee while breaking bread Thursday, POLITICO Florida's Matt Dixon reports. Florida wants federal money to help repair the Herbert Hoover Dike around the lake. "Governor Scott wants to do all he can to protect Florida's environment and President Trump is very supportive," Scott communications director John Tupps said in a statement.

GORE TO TRUMP: TIME TO RESIGN: Former Vice President and environmental advocate Al Gore urged Trump to quit during an interview released Thursday, POLITICO's Darren Samuelsohn reports. Asked what single piece of advice he'd give Trump, Gore told the website LADbible: "Resign."

Speaking of: Gore will keynote the National Clean Energy Summit co-hosted by former Sen. Harry Reid and Nevada Gov. Brian Sandoval on Oct. 13. "Vice President Gore is the most prominent environmental activist in the world today, and I am pleased my friend is coming to Nevada for the National Clean Energy Summit," Reid said in a statement. More on the summit here.

MAIL CALL! OREGONIANS BACK SUNIVA SOLAR TARIFF PETITION: Five Oregon Democrats, including Senate Finance ranking member Ron Wyden, sent a letter to the International Trade Commission backing "appropriate remedies" to a surge in cheap solar imports that many argue have harmed domestic manufacturers. "Should the ITC make an affirmative finding, we support recommending a remedy that will save and strengthen this important American manufacturing industry," they wrote. The ITC held a public hearing earlier this week on petitions from Suniva and SolarWorld Americas seeking steep tariffs on imported solar cells and modules.

PUMP THE BREAKS ON WOTUS REPEAL: More than 100 House Democrats are out with a letter today to Pruitt urging him to reconsider plans to revamp the Obama administration's Waters of the U.S. rule. "We would be willing to work with an administration that wants to develop thoughtful changes that maintain protections for this life-sustaining resource, but this repeal is reckless," the letter, led by Rep. Don Beyer, says.

MORE LAWMAKERS WEIGH IN ON MONUMENTS: California senior Sen. Dianne Feinstein sent Zinke a letter urging him not to alter the boundaries of the six national monuments

from her state still under review. "I encourage you to visit these remarkable places and witness firsthand their inspirational beauty and significance to our nation," she wrote, thanking Zinke for recommending no changes to the Sand to Snow National Monument on Wednesday. In addition, Rep. Martha McSally (R-Ariz.) sent a somewhat bizarre letter urging Zinke to "carefully consider" the impact of his decisions but offering no recommendations for how he should approach the three other Arizona national monuments still under review.

DOJ sued for monument records: The Western Values Project filed a lawsuit Thursday after DOJ's Office of Legal Counsel didn't respond to FOIA requests seeking records related to any efforts to legally justify a roll back of national monument designations made under the Antiquities Act. "The Trump administration is stonewalling the release of public information as they try to fabricate legal loopholes to revoke or resize national monuments," Jayson O'Neill, Western Values Project's deputy director, said in a statement. In particular, the suit seeks records from DOJ communications with Pacific Legal Foundation and American Enterprise Institute staff, as well as two specific attorneys.

SETTING THE RECORD STRAIGHT: Paul Bailey, president of the American Coalition for Clean Coal Electricity, tells ME his group's paper urging the Department of Energy to rethink parts of its draft grid study was misunderstood by some. "The way this appeared in one trade press ... it sounded like we were being critical of natural gas and that's not really the purpose of the paper or in fact the tone of it," Bailey said. "I hope they would be fair about pointing out the shortcomings of natural gas, as well as the advantages. All electricity sources have pluses and minuses." That said, Bailey said he wants staff to distinguish between reliability and resiliency and note that gas can't always make its way to power plants in emergency situations.

OKLAHOMA REP POISED FOR NASA NOMINATION: Trump is getting ready to tap Oklahoma GOP Rep. Jim Bridenstine as NASA administrator, according to multiple reports this week. Bridenstine has been the rumored selection for months. His selection would likely spell trouble for the agency's Earth science program that studies, among other things, climate change. Back in 2013, Bridenstine demanded an apology from Obama on the House floor for what he called the " gross misallocation" of taxpayer dollars into the study of climate change.

KEEP ON TRUCKIN': EPA plans to reconsider parts of the Obama administration's 2016 Phase 2 emissions rule for heavy-duty trucks, which established new standards for model years 2021-2027 of tractor-trailers, school buses, delivery vans and other large workhorse vehicles, Pro's Alex Guillén reports. The agency may revise trailer standards and a part of the rule that classifies gliders - refurbished engines installed into a new tractor chassis - as a new motor vehicle. It plans to keep separate requirements for tractor engines.

GREENS GO BIG FOR NORTHAM: Virginia's League of Conservation Voters announced Wednesday it would spend $1.1 million on a field campaign boosting Democrat Ralph Northam's bid for governor. The effort will stress door-to-door campaigning in the Richmond area and also back Mark Herring for attorney general and Justin Fairfax for lieutenant governor. "We live in an era of unprecedented attacks on the environment from the federal level and Ralph is the only candidate in this race who will stand up to this radical agenda and do the right thing for the air we breathe, water we drink, and the special places we love," Michael Town, the group's

executive director, said in a statement.

WHILE ZINKE'S AWAY: Deputy Interior Secretary David Bernhardt was in Zinke's home state of Montana Thursday "at the dedication of a new wildlife corridor" at the site of a former mine, he tweeted. Kinross Gold U.S.A., Inc., Trout Unlimited and the Rocky Mountain Elk Foundation teamed up to protect the site near Yellowstone and top politicians, including Gov. Steve Bullock, Sens. Jon Tester and Steve Daines and Rep. Greg Gianforte all attended.

HAVE A LISTEN: DOE is out with a new podcast looking at what next week's solar eclipse might mean for the electric grid. Have a listen here. And the Third Way released a short video detailing how the agency helps develop and commercialize new energy technologies.

MOVER, SHAKER: Ramsey Kropf, former deputy solicitor for Interior's water resources division, has joined Somach Simmons & Dunn as a shareholder. She'll work out of the firm's Boulder, Colo. office in its western water practice.

CONGRATS! Jeff Grappone, who works in corporate communications at Siemens USA, proposed to Amy Graham, who works in public affairs at the EPA, on Tuesday. "Jeff proposed on Siasconset Beach in Nantucket and they celebrated at dinner in town with friends before finishing the night at the Club Car's piano bar." A picture of the couple here. Driving the Day

Good Friday morning and welcome to December. THE SENATE IS SCHEDULED TO RESUME WORK ON THE TAX BILL this morning. Late yesterday, the process hit a snag.

SEUNG MIN KIM and **COLIN WILHELM:** "Multiple GOP senators leaving the chamber after a dramatic late afternoon vote said a key proposal for deficit hawks -- a trigger to raise tax rates if sufficient economic growth did not materialize -- would not pass procedural muster and would need to find something else to satisfy the bloc of deficit hawk holdouts, led by Sen. Bob Corker (R-Tenn.).

"'It doesn't look like the trigger is going to work, according to the parliamentarian,' Senate Majority Whip John Cornyn (R-Texas) said. 'So we have an alternative, frankly: a tax increase we don't want to do to try to address Sen. Corker's concerns.'" http://politi.co/2iqAOpU

-- **WAPO'S ERICA WERNER, MIKE DEBONIS** and **DAMIAN PALETTA:** "Now, Republican leaders may have to brace for an intraparty battle over how far to go to accommodate deficit concerns. Other Republicans are arguing strongly against reducing the size of the bill's tax cut, as may now be necessary to satisfy the deficit hawks. ...

"Thursday evening, senators were eyeing a wide range of options to move legislation forward. They are discussing adding higher taxes on upper-income Americans and modestly rolling back the bill's large corporate tax cut. But they did not have an obvious solution, given the need to add hundreds of billions of revenue back into the bill. ...

"The debate is now expected to spill into Friday night. Corker and Flake are both retiring from the Senate and are not up for reelection, giving Republican leaders little leverage over them. And Johnson has pushed his challenge of GOP leaders, some of whom he believes abandoned him during his reelection effort last year." http://wapo.st/2AKXE2N

-- WSJ'S RICH RUBIN, SIOBHAN HUGHES and **KRISTINA PETERSON:** "One possible outcome is that the corporate tax rate would start at 20% and rise in stair-step increments in later years. That move could shrink the size of the tax cut by at least $350 billion over a decade, making it about three-quarters of its previous size and potentially dampening some of the economic growth Republicans said they are trying to create.

"White House congressional liaison Marc Short, who was dashing between Republican leadership offices, said that Republicans were still on track and the legislation's goals would remain the same. Referring to the possible change on corporate taxes, Mr. Short said, 'Even if that happens, it provides record tax relief for the corporate side, and middle-income families.'" http://on.wsj.com/2Aii3v4

ALL EYES will be on Senate Majority Leader Mitch McConnell who still must convince the skeptical deficit hawks to vote for the bill. **WHO TO WATCH -- THE USUAL SUSPECTS:** Sens. Bob Corker (R-Tenn.), Jeff Flake (R-Ariz.) and Ron Johnson (R-Wis.).

UNDER THE RADAR -- "Tax bill could trigger historic spending cuts," by Adam Cancryn and Sarah Ferris: "Republicans are on the verge of a massive tax overhaul that would hand President Donald Trump his first major legislative victory. But the $1.5 trillion tax package could trigger eye-popping cuts to a slew of federal programs, including Medicare. Unless Congress acts swiftly to stop it, as much as $150 billion per year would be cut from initiatives ranging from farm subsidies to student loans to support services for crime victims. Medicare alone could see cuts of $25 billion a year. And the specter of those cuts has thrust Congress into a high-stakes game of political chicken.

"With so much attention focused on the tax bill itself neither lawmakers nor many of the advocacy groups had paid as much attention to the depth and breadth of the cuts that will ensue unless the House and Senate come up with a bipartisan deal to stop them. Some groups had run Medicare ads, but they were largely overshadowed by the tax debate itself." http://politi.co/2BvVzVz

A REMINDER of what's on Washington's radar this month: renewing a massive children's health program, government funding, a rewrite of the country's tax code, restoring subsidies for the health care law, working on a fix so hundreds of thousands of undocumented people do not get deported and a deal to lift spending caps.

ONE WEEK until the government runs out of money.

SHUTDOWN WATCH -- "Trump tells confidants that a government shutdown might be good for him," by WaPo's Josh Dawsey, Sean Sullivan and Ed O'Keefe: "President Trump has told confidants that a government shutdown could be good for him politically and is focusing on his hard-line immigration stance as a way to win back supporters unhappy with his outreach to Democrats this fall, according to people who have spoken with him recently. Over the past 10 days, the president has also told advisers that it is important that he is seen as tough on immigration and getting money for a wall along the U.S.-Mexico border, according to two people who have spoken with him. He has asked friends about how a shutdown would affect him politically and has told several people he would put the blame on Democrats." http://wapo.st/2j4xsFY

-- YOU WON'T FIND many Republicans on Capitol Hill who think that a shutdown is good for them.

THE NEW BOSS AT LANGLEY? -- "Cotton cements his rise under Trump: The Arkansas senator, under consideration as a potential successor to Mike Pompeo as CIA director, has chosen to shape the president rather than railing against him," by Eliana Johnson and Ali Watkins: "Cotton's appointment would cement his meteoric rise in Republican politics, the result of qualities that have taken him, in a matter of years, from freshman congressman to the youngest serving U.S. senator to, potentially, the youngest CIA director in American history: loyalty, brains and raw ambition.

"He also embodies one of the GOP's responses to Trump. Having already shared some of the president's populist leanings, he has worked to co-opt and shape the president rather than rail against him. An ideological conservative from the American heartland, Cotton came up through the Ivy League and was groomed by some of the country's leading conservative thinkers, from the Weekly Standard's Bill Kristol, one of Trump's leading critics, to the acolytes of Leo Strauss at the Claremont Institute who have been far more supportive of the president." http://politi.co/2zUjn8F

-- "White House wanted to publicly shame Tillerson, source says," by CNN's Michelle Kosinski and Sara Murray: "Reports that the White House has a tentative plan to replace Secretary of State Rex Tillerson that emerged Thursday were an effort to express President Donald Trump's deep displeasure and publicly shame his secretary of state, a source with direct knowledge of the White House's thinking said Thursday. The hope from the White House, the source said, is to push out the plan to replace Tillerson and then 'wait for him to punch out.'" http://cnn.it/2AK0WDn

-- "We'll take Pompeo over Tillerson, frustrated diplomats say: Even skeptics of the hawkish CIA director say they would welcome a change - and a solid Trump ally - at the helm of their beleaguered department," by Nahal Toosi: http://politi.co/2jzwIYM

-- NYT'S MARK LANDLER: "Replacing Tillerson With Pompeo Would Supplant a Moderate With a Hawk": "For all his political and bureaucratic stumbles, Secretary of State Rex W. Tillerson has been a steady voice of moderation in how the Trump

administration engages with the world.

"That voice will be lost if, as expected, President Trump replaces Mr. Tillerson at the State Department with Mike Pompeo, a hard-line former Republican congressman who has brought an avowedly political edge to the Central Intelligence Agency, where he is the director. Mr. Pompeo, a West Point graduate best known for savaging Hillary Clinton's response to the deadly attack in Benghazi, Libya, when she was secretary of state, has called for the Iran nuclear agreement to be ripped up, played down talk of Russia's interference in the 2016 election and suggested that regime change in North Korea would be a welcome development.

"Those views have put him in good stead with Mr. Trump, whom White House aides said has come to value Mr. Pompeo's pungent opinions and hard-charging style during his presidential daily briefings. Mr. Trump, by contrast, has publicly undermined Mr. Tillerson while the secretary of state has responded with thinly veiled contempt." http://nyti.ms/2jzZatP

****** **A message from PhRMA: How much are hospitals marking up medicine prices?** According to new Moran Company analysis, hospitals mark up medicine prices nearly 500 percent. The analysis of 20 medicines also found a hospital is paid 2.5 times what the biopharmaceutical company, who brought the medicine to market, receives. Read more: http://onphr.ma/2hSaqox ******

TRUMP'S FRIDAY -- Trump is meeting with Prime Minister Fayez al-Sarraj of Libya. He will have lunch with Secretary of State Rex Tillerson and Defense Secretary James Mattis. This afternoon, he will give a speech at a White House Christmas reception.

SAN FRANCISCO CHRONICLE -- "Kate Steinle trial: Garcia Zarate acquitted in San Francisco pier killing," by Vivian Ho: "A jury handed a stunning acquittal on murder and manslaughter charges to a homeless undocumented immigrant whose arrest in the killing of Kate Steinle on a San Francisco Bay pier intensified a national debate over sanctuary laws. ... [T]he Superior Court jury ... [found] credence in defense attorneys' argument that the shot that ricocheted off the concrete ground before piercing Steinle's heart was an accident, with the gun discharging after the defendant stumbled upon it on the waterfront on July 1, 2015.

"Garcia Zarate, a 45-year-old Mexican citizen who was released from County Jail before the killing despite a federal request that he be held for his sixth deportation, was convicted of a single lesser charge of being a felon in possession of a gun. He faces a sentence of 16 months, two years or three years in state prison. ... U.S. Attorney General Jeff Sessions blamed the killing on San Francisco's policy of refusing cooperation with immigration agents. Jim Steinle, who had been strolling on the pier with his daughter when she fell, told The Chronicle he was 'saddened and shocked,' adding, 'Justice was rendered, but it was not served.'" http://bit.ly/2BATsQt

--@realDonaldTrump at 10:30 p.m.: "A disgraceful verdict in the Kate Steinle case! No

wonder the people of our Country are so angry with Illegal Immigration." ... **at 6:03 a.m.:** "The Kate Steinle killer came back and back over the weakly protected Obama border, always committing crimes and being violent, and yet this info was not used in court. His exoneration is a complete travesty of justice. BUILD THE WALL!" ... **at 6:13 a.m.:** "The jury was not told the killer of Kate was a 7 time felon. The Schumer/Pelosi Democrats are so weak on Crime that they will pay a big price in the 2018 and 2020 Elections."

THE RUSSIA REPORT -- "Trump Pressed Top Republicans to End Senate Russia Inquiry," by NYT's Jonathan Martin, Maggie Haberman and Alex Burns: "President Trump over the summer repeatedly urged senior Senate Republicans, including the chairman of the Senate Intelligence Committee, to end the panel's investigation into Russia's interference in the 2016 election, according to a half dozen lawmakers and aides. Mr. Trump's requests were a highly unusual intervention from a president into a legislative inquiry involving his family and close aides.

"Senator Richard Burr of North Carolina, the intelligence committee chairman, said in an interview this week that Mr. Trump told him that he was eager to see an investigation that has overshadowed much of the first year of his presidency come to an end.

"'It was something along the lines of, 'I hope you can conclude this as quickly as possible," Mr. Burr said. He said he replied to Mr. Trump that 'when we have exhausted everybody we need to talk to, we will finish.' In addition, according to lawmakers and aides, Mr. Trump told Senator Mitch McConnell of Kentucky, the Republican leader, and Senator Roy Blunt, Republican of Missouri and a member of the intelligence committee, to end the investigation swiftly." http://nyti.ms/2jz8vSF

-- "Manafort strikes $11 million bail deal with prosecutors," by Josh Gerstein and Darren Samuelsohn: "Former Trump campaign chairman Paul Manafort has reached an $11 million bail agreement with prosecutors that could clear the way for him to be released from the house arrest he's been under for the past four weeks. In court filings released Thursday afternoon, Manafort's defense attorneys revealed 'an agreed-upon bail package' with lawyers from special counsel Robert Mueller's office, which obtained an indictment last month charging Manafort and business partner Rick Gates with money laundering and failing to register as foreign agents." http://politi.co/2zTwwik

-- "Russian trolls pushed graphic, racist tweets to American voters," by NBC News' Ben Popken: "A zealous band of Russian trolls flooded Twitter with hundreds of thousands of divisive posts in 2016 - accusing Democrats of satanic practices and supporting rape - in an attempt to influence the presidential election, according to a new analysis of a Twitter database by NBC News. The effort tricked thousands of users into spreading graphic racial epithets across social media, interweaving provocative content with disinformation and falsehoods. The tweets were uncovered in a database of over 202,000 deleted Russian troll tweets that NBC News compiled." http://nbcnews.to/2AlUakw

-- "Erik Prince details Seychelles meeting with Russian banker," by CNN's Manu

Raju, Jeremy Herb and Marshall Cohen: "Blackwater founder Erik Prince testified to House lawmakers that he met the head of a Russian investment fund earlier this year -- but he insisted it was not part of an effort to set up a Russian backchannel with the Trump administration, multiple sources told CNN. In private testimony Thursday, Prince informed the House Intelligence Committee that he met in the Seychelles with Kirill Dmitriev, who is the chief executive of the state-run Russian Direct Investment Fund, at the request of the United Arab Emirates to discuss business opportunities.

"The meeting on the island in the Indian Ocean, he said, lasted roughly 20 minutes after dinner over a beer. Prince insisted he did not have the meeting at the request of the Trump administration, according to multiple sources with direct knowledge of the situation. ... But Prince downplayed his ties to the Trump's team, merely saying he was a Trump donor and had met the President on only one occasion, the sources said." http://cnn.it/2ApsLxV

-- "Trump Associate Felix Sater Selling His $2.5M Long Island Manse," by Realtor.com's Becky Bracken: "Called one of the 'most colorful characters' in the ongoing Justice Department investigation into ties between President Donald Trump and Russia, real estate developer Felix Sater is now selling his home in Sands Point, NY, for just under $2.5 million. The four-bedroom, 3.5-bath, 3,600-square-foot home is surrounded by lush foliage, and walls of arborvitaes offer privacy for lounging by the pool. It's a pristine Long Island property on nearly 2 acres that any family would love to call home." ***With four pics*** http://bit.ly/2AoLZDX

SCOOP -- "The Trump Administration Is Mulling A Pitch For A Private 'Rendition' And Spy Network," by BuzzFeed's Aram Roston: "The White House and CIA have been considering a package of secret proposals to allow former U.S. intelligence officers to run privatized covert actions, intelligence gathering, and propaganda missions, according to three sources who've been briefed on or have direct knowledge of the proposals. One of the proposals would involve hiring a private company, Amyntor Group, for millions of dollars to set up a large intelligence network and run counterterrorist propaganda efforts, according to the sources.

"Amyntor's officials and employees include veterans of a variety of U.S. covert operations, ranging from the Reagan-era Iran-Contra affair to more recent actions in Iraq and Afghanistan. ... Another proposal presented to U.S. officials would allow individuals affiliated with the company to help capture wanted terrorists on behalf of the United States. In keeping with that proposal, people close to the company are tracking two specific suspects in a Middle Eastern country, the sources said, for possible 'rendition' to the United States." http://bzfd.it/2nkUfBR

WHAT RON DERMER IS READING -- "Trump inches toward moving U.S. Embassy to Jerusalem: The president promised during the campaign to support the move from Tel Aviv, but delayed it in June amid efforts to revive the Middle East peace process," by Andrew Restuccia and Eliana Johnson: "President Donald Trump and his senior aides are mulling a plan to eventually move the U.S. Embassy in Israel from Tel Aviv to

Jerusalem, a decision that could derail Trump's attempts to restart peace talks between the Israelis and the Palestinians.

"A leading option under consideration: temporarily keeping the U.S. embassy in Tel Aviv while also outlining a longer-term strategy to begin the process of moving the embassy to Jerusalem, according to two administration officials. The plan is meant to strike a middle ground on the politically treacherous issue. One of the officials also said the administration is weighing whether to officially recognize Jerusalem as the capital of Israel." http://politi.co/2zSjVeY

FIRST IN PLAYBOOK - WHAT JARED SAID LAST NIGHT -- JARED KUSHNER spoke at a dinner hosted by Egyptian Ambassador Yasser Reda and Nahla Reda in the Kennedy Caucus Room in the Senate to commemorate the 40th anniversary of former Egyptian President Anwar Sadat's visit to Jerusalem. "Forty years ago, President Anwar Sadat stood before the Knesset in Jerusalem, where his very presence, less than five years after the 1973 War, was something of a miracle. ... President Sadat demonstrated the courage that all great leaders need and too few possess. He took a risk for peace and earned a Nobel Prize for taking that risk. He also paid for that risk with his life. But the peace endures today, and the region is more stable and the opportunities for progress more plentiful as a result. Anwar Sadat understood that a country needed more than military strength to be great.

"His decision to chart Egypt on a course of peace and co-existence was an act of moral courage. ... President Sadat's dream -- a peaceful, thriving Egypt -- is a model for the world, but we should be under no illusions about the task facing us all as we continue to make that dream of peace and prosperity a reality. ... It is an honor to be here tonight, with the Former First Lady Jehan Sadat and Ambassador Yasser Reda as we stand together with America's close friend and partner in fighting terror. It is also great to have Israeli Ambassador Ron Dermer here this evening ... Tonight we remember a great man. His mission endures."

SPOTTED: Treasury Secretary Steven Mnuchin and Veterans Affairs Secretary David Shulkin, Sen. Ed Markey (D-Mass.), former Sen. Norm Coleman (R-Minn.), Reps. Mark Meadows (R-N.C.), Doug Lamborn (R-Colo.), Ed Royce (R-Calif.), and Darrell Issa (R-Calif.), Sergio Gor, Andy Westberry, Ezra Friedlander, Jacob Olidort.

COMING ATTRACTIONS -- "House GOP leaders preparing to bring gun measures to the floor," by Kyle Cheney and John Bresnahan: "House Republican leaders are preparing to move ahead with a package of gun legislation that would sharply expand concealed-carry rights but also address policies that came into play during two recent mass shootings. The proposal is expected to come to the floor as soon as next week. GOP leaders conducted a full whip count of the plan Thursday and sensed enough support from colleagues to bring up the measure, a combination of three proposals that would include a major policy win for gun rights advocates but also seek to placate those clamoring for policy changes following two of the worst shooting massacres in American history -- in Las Vegas and Sutherland Springs, Texas." http://politi.co/2kbVVwt

PIC DU JOUR -- @SteveRudinABC7: "The National Tree Lighting ceremony was beautiful this evening - but hard not to notice the empty seats. #Christmas #DMV #USA" http://bit.ly/2kdXIkl

JOHN MCENTEE PROFILE -- "The Trick-Shot QB Who Played His Way Into Trump's Inner Circle," by Nancy Cook and Ben Strauss: "At age 27, John McEntee, a former University of Connecticut quarterback and star of a viral YouTube trick-throw video, former low-level Fox News staffer and campaign official, now makes $115,000 a year as Trump's personal aide and body man. How he rose to this level of prominence is in some respects the quintessential tale of success within Trump's organization, where loyalty and looks often matter more than résumé. Athletically handsome and a sharp dresser-one former campaign official called him 'so pretty'-McEntee arrived at Trump's doorstep in August 2015 with no more qualifications than his determination to make the boss happy.

"[H]e has a conspicuously low profile -- McEntee's a 'lock box,' in the words of his father and one White House aide, who won't even dish to his own family. 'He literally loves the president. Not even to me, he would never say anything negative, not in a million years,' his father, John, says. 'He loves the president and that family. Jared and Ivanka, too.'" http://politi.co/2noAsBR

ALABAMA LATEST -- "Bannon-backed group makes six-figure ad buy in last-minute push for Moore," by CNN's Kaitlan Collins: "With less than two weeks to go in a volatile special election that has been rocked by allegations of sexual assault against the Republican front-runner, the group, Great America Alliance, is purchasing $150,000 worth of television, radio and digital ads to hit Moore's Democratic opponent, Doug Jones, for his positions on issues like abortion. ... One of the commercials that Great America Alliance will run, which the group initially released online, calls Jones' views on abortion 'deceptive and dangerous.'" http://cnn.it/2jzN1F6 ... ***The ad*** http://bit.ly/2BCoxDw

SEXUAL HARASSMENT FILES -- "Conyers vs. Franken: Black lawmakers suggest double standard," by Heather Caygle: "Black lawmakers are hearing growing calls for Rep. John Conyers to resign and wondering why Sen. Al Franken isn't getting the same treatment. Members of the Congressional Black Caucus have been privately airing concerns about a double standard within Democrats' ranks since sexual harassment allegations against Conyers, the longest serving House member and a founder of the CBC, first surfaced last week. Their concerns were thrust into the open Thursday when Conyers' lawyer hinted that Conyers was being treated differently than Franken because of race." http://politi.co/2AJ9udK

-- "Congress secretly paid nearly $100,000 to settle harassment claims against disgraced congressman," by ABC News' Justin Fishel: "The Congressional Office of Compliance secretly paid close to $100,000 in taxpayer funds to settle sexual harassment claims from at least two young male staffers who worked for disgraced former Congressman Eric Massa, multiple sources with direct knowledge of the matter told ABC News. The claims were settled after Massa, a Democrat from upstate New York, resigned in 2010 amid a pending ethics investigation into allegations he groped and sexually harassed members of his staff." http://abcn.ws/2j3MZWu

MEDIAWATCH -- "White House extends special holiday-party welcome to behind-the-scenes CNN staffers," by WaPo's Erik Wemple: "CNN journalists, buffeted by brutal news cycles, are as festive as any other media types around this time of year. Yet the network decided that it wouldn't be spreading the joy at this year's White House Christmas party. ... The White House, however, is showing some disdain for top-down holiday-party invitation rejections. According to a CNN source, White House deputy press secretary Lindsay Walters on Thursday afternoon sent the following appeal to a dozen-plus CNN staffers who work behind the scenes to produce the network's coverage of news at the White House:

"'Good Afternoon, The President wanted you to know that while the rest of CNN will not be attending the Christmas reception, if you're able to he is still happy to have you - the cameramen, sound, and other technicians, who work so tirelessly behind the scenes - to come participate. You and your guest will be on the list at the entrance. Please note this invitation is nontransferable. Best, Lindsay.'" http://wapo.st/2BAIvyl

Subject: Morning Energy, presented by Chevron: Trump feuds as Puerto Rico struggles — Deregulatory push gets White House spotlight today — White House clamps down on non-commercial travel

By Anthony Adragna | 10/02/2017 05:41 AM EDT

DIRE SITUATION IN PUERTO RICO AMID TRUMP ATTACKS: President Donald Trump spent the weekend tweeting defenses of his administration's response to Hurricane Maria in Puerto Rico from his New Jersey golf resort but his words bear little resemblance to the dire situation on the ground. Just 5 percent of the island has electricity and more than half of people lack access to clean drinking water more than a week and a half after the hurricane.

View from the ground: Trump in a series of weekend tweets bashed the "poor leadership ability" of Puerto Rican officials, who he said "want everything to be done for them," POLITICO's Matthew Nussbaum and Marc Caputo report. But Lt. Gen. Jeffrey Buchanan, who the Defense Department tapped to lead its response efforts, told the PBS NewsHour "this is the worst I've ever seen" in terms of damage from the storm. And Carmen Yulín Cruz, San Juan's mayor and the target of a number of Trump's Twitter missives, told ABC's "This Week" of the federal officials responding: "Their heart is in the right place, but we have to cut the red tape. That's the one message."

Several relief officials told Matthew and Marc over the weekend that the administration's patting itself on the back over the response was not helping, especially as the conditions on the ground in no way matched the rhetoric. "We have to think of this as societal collapse: no power, no water, no food, no nothing," one relief official told them from Puerto Rico. "We came in thinking this would be a traditional model of disaster response ... It is up to us to keep everything moving. Civil society is pretty much gone, and we didn't realize that until like 36 or 48 hours ago. And who knows when it's going to end." Senate Minority Leader Chuck Schumer summed up his view of the response during an interview with CBS' "Face the Nation": "The bottom line is at least for the first week and a half the effort has been slow footed, disorganized, and not adequate," he said.

Administration mounts defense: FEMA Director Brock Long told "Fox News Sunday" the administration continued to make daily progress on improving the situation but added "absolutely" there was a long road ahead. "This is the most logistically challenging event the United States has ever seen and we have been moving and pushing as fast as the situation allows," Long said. "It's going to be multiple — multiple months before power is restored to many of these areas and that's just a reality." In an update obtained by Axios, Tom Bossert, Trump's homeland security adviser, wrote: "Lack of power and the persistent commodity distribution problems on the island are major focuses right now. This is still an urgent situation."

WELCOME TO MONDAY! I'm your host Anthony Adragna, and NOIA's Nicolette Nye was first up to name Rep. Dana Rohrabacher as the former Reagan speechwriter. For today: Which former congressperson joined the Green Party in 2008 and became their presidential candidate?

Send your tips, energy gossip and comments to aadragna@politico.com, or follow us on Twitter @AnthonyAdragna, @Morning_Energy and @POLITICOPro.

WHITE HOUSE TIGHTENS REINS ON CABINET TRAVEL: After Tom Price's resignation Friday over hundreds of thousands in private flights, White House Chief of Staff John Kelly must now approve almost all travel on "government-owned, rented, leased, or chartered aircraft," POLITICO's Matthew Nussbaum reports. "Every penny we spend comes from the taxpayer," OMB Director Mick Mulvaney wrote in a memo shortly after Price's resignation. "We thus owe it to the taxpayer to work as hard managing that money wisely as the taxpayer must do to earn it in the first place." Officials should stick to commercial travel "with few exceptions," he wrote. Remember both EPA Administrator Scott Pruitt and Interior Secretary Ryan Zinke have faced scrutiny in recent days for non-commercial travel.

Key line from memo: "Put another way, just because something is legal doesn't make it right."

Questions for Zinke continue: The Campaign for Accountability on Friday asked Office of Special Counsel and Interior's inspector general to probe whether Zinke violated the Hatch Act by speaking to the NHL's Vegas Golden Knights. He spoke at the dinner organized by team owner Bill Foley, one of Zinke's biggest campaign donors. Then, as POLITICO first reported, he hopped a $12,000 charter flight to an airport 20 minutes away from his Montana residence.

Some argue Pruitt, Zinke deserve Price's fate: A number of green and progressive groups urged Trump to also fire Pruitt and Zinke due to their non-commercial travel. "Forcing Tom Price from office does not come close to answering questions in the Trump Administration about the abuse of taxpayer funds when Ryan Zinke and Scott Pruitt are unrepentantly wasting hundreds of thousands on their own luxurious travel and sticking hardworking Americans with the bill," Sierra Club executive director Michael Brune said in one statement. "They deserve Price's fate and should be removed from office immediately."

MORE PUSHBACK TO PERRY'S FERC ASK: Count the solar and wind industries among those concerned by Energy Secretary Rick Perry's push to throw a lifeline to the struggling coal and nuclear industries (ICYMI Pro's Darius Dixon dived deep into the proposal Perry launched Friday). "The best way to guarantee a resilient and reliable electric grid is through market-based compensation for performance, not guaranteed payments for some, based on a government-prescribed definition," Amy Farrell, senior vice president for the American Wind Energy Association, said in a statement.

Same worries for solar: Christopher Mansour, vice president of federal affairs for the Solar Energy Industries Association: "While we agree that wholesale markets should fully compensate generators for all the energy, capacity and ancillary services they provide, healthy competition should always promote the best, most innovative solutions," he said. The conservative R St. Institute called Perry's plan "an arbitrary backdoor subsidy to coal and nuclear plants."

DEREGULATORY PUSH GETS SPOTLIGHT TODAY: Trump is expected to deliver remarks today at 11 a.m. highlighting his administration's efforts to remove regulatory burdens across the federal government to drive economic growth. Don't expect any major new initiatives

to be announced, but ME would be shocked if the efforts of EPA to halt or delay a host of Obama-era regulations don't make a major appearance. That'll be followed by a series of breakout sessions with 10 agencies, including the Energy and Interior departments.

Not on the list? EPA, though the agency is doing its own event Tuesday to launch what it's calling Smart Sectors. EPA spokeswoman Liz Bowman said it's "a program that aims to facilitate meaningful collaboration with regulated sectors, sensible policies to improve environmental outcomes, and better EPA practices and streamlined operations." As Pro's learned last week, the event will designate staff liaisons for specific industries including oil and gas and utilities and power generation.

Pre-buttal: Public Citizen and Coalition for Sensible Safeguards put out their pre-buttal to the speech and say Trump's agenda is "premised on a series of demonstrably false claims about the costs of regulation, defies public opinion and major campaign promises, and represents a craven attempt at self-enrichment and payback to corporate donors." They'll host a press call at 1:30 p.m., along with Rep. David Cicilline, responding to his remarks.

A taste of today's remarks: Here's how Trump summed up his deregulatory efforts to the National Association of Manufacturers on Friday: "We are cutting regulations at a pace that has never even been thought of before — not even thought of. This is a groundbreaking campaign and involves every department and agency across our government."

A preview (via Playbook): A photo inside the White House from a tipster with the pages on the right showing "the number of pages in the [Code of Federal Regulations] today, which is a measure of all regs on the books (Fed Register are just new ones), versus the # about a half-century ago" on the left side. Click here.

** **A message from Chevron**: We're piloting a program that uses drones to keep an eye on Chevron wells, tanks, and pipelines—all to keep DOERS and what they're doin' safer. Watch the video: http://politi.co/2xO60oe **

ARKEMA UNDER INVESTIGATION: The Harris County District Attorney's Office announced Friday it was investigating the Houston-area Arkema plant whose volatile chemicals exploded in the aftermath of Hurricane Harvey, The Houston Chronicle reports. "Companies should be on notice that we care when they pollute our air, our water, our environment," District Attorney Kim Ogg said. "We are looking into exactly what happened at the plant. We are gathering facts and we will apply the law. Arkema is under criminal investigation."

MAIL CALL! LET'S DO IT, PRUITT: The Senate Environment and Public Works Committee Democrats, led by ranking member Tom Carper, sent Chairman John Barrasso a letter Friday urging him to schedule a hearing on EPA's budget request where Pruitt would testify. "We are concerned that this necessary hearing is long overdue," they wrote. Barrasso would only tell reporters last week he planned to have Pruitt appear before the committee "this year."

BORING BUT IMPORTANT: POLITICO's Danny Vinik looks at an important issue likely

floating under your radar: the federal government's workforce continues to get older and younger people aren't stepping in to fill in the gaps. "It's that smart agencies develop a plan for a pipeline. The federal government's biggest problem is it's not very good at pipeline planning," Don Kettl, a professor at the University of Maryland who has written extensively on government management, said.

TAKE A GLANCE! Interior released a report Friday finding it contributed 1.7 million jobs and $254 billion in economic output during fiscal 2016. Among the conclusions: Interior-managed lands and waters produced 768 million barrels of crude oil, 4.7 trillion cubic feet of natural gas, and 310 million tons of coal. Its lands and facilities also generated enough hydropower to power 3.4 million homes.

SOMETHING'S PHISHY HERE: EPA employees were targeted by a phishing scheme seeking to steal large amounts of office supplies from the U.S., according to a podcast released Friday by the agency's inspector general. Photos of some of the phishing messages posted here.

MOVER, SHAKER: Brandon VerVelde has joined the House Science, Space and Technology Committee as press secretary and as an on-the-record spokesperson. He was previously director of communications for the Asian American Hotel Owners Association.

LIGHTER CLICK: Count Senate Energy Chairman Lisa Murkowski as those sharing super awkward old pictures of themselves to help fundraise help for Puerto Rico (though she left out the key hashtag of #PuberMe). Anyways, pic here. Also, apparently you can catchy your super trendy energy chairman playing cornhole down by Nats Park during the weekend.

HAPPENING THIS WEEK

MONDAY

12:00 p.m. — "The Trump Administration and Federal Land," Women's Council on Energy and the Environment, Beveridge & Diamond PC, 1350 I Street NW

TUESDAY

9:00 a.m. — "Carbon Capture: A Business Opportunity in the Global Low-Carbon Economy," Global CCS Institute, National Press Club, 529 14th Street Northwest

10:00 a.m. — "Resiliency: The Electric Grid's Only Hope," House Science, Space and Technology Committee, Rayburn 2318

10:00 a.m. — Legislative hearing on H.R. 3400, House Natural Resources Committee, Longworth 1334

10:15 a.m. — Senate Energy and Natural Resources Committee holds hearing to consider various nominations, Dirksen 366

10:30 a.m. — "Full Committee Hearing to Examine Energy Storage Technologies," Senate Energy and Natural Resources Committee, Dirksen 366

2:00 p.m. — "Part II: Powering America: Defining Reliability in a Transforming Electricity Industry," House Energy and Commerce Energy Subcommittee, Rayburn 2123

2:30 p.m. — Senate Energy and Natural Resources Subcommittee hearing on various bills, 366 Dirksen

WEDNESDAY

9:30 a.m. — Natural Gas Supply Association holds its winter outlook media briefing for 2017-2018, RSVP: hinson.peters@ngsa.org

10:00 a.m. — Full committee markup on various bills, House Natural Resources Committee, Longworth 133

10:00 a.m. — Senate Environment and Public Works Committee holds hearing on various EPA, NRC nominees, Dirksen 406

10:00 a.m. — "Air Quality Impacts of Wildfires: Perspectives of Key Stakeholders," House Energy and Commerce Environment Subcommittee, Rayburn 2123

2:00 p.m. — House Natural Resources Subcommittee on Indian, Insular and Alaska Native Affairs holds legislative hearing on three bills, Longworth 1334

3:00 p.m. — House Natural Resources Committee holds members forum to discuss rescue and recovery in Puerto Rico and the U.S. Virgin Islands, location: TBD

3:00 p.m. — Senate HELP Committee holds hearing on mine safety nominee, Dirksen 430

THURSDAY

9:30 a.m. — CSIS discussion on the future of electrification, Center for Strategic & International Studies, 1616 Rhode Island Ave NW

10:00 a.m. — "Powering America: Consumer-Oriented Perspectives on Improving the Nation's Electricity Markets," House Energy and Commerce Energy Subcommittee, Rayburn 2123

12:00 p.m. — "The Growing Role of Liquefied Natural Gas in Latin America," Atlantic Council, 1030 15th ST NW, 12th Floor

12:30 p.m. — "How Agencies Reverse Policy: Stays, Remands, and Reconsideration," Environmental Law Institute, 1101 K Street, NW, President's Room

FRIDAY

9:00 a.m. — 2017 Veterans In Energy Forum, NRECA, 4301 Wilson Blvd. Arlington, VA 22203

THAT'S ALL FOR ME!

Trump picks risky Puerto Rico fight Back

By Matthew Nussbaum and Marc Caputo | 09/30/2017 07:50 AM EDT

The natural disaster in Puerto Rico has escalated into a firestorm for President Donald Trump, whose Saturday Twitter attack on the mayor of San Juan drew harsh condemnations, new charges of insensitivity, and warnings about political fallout.

In a series of Saturday morning tweets, Trump blasted the "poor leadership ability" of Puerto Rican officials, who he said "want everything to be done for them." Trump also said the island's leaders "are not able to get their workers to help," and accused the Democratic mayor of San Juan — who has publicly criticized his administration's response to Hurricane Maria — of scoring partisan political points.

Even Republicans were uncomfortable seeing television images of suffering Puerto Ricans

juxtaposed with Trump's fighting words, tweeted from his luxury golf course in Bedminster, New Jersey.

"He is definitely not helping," said Republican state Rep. Bob Cortes, a Puerto Rico native who lives in Central Florida, which has seen a huge influx of Puerto Rican families in recent years. Cortes added that the controversy "gives [Democrats] a platform to register new voters."

Other Republicans also worry that Trump's comments could be a godsend to Democrats in Florida—a swing state whose Puerto Rican population of more than 1 million is expected to swell as people flee the storm's aftermath.

Ten days after Maria ravaged the island, most of Puerto Rico is still without power and many of its 3.4 million residents, most of them U.S. citizens, lack basic supplies like food and water. Critics say the Trump administration has been slow to help, with some invoking the aftermath of Hurricane Katrina in New Orleans a decade ago.

The perception that George W. Bush oversaw an incompetent and insensitive response to Katrina dealt a crippling blow to his presidency from which he never recovered, helping to drive his approval ratings to the low 20s. Trump officials scoff at the comparison with Katrina, saying their response to Maria has been appropriate.

In Washington, Democrats were swift to condemn Trump's tweets Saturday.

Rep. Bennie Thompson of Mississippi, the top Democrat on the House Homeland Security Committee, released a statement calling Trump's tweets "abhorrent, baseless, and ... beneath the dignity of the office of the Presidency."

"Lives are on the line and people are dying," he added.

Trump's early morning broadsides, which began at 7:19 a.m., came after San Juan Mayor Carmen Yulín Cruz slammed the administration's response repeatedly on Friday amid growing media coverage of the devastation on her island.

"We are dying here," Cruz said in an emotional plea. "If anybody out there is listening to us, we are dying, and you are killing us with the inefficiency and the bureaucracy." Puerto Rican officials say Maria killed at least 16 people there — a number experts believe will grow significantly.

From Bedminster, Trump defended his response while dismissing Cruz as a partisan.

"The Mayor of San Juan, who was very complimentary only a few days ago, has now been told by the Democrats that you must be nasty to Trump," Trump wrote on Twitter. "Such poor leadership ability by the Mayor of San Juan, and others in Puerto Rico, who are not able to get their workers to help."

Trump added that the Puerto Ricans "want everything to be done for them when it should be a

community effort. 10,000 Federal workers now on Island doing a fantastic job."

But Republicans are anxious about the political effect the Puerto Rico crisis might have on Trump's national standing as well as their fortunes in Florida, where Gov. Rick Scott is mulling a bid against Democratic incumbent Sen. Bill Nelson next year. The past four top-of-the-ticket races in Florida were decided by 1.2 percentage points or less. Puerto Rican voters already tend to favor Democrats.

"It is a political nightmare for both Trump and Scott," a consultant associated with the Republican National Committee said in a text message. He said the disaster and Trump's "asinine response to criticism" have given Democrats "a way to 1) energize Puerto Rican voters in Florida and 2) motivate Puerto Rican residents who will be Florida residents after this disaster."

While echoing those concerns, Cortes also said Puerto Rico deserves its share of the blame, thanks to the commonwealth's endemic corruption and mismanagement. "It took a storm of this magnitude to show how underprepared they were," Cortes said.

Meanwhile, the White House is fighting against the narrative that it has been slow to act. Trump's Saturday schedule lists five phone calls to discuss the storm response, including one with Federal Emergency Management Agency administrator Brock Long.

Trump also reiterated his plan to visit the island on Tuesday, saying he would "hopefully" stop off in the U.S. Virgin Islands.

Trump's White House social media director, Dan Scavino, joined the fray on Twitter, calling Cruz a "hater" and "an opportunistic politician." Cruz denied that her criticism of Trump was fueled by personal animus.

"Actually, I was asking for help," she told MSNBC on Saturday morning. "I wasn't saying anything nasty about the president." Cruz noted that even Trump's point man for the disaster recovery effort, Army Lt. Gen. Jeff Buchanan, said on Friday that the number of U.S. troops assisting is "not enough." (Buchanan said more manpower and equipment like helicopters were headed to the island.)

Trump's tweets also targeted media outlets that have dedicated increasing amounts of air time to the suffering and chaos on the pummeled island.

"Fake News CNN and NBC are going out of their way to disparage our great First Responders as a way to 'get Trump.' Not fair to FR or effort!" he wrote.

Under mounting pressure, in recent days Trump officials have defended their relief effort as a success. On Thursday, acting Homeland Security Secretary Elaine Duke called the response "a good news story."

The comment only inflamed frustrations on an island where a sense of helplessness prevails, however.

"Damn it, this is not a good news story," Cruz told CNN on Friday. "This is a people are dying story. This is a life or death story. This is a there's a truckload of stuff that cannot be taken to people story. This is a story of a devastation that continues to worsen because people are not getting food and water."

Cruz, a liberal Trump critic, initially avoided tussling with the president for fear that it would become a distraction to relief efforts and "not productive."

But as the week unfolded, Puerto Rico officials felt their pleas for faster action and less red tape went unheeded. Then, on Thursday, Trump touted the recovery effort on Twitter, writing, "Governor said 'great job!'" That was an apparent reference to Cruz, who finally let loose with harsh criticism.

Sen. Marco Rubio (R-Fla.) also pointed to problems on the island in a Friday tweet, writing that criticism of the Trump administration response is "missing [the] main problem." FEMA "has sent lots of aid problem is distribution once it gets to #PuertoRico," Rubio wrote.

Rubio, though, warned the Trump administration privately and publicly that Puerto Rico could become a "Katrina-like" situation.

Behind the sharp debate over disaster response are internal political tensions on the island. Cruz is eyeing the job of Puerto Rico's Republican governor, Ricardo Rossello, who has taken pains to avoid publicly criticizing Trump. She is developing strong ties to Florida Democrats and met Wednesday with Miami Beach Mayor Philip Levine, a likely candidate for Florida governor, when he delivered 7,000 pounds of relief supplies to the island.

About 24 hours later, Florida's Republican governor met with Rossello in Puerto Rico, then debriefed Trump on the disaster response over lunch the following day.

"This is not a time for politics," Scott said on the White House lawn Friday, saying that Rossello is "going through an unbelievable crisis."

Trump's breaking point with Price Back

By Andrew Restuccia, Josh Dawsey and Dan Diamond | 09/29/2017 08:24 PM EDT

Tom Price's downfall was his penchant for pricey jets.

But his demise was months in the making, as the president continued to lose trust in the Health and Human Services secretary who rarely attended Oval Office strategy meetings, had little sway

or influence on Capitol Hill, and was associated in the president's mind with one of the administration's biggest defeats — the failure to repeal Obamacare.

Of particular notoriety: A picture of Price in March drinking at Bullfeathers, a famed Capitol Hill bar, as his colleagues tried to wrangle votes for the president's signature initiative.

Price's lack of goodwill with Trump and other senior administration officials ultimately doomed his chances of survival, even though many administration officials believed the furor would blow over when news first broke that Price spent hundreds of thousands of taxpayer dollars on private jets.

By early this week, however, it became clear that the growing firestorm over Price's travel was only getting worse. A number of officials in the White House said HHS had badly handled the response to the controversy — and was caught off guard by the facts. And it was hard to find a power player in the White House who would defend Price to the president.

POLITICO published five stories over the last 10 days that revealed Price had spent more than $1 million in taxpayer money on travel since May, including overseas flights on military aircrafts and more than two dozen domestic trips on private planes.

Other media outlets amplified the revelations, with cable news frequently running damaging chyrons and reporters peppering Trump and press secretary Sarah Huckabee Sanders about the growing scandal throughout the week.

The president grew more angry, fuming to West Wing aides about the optics of a member of the administration spending so lavishly. The almost daily drip of revelations — including that Price took a government-funded private jet in August to get to a Georgia resort where he and his wife own land — further incensed the president.

Meanwhile, Trump was intensely frustrated by his unsuccessful health care push and associated Price with the failure, several aides said. He joked at a rally in July he would fire Price if he didn't get the votes for the Obamacare repeal.

While the White House has weathered a steady stream of mini-scandals since Trump took office, this one was different, according to administration officials, because it made Price look like the kind of creature of Washington that the president had railed against on the campaign trail.

Trump himself blasted Price on Friday for what he suggested was frivolous spending in light of the administration's efforts to impose fiscal conservatism on the federal government.

"I've saved hundreds of millions of dollars," the president told reporters on Friday when he was asked if he had lost confidence in Price. "So I don't like the optics of what you just saw."

Administration officials grew increasingly certain on Friday that Price would be ousted, but the final decision happened quickly, according to aides, who had cautioned as late as Friday afternoon that Trump might change his mind.

Though he nurtured a reputation as a ruthless boss on The Apprentice, Trump often hesitates to fire people — and sometimes takes weeks to make a final decision. In this case though, the president was counseled that the travel stories had become a distraction from his policy agenda, especially his tax reform push, according to an administration official.

There was also little personal chemistry between the two men.

The president was initially attracted to Price because he was a doctor, a supporter and "looked the part," one adviser with direct knowledge said, plus he was given positive reviews from House Speaker Paul Ryan and others on Capitol Hill.

He soon became a bit player in the administration.

Price was often left out of senior level meetings in the Oval Office on Obamacare repeal, even as other top deputies attended, according to several people with knowledge of the matter.

The president and a number of top aides had little faith in his political instincts.

Leading the effort to negotiate with senators on the Hill was Seema Verma from the Centers for Medicare and Medicaid Services and Marc Short, head of legislative affairs. Two senior White House officials said Price's relationships at the Capitol were not as good as he promised — and that some members preferred not to deal with him. Many members saw him as prickly and not particularly likable, one senior GOP aide said, damaging his ability to negotiate.

Andrew Bremberg, the head of the White House's Domestic Policy Council, was more involved in policy decisions than Price, these people said.

Price was often out of town during key stretches of the presidency, and while several senior officials said they weren't aware of his private jet use, there was a general consensus that he was often nowhere to be found.

"I didn't know he was on private jets," one senior administration official said. "I knew he was never there."

Price's press office initially reassured the White House that the story would quickly pass and argued that Price needed charter jets to respond to public health emergencies like the recent hurricanes.

After POLITICO identified at least 17 charter flights that took place before the first storm — Hurricane Harvey — hit in late August, and included flights that did not appear to be for urgent public health priorities, HHS then changed its argument: Price needed charter aircraft "to accommodate his demanding schedule," a spokesperson allowed last week.

As he often does when making a big decision, the president began making calls on Thursday night and Friday morning to ask whether he should fire Price.

Trump also told aides that if Price had a defense, he would give it. "I don't think he has any defense for it," one person said, summarizing Trump's comments. "He is just taking it."

Price did make a last-ditch effort to save his job, announcing on Thursday that he would reimburse the federal government for the cost of his seat on the domestic flights, a figure that reportedly totals nearly $52,000 — just a fraction of the total cost of the trips. The president didn't like that Price was only offering to pay back some of the flights, and was struck by TV coverage that showed the total cost as more than $1 million, officials said.

The secretary also tried to go on Fox News and assuage the president. It didn't work.

Rumors began swirling in HHS early Friday that Price might be fired. But, in an apparent sign of how quickly the final decision was made, Price was conducting business as usual late Friday.

Just minutes before Price's resignation became official, the secretary sent an email to HHS officials outlining next steps on the "Reimagine HHS initiative," a broad reorganizational effort of the department that was expected to result in staff reductions. The email outlined senior HHS officials who will be spearheading the process.

"Thank you for all your dedication and support, and we look forward to being in touch soon," Price wrote, according to the email, which was obtained by POLITICO.

Across town at the White House, Trump's chief of staff John Kelly was calling Hill leadership to tell them Price was out.

One senior official said the tipping point was when the White House couldn't contain the scandal and it became an administration-wide story.

Other members of Trump's Cabinet were coming under increased criticism for their use of military and private aircraft, including Environmental Protection Agency Administrator Scott Pruitt, Interior Secretary Ryan Zinke and Treasury Secretary Steven Mnuchin.

"Got to the point he was causing problems for everybody," this person said. "He could have lasted maybe if it didn't just get worse every day."

White House to Cabinet: No private air travel without Kelly's approval Back

By Matthew Nussbaum | 09/29/2017 06:57 PM EDT

The White House cracked down on Cabinet officials' use of private planes Friday, telling them

chief of staff John Kelly must approve almost all travel on "government-owned, rented, leased, or chartered aircraft," after Health and Human Services Secretary Tom Price resigned over his own taxpayer-funded flights.

Mick Mulvaney, the director of the Office of Management and Budget, sent out the memo soon after Price's resignation was made public. His exit came after a series of POLITICO reports about his frequent use of private planes to conduct government — and sometimes personal — business.

"In light of recent events, the President has asked me to remind the heads of all executive departments and agencies of Administration policies on travel," Mulvaney wrote.

He reminded the department and agency heads that, by regulation, "Government-owned, rented, leased, or chartered aircraft should not be used for travel by Government employees except with specific justification."

"However, beyond the law and formal policy, departments and agencies should recognize that we are public servants," Mulvaney wrote. "Every penny we spend comes from the taxpayer. We thus owe it to the taxpayer to work as hard managing that money wisely as the taxpayer must do to earn it in the first place."

Mulvaney added: "Put another way, just because something is legal doesn't make it right."

Officials should stick to commercial travel "with few exceptions," he wrote.

In the wake of the controversy, other administration officials' travels have come under scrutiny. Interior Secretary Ryan Zinke has used military planes for some trips, POLITICO reported, while EPA Administrator Scott Pruitt and Treasury Secretary Steven Mnuchin have also raised eyebrows with their travel itineraries.

President Donald Trump was livid over the Price scandal and accepted his resignation on Friday.

"We have great secretaries, and we have some that actually own their own planes, so that solves that," Trump told reporters earlier on Friday.

Interior Secretary Zinke traveled on charter, military planes Back

By Ben Lefebvre | 09/28/2017 07:54 PM EDT

Interior Secretary Ryan Zinke and his aides have taken several flights on private or military aircraft, including a $12,000 charter plane to take him to events in his hometown in Montana and

private flights between two Caribbean islands, according to documents and a department spokeswoman.

Zinke is at least the fourth senior member of the Trump administration to have used non-commercial planes at taxpayer expense, along with Environmental Protection Agency Administrator Scott Pruitt, Treasury Secretary Steven Mnuchin and Health and Human Services Secretary Tom Price. President Donald Trump has fumed at Price's pricey travel, and Democrats say the revelations demonstrate a cavalier attitude by Cabinet members toward excessive spending.

Interior Department spokeswoman Heather Swift said Zinke's charter or military plane trips were booked only after officials were unable to find commercial flights that would accommodate Zinke's schedule and that all were "pre-cleared by career officials in the ethics office." Swift said she had not spoken to Zinke about whether he would reimburse the government for the cost of the flights, as Price plans to do for some of the $400,000 tab he racked up on charter flights.

On June 26, a Beechcraft King Air 200 carried Zinke and several staffers from Las Vegas to Glacier Park International Airport in Kalispell, Montana, about a 20-minute drive from Zinke's home in Whitefish, according to his official schedule. The flight cost $12,375, Swift said.

Zinke left after speaking at an event for the city's new professional hockey team, the Vegas Golden Knights Development Camp Dinner, according to his schedule. Earlier in the day, he had been in Pahrump, Nevada, for an announcement related to public lands.

Zinke's flight left Las Vegas at 8:30 p.m. PST and landed in Kalispell around 1:30 a.m. MST. The secretary stayed overnight at his residence, Interior documents show.

Las Vegas is one of the main connecting airports for commercial flights to Glacier International. Commercial flights between the two cities are available for several hundred dollars a ticket, according to travel planning websites.

In Whitefish, Zinke attended the Western Governors' Association's annual meeting, where he spoke for about 20 minutes without taking questions. He then had a private lunch with association members. In the afternoon Zinke was the subject of a photo shoot with GQ magazine at Lake McDonald and fished while being interviewed by Outside Magazine, the records show.

Zinke and staffers flew commercial back to Washington, D.C., the next day, according to the records.

The trip was not the first in which Interior booked a private jet for Zinke. On March 31, Interior chartered two flights to take Zinke and staff from St. Croix to St. Thomas in the U.S. Virgin Islands to attend the centennial of the Danish government turning the islands over to the United States. Another two flights were chartered to return to St. Croix later that night.

Swift said she did not know how much the flights cost but that no other arrangements were available.

Commercial flights between the two islands generally run a few hundred dollars, according to travel booking websites.

In May, Zinke and his wife, Lolita, used a military aircraft to travel to Norway. From there, they flew on a military plane to Alaska for events organized by the Senate Energy and Natural Resources Committee. The trip included charter planes to travel within Alaska, a common occurrence in the large, remote state. The Zinkes paid for Lolita's share of the trip, the full cost of which was not immediately available, Swift said.

Zinke also took a military helicopter from Fort Bliss to review the Organ Mountains-Desert Peaks National Monument in New Mexico in June, and he used a Bureau of Land Management helicopter to review the Basin and Range National Monument on July 30. "It is difficult to survey a half-million-acre piece of land with few roads by foot or car in an hour-and-a-half," Swift said.

Along with Agriculture Secretary Sonny Perdue, Zinke took a military plane to Ravalli County, Montana, to check on wildfires in the area in August. "The military plane was used because of a very tight travel window, with no viable commercial airline options to transport two secretaries, security details, and associated USDA, Forest Service and Interior staff to Missoula in the time required," said USDA spokesman Tim Murtaugh. The cost of the flight was not immediately available, but the two agencies plan to reimburse the Air Force, Murtaugh said.

DOE's Perry pushes FERC to support coal power plants Back

By Darius Dixon | 09/29/2017 02:48 PM EDT

The Trump administration on Friday called on FERC to create new rules to protect coal-fired and nuclear power plants that are being squeezed by cheaper natural gas and renewable sources, saying they were "indispensable for economic and national security."

Energy Secretary Rick Perry, who told miners in Pennsylvania on Thursday that "it's time for coal in this country to be revived," pressed electricity regulators to alter power markets and protect the resilience of the power grid with payments to generators that keep fuel supplies on site, a clear reference to the coal-fired and nuclear power plants.

The proposal, which DOE said gave FERC 60 days to create a final or interim rule, comes just a month after Perry's agency issued a report saying FERC should "expedite" its work with grid operators to ensure the stability of the nation's power network.

"In terms of process, this is a pretty bold move," said Tony Clark, a Republican former FERC

commissioner. DOE often conducts studies on issues it believes need attention, he said, but "actually forwarding to the commission something specific for action is a pretty bold way of moving the issue right up the batting order at FERC."

The new proposal, directed at FERC under a rarely used Section 403 authority of the Department of Energy Organization Act, stops short of specifically seeking market incentives for coal. But it calls for full-cost recovery for power generating units that provide essential power and "ancillary" services — and have a 90-day fuel supply on site in case of natural or man-made disruptions. That would exclude most natural gas power plants, which do not typically keep large fuel inventories on hand and instead receive supplies via pipeline.

Perry's request represents a departure from the two decades of U.S. policy that has trended toward more market-based tools, which has helped natural gas to nearly double its power market share. Renewable energy sources like wind and solar, though still modest when compared to fossil fuels or nuclear power, have also grown quickly as federal incentives helped drive down their costs.

But the growth of renewables and natural gas — combined with tighter pollution controls and weak new demand for electricity — has forced hundreds of old coal-fired power plants into retirement. Nuclear power plants in some parts of the country are also under financial pressure, hurt by negative wholesale power market prices that sometimes require the plant owners to pay to deliver their power supplies.

"If this gets the debate started, then my hat's off," said former FERC Chairman Pat Wood, a friend of Perry and a strong advocate for market-based power systems. "But it's a pretty arresting [thing] to wake up and read. That would never have played in Texas. ... If there is a service to be valued, then a market can value that."

In the grid study ordered by Perry and released in August, DOE experts pointed to low power prices and cheap natural gas as the single biggest reason for coal ceding its position as the nation's biggest source of electricity. And that report also called for "reforms" to power markets that would help bolster the electricity network's resilience by easing the financial pressures on many power providers.

In its Friday proposal, DOE cited a spike in demand during the 2014 "polar vortex" that hit much of the U.S., which prompted utilities to run many coal plants that were slated for retirement. Without those plants, as many as 65 million people in the PJM market would have seen their power resources threatened, DOE said.

But the new regulatory pitch from the agency also fueled the growing feud between the gas and coal industries.

Paul Bailey, president and CEO American Coalition for Clean Coal Electricity, commended Perry for "initiating a rulemaking by FERC that will finally value the on-site fuel security provided by the coal fleet."

But the American Petroleum Institute, which also represents natural gas producers, said DOE drew the wrong conclusions from the 2014 event, and that forcing new mandates on the power market wasn't the solution.

"[A]s we review the proposal we are concerned the agency has mischaracterized the lessons learned from past weather-related events and appears to suggest that additional regulation is the answer where markets have already proven the ability to greatly benefit consumers and give our electric system the flexibility needed to meet constantly, and often rapidly, changing electricity demands," said API Executive Vice President and Chief Strategy Officer Marty Durbin in a statement.

FERC, which has struggled to integrate states' energy policies that aim to boost renewables or support aging nuclear power plants, has long maintained a fuel-neutral stance in the regional markets that it oversees. If it were to follow Perry's directive to create incentives for grid resilience to plants that maintain their own fuel inventories on site, it would be an implicit move at the national level to alter the electricity markets to support the fuels that both Perry and Trump have touted.

Montana regulator Travis Kavulla suggested on Twitter that rather than deal with the pressing issues facing the grid, "Instead, this reform is sort of the @ENERGY equivalent of the Oprah "you get a car, and you get a car. And you? A car!" approach."

However, FERC, whose members are appointed by the president and operate as an independent body, isn't obligated to implement the specific policy pushed by Perry. The commission will so be back to operating with a full five members in the coming weeks, with a Republican majority.

"FERC's going to follow its own procedures," said Marc Spitzer, a Republican former FERC commissioner. "It would be a mistake for people to assume that this is going to be some partisan Republican rubber stamp given the way FERC works."

FERC can spend months or years digging into complex issues that underpin the power markets, and its commissioners tend to seek common ground with each other to ensure that its rules are clear and ensure long-lasting regulations that give utilities stability to plan their operations.

"Is someone really going to invest [billions of dollars] when it's a 3-2 vote that partisans and the parties can flip next year? Is that a good forum for investment as opposed to a 5-0 order?" Spitzer said.

FERC declined to say when the agency last received a rulemaking from DOE using Section 403.

Bonds
Climate Bonds Pioneered by Goldman Lure Storm-Plagued Cities
As climate change pushes U.S. cities to build protections against stronger storms and more frequent floods, the Rockefeller Foundation is helping cities with a novel kind of financing, one that transfers some of the risk of innovative projects from cities to investors.

Energy

Mishap Triggers Taiwan Blackout as Power Policies Questioned

A blackout caused by a blunder at Taiwan's biggest gas-fired plant is the latest challenge to an electricity grid recently pushed to its limit and to President Tsai Ing-wen's efforts to reshape the island's power mix.

Energy

Scana Needs'Willing Partner' to Resume Nuclear Construction

Scana Corp. executives said the company would need to sign new contracts to revive construction on a South Carolina nuclear power plant—and that federal tax credits would be "an important factor."

Liable Parties

Feds Liable for Navajo Reservation Superfund Cleanup

El Paso Natural Gas can pursue the federal government for the cost of cleaning up uranium contamination from mines on the Navajo Reservation, the District of Arizona ruled (El Paso Nat. Gas Co. v. United States, 2017 BL 285617, D. Ariz., No. 14-cv-8165, 8/15/17).

Mining

Brazil Refuses to Waive Fines on Samarco for Mine Spill

The enforcement arm of Brazil's Environment Ministry (IBAMA) has refused to waive 150 million reais ($47.5 million) in fines it slapped on Samarco Mineracao for the 2015 rupture of a mining waste reservoir that the ministry has called the "country's worst environmental catastrophe."

Motor Vehicles

EU Automakers May Be Required to Produce Electric Vehicles

Making electric cars may become a regulatory requirement rather than a strategic choice for vehicle makers in the European Union as the bloc seeks to underpin a shift away from polluting combustion engines.

Oil & Gas

Offshore Drillers Shrug as U.S. Offers More Acreage, Lower Fees

Oil drillers are shrugging at President Donald Trump's pitch to invest in federal waters.

Renewable Energy

Arizona Utility to Replace Rooftop Solar Payments After Protests

Pinnacle West Capital Corp.'s Arizona Public Service will replace a program that required the state's largest utility to buy excess rooftop solar power at the same price that customers pay the utility.

Renewable Energy

Bird Charity Asked to Abandon Challenge to Scottish Wind Farm

Companies in the offshore wind energy supply chain asked a U.K. bird charity to abandon its legal battle against four giant projects planned off the coast of Scotland, which the environmentalists say could harm wildlife in the area if they were built.

Renewable Energy

State Nixes $2.5 Billion Line to Bring Wind Power to Midwest

A proposed $2.5 billion transmission line to bring cheap Kansas wind power to the Midwest was rejected by Missouri, which said the project failed to get all needed county approvals.

Solid Waste

Product Disposal Plan or Jail for India's Electronics Makers

India's electronics producers risk fines and possible imprisonment if they sell their goods without having an approved plan for their end-of-life disposal with authorized dismantlers or recyclers. The Central Pollution Control Board (CPCB) sent a notice reminding electronics producers of the potential for enforcement action in line with the Oct. 1, 2016, rules on managing electronic waste issued under the Environment Protection Act of 1986.

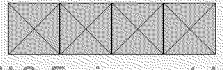
Top EPA Presidential Nominees Approved By Senate EPW Committee

WASHINGTON (October 25, 2017) - Today, the U.S. Environmental Protection Agency (EPA) presidential nominees to head the Agency's air, water, chemical and legal offices were approved by the U.S. Senate Environment and Public Works Committee (EPW). The following nominations will soon be moved to the Senate chamber for a full vote:

Michael Dourson, nominee to be assistant administrator for the Office of Chemical Safety and Pollution Prevention.



Matthew Leopold, nominee to be assistant administrator for the Office of General Counsel at the EPA.

David Ross, nominee to be assistant administrator for the Office of Water at the EPA.

Bill Wehrum, nominee to be assistant administrator for the Office of Air and Regulation.

"I want to thank Chairman John Barrasso and Members of the Senate Environment and Public Works Committee for granting our nominees a fair Hearing and approving their nominations," **said Administrator Scott Pruitt**. "These top leaders in their fields will bring positive change to EPA's mission to protect human health and the environment. We look forward to a full Senate vote on these highly-qualified leaders."

U.S. East Coast Drivers to Feel Harvey Fury at Gasoline Pump

Posted August 31, 2017, 02:15 P.M. ET

By Laura Blewitt

Motorists from Maine to Florida will soon feel the wrath of Hurricane Harvey without seeing a single raindrop.

Fuel prices at the pump are likely to climb after Colonial Pipeline Co.—the largest U.S. gasoline conduit—was forced to shut parts of its main diesel line late Aug. 30 and planned to halt a portion of its gasoline line Aug. 31 because about half of Gulf Coast refining capacity was offline. The company anticipates resuming some service late Sept. 3. Valero Energy Corp. and Royal Dutch Shell Plc, both major Gulf Coast refiners, told wholesale customers Aug. 30 they don't have enough gasoline and diesel to sell retail suppliers.

"It's one thing to not have refiners," Dan McTeague, an analyst at GasBuddy.com, a company which tracks retail prices and availability, said by phone. "It's quite another thing to not have pipelines."

Hurricane Harvey has potentially cut U.S. fuel-making capacity to the lowest level since 2008 after its initial strike on the Texas coast late last week. As Tropical Storm Harvey hit southeast Louisiana on Aug. 30, it brought torrential rains that shut the biggest U.S. refinery, owned by Motiva Enterprises LLC in Port Arthur, Texas, and one nearby held by Total SA. They join more than 12 other plants with almost a quarter of U.S. refining capacity.

As refineries along the Gulf Coast turned off the lights, Colonial, which carries fuel from Gulf Coast refineries to the East Coast, indicated that portions of its two main Lines 1 and 2 west of Lake Charles, Louisiana, would be offline and operating at reduced rates east of Lake Charles. Many smaller lines branching off from its main artery are also likely to shut.

Pace of Supply

"The issue is the pace of supply that we're getting from the origins," Buster Brown, Colonial's director of scheduling, said in a telephone interview. "It's not as much running out of supply as the timing—the speed at which supply gets to market."

Once shipments from the Houston area resume, Colonial will be able to ship fuels east, bypassing

shuttered terminals in the Port Arthur, Texas, area, Brown said, noting that "Houston supply and Port Arthur supply are independent, so to speak."

Harvey also submerged pump stations and terminals along the Gulf Coast with its days-long deluge, and operators such as Valero and Shell had no choice but to stop sending fuels.

Valero stopped supplying gasoline stations across the Northeast at stores that don't carry its logo, while Shell reduced supplies to some company-branded stations in the lower Atlantic, according to people familiar with the operations of both companies who asked not to be identified. Motiva Enterprises holds exclusive rights to distribute Shell fuels to the majority of the southeast, said Natalie Gunnell, a spokeswoman for Shell's U.S. products unit.

BP Plc was said to be moving a tanker authorized to carry fuels between U.S. ports to Florida from New York Harbor, according to a person familiar with the cargo.

Spokespeople from Valero and BP didn't return requests for comment.

Fuel Waivers

The Environmental Protection Agency, in an effort to stay ahead of potential shortages, has been issuing waivers exempting more and more southeastern states from requirements that they use fuel that meets clean-air quality standards.

Gasoline futures for September delivery at New York Harbor rose for an eighth session Aug. 31, the longest rally since 2013, and climbed above $2 a gallon.

As shortages ripple across the East Coast, the most likely suppliers left standing are refiners from Louisiana and Europe, according to Zachary Rogers, a refining and oil products analyst at Wood Mackenzie. The ongoing gasoline supply issues could reduce East Coast inventories to 3- to 5-year lows, he said by phone from Houston.

At least 20 tankers were booked to load European fuels for the U.S. since Harvey made landfall, a rate nearly double the average for August, shipping data compiled by Bloomberg show. Shipbrokers said cargo flows to New York are expected to be the highest since November, when Colonial Pipeline exploded and cut off supplies.

"Because of the shortage, you will likely see a price increase in the East Coast, which would incentivize the other refiners to shift gasoline yields," Rogers said.

While suppliers of gasoline stations from Georgia northward may have reason to be concerned, the Sunshine State has one key advantage: It's not winter yet.

"In Florida, we're not in the main season, so demand is not as high as it would be normally from November to May," said Ned Boman, executive director of the Florida Petroleum Marketers and Convenience Store Association. "We should be OK."

New England, Canada Strive for Deeper Greenhouse Gas Cuts

Posted August 31, 2017, 02:56 P.M. ET

By Adrianne Appel

New England and eastern Canadian provinces will lean more heavily on renewable energy, electricity conservation, and zero-emissions vehicles as they aim for deeper greenhouse gas reductions.

The governors and premiers set a goal to reduce harmful carbon emissions 35 percent to 45 percent below 1990 levels by 2030 in a plan they released Aug. 31.

The region easily met the previous carbon-reduction goals in 2010 and 2015, the leaders of the six New England states and five Canadian provinces said during their annual meeting on Prince Edward Island, Canada.

In order to reach the 2030 target, however, the region has to be more aggressive in reducing greenhouse gas emissions, they said.

Harvey's Floods Could Delay 10 Percent of U.S. Fracking: Analyst

Posted August 31, 2017, 12:31 P.M. ET

By David Wethe

As much as 10 percent of U.S. fracking work could be delayed after Hurricane Harvey ripped through southeast Texas, home to one of the nation's busiest oilfields, according to Raymond James & Associates financial advisory.

More than half the rigs running in the Eagle Ford Shale are estimated to have suspended drilling because of the storm, Marshall Adkins, an analyst at Raymond James, wrote in an Aug. 31 note to clients. The muddy conditions left in Harvey's wake will add stress to the fracking services sector that has consistently lagged the faster drilling crews.

Given its location in far southeastern Texas, the Eagle Ford was the only major American shale formation in the cross hairs of Harvey when it slammed ashore as a Category 4 hurricane last week. Major explorers including EOG Resources Inc. and Marathon Oil Corp. halted drilling and evacuated crews in anticipation of the storm, crimping as much as 57 percent of daily production, according to the Texas Railroad Commission.

"Given that much of oil and gas activity occurs in areas only accessible via dirt roads, the heavy rainfall usually makes the movement of trucks and supplies much more difficult," Adkins wrote. "The trucking and rail of sand, chemicals, and personnel to the well site will all take more time given the likely nasty condition of many Eagle Ford access roads."

The Eagle Ford was the only shale basin of the big four to drop activity in recent days, as some in the industry start to look at shale as a more expensive option compared to other places.

The temporary drop in the rig count by as much as 45 rigs due to flooding could be a catalyst for higher oil prices, Adkins wrote.

Harvey's Roar Rumbles Half a World Away as Propane in Asia Jumps

Posted August 31, 2017, 7:39 A.M. ET

By Ann Koh and Laura Blewitt

Asian buyers of liquefied petroleum gas are already paying for disruptions half a world away in Texas as record rainfall halted shipments of propane and butane from ports that handle more than 90 percent of U.S. exports to the region.

Marine export terminals operated by Enterprise Products Partners LP, Targa Resources Inc. and Phillips 66, all suppliers of the fuel, are shut because of closures at the Houston Ship Channel, Port of Beaumont, and Port of Freeport, according to Aug. 29 statements from the companies. Mont Belvieu, Texas, facilities belonging to Enterprise and Targa also have halted some fractionation operations, in which raw liquids are turned into products like propane and butane. There are no estimates yet for when the ports will reopen.

The U.S. Gulf Coast, home to the largest LPG storage caverns in the world, is a key global supplier, so events there can ricochet in markets around the world. As Hurricane Harvey made landfall near Corpus Christi, Texas, late last week, propane prices in Northeast Asia climbed. And as it approached the Louisiana coast before making a second strike Aug. 30 as a tropical storm, Middle Eastern producers said they're raising prices. Asian buyers, which import the fuel for heating and petrochemical production, were caught in the middle.

"Affected buyers will seek cargoes from elsewhere," said Ong Han Wee, a consultant with FGE in Singapore. "The prices jumped last Friday in Asia, just before or when the hurricane made landfall. The Middle East contract prices are also higher now, most likely because of sentiment from Harvey."

Middle Eastern producers Saudi Arabian Oil Co. and Kuwait Petroleum Corp. announced that they would increase September contract prices for propane and butane by $40 to $60 a metric ton amid bullish sentiment, traders said. The region's countries are the most likely alternative suppliers because they are nearest to Asia, Ong said.

While international LPG prices have soared since Harvey's landfall, propane traded at the Mont Belvieu Enterprise terminal hasn't kept pace, rising just 2 percent since Aug. 24, according to DTN Energy data. The lack of dramatic price action stateside will expand arbitrage opportunities to Asia once the exporters can finally use the Gulf Coast ports, said Peter Fasullo, co-founder at LPG consultancy En*Vantage Inc.

The U.S. is expected to export 28 million tons of propane and butane this year, half of which will go to Asian buyers in Japan, South Korea, and China, according to FGE.

But the U.S. hasn't sent a single LPG tanker from the Gulf Coast since Aug. 25, according to Bloomberg market specialist Bert Gilbert. The Ports of Houston and Freeport said they're still uncertain when they'll be able to reopen to vessel traffic.

Historic Rains

And supply concerns extend beyond the shutdown of the ports.

Cedar Bayou, a body of water just outside of the fractionation and storage hub in Mont Belvieu, recorded 51.88 inches (132 centimeters) of rain this week, setting a new record for the continental U.S., according to the National Weather Service.

That much water could signal weeks of trouble for the storage facilities there, Fasullo said. Underground storage of LPG uses brine ponds to pump highly salinated fluids into caverns. If heavy rains dilute the salty ponds, contamination, and containment issues that make it hard to get the fuel out of storage may occur.

Enterprise's "storage assets have remained operational," said Rick Rainey, a company spokesman in Houston. "We continue to manage our brine supplies."

But Targa's capacity to receive raw products was "negatively impacted" by flooding, according to a company statement.

"I don't think there's going to be any relief for many days, and if those many days turn into weeks, it could be a one- to three-week period" before normal exports resume, Fasullo said by telephone from Houston. "Propane prices could go off to the races because I think you're going to get strong storage draws when we will be able to get those export terminals up."

Japan Environment Ministry Asks for $2.9B to Boost Clean Energy

Posted August 31, 2017, 9:16 A.M. ET

By Chisaki Watanabe

Japan's Ministry of Economy, Trade and Industry is seeking to allocate 323 billion yen ($2.9 billion) to expand the use of low-carbon energy sources for the year starting April 1, an increase of nearly 7 percent from the previous year.

The plan includes support for research and development for more efficient solar panels such as perovskite cells and cheaper floating offshore wind, according to a ministry document released on Aug. 31. The allocation will also be used to increase installations of hydrogen fuel cells and hydrogen stations for vehicles.

The ministry is increasing support for next-generation vehicles and self-driving technology by 31 percent to 45 billion yen, including 4.8 billion yen for the development of next-generation batteries, including solid-state lithium-ion batteries.

The ministry is also planning to set aside 78 billion yen to promote energy savings in factories, office buildings and homes with more energy-efficient light bulbs and insulating materials. That's up from 72 billion yen a year ago.

Germany to Cut 2018 Onshore Wind Aid After Additions Exceed Cap

Posted August 31, 2017, 11:53 A.M. ET

By Brian Parkin

Germany will cut subsidies paid to onshore wind farm owners from January after additions surpassed an industry cap, the Bnetza power regulator said.

A record 5.03 gigawatts of new onshore wind power was added in Germany during the past 12 months, exceeding the gigawatt 3.5-gigawatt limit the government established to support sustainable growth, the Bonn-based regulator said Aug. 31 in an email.

Guaranteed subsidies for operational onshore wind plants will be cut 2.4 percent from Jan. 1, with payments starting at 7.49 euro cents (9 cents) a kilowatt-hour for new plants and 4.17 cents a kilowatt-hour for older plants, Bnetza said.

Should new wind or utility-scale solar additions fall below targets, subsidies would rise, according to the rules.

Brazil Plans to Offer Up to 9 Gigawatts in Energy Auctions

Posted August 31, 2017, 8:49 A.M. ET

By Vanessa Dezem

Brazil is planning to award contracts for as much as 9 gigawatts of new generating capacity in a pair of power auctions scheduled for December, according to a person with knowledge of the process. The bulk is expected to go to wind farms.

The first event will feature contracts for 1.4 gigawatts to 2 gigawatts of capacity, and the second event will be bigger, with developers bidding for 5 gigawatts to 7 gigawatts, according to the person, who asked not to be identified because the information isn't public.

The scale of the two auctions will be welcome news to renewable energy developers and suppliers. Last December, the government canceled what would have been the year's only auction solely for wind and solar energy, and hasn't held any since. Companies seeking to build power plants have been hobbled by the lack of details regarding future demand, while turbine companies faced the prospect of halting production lines after their current crop of orders dries up.

The auctions this December will offer contracts to sell power from new plants that go into operation in 2021 and 2023. The first will be open only to renewable energy projects, and the other will accept bids from both clean and conventional sources. Power distributors in Brazil are expected to provide more details soon about the amount of capacity they expect to need, according to the person.

The decision to cancel last year's auction resulted from a growing electricity surplus as Brazil grappled with the worst recession in a century. With the economy now starting to improve, the government expects energy demand to increase next year, driving demand for power plants,

according to Paulo Pedrosa, executive secretary for the Ministry of Mines and Energy.

Two new auctions are also scheduled for 2018, with one penciled in for the start of the year, according to Pedrosa.

Australia's Digital Currency Opens Avenues for Renewables Trading

Posted August 31, 2017, 03:11 P.M. ET

By Murray Griffin

An Australian company developed a digital currency designed for peer-to-peer trading among businesses and homeowners looking to sell surplus renewable energy.

Power Ledger's decentralized trading platform relies on its own version of bitcoin blockchain technology to instantaneously track transactions, making it possible for them to trade clean energy without the need for accountants, lawyers, or banks.

The blockchain encrypts, replicates, and shares multiple transaction records across a network of participants.

Power Ledger said a key benefit of its platform is that participating small and midsize businesses and homes with rooftop solar photovoltaic systems in Australia will no longer have to sell excess power back to electricity retailers at the low prices they offer.

The penetration rate for rooftop PV systems in Australia is now among the world's highest, according to the Australian Energy Regulator. While state governments are phasing out premium feed-in tariffs, the loss of these incentives is being largely offset by declining installation costs for solar systems, the regulator said.

Those using the peer-to-peer platform instead can sell their excess power to businesses or households prepared to buy it possibly at a higher price. The buyers also benefit because they still pay less than they would if they were purchasing from an electricity retailer. A $25,000 cap discourages large businesses and utilities from controlling the market.

Expanding Market

It's a large potential market, given Australia has more than 1.7 million small-scale solar PV systems on the rooftops of small businesses and homes, and there is a fast-growing number of slightly larger systems installed on commercial and industrial buildings, according to the federal Clean Energy Regulator.

The Power Ledger platform can accommodate various forms of peer-to-peer renewable energy trading, company co-founder and chairwoman Jemma Green told Bloomberg BNA by phone.

In addition to allowing trading among apartment block occupants or industrial park tenants that all use power behind the same main meter, developers of projects such as community solar farms could use it to secure funding, she said Aug. 28.

Developers "could sell shares in their solar farm via the platform," with the shareholders then receiving some of the income from the project. Power Ledger would in turn charge the developer a fee based on "a percentage of the capex [capital expenditure] of the project," she said.

For households, the digital currency enables owners to sell their excess energy, much in the same way Uber and AirBnb lets people make money from their cars and spare guestrooms.

Larger Networks

If partnerships are forged with electricity distribution businesses, then trading also could occur across larger electricity networks, according to Green.

The company already is testing its trading platform at a new housing development in the Western Australian city of Perth. Green said residents were paying at least 20 percent less for power than if they were buying it from the grid.

Power Ledger is currently piloting the platform in conjunction with New Zealand's largest electricity distributor, Vector Ltd. "Vector is looking at the potential for blockchain technology in peer-to-peer energy trading, and has been working since the start of the year with PowerLedger on a trial," said a Vector spokesman, adding that it's too early to comment on the trial.

It's also in discussions with Western Power, the distribution business owned by the Western Australian state government, regarding a trial that would involve some of the 11,000 homes—as well as TasNetworks, the electricity distribution network owned by the Tasmanian state government—Power Ledger managing director David Martin told Bloomberg BNA by phone Aug. 28.

In addition, discussions are underway with a large distribution business in the U.S. and another in Japan, although Green said neither could be named at this stage for reasons of commercial confidentiality.

The company started selling 100 million tokens that give those holding them rights to use its trading platform Aug. 27 and by Aug. 30 more than 90 percent had been sold at a fixed price of 8.8 cents.

Disruption?

Power Ledger has created 1 billion tokens and a follow offering will take place in September at an uncapped price.

Meanwhile, the federal government's Australian Renewable Energy Agency (ARENA) has separately been looking into using blockchain to enable peer-to-peer trading in renewable energy among businesses and households.

In May this year it contributed A$120,000 ($95,000) to an A$293,000 desktop trial by AGL Energy, one of Australia's largest electricity businesses.

"Australia has experienced a rooftop solar boom in the past decade and we are expecting a residential battery boom to follow in the coming years," ARENA chief executive Ivor Frischknecht said. "Ultimately, these investigations are about getting the most value out of solar and battery systems through a more flexible and modern marketplace."

A report on the findings of the ARENA-funded study is expected to be released soon.

China's Ex-Im Bank Backs Azerbaijan Wind With $460 Million Loan

Posted August 31, 2017, 9:05 A.M. ET

By Zulfugar Agayev

The Export-Import Bank of China will finance a 500 million-euro ($460 million) wind farm in the Caspian Sea off the coast of Azerbaijan as the third-biggest crude oil producer in the former Soviet Union taps clean energy to supply its domestic energy needs.

The Azeri government is working with the state-owned China Power Engineering Consulting Group Co., or CPECGC, which will build 40 to 60 wind turbines between the Caspian Sea islands of Pirallahi and Cilov, according to Camil Malikov, deputy head of the State Agency for Alternative and Renewable Energy Sources.

CPECGC agreed to finance the feasibility study of the project, which may be approved by the government in late January or early February, he said.

"The Export-Import Bank of China together with other Chinese state lenders will provide 90 percent to 95 percent of the funding," Malikov said in an interview in Baku, noting project costs will be about 450 million euros to 500 million euros in total. "The remaining part will be covered by the Azeri government."

'City of Winds'

CPECGC will conduct engineering, procurement and construction of the project together with domestic companies should the government approve the feasibility plan. The 200-megawatt project would provide enough power for 500,000 homes, he said.

"We'll operate the wind park and repay the debt within 12 to 15 years," Malikov said.

Azerbaijan seeks to substitute more clean energy for fossil fuel, which contributed 34 percent of gross domestic product and 43 percent of state budget revenues last year, according to Sberbank CIB. Oil production fell 8.9 percent in the first seven months of 2017 from the same period a year ago, and marketable natural gas output dropped 1.3 percent, according to a State Statistics Committee report on Aug. 15.

Azerbaijan's oil production is likely to drop another 20 percent from the current levels by 2025, according to the Organization of Petroleum Exporting Countries.

Wind farms are attractive to investors because of the strength of breezes in Baku and the Absheron Peninsula, Malikov said. Wind blows more than 270 days in Baku, which means "city of winds" in Persian, according to estimates from the Geography Institute of Azerbaijan's Academy of Sciences.

Hybrid Stations

The government also is working with Germany's KfW development bank to build two hybrid power stations in the Qaradag and Xizi districts west and northwest of the capital, Malikov said.

German experts are drawing up a feasibility plan for the projects, which will generate a combined 140 megawatts of wind and solar energy. That will include 120 megawatts of wind and 40 megawatts of solar energy. Those projects may cost about 200 million euros, Malikov said, adding that state guarantees would be required to secure financing from the German lender.

Azerbaijan currently generates 1,500 megawatts—or 10 percent of its annual electricity production, from clean sources—Malikov said. That includes 1,100 megawatts to 1,200 megawatts from hydroelectric dams, 60 megawatts from wind and 50 megawatts from solar farms.

The plan is to increase electricity production from renewable sources by 420 megawatts by 2020.

“By 2025, we’ll be generating 20 percent of our electricity from clean sources,” Malikov said.

Subject: Today on Climate Beat

August 23, 2017

Today on Climate Beat . . .

. . . we went to court, where appellate judges are formally implementing their June ruling that scrapped a requirement for EPA to conduct a sweeping review of the effect that its climate and air rules have had on coal sector employment, highlighting that coal firms that pursued the litigation did not seek to appeal the ruling.

Out in California, a clean energy group is finding that the state's transportation-related greenhouse gas emissions are rising due to relatively low gasoline prices and longer commutes, heightening the need for tougher vehicle regulations if the state is going to achieve its 2030 and 2050 GHG targets.

And our daily news roundup looked at what climate has to do with a reported leadership change at Chevron, as well as Democratic attorney generals using EPA chief Scott Pruitt's playbook against him.

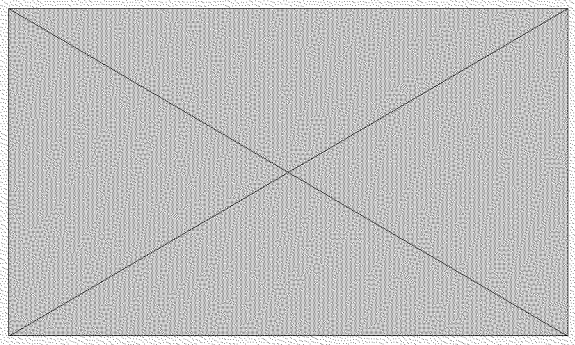
Subject: AEI Today: The coming politicalization of the 25th Amendment

The medical profession and democracy would be ill served if a political determination, such as removing the President, were ever disguised as clinical judgment.

AEI's daily publication of independent research, insightful analysis, and scholarly debate



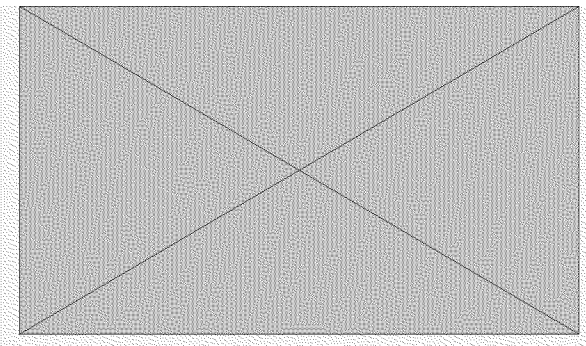
Reuters

The coming politicalization of the 25th Amendment

Sally Satel and Peter D. Kramer | The New York Times

Donald Trump's mental health has been under scrutiny since he began running for president. Now 28 Democratic members of Congress have signed on to a bill, introduced in April, that could lead to a formal evaluation of his fitness. The bill seeks to set in motion a part of the 25th Amendment that empowers Congress to

establish a body to assess the president's ability to govern. The role of psychiatry in this process would be problematic.



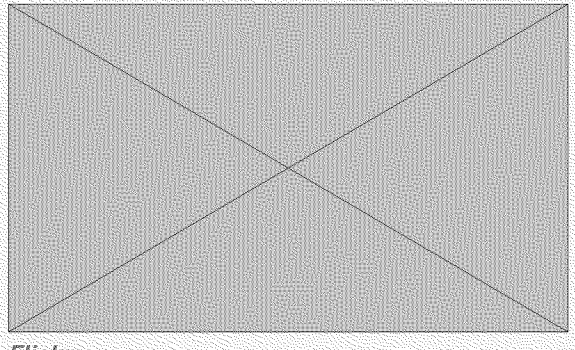
Reuters

You can be a pro-capitalist and a good Catholic

Michael R. Strain | Bloomberg View

At a nationally televised town hall last week, Paul Ryan was asked how he upholds the Catholic Church's teaching that we should help the poor. Ryan, a Catholic, answered that his emphasis on economic growth, upward mobility, and opportunity for all is how, as House speaker, he puts that teaching into practice. Not all Catholics liked this answer, but it is good to remind progressives that economic growth is the best antipoverty program the world has ever seen.

Reuters



How to get out of the Iran nuclear deal

John R. Bolton | National Review Online

Although Donald Trump repeatedly criticized Barack Obama's Iran nuclear agreement, his administration has twice decided to remain in the deal. It so certified to Congress, most recently in July, as required by law. Before the second certification, Trump asked repeatedly for alternatives to acquiescing yet again to a policy he clearly disagreed with. But no such options were forthcoming, until now, with John R. Bolton presenting his straightforward plan to repeal the Iran deal.

What jazz can teach us about freedom

Arthur C. Brooks | The New York Times

"They teach you there's a boundary line to

music. But man, there's no boundary line to art." Those are the words of Charlie Parker, the jazz saxophonist. You might be tempted to take his words literally when you hear his improvisational style. His freewheeling solos made up on the spot are pure freedom, right? Wrong. Jazz, like all serious art, is slavish in its adherence to boundaries and rules. And therein it achieves the nature of true freedom, in both art and life.

Air Pollution
States With Ozone Problems Still Waiting on EPA to Act
States with significant ozone pollution problems are left hanging after the EPA released its list of regions that meet national air quality standards, but not the problem areas that don't.

EPA
EPA Air Chief Pick Could See Full Senate Vote This Week
Senate Democrats may allow the EPA's nominee for air chief to get an up-or-down vote by the end of the week, the Senate environment committee's top Democrat told Bloomberg Environment Nov. 7.

International Climate
Syria Joining Paris Deal Highlights Climate's Security Effects
Syria's announcement that the war-torn nation is formally joining the Paris climate pact highlighted concern among the agreement's backers that worsening climate impacts will aggravate global security and weaken U.S. diplomatic clout.

News

Agriculture
Trump Administration Drops Call for New WTO Pesticide Standards
The Trump administration dropped its bid for a World Trade Organization accord to harmonize international pesticide residue standards for food imports.

Air Pollution
Google Earth Has Cars Sniffing U.S. Cities to Guard Your Health

As firefighters fought to control deadly wildfires north of San Francisco last month, a small unit of Alphabet Inc.'s Google had a more modest goal. It had employees driving cars around loaded with air-monitoring equipment to measure how badly the smoke was polluting the air.

Asbestos

Wyeth Holdings Wins Reversal of Asbestos Jury Award

Pfizer subsidiary Wyeth Holdings won reversal of a jury award in favor of the widow of a man who allegedly contracted cancer from workplace exposure to asbestos dust from a Wyeth product.

Biofuels

Where Green Incentives Chop Down Palm Trees in Search for Fuel

What started as a way to cut Japan's dependence on imported fossil fuels has led to an expected surge in a different and equally controversial shipment: palm oil.

Books and Records Inspections

Shareholders Sue to Access GM Records on Emissions Compliance

Shareholders are suing General Motors Co. to access documents they say may shed light on whether directors allowed the company to illegally evade emissions standards.

California

Dow AgroSciences Wins Venue Battle in Cancer Warning Case

Claims that Dow AgroSciences LLC failed to warn California residents of a cancer-causing chemical in its soil fumigant will be tried where the alleged violation occurred, not in a county selected by the plaintiff, a California appeals court ruled Nov. 6.

Chemical Safety Board

Exxon Avoids Nearly Half of Safety Board Requests for Torrance Records

Exxon Mobil Corp. will avoid turning over to the U.S. Chemical Safety Board about 45 percent of the board's specific document requests on chemical operations at its former refinery in Torrance, Calif., where an explosion injured two workers in February 2015.

Chemical Testing

'Safe Harbor' Needed as Chemical Makers Use Fewer Lab Animals

Chemical manufacturers have invested millions to develop new tests that don't rely on laboratory animals, but they need a "safe harbor" to share that data from those tests with the EPA and each other.

Chemicals

Correction

A Nov. 6 article, "North Carolina Senators Decline to Back EPA Nominee Dourson," misstated Scott Faber's role in a coalition of groups opposing the nomination of Michael Dourson. Faber said he is a part of the coalition. The online version has been corrected.

Coal Mining

Wyoming Proposes Self-Bonding Limits for Coal Mine Cleanups

Coal companies operating in Wyoming would be able to self-bond only up to 70 percent of the cost of post-mining reclamation under rules the state proposed.

Coal-Fired Power Plants

Merkel's Green Party Coalition Hopefuls Drop Quick-Fix Coal Call

Germany's Green Party backed down on demands that the nation shutter its coal power plants by 2030, signaling a readiness to compromise as it struggles to become a member of

a new national coalition.

Energy
France Says Macron's Target to Cut Nuclear Power 'Unrealistic'
The French government said its objective of reducing nuclear to 50 percent of power generation by 2025 is "unrealistic" because it could endanger energy supplies unless carbon-emitting plants took up the slack.

Energy
Oil and Gas Development Bill Heads for House Committee Vote
Legislation that would shift some oil and gas permitting to states and limit the president's ability to bar energy development in some federal waters could sail through a House committee this week.

Energy
Restoring Electricity Top Priority for Puerto Rico Debt Board
Restoring electricity to hurricane-ravaged Puerto Rico is the top priority of the congressionally created financial oversight board seeking more control over the territory's bankrupt electricity authority.

Energy
South Africa's Gigaba Is Said to Meet World Bank on Nuclear Plan
South Africa's Finance Minister Malusi Gigaba met with representatives of the World Bank last week to discuss financing for development of a nuclear power program in the country, according to two people familiar with the meeting.

Insurance
Flood Insurance Reauthorization Stalls at House Rules Panel
House Rules Committee action on a bill to reauthorize the National Flood Insurance Program was postponed Nov. 7 and an aide told Bloomberg Government that the measure is now unlikely to be taken up this week.

International Climate
What's Behind the UN's Green Climate Fund
Climate finance is likely to be a hot topic at the United Nations climate talks in Bonn, which started yesterday and run until Nov. 17.

Oil & Gas
Offshore Safety Chief Wants 'Near-Miss' Reporting From Oil Rigs
Almost no U.S. oil and gas operators working in federal offshore waters have agreed to report "near misses"—the incidents that do not cause accidents but come close. The director of the Bureau of Safety and Environmental Enforcement says he intends to change that.

Oil & Gas
Williams Partners Wants Clarity on Court's Pipeline Stay
Williams Partners says a court order that temporarily stays government approval and halts construction of the Atlantic Sunrise natural gas pipeline expansion is putting 8,000 jobs at risk in Pennsylvania.

Pesticides
Olive Oil, Quinoa Among Repeat Offenders on Pesticide Watch List
The FDA is looking at more than two dozen imported foods that might warrant "special

attention" from inspectors because they contain pesticide residues in excess of U.S. limits, many of which have drawn agency scrutiny before.

Subject: Judges prod Trump administration over slow pace of Clean Power Plan review

By Alex Guillén

08/08/2017 04:58 PM EDT

Until it puts in place a replacement for the Clean Power Plan, EPA is avoiding its "statutory duty" to regulate greenhouse gas emissions, two federal court judges wrote today in an unusual warning shot at the Trump administration.

The D.C. Circuit agreed to keep a case challenging the Obama-era climate rule on hold for at least two more months, but a pair of judges appointed by Democratic presidents said that delay cannot continue forever. The Supreme Court in 2016 stayed the Clean Power Plan until the conclusion of the legal challenge, which has been suspended since the Trump administration began reviewing the rule.

"That in and of itself might not be a problem but for the fact that, in 2009, EPA promulgated an endangerment finding, which we have sustained," wrote judges David S. Tatel, a Clinton appointee, and Patricia A. Millett, an Obama appointee. The finding, which originally applied to vehicles but was expanded to power plants, requires EPA to take action on carbon dioxide emissions from power plants so long as it is in place.

"Combined with this court's abeyance, the stay has the effect of relieving EPA of its obligation to comply with that statutory duty for the indefinite future," they continued in an addendum to today's order keeping the case on hold.

Last week, environmentalists asked the court to issue its ruling on the Clean Power Plan because EPA has not provided an estimated date for proposing a repeal of the rule.

WHAT'S NEXT: The new 60-day hold on the litigation will place the court's next action shortly after the one-year anniversary of the Sept. 27, 2016, oral arguments over the Clean Power Plan, which took place before a panel of 10 of the D.C. Circuit's judges.

Subject: POLITICO's Morning Score: Rokita's road rules — Campbell embraces Trump in new ad — Trump vs. Flake begins in earnest

By Kevin Robillard | 08/18/2017 10:00 AM EDT

With Zach Montellaro, Daniel Strauss and Elena Schneider

The following newsletter is an abridged version of Campaign Pro's Morning Score. For an earlier morning read on exponentially more races - and for a more comprehensive aggregation of the day's most important campaign news - sign up for Campaign Pro today. (http://www.politicopro.com/proinfo)

DRIVING MR. ROKITA - "The agonizing, 8-page memo on how to chauffeur a congressman," by John Bresnahan and Rachael Bade: "Who knew it could take eight pages of instructions on how to properly escort a member of Congress around his district? Yet there it is, laid out in mind-blowing detail, in a memo obtained by POLITICO that's sure to make any young, eager-beaver political aide shudder. Tasks listed in the document, entitled 'Instructions on Staffing and Driving - District Version,' include handing Rokita a cup of black coffee upon picking him up at his home, acting as a physical barrier between him and trackers looking to capture embarrassing footage of the congressman, and "avoid[ing] sudden acceleration or braking" while driving. 'The goal is to provide as smooth a ride as possible,' reads the instruction manual, co-authored by a former chief of staff to the congressman and Tim Edson, Rokita's ex-communications director turned campaign spokesman. ... Drivers are expected to transport not only Rokita's toothbrush and toothpaste but also stock and tote around the district a nearly 20-item supply box that Rokita's staffers call "the football." The contents include gum, hand sanitizer, business cards, bottled water, napkins and Kleenex, Lozenges-brand cough drops, a stapler and stapler remover, Post-it notes and Shout wipes, among other items. ... Asked about the memo, Rokita's campaign spokesman Tim Edson wrote in an email that 'there is nothing embarrassing about always being prepared.' Edson blamed the leaked memo on his boss' longtime nemesis, Rep. Luke Messer (R-Ind.), who he's running against for the GOP nomination to challenge Democratic incumbent Sen. Joe Donnelly (D-Ind.)." **Full story.**

FIRST IN SCORE - North Dakota's Campbell goes up with pro-Trump spot: North Dakota State Sen. Tom Campbell, a wealthy Republican potato farmer who announced a challenge to Democratic Sen. Heidi Heitkamp earlier this week, is out with his second television ad of the campaign. The 30-second spot features Campbell speaking directly to camera and linking himself to President Donald Trump. "America sent Washington a message. His name? Donald Trump," Campbell says. "The media may not like it, but it's exactly what Washington needs: Cut spending. Build the wall. Bold tax reform. And term limits to get rid of career politicians in both parties." **Watch the ad here.**

TRUMP VS. FLAKE - "Trump aides worry he hurt hopes of defeating Flake," by POLITICO's Alex Isenstadt: "President Donald Trump upended the Arizona Senate race on Thursday by signaling support for an underdog primary challenger - a move that went against the

wishes of his advisers and potentially undercut their efforts to unseat GOP Sen. Jeff Flake. ... Trump aides were taken aback by the tweet. Many of them are deeply skeptical about [Kelli] Ward's ability to defeat Flake. In 2016, Ward received 39 percent of the vote in an unsuccessful effort to unseat GOP Sen. John McCain . More recently, she came under fire for saying that McCain should step down from the Senate 'as quickly as possible' after he was diagnosed with brain cancer. The White House has met with two other prospective Flake opponents, Arizona state treasurer Jeff DeWit, who was a top official on Trump's campaign, and former state GOP chairman Robert Graham. Some in the administration, meanwhile, have set their sights on another Arizona Republican, former GOP Rep. Matt Salmon ...

In a brief telephone interview on Thursday afternoon, Salmon said he is currently abroad and not interested in joining the race. He declined to comment on his discussions with Bossie, who did not respond to a request for comment. ... Ward's aides said they hope to parlay Trump's tweet into financial backing from his donors. On Thursday, she reached out to Doug Deason, a Texas businessman and the son of billionaire Darwin Deason, though he hasn't committed. Her campaign announced the support of Bill Doddridge, a major GOP donor and jewelry company executive who funded a Trump 2016 super PAC." **Full story.**

-The tweet that started it all: "Great to see that Dr. Kelli Ward is running against Flake Jeff Flake, who is WEAK on borders, crime and a non-factor in Senate. He's toxic!"

-The NRSC and Senate Majority Leader Mitch McConnell are, predictably, standing by their man. "Jeff Flake is an excellent Senator and a tireless advocate for Arizona and our nation. He has my full support," McConnell said in a statement.

- BATTLING BOTS - "Russian network amplified Trump's Flake criticism," by USA Today's Oren Dorrell: "After President Trump criticized GOP Sen. Jeff Flake of Arizona on Twitter Thursday, a network of Russian propaganda tools amplified the message across the twitterverse, following a pattern of sowing division in the U.S. and in Europe. ... Later Thursday, 'Flake,' 'Phoenix' and 'Arizona' were among the top five trending topics under discussion by a network of 600 Twitter accounts that amplify messages developed by the Kremlin for the U.S. audience. The list of accounts is compiled and tracked by a new database created by the German Marshall Fund of the United States, a Washington, D.C., think tank that promotes cooperation between North America and Europe." **Full story.**

- REID WEIGHS IN - "Southwest Rises as 2018 Senate Battleground," by the New York Times' Alex Burns: "Harry Reid, the former Democratic leader in the Senate, said the growing prominence of these states in 2018 portended a longer-term shift. For all the concern about Midwestern states that shifted toward Mr. Trump, it is the Sun Belt and interior West that are expected to gain population, House seats and electoral votes over the coming decades. 'The power has shifted in our country, west of the Mississippi,' Mr. Reid said in an interview. 'It started a couple of cycles ago, but now it's in full force.' But Mr. Reid said it would take intensive financial investment and political organizing by Democrats to capture new states, like Arizona or Texas, where Representative Beto O'Rourke, a Democrat, is mounting a challenge to Mr. Cruz." **Full story.**

Days until the 2017 election: 81

Days until the 2018 election: 445.

FOR YOUR RADAR - "Is Scott Pruitt on the campaign trail?" by Pro Energy's Emily Holden: "EPA Administrator Scott Pruitt has logged thousands of miles this summer touting his plans to rewrite the Obama administration's environmental regulations - and fueling speculation that he's laying the groundwork for a political campaign once he leaves his cabinet post. The former Oklahoma attorney general who made a name for himself by launching more than a dozen lawsuits against the Obama administration has visited 10 states in a few short weeks, hitting local media outlets along the way in a strategy that Beltway strategists say resembles more a candidate seeking political support than an EPA administrator pressing for regulatory changes. One conservative talk radio host in Iowa even joked about Pruitt's August trip to the state. 'If you're writing a book, you come to Iowa, or you must be running for the presidency,' WHO-AM's Simon Conway said to Pruitt. The trips, which have taken Pruitt mostly to Republican-led states, are ostensibly to highlight his efforts to loosen Obama-era water regulations. But he's also spending time with GOP leaders and influential industries and packing in as many media hits as possible, laying out well-rehearsed talking points to bash former President Barack Obama's EPA as part of his modern-day stump speech." **Full story.**

- "At Senator Menendez's Trial, Stakes Are High for Democrats," by the New York Times' Shane Goldmacher: "If Mr. Menendez, a Democrat, is convicted and then expelled from the United States Senate by early January, his replacement would be picked by Gov. Chris Christie, the Republican governor of New Jersey and an ally of President Trump. That scenario - where Mr. Menendez's interim replacement would more than likely be a Republican - would have immediate and far-reaching implications: The Republicans would be gifted a crucial extra vote just as the party remains a single vote shy in the Senate of advancing its bill to dismantle President Obama's signature health care law. Those potential consequences only heighten the drama around the first federal bribery charges leveled against a sitting senator in a generation. ... Even a bribery conviction would not automatically force Mr. Menendez from office, under the Senate rules. He would either have to voluntarily resign his seat, or two-thirds of his Senate colleagues - including at least 15 Democrats - would have to vote to expel him." **Full story.**

FOCUS ON FOCUS GROUPS - American Action Network tests tax reform arguments: American Action Network is out with the results of focus groups on tax reform in Orange County, Calif., and Omaha, Neb. Some of the takeaways: "The most popular messages on tax reform: more money in the pockets of the American people, bringing back the middle class, and paying your fair share. Least convincing message against tax reform: Any change to the tax system is just a cut for the rich and will not help relieve the tax burden on the middle class." The

memo also suggests "respondents recognized that Democrats will play on emotional fear mongering, yet all groups remained strongly in favor of tax reform." **Read the full memo here.**

MEMO MOMENT - Bridge questions McConnell: In a new memo, American Bridge argues "McConnell looks weaker than ever." "McConnell's humiliation is the culmination of eight disastrous months for Senate Republicans in which they have careened from crisis to crisis," the group's president, Jessica Mackler, writes. **Full memo here.**

GETTING THE NOD - End Citizens United endorsed first House candidates of 2018: End Citizens United endorsed three House challengers this week - Randy Bryce in Wisconsin's 1st District, Paul Davis in Kansas' 2nd District and Chrissy Houlahan in Pennsylvania's 6th District. The districts represent a diverse, both ideologically and demographically, slate of seats, which the group told McClatchy indicates that candidates who support getting money out of politics can run anywhere.

CODA - QUOTE OF THE DAY: "[Kid Rock] ain't running for jack squat. Okay? He never intended - he never thought about it. ... He ain't running. He never thought of running. Somebody literally pulled it out of their ass and said, 'Hey, what about Kid Rock?' Kid Rock didn't know anything about it. He's just having fun with it because it's so silly." - Ted Nugent, discussing Kid Rock's chances of running for Senate on a Michigan radio show.

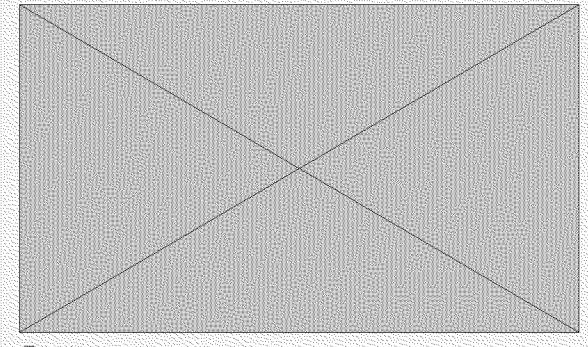
Recommendations for a future national defense strategy

Mackenzie Eaglen | Testimony before the Senate Committee on Armed Services

Since the end of the Cold War, the Pentagon's force-sizing construct has gradually become muddled and watered down at each iteration — from the aspirational objective of fighting two wars at once to the declinist "defeat-and-deny" approach — without enough substantive debate over the wisdom of the progressive

abandonment of the two-war standard.

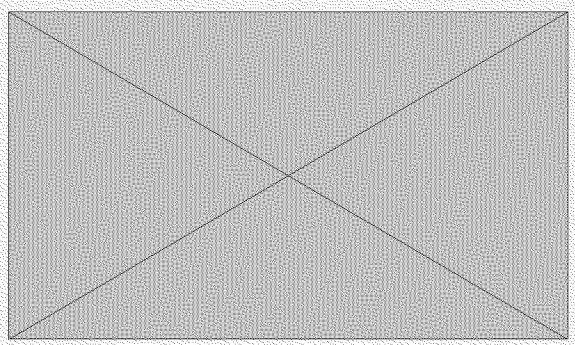


Twenty20

A GOP tax reform proposal that would help the working class

W. Bradford Wilcox and Samuel Hammond | The Atlantic

Republican leaders in Congress will say that there is simply no room in the budget to do more for working-class families, most of whom earn too little to owe federal taxes in the first place. But these same families lose roughly 15 cents of every hard-earned dollar to federal payroll taxes, directly diminishing their incentive to work and their ability to put their families on a firmer financial footing.



Reuters

Reviewing the polls: Hot topics in 2017

Karlyn Bowman and Eleanor O'Neil | Forbes

Most polls tend to reflect the national news cycle in terms of subject matter, and many of the hot topics this year related to national politics. But that does not mean other topics were less important to Americans. Besides politics, what were some of the other major issues registering in 2017?

Reuters

Farm subsidies: How effective are they?

Vincent H. Smith | AEI video

As Congress and the current administration seek to reduce poverty, policymakers should be wary of wasteful programs that do little to help poor Americans. Agricultural subsidies — especially popular with the largest and wealthiest farm business operations — largely fall into that category. Watch this minute-long video to learn more.

EHS Federal Regulatory Alert

September 19, 2017 - Number 180

You can create a report customized by topic, jurisdiction, and date range by using the Regulatory Summaries Report Tool. The report can be generated in Excel, Word, or PDF.

Summaries

AIR
Maine SIP/Regional Haze
AIR

Final rule of the EPA approves a revision to the Maine SIP for regional haze. The revision includes a five-year progress report toward reasonable progress goals (RPGs) for regional haze and a determination of adequacy of the existing regional haze SIP. The progress report specifies that the state has implemented the necessary measures and that visibility in federal Class I areas affected by the state's emissions is improving and meets the applicable RPGs for 2018. The rule is effective Oct. 19, 2017. Contact: Anne McWilliams; EPA Region 1, Air Quality Unit; 617-918-1697; mcwilliams.anne@epa.gov. Citations: 40 CFR 52.1020

82 FR 43699 (09/19/2017)

Regulatory Update

AIR
Primary NAAQS for SOx/Draft External Review Documents
AIR

Notice of the EPA announces the availability of two external review draft documents concerning risk and exposure assessment for the review of the primary NAAQS for sulfur oxides (SOx) and the policy assessment for the review of the primary SOx NAAQS. The draft documents address quantitative exposure and risk analyses for the NAAQS review and, when finalized, the policy assessment is intended to connect currently available scientific information and the judgments required of the administrator in determining whether to retain or revise the existing primary SOx NAAQS. The agency will announce a meeting at a later date. Comments are due Oct. 18, 2017. Contact: Nicole Hagan; EPA, Office of Air Quality Planning and Standards; 919-541-3153; hagan.nicole@epa.gov

82 FR 43756 (09/19/2017)

Regulatory Update

ENDANGERED SPECIES
Maui Dolphin, South Island Hector's Dolphin Listing
ENDANGERED SPECIES

Final rule of the National Marine Fisheries Service lists the Maui dolphin as endangered and the South Island Hector's dolphin as threatened. The subspecies are endemic to New Zealand and do not occur within areas under U.S. jurisdiction, and therefore NMFS does not intend to propose any critical habitat designations. The rule is issued in response to a petition from WildEarth Guardians. The rule is effective Oct. 19, 2017. Contact: Lisa Manning; NMFS, Office of Protected Resources; 301-427-8466; lisa.manning@noaa.gov. Citations: 50 CFR 223.102, 224.101

82 FR 43701 (09/19/2017)

Regulatory Update

FOOD SAFETY
Listing of Manufacturers/Processors for Food Exports to China
FOOD SAFETY

Notice announces the intention of the FDA to seek OMB approval for a continuing information collection request regarding lists maintained by the agency identifying U.S. manufacturers/processors interested in exporting milk and milk products, seafood, infant formula, formula for young children, or other products regulated by the Center for Food Safety and Applied Nutrition (CFSAN) to China. The collection addresses requirements in FDA guidance for manufacturers/processors to provide evidence of third-party certification of compliance with applicable Chinese standards to be placed on the lists and to update information biennially to remain on the lists. Comments are due Nov. 20, 2017. Contact: Domini Bean; FDA, Office of Operations; 301-796-5733; PRAStaff@fda.hhs.gov

82 FR 43761 (09/19/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Cigarette Graphic Health Warnings
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces the submission of a new information collection request to the OMB regarding warning statements for cigarette graphic health warnings. The collection concerns a study of consumer responses to potential textual warnings statements intended to promote greater public understanding of the negative health consequences of cigarette smoking. The study is being conducted due to a 2012 appeals court ruling that a June 22, 2011, final rule (76 FR 36628) requiring nine specified images to accompany textual warning statements for cigarettes violated the First Amendment. Comments are due Oct. 19, 2017. Contact: JonnaLynn Capezzuto; FDA, Office of Operations; 301-796-3794; PRAStaff@fda.hhs.gov. Citations: 21 CFR 1141

82 FR 43764 (09/19/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Generic Drug Policy
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces an extension of the comment period relating to a July 18, 2017, meeting (82 FR 28493; 06/22/2017) regarding implementation of the Hatch-Waxman Amendments and the appropriate balance between encouraging innovation in drug development and accelerating the availability to the public of lower cost alternatives to innovator drugs. The FDA seeks information regarding how the existing legal and regulatory framework and available incentives and marketplace practices impact consumer access to generic drugs. The previous notice listed several detailed questions on which the FDA would like specific input, including the impact of the Hatch-Waxman amendments on exclusivity periods, patents and patent listing procedures, innovator drug product labeling, post-approval changes to innovator drug products, and other regulatory processes such as the citizen petition process. Comments now are due Nov. 17, 2017. Contact: Philip Bonforte; FDA, Center for Drug Evaluation and Research; 240-402-6980; GenericDrugPolicy@fda.hhs.gov

82 FR 43767 (09/19/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Michigan, Wisconsin/Menominee and Park Mill Hydroelectric Project
GENERAL ENVIRONMENT AND SAFETY

Notice of FERC, Office of Energy Projects, announces the availability of an environmental assessment for the Menominee and Park Mill Hydroelectric Project on the Menominee River in Menominee County, Mich., and Marinette County, Wis. The project, proposed by North East Wisconsin Hydro LLC, of Neshkoro, Wis., consists of two developments with a total installed capacity of 4.348-megawatts. The EA concludes that issuing a new license for the project, with appropriate environmental measures, would not constitute a major federal action significantly affecting the quality of the human environment. Comments are due Oct. 30, 2017. Contact: Chelsea Hudock; FERC; 202-502-8448; chelsea.hudock@ferc.gov

82 FR 43754 (09/19/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Registration of Tobacco Establishments, Product Listing
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA announces the availability of a revised guidance for industry regarding registration and product listing for owners and operators of domestic tobacco product establishments. The guidance is intended to assist persons making establishment registration and product listing submissions to the FDA. The revisions specify a compliance policy for certain product listing labeling submissions. The revisions also update the compliance date concerning newly deemed products to specify that the agency does not intend to enforce such requirements if submissions are received by Sept. 30, 2017. Comments may be submitted at any time. Contact: Matthew Brenner; FDA, Center for Tobacco Products; 877-287-1373;

CTPRegulations@fda.hhs.gov

82 FR 43768 (09/19/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Tobacco Flavor Developer and Manufacturer Site Tours
GENERAL ENVIRONMENT AND SAFETY

Notice of the FDA, Center for Tobacco Products, announces an invitation for participation in its voluntary Flavor Developer and Manufacturer Site Tours Program. The program will provide agency staff an opportunity to visit companies that develop and/or manufacture flavors that are sold to tobacco product manufacturers to gain a better understanding of the development, testing, and production of flavors and flavor mixtures. A May 10, 2016, final rule (81 FR 28974) provided that all products that meet the statutory definition of "tobacco product," including components and parts, are subject to tobacco product manufacturing, distribution, and marketing regulations under the Federal Food, Drug, and Cosmetic Act. Company requests for participation in the program are due Nov. 20, 2017. Contact: Karla Price; FDA, Center for Tobacco Products; 877-287-1373; AskCTP@fda.hhs.gov

82 FR 43770 (09/19/2017)

Regulatory Update

HAZARDOUS MATERIALS TRANSPORTATION
Chemical Transportation Advisory Committee Meeting
HAZARDOUS MATERIALS TRANSPORTATION

Notice of the U.S. Coast Guard announces additional information concerning Oct. 3-5, 2017, meetings of the Chemical Transportation Advisory Committee and its subcommittees to discuss issues related to the marine transportation of hazardous materials (82 FR 41279; 08/30/2017). The meeting will address safety standards for the design of vessels carrying natural gas or using natural gas as fuel, marine vapor control system regulations implementation and guidance, hazardous substance response plans for tank vessels and facilities, and international maritime organization activities. The meeting also will address regulatory reform of Coast Guard regulations per executive orders 13771 (82 FR 9339; 02/03/2017) and 13783 (82 FR 16093; 03/31/2017). The notice announces a teleconference participation option for the full committee meeting scheduled for Oct. 5, 2017. Contact: Jake Lobb; USCG; 202-372-1428; jake.r.lobb@uscg.mil

82 FR 43778 (09/19/2017)

Regulatory Update

HAZARDOUS MATERIALS TRANSPORTATION
Motor Carrier Safety Medical Review Board
HAZARDOUS MATERIALS TRANSPORTATION

Notice of the Federal Motor Carrier Safety Administration announces a meeting of the Medical Review Board. The meeting agenda includes revisions to the handbook for medical examiners on

the National Registry of Certified Medical Examiners for use in evaluating interstate commercial motor vehicle drivers for a medical qualification determination. The meeting also includes review of the current advisory and exemption program criteria concerning individuals taking anti-seizure medication and identification of factors for consideration for potential regulatory actions to eliminate the need for granting exemptions. The meeting is scheduled Sept. 26-27, 2017, in Arlington, Va. Comments are due Sept. 20, 2017. Contact: Shannon Watson; FMCSA; 202-366-5221; mrb@dot.gov

82 FR 43809 (09/19/2017)

Regulatory Update

RADIATION
Georgia/Robins Air Force Base Decommissioning Plan
RADIATION

Notice of the NRC announces the availability of an environmental assessment and finding of no significant impact regarding an application from the Department of the Air Force for an amendment to its materials license (No. 42-23539-01AF) that authorizes the possession, storage, and use of radioactive materials around the U.S. The applicant seeks approval of a proposed decommissioning plan for Building 181 at Robins Air Force Base in Warner Robins, Ga., that would involve the cleanup of residual depleted uranium inside and underneath the building and partial demolition of the building. Contact: Vivian Campbell; NRC Region IV Office; 817-200-1455; Vivian.Campbell@nrc.gov

82 FR 43794 (09/19/2017)

Regulatory Update

RADIATION
NRC Fitness-for-Duty Programs
RADIATION

Notice of the NRC announces the submission of a continuing information collection request to the OMB regarding nuclear power fitness-for-duty programs. The collection addresses forms used by nuclear power plant licensees, strategic special nuclear material licensees, and other affected entities to report compliance with fitness-for-duty requirements related to drug and alcohol testing and fatigue reporting (NRC Forms 890, 891, and 892). Comments are due Oct. 19, 2017. Contact: David Cullison; NRC, Office of the Chief Information Officer; 301-415-2084; INFOCOLLECTS.Resource@nrc.gov. Citations: 10 CFR 26

82 FR 43797 (09/19/2017)

Regulatory Update

TOXIC SUBSTANCES
Federal Explosives Licensing Center/Notification of Change of Address
TOXIC SUBSTANCES

Notice of the Bureau of Alcohol, Tobacco, Firearms, and Explosives announces the submission of a continuing information collection request to the OMB concerning notification requirements

for explosives permit and license holders of a change of mailing or premise address. The collection addresses requirements for notification of the chief of the Federal Explosives Licensing Center of a business or operations address change. Comments are due Oct. 19, 2017. Contact: Shawn Stevens; ATF, Federal Explosives Licensing Center; 304-616-4421; Shawn.Stevens@atf.gov. Citations: 27 CFR 555.54

82 FR 43791 (09/19/2017)

Regulatory Update

WATER
Advanced Notice of Vessel Arrival
WATER

Notice of the U.S. Coast Guard announces the submission of a continuing information collection request to the OMB concerning the requirement for prearrival messages from any vessel entering a port or place in the U.S. The collection facilitates the control of vessel traffic, development of contingency plans, and enforcement of agency regulations. Comments are due Oct. 19, 2017. Contact: Anthony Smith; USCG, Office of Information Management; 202-475-3532. Citations: 33 CFR 146; 160, Subpart C

82 FR 43779 (09/19/2017)

Regulatory Update

WATER
Waiver of Compliance with Navigation Laws/Hurricanes Harvey and Irma
WATER

Notice of the Department of Homeland Security, Office of the Secretary, announces the extension and modification of a Sept. 14, 2017, waiver (82 FR 43248) of provisions of the Jones Act through Sept. 22, 2017. The act requires certain vessels providing transportation of merchandise by water, or by water and land between points in the U.S., to have a coastwise endorsement or the vessel to have been built in and documented under U.S. laws and to be wholly owned by U.S. citizens. The waiver was provided due to severe disruptions in both the midstream and downstream sectors of the Gulf Cost oil supply system due to Hurricane Harvey and the potential imminent shortage of energy supply in areas affected by Hurricane Irma. The waiver is intended to facilitate movement of refined petroleum products, including gasoline, diesel, and jet fuel, to be shipped from Alabama, Arkansas, Delaware, Louisiana, Maryland, Mississippi, New Mexico, New Jersey, New York, Pennsylvania, and Texas to Florida, Georgia, North Carolina, Puerto Rico, South Carolina, Virginia, and West Virginia. The modification extends the waiver to several additional states. The extension is effective Sept. 12, 2017. Contact: DHS; 202-282-8010

Subject: POLITICO's Morning Score: Maryland congressman eyes 2020 — Senate Majority PAC raised $4.5 million — LePage says Collins is going to run for governor

By Elena Schneider | 07/28/2017 10:00 AM EDT

With Daniel Strauss and Zach Montellaro

The following newsletter is an abridged version of Campaign Pro's Morning Score. For an earlier morning read on exponentially more races - and for a more comprehensive aggregation of the day's most important campaign news - sign up for Campaign Pro today. (http://www.politicopro.com/proinfo)

THIS IS UNEXPECTED - "Delaney eyes 2020 presidential run," by Campaign Pro's Kevin Robillard and Heather Caygle: "Rep. John Delaney (D-Md.) plans on bypassing runs for governor and reelection and has told associates he is seriously considering a bid for president in 2020, according to two Democratic sources. Five Democratic sources in the state said buzz about the Delaney's intentions for 2018 and 2020 has been building for weeks, with increasing chatter about a presidential bid. Delaney, who could self-fund a run for governor, will skip a challenge against popular GOP Gov. Larry Hogan. He will also leave Democrats to defend his district, which he nearly lost in 2014. Democrats in the state believe he will announce his plans in a Washington Post op-ed on Friday. ... A presidential bid would seem quixotic: Delaney is little-known even among Democratic operatives, and his moderate stances and background in finance don't match a left-leaning Democratic primary electorate." **Full story.**

IN THE DETAILS - "Johnson Amendment changes moving through House, with all sides watching warily," by Campaign Pro's Maggie Severns: "Free speech proponents, campaign finance watchdogs and religious leaders are all closely watching an appropriations rider that would chip away at rules barring churches from participating in politics, divided not only by their politics but by whether the rider would have any effect at all. The language, tucked into a House appropriations bill that recently passed out of committee, strikes at the Johnson Amendment, which bars nonprofits from endorsing or opposing candidates and spending money in elections. President Donald Trump promised to undo the amendment on the campaign trail, but to do so would take an act of Congress. Trump signed an executive order this year that mostly symbolically addressed the issue by instructing the IRS to not take action against churches that take political positions. **Full story.**

CASH RACE - "Senate Majority PAC raised $4.5M in first half of 2017," by Campaign Pro's Kevin Robillard: "Senate Majority PAC, the Democratic super PAC controlled by allies of Senate Minority Leader Chuck Schumer, raised $4.6 million in the first six months of 2017, its fastest-ever fundraising start at the beginning of an election cycle. The super PAC has spent little, and ended June with $4.5 million in the bank. Senate Majority PAC is expected to play a major role in Senate Democrats' defensive effort in 2018, when ten Democratic senators are facing reelection in states President Donald Trump won last November. In five of those states - Indiana, West Virginia, Montana, North Dakota and Missouri - Trump won by more than 10

percentage points." **Full story.**

HMM ... - "Paul LePage says Susan Collins is going to run for governor," by the Maine Sun Journal's Steve Collins: "Gov. Paul LePage said Thursday he believes that Maine's senior senator, Republican Susan Collins, has her eye on the Blaine House. 'I think she knows what she's doing. She's planning to run for governor,' LePage told Portland radio station WGAN." **Full story.**

Days until the 2017 election: 101.

Days until the 2018 election: 465.

Thanks for joining us. You can email tips to the Campaign Pro team at sbland@politico.com, eschneider@politico.com, krobillard@politico.com, dstrauss@politico.com and mseverns@politico.com.

You can also follow us on Twitter: @politicoscott, @ec_schneider, @politicokevin, @danielstrauss4 and @maggieseverns.

STAFFING UP - Buckeye Battle PAC adds top operatives: Buckeye Battle PAC, a pro-Mike Gibbons super PAC, has brought on a pair of veteran Republican operatives, Gentry Collins and Eric Woolson. According to the press release announcing the hires: "Gentry Collins joins as the senior political advisor, overseeing strategy and coalitions. During the 2010 election cycle, Collins served as the national political director at the Republican National Committee, tasked with building get-out-the-vote infrastructure nationwide. Under his direction the Republican Party made more volunteer voter contacts than any other cycle in history. The unprecedented ground game in 2010 played a major role in returning a Republican majority to Congress ... Eric Woolson joins Buckeye Battle PAC as the director of communications. Woolson is a former communications director for Iowa Gov. Terry Branstad, who was recently confirmed as U.S. Ambassador to China. Best known for managing former Arkansas Gov. Mike Huckabee's presidential campaign to a stunning victory in the 2008 Iowa caucuses, he has served in communications roles for six presidential candidates, numerous state and federal candidates and at three Republican National Conventions."

ON DEFENSE - "Pelosi defends Brady amid campaign investigation," by POLITICO's Heather Caygle: "House Minority Leader Nancy Pelosi is defending Rep. Bob Brady amid a federal probe into allegations his campaign illegally paid a primary challenger to drop out in 2012. The investigation came to light this week after Carolyn Cavaness, a former campaign manager and fiancé of Jimmie Moore, Brady's 2012 challenger, pleaded guilty for her role in helping illegally transfer $90,000 from the lawmaker's campaign coffers to Moore. Pelosi said she has confidence in Brady, who has served in the chamber for nearly two decades and is the top Democrat on the House Administration Committee." **Full story.**

CHANGE OF TUNE - "As Democrats Lay Into Trump, Cuomo Takes a Different Tack," by The New York Times' Shane Goldmacher: "Donald Trump may be the two most potent words in Democratic politics, but Andrew M. Cuomo, the Democratic governor of New York,

has spent much of the last six months going out of his way to avoid them. Nearly as soon as Mr. Trump was elected, Mr. Cuomo began dancing around invoking the president's name on the stump, skirting attacks in print and sidestepping reporters' questions about the president. As the Democratic Party's watchword in 2017 has become 'resist,' Mr. Cuomo, who has garnered attention as a possible presidential candidate in 2020, has instead opted to coexist." **Full story.**

POLLING DATA - Alabama Senate poll shows Strange with lead: A poll from the Raycom News Network and Strategy Research gives Sen. Luther Strange a narrow lead of likely registered voters in the Republican primary. Former Chief Justice Roy Moore is right on his heels with 33 percent and Rep. Mo Brooks has 16 percent, per WBRC. The IVR poll was in the field on July 34 and surveyed 3,000 registered voters with a margin of error of +/- 2 percent.

STEPPING UP - "Next Kansas governor would be a surgeon, Brownback loyalist," by the Associated Press's John Hanna: "Jeff Colyer is preparing to become Kansas' next governor after nearly a decade helping fellow conservative Republicans shape health care policy and serving as a loyal lieutenant governor and plastic surgeon, who squeezed in medical relief missions to disaster and war zones. Colyer would be elevated when his two-term running mate, GOP Gov. Sam Brownback, resigns to become President Donald Trump's ambassador-at-large for international religious freedom. ... Colyer would serve the remainder of Brownback's term, which ends in January 2019. The 57-year-old Colyer already was seen as a potential Republican candidate for governor next year because Brownback was term-limited. He was often the administration's spokesman on health issues and served in the Legislature before first running on Brownback's ticket in 2010." **Full story.**

ONLINE FUNDRAISING BONANZA - "Democratic 'nominee funds' top $100K in 12 districts," via Campaign Pro's Scott Bland: "Democratic small-dollar donors have already poured over $100,000 into escrow funds for the eventual nominee in 12 GOP-held battleground House districts, according to a new tool launched by Swing Left, one of the prominent groups raising money into such funds. Swing Left has launched a leaderboard tool to track district-by-district fundraising by its donors, and to give activists a platform to launch their own fundraising efforts. The tool includes the combined total with other groups, like ActBlue, that have also set up online 'nominee funds' that will flow to Democratic primary winners next year." **Full story.**

ADMINISTRATION SPEED READ - "Scaramucci declares war on Priebus, Bannon," via POLITICO's Josh Dawsey: "Anthony Scaramucci, the flashy and sometimes profane Wall Street financier, was brought on as White House communications director last Friday. It's already clear he's a lot more than that. In the span of six days, he has launched a brutally edged campaign to identify White House leakers, threatened to "fire everybody" in the communications shop, and has declared war on chief of staff Reince Priebus and chief strategist Steve Bannon. Scaramucci, who boasted that he reports directly to President Donald Trump, has described his role as "fixing the place," said one person who spoke with him this week. And he's wasting no time. In a vulgar interview with The New Yorker's Ryan Lizza on Wednesday night, Scaramucci laced into Priebus for trying to 'c--- block' him from a job in the White House, called him a 'f------ paranoid schizophrenic,' and questioned Bannon's loyalty. 'I'm not Steve Bannon, I'm not trying to suck my own c---,' he said." **Full story.**

CODA - QUOTE OF THE DAY: "Running mates don't matter. They do nothing to help you. All they can do is hurt you politically in terms of a race and who's voting for who." - New Jersey Gov. Chris Christie, talking about the selection by his running mate, Lt. Gov. Kim Guadagno, who is running for his job this year, via POLITICO New Jersey.

Bonds

Climate Bonds Pioneered by Goldman Lure Storm-Plagued Cities

As climate change pushes U.S. cities to build protections against stronger storms and more frequent floods, the Rockefeller Foundation is helping cities with a novel kind of financing, one that transfers some of the risk of innovative projects from cities to investors.

Coal-Fired Power Plants

China Coal Capacity Cuts Parallel Nudge Toward Gas Production

China is more than halfway to its goal of cutting 800 million metric tons of coal production capacity by the end of 2020, signaling to investors the government isn't projecting coal production to grow much more.

Energy

Mishap Triggers Taiwan Blackout as Power Policies Questioned

A blackout caused by a blunder at Taiwan's biggest gas-fired plant is the latest challenge to an electricity grid recently pushed to its limit and to President Tsai Ing-wen's efforts to reshape the island's power mix.

Energy

Scana Needs'Willing Partner' to Resume Nuclear Construction

Scana Corp. executives said the company would need to sign new contracts to revive construction on a South Carolina nuclear power plant—and that federal tax credits would be "an important factor."

Fossil Fuels

Court Provides Blueprint for Challenging Fossil Fuel Projects

A district court decision stopping the expansion of a Montana coal mine provides a blueprint for environmental advocates to block other coal, oil, and gas projects across the country.

Motor Vehicles

EU Automakers May Be Required to Produce Electric Vehicles

Making electric cars may become a regulatory requirement rather than a strategic choice for vehicle makers in the European Union as the bloc seeks to underpin a shift away from polluting combustion engines.

Oil & Gas

Offshore Drillers Shrug as U.S. Offers More Acreage, Lower Fees

Oil drillers are shrugging at President Donald Trump's pitch to invest in federal waters.

Renewable Energy

Arizona Utility to Replace Rooftop Solar Payments After Protests

Pinnacle West Capital Corp.'s Arizona Public Service will replace a program that required the state's largest utility to buy excess rooftop solar power at the same price that customers pay the utility.

Renewable Energy

Bird Charity Asked to Abandon Challenge to Scottish Wind Farm

Companies in the offshore wind energy supply chain asked a U.K. bird charity to abandon its legal battle against four giant projects planned off the coast of Scotland, which the environmentalists say could harm wildlife in the area if they were built.

Renewable Energy

State Nixes $2.5 Billion Line to Bring Wind Power to Midwest

A proposed $2.5 billion transmission line to bring cheap Kansas wind power to the Midwest was rejected by Missouri, which said the project failed to get all needed county approvals.

Sustainability

Tesla Skipping Green Bond Label Keeps Fledgling Market Limited

Investors are hungrier than ever for green bonds, yet companies known for their sustainable prowess—including Tesla Inc.—are choosing to sit out, raising questions about just how valuable the green bond label is.

Trump Push for Natural Gas Exports Opposed by Manufacturers

President Donald Trump's effort to boost U.S. energy is facing push back from manufacturers who say exporting more natural gas may undercut his "America First" jobs focus.

Practitioner Insights

Enforcement

Practitioner Insights: Environmental Fraud—New or Not?

"Fraud" is a term typically associated with Bernie Madoff, Ponzi schemes, and other situations where perpetrators have achieved financial gain. But fraud in the environmental area hasn't captured recent headlines until Volkswagen was found to have installed emissions cheating software in their diesel models, a decision that has cost VW more than $20 billion to date. One positive aspect of the VW scandal may be raised awareness of environmental fraud, and for environmental ...

Under Water, Houston Superfund Sites Spread Unease

Posted August 31, 2017, 12:35 P.M. ET

By Sylvia Carignan

At two Superfund sites in Houston, contaminants have likely spread outside secured perimeters, into communities and bodies of water, community advocates said.

"There are these massive pools of water sitting on the actual site," said Yvette Arellano, spokeswoman for Texas Environmental Justice Advocacy Services, which is tracking progress at the Many Diversified Interests Inc. Superfund site in Houston. Arellano and other community advocates worry that lead-contaminated soil has mixed with floodwater at the site.

The Environmental Protection Agency is taking stock of flooded Superfund sites in the aftermath of Hurricane Harvey, but community groups worry that the agency's cleanup policies aren't enough to protect human health.

The EPA started assessing storm damage at affected Superfund sites Aug. 30, but has not specified which properties it has reviewed. There are 13 federal Superfund sites in Harris County, Texas, which includes the city of Houston. The San Jacinto River Waste Pits Superfund site outside Houston has impounded paper-mill waste. In the early 2000s, the Texas Commission on Environmental Quality found dioxins and furans in sediment, fish, and crabs.

"The original way they found out the pits were leaking was through a similar storm many years ago," Lois Gibbs, founder of Center for Health, Environment & Justice, told Bloomberg BNA, adding that "the dioxin washed up into the properties there."

The EPA's proposed remediation plan for the site acknowledges the potential for flooding and changes in the river's path, making containment options unreliable. An armored cap placed on some of the waste in 2011 has been deteriorating, even with periodic repairs.

The San Jacinto River site is one of nine where EPA Administrator Scott Pruitt will decide on the

final remedial plan. The proposed plan, to ultimately remove the contaminants from the site, was estimated to cost nearly $100 million.

Harvey's Floods Could Delay 10 Percent of U.S. Fracking: Analyst

Posted August 31, 2017, 12:31 P.M. ET

By David Wethe

As much as 10 percent of U.S. fracking work could be delayed after Hurricane Harvey ripped through southeast Texas, home to one of the nation's busiest oilfields, according to Raymond James & Associates financial advisory.

More than half the rigs running in the Eagle Ford Shale are estimated to have suspended drilling because of the storm, Marshall Adkins, an analyst at Raymond James, wrote in an Aug. 31 note to clients. The muddy conditions left in Harvey's wake will add stress to the fracking services sector that has consistently lagged the faster drilling crews.

Given its location in far southeastern Texas, the Eagle Ford was the only major American shale formation in the cross hairs of Harvey when it slammed ashore as a Category 4 hurricane last week. Major explorers including EOG Resources Inc. and Marathon Oil Corp. halted drilling and evacuated crews in anticipation of the storm, crimping as much as 57 percent of daily production, according to the Texas Railroad Commission.

"Given that much of oil and gas activity occurs in areas only accessible via dirt roads, the heavy rainfall usually makes the movement of trucks and supplies much more difficult," Adkins wrote. "The trucking and rail of sand, chemicals, and personnel to the well site will all take more time given the likely nasty condition of many Eagle Ford access roads."

The Eagle Ford was the only shale basin of the big four to drop activity in recent days, as some in the industry start to look at shale as a more expensive option compared to other places.

The temporary drop in the rig count by as much as 45 rigs due to flooding could be a catalyst for higher oil prices, Adkins wrote.

Concerns Over Houston Landfills Rise as Floodwaters Recede

Posted August 31, 2017, 02:50 P.M. ET

By Adam Allington

Tens of thousands of hurricane-ravaged houses will be gutted or bulldozed when the floodwaters in Texas eventually recede and cleanup begins. Where all of that garbage ends up is a looming question, with potential long-term environmental consequences.

While state officials say it is still too early to determine how much debris will remain, they know that in the aftermath of Hurricane Katrina in 2005, the city of New Orleans—which is one-sixth the size of Houston—had to dispose of 55 million cubic yards of waste, enough to fill the Superdome 40 times over. Simple math indicates that the size and scope of the Houston cleanup will be much greater,

raising questions about whether area landfills are equipped to sort and dispose of that much garbage.

Toxic Waste Headed to Landfills

In the aftermath of a hurricane, getting people safely back into their homes is the first priority. In an effort to speed that process, the Texas Commission on Environmental Quality has waived certain environmental regulations, including several pertaining to the disposal of solid waste.

According to the federal Resource Conservation and Recovery Act, all debris headed to landfills first must be sorted into five categories: woody debris; construction and demolition debris; "white goods," such as refrigerators, air conditioners, and water heaters; household hazardous waste; and electronic waste.

Many environmentalists worry that with thousands of truckloads of debris coming in such a rapid succession, sorting won't actually happen to the extent it should.

"We're about to put hundreds of thousands of tons of toxic materials into landfills," Andrew Dobbs, program director with the Texas Campaign for the Environment, told Bloomberg BNA. "Based on what we've seen from other recent floods in Texas, they probably aren't going to segregate out toxic materials, it's just going to end up in the landfill."

Dobbs said he and other environmentalists are not wagging their fingers at people who want the cleanup to go as quickly as possible. Instead, he says Houston should use this as an opportunity to plan for the next disaster, and properly prioritize hazardous waste cleanup.

A Very Long Cleanup

The trash and debris Harvey will leave behind is likely to take years to clean up, according to the Federal Emergency Management Agency. If disasters such as Harvey become more frequent, as climate scientists say they will, landfills will become increasingly important to the recovery process.

In the case of Houston, a lack of space in landfills might not be the immediate concern. The Houston-Galveston region has 27 landfills, with a total of 34 years of capacity under normal disposal rates, according to the Houston-Galveston Area Council.

"As things dry out, most cities and counties do have disaster debris management programs in place," Anne Germain, director of waste and recycling technology at the National Waste and Recycling Association, told Bloomberg BNA.

With the full cleanup likely to take a long time, the impact to neighborhoods could be minimized by having the material removed and managed at temporary locations, like the ones used in the aftermath of Katrina, Germain said.

Construction and demolition (C and D) landfills, so-called "sticks and bricks" sites, for example, could be used to take on extra capacity that might otherwise end up in municipal solid waste landfills.

"For instance, there will be lots of cars," Germain said. "Cars don't normally go to landfills, but they could be stored and processed at one off-site location.

Typically, the liner requirements for C and D landfills are not as robust to protect groundwater and each state regulates what materials those landfills can accept.

In Texas, Germain said, small amounts of household hazardous waste such as compact fluorescent light bulbs and batteries are permitted to go into the regular municipal solid waste landfill. More hazardous materials like propane tanks, pesticide containers, and household cleaners will need to be separated and taken to special disposal sites.

Lessons From Katrina

One of the factors contributing to the lengthy cleanup process after Katrina was the unprecedented scale of the operation and the complexity of the waste stream. Lessons learned from that cleanup have become integral to other disaster recovery plans.

"We authorized 409 sites for debris management—things like storage, grinding up waste to reduce volume," Chuck Carr Brown, the secretary of the Louisiana Department of Environmental Quality, told Bloomberg BNA. Brown was the assistant secretary during Hurricane Katrina and said he has shared his post-disaster playbook with his counterparts in Texas

His main piece of advice for Texas was to distribute the waste and debris segregation protocols as quickly as possible.

"Once the water recedes, the first thing you'll have is folks will go back home and start gutting houses—sheet rock, carpet, refrigerator, it will all go out to the curb," he said.

Brown told Bloomberg BNA that the list of materials that could be dumped in landfills was expanded in the aftermath of Katrina, but residents have not been exposed to a greater risk of point-source pollution.

"We didn't relax environmental" regulations, Brown said. "However, we did use a common sense approach to questions like, 'How can we create additional landfill space?'"

Louisiana extended the kinds of materials that could be taken to C and D landfills to include things like carpet and furniture, which frequently include chemicals and plastics, Brown said.

Synthetic carpets biodegrade very slowly and are known contributor to methane emissions. They can leach dangerous chemicals into the water supply, according to the anti-incineration group GAIA.

Brown said that waste collected during the Katrina cleanup is still being tested and has not been a problem. "We're 12 years out and not one environmental issue," he said.

He also said New Orleans was able to recycle 39 percent of the debris the city collected.

"If the people in Houston are able to do that, they'll be fine."

U.S. East Coast Drivers to Feel Harvey Fury at Gasoline Pump

Posted August 31, 2017, 02:15 P.M. ET

By Laura Blewitt

Motorists from Maine to Florida will soon feel the wrath of Hurricane Harvey without seeing a single raindrop.

Fuel prices at the pump are likely to climb after Colonial Pipeline Co.—the largest U.S. gasoline conduit—was forced to shut parts of its main diesel line late Aug. 30 and planned to halt a portion of its gasoline line Aug. 31 because about half of Gulf Coast refining capacity was offline. The company anticipates resuming some service late Sept. 3. Valero Energy Corp. and Royal Dutch Shell Plc, both major Gulf Coast refiners, told wholesale customers Aug. 30 they don't have enough gasoline and diesel to sell retail suppliers.

"It's one thing to not have refiners," Dan McTeague, an analyst at GasBuddy.com, a company which tracks retail prices and availability, said by phone. "It's quite another thing to not have pipelines."

Hurricane Harvey has potentially cut U.S. fuel-making capacity to the lowest level since 2008 after its initial strike on the Texas coast late last week. As Tropical Storm Harvey hit southeast Louisiana on Aug. 30, it brought torrential rains that shut the biggest U.S. refinery, owned by Motiva Enterprises LLC in Port Arthur, Texas, and one nearby held by Total SA. They join more than 12 other plants with almost a quarter of U.S. refining capacity.

As refineries along the Gulf Coast turned off the lights, Colonial, which carries fuel from Gulf Coast refineries to the East Coast, indicated that portions of its two main Lines 1 and 2 west of Lake Charles, Louisiana, would be offline and operating at reduced rates east of Lake Charles. Many smaller lines branching off from its main artery are also likely to shut.

Pace of Supply

"The issue is the pace of supply that we're getting from the origins," Buster Brown, Colonial's director of scheduling, said in a telephone interview. "It's not as much running out of supply as the timing—the speed at which supply gets to market."

Once shipments from the Houston area resume, Colonial will be able to ship fuels east, bypassing shuttered terminals in the Port Arthur, Texas, area, Brown said, noting that "Houston supply and Port Arthur supply are independent, so to speak."

Harvey also submerged pump stations and terminals along the Gulf Coast with its days-long deluge, and operators such as Valero and Shell had no choice but to stop sending fuels.

Valero stopped supplying gasoline stations across the Northeast at stores that don't carry its logo, while Shell reduced supplies to some company-branded stations in the lower Atlantic, according to people familiar with the operations of both companies who asked not to be identified. Motiva Enterprises holds exclusive rights to distribute Shell fuels to the majority of the southeast, said Natalie Gunnell, a spokeswoman for Shell's U.S. products unit.

BP Plc was said to be moving a tanker authorized to carry fuels between U.S. ports to Florida from New York Harbor, according to a person familiar with the cargo.

Spokespeople from Valero and BP didn't return requests for comment.

Fuel Waivers

The Environmental Protection Agency, in an effort to stay ahead of potential shortages, has been

issuing waivers exempting more and more southeastern states from requirements that they use fuel that meets clean-air quality standards.

Gasoline futures for September delivery at New York Harbor rose for an eighth session Aug. 31, the longest rally since 2013, and climbed above $2 a gallon.

As shortages ripple across the East Coast, the most likely suppliers left standing are refiners from Louisiana and Europe, according to Zachary Rogers, a refining and oil products analyst at Wood Mackenzie. The ongoing gasoline supply issues could reduce East Coast inventories to 3- to 5-year lows, he said by phone from Houston.

At least 20 tankers were booked to load European fuels for the U.S. since Harvey made landfall, a rate nearly double the average for August, shipping data compiled by Bloomberg show. Shipbrokers said cargo flows to New York are expected to be the highest since November, when Colonial Pipeline exploded and cut off supplies.

“Because of the shortage, you will likely see a price increase in the East Coast, which would incentivize the other refiners to shift gasoline yields,” Rogers said.

While suppliers of gasoline stations from Georgia northward may have reason to be concerned, the Sunshine State has one key advantage: It’s not winter yet.

“In Florida, we’re not in the main season, so demand is not as high as it would be normally from November to May,” said Ned Boman, executive director of the Florida Petroleum Marketers and Convenience Store Association. “We should be OK.”

Arkema Chemical Plant in Texas Explodes After Hurricane Damage

Posted August 31, 2017, 9:46 A.M. ET

By Ania Nussbaum and Jack Kaskey

A Texas chemical plant was hit by explosions after floods caused by Hurricane Harvey knocked out power supplies needed to refrigerate volatile chemicals. The plant, owned by French chemical company Arkema SA, was evacuated and the local area cleared prior to the blow.

Two explosions and black smoke were reported at 2:00 a.m. local time, after the plant in Crosby, Texas, lost its electricity supply and backup generators, the company said in an Aug. 31 statement. Arkema stores organic peroxides at several locations on the site and the threat of additional explosions remains, it said.

“It is not anything toxic. It is not anything we think is a danger to the community at all,” Harris County Sheriff Ed Gonzales said in a press conference streamed on the internet Aug. 31. Harvey made landfall on Aug. 26 and has brought torrential rain and the collapse of levees, dams and drains while knocking out almost a quarter of U.S. refining capacity, of which more than half is in the Gulf of Mexico region. While Harvey’s closure of U.S. crude processing capacity has grabbed headlines and led to spiking gasoline prices, less known is the storm’s outsize impact on chemical production.

"It seems like Harvey came with a plan to follow the chemical industry on the Gulf Coast," said Sam Mannan, director of the Mary Kay O'Connor Process Safety Center at Texas A&M University. "This whole thing is testing how well we have thought through our safety systems and programs and how robust the plants are."

Uncharted Territory

About 61 percent of U.S. ethylene production has been shut due to Harvey as of Aug. 30 afternoon, according to PetroChemwire.

While Gulf Coast chemical plants are designed to withstand hurricane force winds and floods, Harvey has put the industry into uncharted territory, according to Mannan.

"I don't know if anybody is ready for this level of flooding," he said. Arkema's site in Crosby, which is about 25 miles from downtown Houston, is situated in an area with no hospitals, schools, correctional facilities, recreational areas, or industrial and commercial areas in the vicinity, according to the Colombes, France-based company.

The best course of action is to let the fire burn itself out, it said. The chemicals made at the plant are used in a variety of products from drugs to construction materials.

"At Crosby, we prepared for what we recognized could be a worst-case scenario," Rich Rowe, who overseas Arkema's U.S. operation, said in a statement. "We had redundant contingency plans in place. Right now, we have an unprecedented six feet of water at the plant."

One complicating factor post-Harvey is the urban sprawl gradually engulfing chemical plants, according to Andrea Sella, a professor of inorganic chemistry at UCL university in London.

"Because accidents are unusual, planners can come to underestimate the severity of what are likely to be quite rare events," she said in an e-mailed statement.

Texas Explosions Signal Chemical Plants Pushed to Limits by Storm

Posted August 31, 2017, 12:28 P.M. ET

By Jack Kaskey and Ania Nussbaum

In its devastatingly slow crawl up the industrial Gulf Coast, Hurricane Harvey is proving to be the biggest test yet of the safety and vulnerabilities of the U.S. chemicals industry.

A Houston-area chemical plant was hit by explosions overnight after floods caused by Harvey knocked out power supplies needed to refrigerate volatile peroxides. Fifteen police officers were treated at the hospital for smoke irritation from the plant, though earlier evacuations of the site and surrounding community prevented more serious injuries. The plant is owned by French chemical company Arkema SA.

The remaining chemicals will eventually burn, Richard Rennard, an Arkema division president, told reporters Aug. 31. “It is not anything we think is a danger to the community at all,” Harris County Sheriff Ed Gonzalez said in a news conference early in the day.

The incident underscored the risks confronting the industry after dozens of chemical plants shut down in the path of the storm from South Texas to Louisiana, knocking out more than half of U.S. production of some of the most-used chemicals and plastics.

With its crucial access to ports for shipping and receiving, the Gulf Coast is the epicenter of the nation’s chemical industry, where many of the materials indispensable to modern society are produced. The plants provide the basic building blocks for making everything from cars and computers to household furnishings and appliances.

The massive industrial centers also deal with complex chemical processes that pose hazards from lethal explosions to toxic spills when things go wrong. The danger is greatest when plants are shutting down and starting up.

“That is when bad things happen,” said Ramanan Krishnamoorti, the chief energy officer at the University of Houston.

Uncharted Territory

Gulf Coast chemical plants are designed to withstand hurricane force winds and floods, but Harvey has put the industry into uncharted territory, Sam Mannan, director of the Mary Kay O’Connor Process Safety Center at Texas A&M University, which studies plant safety.

Though plants have been dealing with a multitude of problems and there have been no serious injuries, the crisis is far from over. It will take weeks, if not months, for all the plants to assess damage, make repairs and restart operations in the wake of the floods.

“This whole thing is testing how well we have thought through our safety systems and programs and how robust the plants are,” said Mannan. “I don’t know if anybody is ready for this level of flooding.“

Harvey made landfall on Aug. 26 and has brought torrential rain and historic flooding along the Gulf Coast, knocking out almost a quarter of U.S. refining capacity. While Harvey’s shut down of U.S. crude processing capacity has grabbed headlines and led to spiking gasoline prices, less known is the storm’s outsize impact on chemical production.

“It seems like Harvey came with a plan to follow the chemical industry on the Gulf Coast,” Mannan said.

Production Halted

About 61 percent of U.S. ethylene production has been shut due to Harvey, according to PetroChemwire. The storm has closed about 51 percent of U.S. capacity for making polyethylene, the world’s most used plastic resin, according to Kevin McCarthy, an equity analyst at Vertical Research Partners. As much as 65 percent of polypropylene production and one-third of chlorine output may shut or running at reduced rates, according to IHS Markit. Prices already have been rising.

“The combination of Harvey’s path, duration and rainfall total is wreaking havoc with the supply side

of the U.S. chemicals industry on an unprecedented scale," McCarthy said. "We certainly haven't seen anything quite like it in our 18 years of following chemical stocks on Wall Street."

One complicating factor post-Harvey is the urban sprawl gradually engulfing chemical plants, according to Andrea Sella, a professor of inorganic chemistry at UCL university in London. "Because accidents are unusual, planners can come to underestimate the severity of what are likely to be quite rare events," he said by email.

Arkema's site in Crosby, which is about 25 miles from downtown Houston, is situated in an area with no hospitals, schools, correctional facilities, recreational areas or industrial and commercial areas in the vicinity, according to the Colombes, France-based company.

Explosions, Smoke

Two explosions and black smoke were reported at 2 a.m. local time, after the plant lost power and backup generators in the storm's flood, the company said in a statement on Thursday. Arkema stores organic peroxides at several locations on the site. Sheriff Gonzalez said 13 of the 15 deputies treated for smoke exposure had been released from the hospital.

The best course of action is to let the fire burn itself out, the company said. The chemicals made at the plant are used to make plastics.

"At Crosby, we prepared for what we recognized could be a worst-case scenario," Rich Rowe, who overseas Arkema's U.S. operations, said in a statement. "We had redundant contingency plans in place." The flood waters, which reached 6 feet inside the plant, have begun to recede, Rennard, the company president, said Aug. 31.

Harvey Cleanup Tests Trump's Plan to Shrink EPA Staff by 8%

Posted August 31, 2017, 12:24 P.M. ET

By Abby Smith

The EPA has a team in Texas to lead the environmental response to Hurricane Harvey, which could pose a severe test for an agency the Trump administration is moving to shrink as early as this weekend.

The hurricane struck as the Environmental Protection Agency could buy out as many as 1,228 employees, or roughly 8 percent of its workforce.

"I've got to hope there has been a sudden and drastic culture change within the agency, and the political appointees from [EPA Administrator Scott] Pruitt down I hope and pray are listening to the EPA career staff," Judith Enck, who served as EPA Region 2 administrator during the Obama administration, told Bloomberg BNA. Enck led the agency's response to Hurricane Sandy, which swept across the Northeast in 2012 leaving areas of the New York and New Jersey coastline devastated.

The Trump administration's plans to shrink EPA staff pose a significant concern to the agency's Harvey response, she said. The first round of early buyouts for staff is Sept. 2.

"If a large number of EPA staff are walking out the door then, that is a huge problem," Enck said, suggesting the EPA should freeze that round of buyouts.

"The Trump administration wants to cut the EPA budget by 31 percent. Imagine responding to the current situation with only two-thirds of the staff on board," she said, adding that the people who would be leaving due to buyouts are the "ones most experienced, the people who worked on the Katrina and Sandy responses."

The Category 4 storm that ripped through the Houston area late last week and is now making its way through southeast Texas and Louisiana has caused historic flooding, but it is also leaving behind environmental hazards—from flood waters littered with chemicals, sewage, bacteria, and debris to large releases of toxic gas and pollutants into the air from the heavy concentration of refineries and chemical plants in the area.

While the Federal Emergency Management Agency serves as the lead agency in emergency response, the EPA will work to address environmental threats caused by the storm—a recovery effort that is likely to take months, if not years.

EPA Teams in Texas

To respond to Harvey, the EPA has activated its Emergency Operations Center, as well as the National Incident Management Team composed of response personnel from EPA Regions 3, 4, and 5. That team arrived in Dallas on Aug. 30, according to David Gray, acting deputy regional administrator for EPA Region 6, which covers Texas and Louisiana.

"EPA has an organized emergency response program and is positioned to support FEMA, state, local and tribal partners," Gray said in a statement to Bloomberg BNA. "Helping to manage response efforts and focusing on the safety of those affected are our highest priorities."

Typically, the EPA serves as the lead agency for cleanup of hazardous materials in the aftermath of an environmental disaster, though it also coordinates with other federal and local agencies to assess and respond to other potential environmental impacts.

Gray said the EPA is working with the Texas Commission on Environmental Quality, Texas General Land Office, and the Coast Guard, with seven teams in the field. The EPA Aug. 30 sent teams to inspect two Superfund sites near Corpus Christi that are on the agency's National Priorities List, according to Gray. The agency will also send teams to two drinking water and waste water systems, as well as aircraft to assess pollution in the impacted area.

In June, the union covering EPA employees said as many as 1,228 EPA employees would be eligible for buyout offers that would need to take effect by Sept. 2.

Fate of Chemical Makers' Trade Secrets Rests With EPA

Posted August 31, 2017, 7:31 A.M. ET

By Pat Rizzuto

The EPA is preparing to receive requests from potentially hundreds of chemical manufacturers, importers, and processors who want to keep thousands of chemical details out of the public eye.

However, with a looming Sept. 19 deadline for companies to justify past requests to the EPA, a sense of confusion remains over what companies need to do to keep their trade secrets confidential, according to industry officials and consultants. That confusion is the result of a complex web of deadlines and requirements for different types of information and some initial missteps following the 2016 update to the nation's chemicals law.

At issue is confidential business information, facts such as a company's identity as the manufacturer of a chemical, which could be mined by competitors to gain market share.

"Protection of confidential business information is critical to enable innovation," Jarrod Erpelding, a Dow Chemical Co. spokesman, told Bloomberg BNA.

Chemical companies frequently ask the EPA to keep some details about chemicals private. The 2016 update to the Toxic Substances Control Act added a new requirement that manufacturers routinely justify their need for that chemical information to be kept confidential.

Three 'Buckets'

The statute requires the EPA to review all claims that a chemical's identity should be kept confidential and 25 percent of any other proprietary business information claims.

The updated chemicals law, along with a Jan. 19 Federal Register notice and an Aug. 11 rule (RIN 2070-AK24), established three general groups, or "buckets," of CBI claims the EPA must review, Richard Engler, a senior chemist with Bergeson & Campbell, P.C. and 17-year veteran of the EPA chemicals office, told Bloomberg BNA.

Those "buckets" of claims are:

• "retrospective substantiations" for claims that companies made on TSCA documents submitted between June 22, 2016, when the law was updated, and March 21, 2017, when the EPA issued guidance;

• ongoing substantiations that provided a company's rationale to keep confidential information on any TSCA document filed since March 21; and

• justifications for CBI claims made in response to an August regulation known as the "Inventory Reset" rule, which requires chemical manufacturers and importers, and allows chemical processors to, notify the EPA about any chemical they made or used since June 21, 2006. Those submissions are due by Feb. 7, 2018.

Confidential business information isn't just a big issue for chemical companies. Environmental advocates say that workers, industrial hygienists, ecologists, state and environmental officials, and the public generally have the right to know about chemicals that are in people's bodies and the environment. The ability to figure out whether that exposure could cause harm depends on chemical information being publicly available, they said.

The Environmental Defense Fund and Safer Chemicals Healthy Families were unable to respond to a request for comment on the EPA's review of confidential business information claims, while the Natural Resources Defense Council didn't reply to repeated requests. In a Jan. 18 blog, Richard Dension, lead senior scientist with the Environmental Defense Fund, described the EPA's decision

to give chemical companies until Sept. 19 to substantiate previously submitted confidential business information claims as "exceedingly generous."

EPA Prepping for Deluge

The most imminent deadline companies face is the Sept. 19 deadline for justifying claims made in the nine months after TSCA was updated. A single TSCA document filed during that period could include multiple CBI claims.

The universe of claims companies made during those nine months could include thousands of requests stemming from the Chemical Data Reporting rule submissions they submitted to the EPA in 2016. Bloomberg BNA reviewed 43,095 submissions from last year: 6,554 of them, or about 15.2 percent, came from manufacturing sites claiming their identity as confidential.

Realizing a deluge of confidential business information justifications may be submitted by that deadline, the EPA boosted by 20 percent the number of staff that will review company claims, Pam Myrick, director of the chemical office's Information Management Division, told Bloomberg BNA. The agency may seek additional, temporary help due to the volume expected, she said.

The amended chemicals law gives the EPA 90 days to complete its reviews of confidential business information claims.

"We will do our best," Ryan Wallace, acting information access chief of the Information Management Division in the EPA chemicals office, told Bloomberg BNA.

If a company fails to substantiate information it claimed needed trade secret protection, the agency will notify the company. The business have 30 additional days to substantiate the information, he said. The agency also will provide its final decisions and the rationale behind them to companies, which would then have 30 days to appeal that decision in a U.S. district court, Wallace said.

That 30 day time limit to sue means chemical manufacturers must take seriously any letter they receive from the agency and decide promptly if they want to challenge it, Irene Hantman, an attorney in the Washington office of Verdant Law, PLLC, told Bloomberg BNA. If not, the company loses its ability to prevent the information from being made public, she said.

Confusing Context

With just weeks to go before the Sept. 19 deadline, some chemical makers don't realize how many confidentiality claims may need to be substantiated, or re-substantiated, because they were made during the June 2016 to March 2017 window, Brianna Scherffius, a consultant with Ramboll Environ, Inc., and other chemical policy professionals told Bloomberg BNA.

Companies submitted thousands of Chemical Data Reporting rule forms—each form having many potentially confidential details—from June 1 through Oct. 31, 2016. Confidential business information claims also could have been made between June 22, 2016, and March 21, 2017, on:

- new chemical notices and related documents (TSCA Section 5);

- substantial risk notices (TSCA Section 8(e)); and

- documents such as chemical information submitted due to a rule or enforceable consent agreement (TSCA Section 4).

The context in which these claims were filed makes them particularly complex and potentially confusing for chemical manufacturers, Scherffius and Christina Franz, senior director of regulatory and technical affairs at the American Chemistry Council, told Bloomberg BNA.

The requirement to justify confidentiality claims was effective as soon as the TSCA amendments became law in June 2016. Yet, the electronic database companies use to submit chemical information to the EPA wasn't updated for several months, Scherffius, Franz, and Wallace said.

The delay meant the software companies use didn't automatically trigger the substantiation requirement for many confidentiality claims they could make.

It also took the EPA until January to prepare guidance to help companies substantiate confidentiality requests, Wallace said. The EPA had developed guidance and updated its electronic filing system by Jan. 19 when it announced the retrospective substantiation window, he said.

Mistakes Made Early On

Prior to that January guidance, companies had some painful experiences with confidential business information requests.

Chemical manufacturers were getting letters "fast and furious" from the EPA saying confidential information had not been adequately substantiated, yet those letters weren't clear about what the agency needed, Franz said.

In at least one case, a company's CBI was unintentionally disclosed, Franz said. The company's competitive position wasn't harmed as a result of that disclosure, Franz said, but the EPA took the security breach seriously.

"We were making mistakes in the haste to get them [the letters] out," Wallace said.

After chemical manufacturers alerted officials to the problems, the agency temporarily stopped sending letters saying claims had not been sufficiently substantiated, Wallace said. The EPA focused on setting up a clearer review and communication process and developing guidance, he added.

Those efforts included regular meetings between EPA and the American Chemistry Council to ensure that companies understand the agency's expectations, Franz said. In addition the EPA hosted two webinars in March on its updated electronic filing system and had agency staff speak during Chemistry Council webinars this summer to further explain expectations and the law's requirements.

"During the start-up of EPA's CBI review program, many companies, including Dow, encountered errors," Erpelding told Bloomberg BNA by email. "The agency responded, and appears to have resolved those issues."

Lack of Awareness Persists

Notwithstanding the EPA's "very constructive" efforts to clarify its expectations, some chemical manufacturers still don't realize they have to substantiate or re-substantiate confidentiality claims made soon after TSCA was amended, Franz said.

The EPA developed three CBI substantiation templates to help companies understand what information can be claimed confidential and what questions they would be able to answer to explain why.

Yet, Scherffius said, some chemical manufacturers do not know these templates exist or understand how to substantiate their claims.

Nor do manufacturers fully realize different substantiation requirements may or may not apply to different types of claims, Engler said.

The amended chemicals law presumes certain types of information to be confidential, which means companies don't have to justify the need to keep that information confidential when its provided to the EPA, Engler said. That includes information like a company's suppliers and customers, as well as the specific ingredients and percentage of those ingredients in chemical mixtures is confidential.

More Justifications Possible

There's another reason the EPA may contact a chemical manufacturer or processor and ask it to justify a confidential business information claim—if a Freedom of Information Act (FOIA) request seeks a document that contains protected information.

The EPA could ask the company to clarify inconsistencies about the amount of information that needs to be protected, the agency said. For example, if a manufacturer claimed its identity as confidential, but failed to claim its address too, the EPA would ask whether it sought protection for all aspects of its identity, the agency said.

"In general however, EPA only protects information that is claimed as CBI," it said.

FOIA-triggered confidential business reviews do not count toward the 25 percent of examinations TSCA requires the EPA to make, the agency told Bloomberg BNA.

Companies only have 10 days to challenge an EPA determination on CBI triggered by a Freedom of Information Act request, according to Hantman, who has handled such substantiation requests for clients.

EPA Notices Common Problems

EPA's Wallace and Myrick discussed common problems staff have observed as they've reviewed substantiations. Primarily they referred to problems that arise when companies claim the specific identity of a chemical to be a trade secret.

Chemical companies are allowed to keep a chemical's identity secret in some circumstances. For example, if it's a new molecule that a company spent thousands of dollars developing. In such cases, the updated TSCA directs companies to use a "structurally descriptive generic name" for public documents about the chemical.

One mistake some companies have made is claiming that a specific chemical's identity needs to be kept confidential, even though that information is already available to the public via a safety data sheet posted on the company's website, Wallace said.

"We've encouraged industry to contact staff with questions," Wallace said. Often, when companies do, they realize they don't need the agency to keep certain information out of the public eye, he said.

Industry representatives told Bloomberg BNA that another common problem is that companies are sometimes asking the EPA to shield their identity as a manufacturer of a specific chemical, but forgetting to claim its address or the name of its "technical contact" as confidential information. Internet searches can easily link the address or technical contact with the manufacturer.

Companies Urged to Provide Facts

Franz encouraged chemical makers to look at the EPA's CBI substantiation templates, frequently asked questions, and other information it has prepared.

Companies will have to provide facts and a clear rationale to show the agency why its release of confidential business information would harm them financially, she said.

"Companies need to help EPA understand, so it will make an educated decision," Franz said.

Information that could help the EPA decide trade secret protection was warranted could include details showing that one company is the only business to have discovered a particular use for a chemical. For example, if a processor discovered that a chemical not known for being used in a particular type of formulation—like a paint, floor wax, or cleaner—was useful, the company might want to keep its use of that chemical confidential.

Too often, Scherffius said, CBI justifications are a last minute effort as a company finishes providing technical details on another TSCA form.

"Companies do not understand how to fill out the CBI form and the fact that this is their opportunity to support why each piece of data needs to be maintained as confidential," she said.

Chemical Identity

One thing companies won't need to worry about yet is justifying their need for continued CBI protection for the specific identity of chemicals on the agency's confidential TSCA inventory. Those types of claims need not be substantiated now, Engler said.

Amended TSCA requires the EPA to propose a "review plan" rule describing the process it will use to review companies' assertions that an existing chemical's specific identity must continue to be kept secret, he said. Once that plan is released, which could happen in 2019, the EPA would have five years to review all claims companies make to keep a chemical's specific identity confidential.

Given all the other statutory deadlines the agency faces, it may be a few years before the EPA begins to require and review chemical identity substantiations, Engler said.

Judge With 'Healthy Skepticism' of Regulation Exits D.C. Circuit

Posted August 31, 2017, 7:45 A.M. ET

By Rebecca Wilhelm

The nation's second-most-powerful court is losing a "unique" voice that is skeptical of administrative agency power, with Judge Janice Rogers Brown set to retire Aug. 31 after 12 years serving on the U.S. Court of Appeals for the District of Columbia Circuit.

Brown's retirement hands President Donald Trump his first opportunity to fill a seat on the court, which frequently hears administrative law cases, including challenges to EPA regulations.

While Brown generally votes with the conservative bloc, she often reaches the same outcome in a different way from her conservative colleagues, Christopher J. Walker, an associate professor of law at The Ohio State University Moritz College of Law, told Bloomberg BNA.

"When you're just counting votes on the D.C. Circuit, you might not see much of a difference" after Trump appoints Brown's replacement, Walker said. "But when you're looking at the reasoning that's given, I doubt you'll have a judge like Janice Rogers Brown, with that kind of libertarian bent."

Walker said in that respect, she's comparable to Supreme Court Justice Clarence Thomas: they might reach the same conclusion as their conservative colleagues, but for different reasons.

'Healthy Skepticism'

Former President George W. Bush first nominated Brown to the federal judiciary in 2003, but she wasn't confirmed until 2005 because of opposition from Senate Democrats.

Originally from Alabama, Brown previously served as an associate justice of the California Supreme Court. She received her juris doctorate from UCLA School of Law and her master of laws from the University of Virginia School of Law.

Brown has a "healthy skepticism of the administrative state," Walker said. She falls within the libertarian camp that believes courts should more aggressively review government action.

The D.C. Circuit declined to make Brown available for an interview. However, the opinions she has authored illustrate her skepticism of certain agency actions , including those of the EPA.

In 2009, the D.C. Circuit denied a petition seeking review of a Drug Enforcement Agency order revoking a company's authority to distribute certain chemical products under the Controlled Substances Act. Brown dissented from that decision.

"I close with a few words on how easily the administrative state can slip its leash," Brown wrote in Novelty, Inc. v. DEA.

"A familiar argument for enhanced administrative authority (and hence diminished judicial review) is the need for 'flexibility,' as old-fashioned courts are ill-suited to deal with the complexities of the modern world," Brown wrote. "That may be true. But the flipside of flexibility is certainty, consistency, evenhandedness, and predictability—those Rule of Law values that mark a free society."

Jonathan H. Adler, a professor of law at Case Western Reserve University School of Law, told Bloomberg BNA: "Judge Brown is more openly skeptical of assertions of agency power than most judges are and certainly has a distinct voice in that regard."

Not Subject to Judicial Review

But Brown doesn't always think that an agency's action is judicially reviewable.

In Clean Air Council v. Pruitt, the D.C. Circuit recently rebuked the Environmental Protection Agency for suspending methane emissions regulations imposed under the Obama administration. The court held that the EPA decision to stay enforcement of the Clean Air Act rule for three months while the agency reconsidered it was unauthorized and unreasonable.

Brown dissented, arguing that the court lacked jurisdiction to hear the case because the EPA decision wasn't final agency action subject to judicial review.

"That Petitioners are anxious to see their victory implemented and impatient with delay does not make EPA's action final," she wrote. "It may be annoying, disappointing, ill-advised, even unlawful, but that does not transform a stay to facilitate reconsideration into 'final agency action.' "

'Unique Perspective'

"Judge Brown has a unique perspective on things," Aaron Nielson, an associate professor of law at J. Reuben Clark Law School at Brigham Young University, told Bloomberg BNA. "She comes from a distinct place and brings a deep fountain of knowledge to these cases that isn't the same background and knowledge that a lot of other judges have."

She's wary of federal agency overreach and is very mindful of things like how much something costs and who's paying for it, said Nielson, who clerked for Brown. "She is in D.C., but not of D.C."

Brown also is concerned about retroactivity, according to Nielson. "She doesn't think it's fair to change the rules in the middle of the game," he said.

She authored the majority opinion in Arkema Inc. v. EPA, which found an EPA rule modifying the cap-and-trade market for hydrochlorofluorocarbons "impermissibly retroactive" because it no longer included companies' inter-pollutant transfers in their baseline allowances, which were recognized under an earlier rule.

The EPA interpretation of the Clean Air Act "contradicts its past practice, narrowing the range of options and altering the legal landscape" for companies participating in the cap-and-trade market, Brown wrote. "Prospectively, the EPA can limit inter-pollutant trades to a single year and can prohibit inter-pollutant baseline transfers. But the Final Rule cannot have retroactive effect."

No Replacement Yet

Trump has not yet announced Brown's successor.

"It's possible we could get a replacement that is similarly outspoken and has similar views," Adler said, "but she certainly has a distinctive voice on the federal judiciary."

The D.C. Circuit is an important court, and Democrats in Congress could try to delay the confirmation process, Adler said. But Democrats won't be able to block the nomination on their own because the Senate moved to a 51-vote threshold for appellate court nominees in 2013.

Recently, the D.C. Circuit has "been the source of a disproportionate percentage of Supreme Court nominees," Adler said. "But I wouldn't assume that anyone he appoints is a Supreme Court short-lister."

Number of Chemicals in Products is Underestimated, EPA Says

Posted August 31, 2017, 02:26 P.M. ET

By Pat Rizzuto

The number of chemicals in products people use at home, at their worksite, and in schools is typically underestimated, an EPA exposure researcher said Aug. 31.

Anyone trying to estimate the number and concentration of chemicals in products has to go beyond safety data sheets, ingredient labels, and other listings, according to Katherine Phillips, a research chemist at the Environmental Protection Agency's National Exposure Research Laboratory. During an EPA webinar, Phillips described research the agency is doing to help regulatory staff and other decision-makers decide when a chemical has the potential to harm people or the environment.

The research is designed to help the agency address the multitude of chemicals in everyday life and answer a few central questions, like which ones should the EPA worry about? Or which ones should the agency evaluate for health and ecological risks?

There are tens of thousands of chemicals in products people spray, touch, sit on, slather on, and otherwise come into contact with.

Choosing to focus on chemicals unlikely to cause problems could waste taxpayers' and companies' money as the companies invest time and research to provide the agency with chemical use, exposure, and other data. The EPA also must analyze information from academia, unions, advocacy organizations, and other groups. Choosing chemicals that do put people's health at risk or hurt the environment could prevent disease, fish kills, and other problems that also cost people, farmers, and others harm.

The research Phillips and her colleagues are doing could influence how the agency picks chemicals and pesticides for further evaluation and regulation. For example, the research office is examining ways it can help the EPA's chemicals office determine which chemicals are priorities for risk evaluations that could lead to chemical use restrictions or other regulations.

EPA Enforcement Nominee to Start Work Ahead of Confirmation

Posted August 31, 2017, 03:48 P.M. ET

By Renee Schoof

Susan Parker Bodine, the president's pick for EPA enforcement chief, will start work at the agency Sept. 5 ahead of her Senate confirmation vote.

Bodine will work as special counsel to the administrator on enforcement, agency spokeswoman Amy Graham said Aug. 31. Bodine is the nominee to become assistant administrator for enforcement and compliance.

The move raised questions from one advocacy group about whether the Trump administration was getting around the Senate's role to advise and consent on the agency's leadership, even temporarily.

The nonprofit group Public Employees for Environmental Responsibility said in a news release Aug. 31 that Bodine's early start "appears to fly in the face of the spirit, if not the letter, of a 2017 U.S. Supreme Court decision that the Federal Vacancies Reform Act bars unconfirmed presidential nominees from performing the duties of that office in an acting capacity or from serving as `first assistants who automatically assume acting duties.'"

Graham, asked about this, said by email, "This is a usual practice done in many administrations."

Ryan Jackson, the EPA chief of staff, told staffers in an email obtained and released by PEER that the acting head of the Office of Enforcement and Compliance Assurance, career official Larry Starfield, would remain in that role until Bodine is confirmed.

New England, Canada Strive for Deeper Greenhouse Gas Cuts

Posted August 31, 2017, 02:56 P.M. ET

By Adrianne Appel

New England and eastern Canadian provinces will lean more heavily on renewable energy, electricity conservation, and zero-emissions vehicles as they aim for deeper greenhouse gas reductions.

The governors and premiers set a goal to reduce harmful carbon emissions 35 percent to 45 percent below 1990 levels by 2030 in a plan they released Aug. 31.

The region easily met the previous carbon-reduction goals in 2010 and 2015, the leaders of the six New England states and five Canadian provinces said during their annual meeting on Prince Edward Island, Canada.

In order to reach the 2030 target, however, the region has to be more aggressive in reducing greenhouse gas emissions, they said.

Chemours Told to Stop Discharging Two Chemicals in N.C.

Posted August 31, 2017, 03:43 P.M. ET

By Andrew M. Ballard

North Carolina regulators are asking The Chemours Co., to stop discharging two more chemical compounds of concern into the Cape Fear River from its Fayetteville, N.C., facility.

The two compounds, both perfluoroethersulfonic acid byproducts, were uncovered in the company's waste stream by the U.S. Environmental Protection Agency during its investigation into the facility's discharges of GenX, a substitute for the widely used Teflon chemical perfluorooctanoic acid (PFOA). The compounds are sometimes used to make stain resistant coatings for carpets, rain gear, fast food wrappers, and frying pans.

Sufficient exposure to PFOA has been linked to thyroid disease, high cholesterol, early signs of liver damage, and testicular and kidney cancer, among other health effects according to a 2012 paper in the journal Environmental Health Perspectives.

Chemours already voluntarily stopped discharging GenX due to concerns about its potential health effects. Sampling has found concentrations of GenX and three other perfluorinated compounds in the Cape Fear River—a drinking water source to tens of thousands of North Carolina residents—to have dropped since that release was stopped.

Details Sought

In addition to asking Chemours to cease discharging the two newly discovered compounds, the state Department of Environmental Quality (DEQ) said Aug. 31 that it was still demanding that the company provide it with a "complete inventory, sampling data and test results for all chemicals included in the company's waste stream." The request to stop releasing the two byproducts was made in an Aug. 29 letter sent to Chemours, the state agency said.

"DEQ is looking at all legal options including going to court to get the company to stop the discharge" of the newly discovered compounds, the agency said in its Aug. 31 announcement.

In a statement, the company said it "was made aware of these sampling results on Tuesday, Aug. 29. In response, we are now investigating the potential that these two substances are byproducts of the IXM production unit at Chemours Fayetteville manufacturing site. We are working with the North Carolina Department of Environmental Quality to understand their data and gain additional clarity regarding these samples. As we gather this additional information, we are also working to determine the appropriate next steps."

The technical name of one byproduct is perfluoro-3,6-dioxa-4-methyl-7-octene-1-sulfonic acid. The second is called ethanesulfonic acid, 2-[1-(difluoro(1,2,2,2-tetrafluoroethoxy]-1,1,2,2-tetrafluoro.

Limited Funding

The announcement that the two additional chemicals of concern were found came on the same day that state lawmakers approved a bill (H.B. 56) that, among other things, provides $435,000 to local utilities and the University of North Carolina at Wilmington for water testing and treatment efforts related to GenX.

Critics of the GenX provisions in the bill said it was too narrowly focused and provided insufficient funding, while supporters argued it was a necessary and immediate response to the issue.

H.B. 56, which now goes to Gov. Roy Cooper (D) for his consideration, also would lift a ban on the sale of plastic bags in three coastal counties in place since 2009, ease certain solid waste "flow control" requirements, and consolidate water quality reports, among other changes.

Harvey's Roar Rumbles Half a World Away as Propane in Asia Jumps

Posted August 31, 2017, 7:39 A.M. ET

By Ann Koh and Laura Blewitt

Asian buyers of liquefied petroleum gas are already paying for disruptions half a world away in Texas as record rainfall halted shipments of propane and butane from ports that handle more than 90 percent of U.S. exports to the region.

Marine export terminals operated by Enterprise Products Partners LP, Targa Resources Inc. and Phillips 66, all suppliers of the fuel, are shut because of closures at the Houston Ship Channel, Port of Beaumont, and Port of Freeport, according to Aug. 29 statements from the companies. Mont Belvieu, Texas, facilities belonging to Enterprise and Targa also have halted some fractionation operations, in which raw liquids are turned into products like propane and butane. There are no estimates yet for when the ports will reopen.

The U.S. Gulf Coast, home to the largest LPG storage caverns in the world, is a key global supplier, so events there can ricochet in markets around the world. As Hurricane Harvey made landfall near Corpus Christi, Texas, late last week, propane prices in Northeast Asia climbed. And as it approached the Louisiana coast before making a second strike Aug. 30 as a tropical storm, Middle Eastern producers said they're raising prices. Asian buyers, which import the fuel for heating and petrochemical production, were caught in the middle.

"Affected buyers will seek cargoes from elsewhere," said Ong Han Wee, a consultant with FGE in Singapore. "The prices jumped last Friday in Asia, just before or when the hurricane made landfall. The Middle East contract prices are also higher now, most likely because of sentiment from Harvey."

Middle Eastern producers Saudi Arabian Oil Co. and Kuwait Petroleum Corp. announced that they would increase September contract prices for propane and butane by $40 to $60 a metric ton amid bullish sentiment, traders said. The region's countries are the most likely alternative suppliers because they are nearest to Asia, Ong said.

While international LPG prices have soared since Harvey's landfall, propane traded at the Mont Belvieu Enterprise terminal hasn't kept pace, rising just 2 percent since Aug. 24, according to DTN Energy data. The lack of dramatic price action stateside will expand arbitrage opportunities to Asia once the exporters can finally use the Gulf Coast ports, said Peter Fasullo, co-founder at LPG consultancy En*Vantage Inc.

The U.S. is expected to export 28 million tons of propane and butane this year, half of which will go to Asian buyers in Japan, South Korea, and China, according to FGE.

But the U.S. hasn't sent a single LPG tanker from the Gulf Coast since Aug. 25, according to Bloomberg market specialist Bert Gilbert. The Ports of Houston and Freeport said they're still uncertain when they'll be able to reopen to vessel traffic.

Historic Rains

And supply concerns extend beyond the shutdown of the ports.

Cedar Bayou, a body of water just outside of the fractionation and storage hub in Mont Belvieu, recorded 51.88 inches (132 centimeters) of rain this week, setting a new record for the continental U.S., according to the National Weather Service.

That much water could signal weeks of trouble for the storage facilities there, Fasullo said. Underground storage of LPG uses brine ponds to pump highly salinated fluids into caverns. If heavy rains dilute the salty ponds, contamination, and containment issues that make it hard to get the fuel out of storage may occur.

Enterprise's "storage assets have remained operational," said Rick Rainey, a company spokesman in Houston. "We continue to manage our brine supplies."

But Targa's capacity to receive raw products was "negatively impacted" by flooding, according to a company statement.

"I don't think there's going to be any relief for many days, and if those many days turn into weeks, it could be a one- to three-week period" before normal exports resume, Fasullo said by telephone from Houston. "Propane prices could go off to the races because I think you're going to get strong storage draws when we will be able to get those export terminals up."

Germany to Cut 2018 Onshore Wind Aid After Additions Exceed Cap

Posted August 31, 2017, 11:53 A.M. ET

By Brian Parkin

Germany will cut subsidies paid to onshore wind farm owners from January after additions surpassed an industry cap, the Bnetza power regulator said.

A record 5.03 gigawatts of new onshore wind power was added in Germany during the past 12 months, exceeding the gigawatt 3.5-gigawatt limit the government established to support sustainable growth, the Bonn-based regulator said Aug. 31 in an email.

Guaranteed subsidies for operational onshore wind plants will be cut 2.4 percent from Jan. 1, with payments starting at 7.49 euro cents (9 cents) a kilowatt-hour for new plants and 4.17 cents a kilowatt-hour for older plants, Bnetza said.

Should new wind or utility-scale solar additions fall below targets, subsidies would rise, according to the rules.

Brazil Judge Reinstates Ban on Mining in Copper-Rich Amazon Area

Posted August 31, 2017, 12:10 P.M. ET

By Michael Kepp

A federal judge in Brazil suspended a presidential decree that had reopened the gold-and-copper-rich eastern Amazon to mining.

President Michel Temer exceeded his authority in issuing the decree on the National Reserve of Copper and Associated Minerals (RENCA) because lifting the ban on mining requires a law that Congress must pass, Judge Rolando Valcir Spanholo of the Twenty-First Regional Federal Court in Brasilia said in his Aug. 29 ruling.

"The suspension of President Temer's unilateral decree with its severe threats to vast Amazonian forest offers a welcome and temporary reprieve," said Christian Poirier, program director for

Amazon Watch. "Today's ruling upholds constitutional guarantees and puts the brakes on this drastic regression, but is ultimately vulnerable to being overruled by higher courts."

Temer's Aug. 22 decree lifted the ban on mining in RENCA, which spans a 17,930-square-mile (46,450-square kilometer) expanse of the eastern Amazon in Amapa and Para states. In 1984 the government set up RENCA, an area larger than Denmark, to temporarily suspend exploration for, and extraction of, copper and other ores there to allow it to extract the minerals at a future date. Subsequent governments had maintained the ban.

"The judge's decision to suspend the decree makes no sense because if a 1984 presidential decree created RENCA, a 2017 presidential decree can end it," Elmer Prata Salomao, president of the advisory council of the Brazilian Association of Mining Research Companies, whose members are major domestic and foreign private-sector mining companies, told Bloomberg BNA Aug. 30.

The judge's decision to reinstate the ban is provisional and his definitive ruling on the merits of the case could take at least six months to decide, Claudia Franco, an assistant to Valcir Spanholo, told Bloomberg BNA.

Temer's legal office will challenge the decision with either in the court where the decision was issued or in a federal appeals court, a spokesman for his legal office told Bloomberg BNA Aug. 31.

Brazil Plans to Offer Up to 9 Gigawatts in Energy Auctions

Posted August 31, 2017, 8:49 A.M. ET

By Vanessa Dezem

Brazil is planning to award contracts for as much as 9 gigawatts of new generating capacity in a pair of power auctions scheduled for December, according to a person with knowledge of the process. The bulk is expected to go to wind farms.

The first event will feature contracts for 1.4 gigawatts to 2 gigawatts of capacity, and the second event will be bigger, with developers bidding for 5 gigawatts to 7 gigawatts, according to the person, who asked not to be identified because the information isn't public.

The scale of the two auctions will be welcome news to renewable energy developers and suppliers. Last December, the government canceled what would have been the year's only auction solely for wind and solar energy, and hasn't held any since. Companies seeking to build power plants have been hobbled by the lack of details regarding future demand, while turbine companies faced the prospect of halting production lines after their current crop of orders dries up.

The auctions this December will offer contracts to sell power from new plants that go into operation in 2021 and 2023. The first will be open only to renewable energy projects, and the other will accept bids from both clean and conventional sources. Power distributors in Brazil are expected to provide more details soon about the amount of capacity they expect to need, according to the person.

The decision to cancel last year's auction resulted from a growing electricity surplus as Brazil grappled with the worst recession in a century. With the economy now starting to improve, the government expects energy demand to increase next year, driving demand for power plants, according to Paulo Pedrosa, executive secretary for the Ministry of Mines and Energy.

Two new auctions are also scheduled for 2018, with one penciled in for the start of the year, according to Pedrosa.

Australia's Digital Currency Opens Avenues for Renewables Trading

Posted August 31, 2017, 03:11 P.M. ET

By Murray Griffin

An Australian company developed a digital currency designed for peer-to-peer trading among businesses and homeowners looking to sell surplus renewable energy.

Power Ledger's decentralized trading platform relies on its own version of bitcoin blockchain technology to instantaneously track transactions, making it possible for them to trade clean energy without the need for accountants, lawyers, or banks.

The blockchain encrypts, replicates, and shares multiple transaction records across a network of participants.

Power Ledger said a key benefit of its platform is that participating small and midsize businesses and homes with rooftop solar photovoltaic systems in Australia will no longer have to sell excess power back to electricity retailers at the low prices they offer.

The penetration rate for rooftop PV systems in Australia is now among the world's highest, according to the Australian Energy Regulator. While state governments are phasing out premium feed-in tariffs, the loss of these incentives is being largely offset by declining installation costs for solar systems, the regulator said.

Those using the peer-to-peer platform instead can sell their excess power to businesses or households prepared to buy it possibly at a higher price. The buyers also benefit because they still pay less than they would if they were purchasing from an electricity retailer. A $25,000 cap discourages large businesses and utilities from controlling the market.

Expanding Market

It's a large potential market, given Australia has more than 1.7 million small-scale solar PV systems on the rooftops of small businesses and homes, and there is a fast-growing number of slightly larger systems installed on commercial and industrial buildings, according to the federal Clean Energy Regulator.

The Power Ledger platform can accommodate various forms of peer-to-peer renewable energy trading, company co-founder and chairwoman Jemma Green told Bloomberg BNA by phone.

In addition to allowing trading among apartment block occupants or industrial park tenants that all use power behind the same main meter, developers of projects such as community solar farms could use it to secure funding, she said Aug. 28.

Developers "could sell shares in their solar farm via the platform," with the shareholders then receiving some of the income from the project. Power Ledger would in turn charge the developer a fee based on "a percentage of the capex [capital expenditure] of the project," she said.

For households, the digital currency enables owners to sell their excess energy, much in the same way Uber and AirBnb lets people make money from their cars and spare guestrooms.

Larger Networks

If partnerships are forged with electricity distribution businesses, then trading also could occur across larger electricity networks, according to Green.

The company already is testing its trading platform at a new housing development in the Western Australian city of Perth. Green said residents were paying at least 20 percent less for power than if they were buying it from the grid.

Power Ledger is currently piloting the platform in conjunction with New Zealand's largest electricity distributor, Vector Ltd. "Vector is looking at the potential for blockchain technology in peer-to-peer energy trading, and has been working since the start of the year with PowerLedger on a trial," said a Vector spokesman, adding that it's too early to comment on the trial.

It's also in discussions with Western Power, the distribution business owned by the Western Australian state government, regarding a trial that would involve some of the 11,000 homes—as well as TasNetworks, the electricity distribution network owned by the Tasmanian state government—Power Ledger managing director David Martin told Bloomberg BNA by phone Aug. 28.

In addition, discussions are underway with a large distribution business in the U.S. and another in Japan, although Green said neither could be named at this stage for reasons of commercial confidentiality.

The company started selling 100 million tokens that give those holding them rights to use its trading platform Aug. 27 and by Aug. 30 more than 90 percent had been sold at a fixed price of 8.8 cents.

Disruption?

Power Ledger has created 1 billion tokens and a follow offering will take place in September at an uncapped price.

Meanwhile, the federal government's Australian Renewable Energy Agency (ARENA) has separately been looking into using blockchain to enable peer-to-peer trading in renewable energy among businesses and households.

In May this year it contributed A$120,000 ($95,000) to an A$293,000 desktop trial by AGL Energy, one of Australia's largest electricity businesses.

"Australia has experienced a rooftop solar boom in the past decade and we are expecting a residential battery boom to follow in the coming years," ARENA chief executive Ivor Frischknecht said. "Ultimately, these investigations are about getting the most value out of solar and battery systems through a more flexible and modern marketplace."

A report on the findings of the ARENA-funded study is expected to be released soon.

Japan Environment Ministry Asks for $2.9B to Boost Clean Energy

Posted August 31, 2017, 9:16 A.M. ET

By Chisaki Watanabe

Japan's Ministry of Economy, Trade and Industry is seeking to allocate 323 billion yen ($2.9 billion) to expand the use of low-carbon energy sources for the year starting April 1, an increase of nearly 7

percent from the previous year.

The plan includes support for research and development for more efficient solar panels such as perovskite cells and cheaper floating offshore wind, according to a ministry document released on Aug. 31. The allocation will also be used to increase installations of hydrogen fuel cells and hydrogen stations for vehicles.

The ministry is increasing support for next-generation vehicles and self-driving technology by 31 percent to 45 billion yen, including 4.8 billion yen for the development of next-generation batteries, including solid-state lithium-ion batteries.

The ministry is also planning to set aside 78 billion yen to promote energy savings in factories, office buildings and homes with more energy-efficient light bulbs and insulating materials. That's up from 72 billion yen a year ago.

China's Ex-Im Bank Backs Azerbaijan Wind With $460 Million Loan

Posted August 31, 2017, 9:05 A.M. ET

By Zulfugar Agayev

The Export-Import Bank of China will finance a 500 million-euro ($460 million) wind farm in the Caspian Sea off the coast of Azerbaijan as the third-biggest crude oil producer in the former Soviet Union taps clean energy to supply its domestic energy needs.

The Azeri government is working with the state-owned China Power Engineering Consulting Group Co., or CPECGC, which will build 40 to 60 wind turbines between the Caspian Sea islands of Pirallahi and Cilov, according to Camil Malikov, deputy head of the State Agency for Alternative and Renewable Energy Sources.

CPECGC agreed to finance the feasibility study of the project, which may be approved by the government in late January or early February, he said.

"The Export-Import Bank of China together with other Chinese state lenders will provide 90 percent to 95 percent of the funding," Malikov said in an interview in Baku, noting project costs will be about 450 million euros to 500 million euros in total. "The remaining part will be covered by the Azeri government."

'City of Winds'

CPECGC will conduct engineering, procurement and construction of the project together with domestic companies should the government approve the feasibility plan. The 200-megawatt project would provide enough power for 500,000 homes, he said.

"We'll operate the wind park and repay the debt within 12 to 15 years," Malikov said.

Azerbaijan seeks to substitute more clean energy for fossil fuel, which contributed 34 percent of gross domestic product and 43 percent of state budget revenues last year, according to Sberbank CIB. Oil production fell 8.9 percent in the first seven months of 2017 from the same period a year ago, and marketable natural gas output dropped 1.3 percent, according to a State Statistics

Committee report on Aug. 15.

Azerbaijan's oil production is likely to drop another 20 percent from the current levels by 2025, according to the Organization of Petroleum Exporting Countries.

Wind farms are attractive to investors because of the strength of breezes in Baku and the Absheron Peninsula, Malikov said. Wind blows more than 270 days in Baku, which means "city of winds" in Persian, according to estimates from the Geography Institute of Azerbaijan's Academy of Sciences.

Hybrid Stations

The government also is working with Germany's KfW development bank to build two hybrid power stations in the Qaradag and Xizi districts west and northwest of the capital, Malikov said.

German experts are drawing up a feasibility plan for the projects, which will generate a combined 140 megawatts of wind and solar energy. That will include 120 megawatts of wind and 40 megawatts of solar energy. Those projects may cost about 200 million euros, Malikov said, adding that state guarantees would be required to secure financing from the German lender.

Azerbaijan currently generates 1,500 megawatts—or 10 percent of its annual electricity production, from clean sources—Malikov said. That includes 1,100 megawatts to 1,200 megawatts from hydroelectric dams, 60 megawatts from wind and 50 megawatts from solar farms.

The plan is to increase electricity production from renewable sources by 420 megawatts by 2020.

"By 2025, we'll be generating 20 percent of our electricity from clean sources," Malikov said.

Subject: Northam wins Virginia governor's race

By POLITICO Pro Staff

11/07/2017 08:19 PM EDT

Democrat Ralph Northam has won the Virginia governor's race, defeating Republican Ed Gillespie.

Northam, the lieutenant governor, had 51 percent of the vote to Gillespie's 48 percent when the Associated Press called the race with 60 percent of precincts reporting.

See results here.

Water Rule Analysis Broader Than Critics Contend, EPA Says

Posted August 08, 2017, 9:16 A.M. ET

By Amena H. Saiyid

The EPA's economic analysis of the Obama-era Clean Water Rule relied on permitting data from years after the economic recession ended, the agency said countering accusations its analysis was limited to when the downturn occurred.

The Environmental Protection Agency study of the 2015 rule's costs and benefits was more comprehensive than critics claimed, Al McGartland, head of the agency's National Center for Environmental Economics, told Bloomberg BNA in an email.

Critics contended the EPA relied on permitting data from two years during the economic recession, when construction and manufacturing would have been at their lowest, to inform its study of costs and benefits of the rule, which determines the reach of federal water permitting requirements. The EPA used that same data when it issued the rule in 2015 and again this year as the administration proposed to roll it back (RIN:2040-AF74).

McGartland acknowledged that the EPA did use the permitting data from fiscal years 2009 and 2010 when it initially proposed the rule, also known as waters of the U.S. rule, or WOTUS. But the agency relied on five years of data for the economic analysis of the final rule. The updated analysis for the 2015 final rule came in response to criticism from the Waters Advocacy Coalition, an industry-led coalition of manufacturers, farmers, miners, road builders, and businesses that had hired David Sunding, of the University of California, Berkeley, to critique the analysis of the proposal.

"In fact, to ensure EPA did not understate permit activity, EPA looked at the range of permitting activity from 2009 through 2014 and used the maximum number of permits in any given year," McGartland said.

Specifically, the analysis calculated the overall impact by using the maximum number of individual permits to dredge and fill wetlands and streams that the U.S. Army Corps of Engineers issued in

fiscal year 2009 and the maximum number of general permits issued in 2013, McGartland added.

Analysis Still Said to Lack Rigor

Despite the EPA's defense, skeptics of the agencies' analysis remained unpersuaded.

The use of the recession-era data as an economic baseline was one of a number of problems with the original study and the more recent analysis, William Yeatman, a senior fellow with the Competitive Enterprise Institute, said.

"It doesn't change the fact that both of these studies were driven by assumptions to control the results," Yeatman told Bloomberg BNA Aug. 7.

James Goodwin, a senior fellow with the Center for Progressive Reform, said the Trump and Obama administrations "cherry picked" assumptions to reach their respective conclusions. The "cost benefit analyses are nothing more than administration tools to justify their actions," he said.

Goodwin noted that permits are a lagging indicator of economic activity because the corps doesn't issue the permits right when the applicants seek them.

Yeatman, who was opposed to the 2015 rulemaking and supports the Trump administration's proposal to withdraw the rule, reiterated that the EPA and the corps are missing an opportunity to do this analysis properly.

At the end of the day, "It's all politics," Yeatman said.

Commonwealth Bank of Australia Shareholders Sue Over Climate Risk

Posted August 08, 2017, 03:55 P.M. ET

By Murray Griffin and Chuck McCutcheon

An Aug. 8 lawsuit in Australia against one of the country's largest banks alleging it failed to adequately disclose climate change risks is being seen as a wake-up call for other global financial institutions.

The action against Commonwealth Bank of Australia was filed in Federal Court by Environmental Justice Australia on behalf of Guy and Kim Abrahams, who have held shares in the bank for years. The couple says the bank knew—or should have known—that climate change risks might have a material or major impact on the bank's operations, financial position, and prospects. They allege the bank did not report on these risks or its management of them in its 2016 annual report.

"There's a hope this kind of suit will raise a red flag to the larger banking sector to look at the merits and take action before they have litigation facing them as well," Lauren Compere, managing director of Boston Common Asset Management, a firm that focuses on socially responsible investing, told Bloomberg BNA.

Financial sector shareholders have a reasonable expectation to know of the growing risks that climate change poses, Daniel Kreeger, director of the Association of Climate Change Officers, told Bloomberg BNA.

"There has to be information [to investors] that's somewhere between 'there's nothing happening' and 'the sky is falling,'" said Kreeger, whose organization works with public and private employees who focus on climate issues. The institution "needs to be responsible and to have identified meaningful and tangible and plausible risks—to not just articulate them but address them strategically and convey they are addressing them strategically. That will make investors feel a lot better than pretending that nothing's happening."

Kreeger said he was unaware of any similar litigation involving another bank, though he noted similar shareholder pressures have arisen regarding climate change. In May, investors holding 62 percent of Exxon Mobil's shares voted at the company's annual meeting in favor of greater disclosure around the effects of global policies that seek to limit global warming to 2 degrees Celsius (3.6 degrees Fahrenheit).

'Deeply Concerned' About Climate Risk

In their lawsuit, the Commonwealth Bank shareholders argued that the bank's omission of climate change information constituted a breach of the Corporations Act of 2001, which requires companies to give a true and fair view of their financial position and performance. They also said the bank breached a provision of the Corporations Act requiring companies to provide investors with information allowing them to make informed assessments.

"We are deeply concerned about the serious risks that climate change poses to the environment and society," Guy Abrahams said in a statement. "The bank should tell investors about the risks climate change will have on its business."

Commonwealth Bank rejected the lawsuit's allegations, saying in a statement it takes its statutory reporting obligations "very seriously."

"Commonwealth Bank understands that climate change is a topic of public and shareholder interest and we are committed to playing our part in limiting climate change to well below 2 degrees in line with the Paris Agreement and supporting the responsible global transition to net zero emissions by 2050," the bank's statement said.

Commonwealth 'Not the Worst'

Compere said her firm did outreach to 62 banks globally in 2014 in connection with research into whether banks had yet incorporated climate considerations into their risk management practices or developed long-term climate strategies. She said Commonwealth Bank was found to have taken the issue more seriously than some other large banks.

"They were not the worst," she said.

The firm is now doing followup research with those banks in the hope of "tying up the conversation and the dialogue," she told Bloomberg BNA.

Barrier Reef Coal Export Route

Also in their suit, the Abrahamses refer to the prospect that the bank might fund a large proposed coal mine in Queensland state that would export coal through the Great Barrier Reef. The Adani Group's Carmichael coal mine has faced repeated questions about potential climate risks from environmental activists as well as politicians.

The suit says the prospect of the bank financing the mine was "a matter of substantial controversy and concern" during the 2015-2016 financial year, and that the bank should have known it constituted a risk to the bank. Yet, it says, the annual report did not mention the risks that Carmichael presents to the climate.

The suit seeks an order from the Federal Court of Australia that the bank breached the Corporations Act. It seeks an injunction restraining the bank from "continuing to fail to report" on climate risks.

Trump's UN Diplomat Pledges No Interference in Climate Study

Posted August 08, 2017, 03:15 P.M. ET

By Dean Scott

The Trump administration won't interfere in a broad climate study focusing on how rising sea level, increasing temperatures, and other climate impacts are already affecting the U.S., the president's United Nations ambassador pledged today.

"I haven't seen the report, but I don't see any reason why they wouldn't" back the study, Nikki Haley, U.S. Ambassador to the U.N., said on NBC's "Today" show. Haley pushed back against reports suggesting scientists are worried Trump will torpedo the draft report—known as the Fourth National Climate Assessment and slated for completion in late 2018—given Trump's June withdrawal from the Paris climate pact.

"First of all … just because we pulled out of the Paris accord doesn't mean we don't believe in climate protection," Haley said.

The report, compiled by the U.S. Global Change Research Program, is required under a 1990 law to be provided to Congress. One draft portion of the report, known as the climate science special report, said even "stronger evidence" has emerged of "continuing, rapid, human-caused warming of the global atmosphere and ocean" since the last report in 2014.

Sessions Wants Data on Settlement Payments to Third Parties

Posted August 08, 2017, 03:50 P.M. ET

By Renee Schoof

Attorney General Jeff Sessions is calling for a list of all criminal and civil settlements reached by the EPA and other agencies in the past 10 years that include payments to third parties in lawsuits after he banned the practice in June.

The latest directive from Sessions, in a July 28 memo, gives Justice Department office heads and U.S. attorneys until Aug. 31 to provide the information. The memo says the purpose of the review is "to assist the Department in implementing the new policy," which bars payments to nongovernmental third-party groups in settlement agreements.

Among other things, it asks them to identify any such payments that "are still outstanding or have not been fully satisfied."

The Justice Department in July said Harley-Davidson Inc. would not have to pay $3 million to an

American Lung Association effort to replace conventional wood stoves with cleaner-burning ones to reduce air pollution. It was part of a $15 million settlement the motorcycle maker reached with the Justice Department in 2016 over accusations that Harley was selling tuners that allowed motorcycles to be tweaked to emit more pollution than is certified by the Environmental Protection Agency.

The case raised interest because Harley got to keep the $3 million.

Harley said the tuners were meant for off-road and closed-course competition and that it did nothing wrong by selling them. The settlement had not yet been approved by a judge.

The ban on third-party payments also raised questions about how it would affect the EPA's Supplemental Environmental Projects (SEPs) policy. Companies involved in settlements can voluntarily agree to undertake environmentally beneficial projects in exchange for a reduced penalty.

The Justice Department told Bloomberg BNA that the new policy does not address settlements that are consistent with the EPA's 2015 SEP Policy, which already prohibits third-party payments. The policy says there must be a relationship between the violation and the health or environmental benefits the project will provide. It also specifies types of projects that are not acceptable as SEPs, including cash donations to community groups, environmental organizations, or other third parties, and projects by individuals or groups who are not a party to the settlement or hired by the defendant in a settlement case.

House Oversight Committee Advances Cancer Institute Probe

Posted August 08, 2017, 04:21 P.M. ET

By Tiffany Stecker

House Oversight and Government Reform Chairman Trey Gowdy (R-S.C.) is pushing further an investigation into U.S. funding of an international institution criticized for labeling a widely used herbicide as carcinogenic.

Gowdy sent a letter to Francis Collins, director of the National Institutes of Health, Aug. 8 asking for additional documents for an ongoing probe into the International Agency for Research on Cancer. The Lyon, France-based agency in 2015 found that glyphosate, the main ingredient in Monsanto Co.'s Roundup, was a "probable" carcinogen.

Gowdy wants NIH to provide documents relating to recent news that retired National Cancer Institute scientist Aaron Blair withheld study results that could have changed IARC's conclusion on glyphosate. Blair, who oversaw a large population study on farmers and their spouses exposed to pesticides, did not hand over to IARC the latest data in the study because it had not been published in a scientific peer-reviewed journal. That data could have influenced the final report from IARC, Blair said in a court deposition.

The National Institutes of Health did not respond to a request for comment. Sen. Jim Inhofe (R-Okla.) sent a similar letter last week.

EPA's Coolant Chemicals Ban Struck Down by Court

Posted August 08, 2017, 11:22 A.M. ET

By David Schultz

The EPA's ban on certain refrigerant chemicals that are potent greenhouse gasses overstepped its legal authority, a federal appeals court said in a victory for Arkema, Mexichem Fluor Inc., and other companies that manufacture them.

A three judge panel in the U.S. Court of Appeals for the D.C. Circuit ruled that the agency overstepped its authority when it forbade the use of hydrofluorocarbons, or HFCs, which can trap heat in the atmosphere thousands of times more efficiently than an equivalent amount of carbon dioxide. HFCs were originally created as a substitute for other refrigerants that harmed the ozone layer, and the Environmental Protection Agency tried to use the same ozone depletion law that spurred the chemicals' introduction to also remove HFCs from the marketplace.

However, in a 2-1 decision issued today, the judges ruled that the law only allows the EPA to ban ozone-harming chemicals, not chemicals that cause other environmental problems.

The decision dealt a blow to Honeywell International and Chemours, which have developed chemicals meant to replace HFCs.

Groundwater Cleanup Could Overwhelm Pentagon Budget

Posted August 08, 2017, 9:57 A.M. ET

By David Schultz

The $2 billion the Pentagon may need to clean up contaminated groundwater near military bases could blow a hole in the Defense Department's remediation budget, an official said.

That estimate could grow because the Defense Department is only 80 percent of the way through testing the groundwater at its bases for toxic perfluorinated chemicals, which can collect in the body and biodegrade very slowly, Maureen Sullivan, the Pentagon's top official overseeing environmental issues on its installations, said at an Aug. 8 conference of scientists, engineers and others who work on groundwater issues.

The Pentagon currently has a total of $25 billion in cleanup liability across all other environmental contaminants, including munitions. But that doesn't include cleaning up perfluorinated chemicals, which were used as fire suppressors.

Lenny Siegel, executive director of the Center for Public Environmental Oversight, said this $2 billion figure may actually be too low, especially if the military can't figure out how to clean up the groundwater at its source and must instead filter water at wells or at taps.

Spending more than $2 billion is "within the realm of possibility," Siegel, whose group focuses on contamination issues at military bases, told Bloomberg BNA. "There are some significant unknowns."

Funding Not Keeping Up

The military will soon have to make difficult choices about which cleanup projects to prioritize,

Sullivan told Bloomberg BNA. For the coming fiscal year, the White House asked Congress to cut the Pentagon's environmental restoration budget across its services by more than $53 million, a 5 percent reduction from its current levels.

A funding bill that passed the House last month restored most of these cuts, however. The bill was amended on the House floor to give $30 million to the Navy and Air Force specifically for cleaning up perfluorinated chemicals.

But keeping restoration funding flat won't be able to keep up with the growing list of contaminants that the military will need to address, as scientists learn more about the health effects of the chemicals it uses, Sullivan said.

She said the Pentagon doesn't even know the full extent to which perfluorinated chemicals have seeped into aquifers because it is only 80 percent of the way through testing the drinking water at its bases.

Tax Breaks Powered Wind Energy Growth in 2016

Posted August 08, 2017, 02:06 P.M. ET

By Rebecca Kern

Wind energy installations in the U.S. continued to grow in 2016 thanks in part to the production tax credit that went into effect in late 2015, the Energy Department said in reports out today.

"A combination of federal subsidies, state mandates, and technological advancements continue to help drive new wind capacity additions," Daniel Simmons, acting assistant secretary at the Energy Department's Office of Energy Efficiency and Renewable Energy, said in a Aug. 8 statement.

The Energy Department's 2016 Wind Technologies Market Report found the U.S. wind industry added 8,203 megawatts of new wind power capacity, or 27 percent of total capacity additions, in 2016.

This continues the growth of new installations that included 8,598 megawatts of new wind capacity in 2015, which made up even more of total U.S. capacity additions—40 percent—in that year.

Congress passed the production tax credit in December 2015, encouraging new wind installation through phased-down tax credits that last until 2019. The tax credits have helped spur new wind installations, with 102,000 wind energy jobs in 2016, up 32 percent from 2015, according to the report.

The report notes, however, that forecasts from 2021-2025 show a downturn in expected new wind energy capacity installations as the production tax credit phases out.

The Energy Department also released offshore wind and distributed wind market reports documenting growth in these areas as well.

Keystone XL's Path Up for Grabs as Nebraska Commission Weighs In

Posted August 08, 2017, 11:40 A.M. ET

By Andrew Harris

The future of TransCanada Corp.'s Keystone XL pipeline could hinge on whether a Nebraska commission believes the project is in the public's interest or is a private land grab as property owners claim.

More than 90 percent of TransCanada's preferred 270-mile route through the state would cut across privately owned land, as would an alternate route, company project manager Paul Fuhrer testified Aug. 7 during the first day of a hearing in Lincoln, Neb.

To gain approval for one of its proposed paths, Keystone lawyers will need to convince the Public Service Commission--made up of four Republicans and one Democrat--and overcome vehement opposition from dozens of landowners, environmental conservation groups, and Native American tribes.

The elected commission, created under the state's constitution, began hearing testimony in what is scheduled to be a week-long hearing. Much of the Aug. 7 hearing was dominated by testimony from company executives on the pipeline's maintenance details, including responsibility for cleanup, restoration, and removal once the conduit reaches its life expectancy.

A ruling from the panel is due no later than Nov. 23. Whether the pipeline gets built, however, may ultimately rest upon what the state's seven-member Supreme Court decides, as the loser is likely to appeal.

"The pipeline is not in the public interest," activist Jane Kleeb, president of the environmental advocacy group Bold Alliance who was elected last year as the state's Democratic Party chair, said in an interview prior to the Aug. 7 hearing. "This will be a private, foreign corporation that would be using eminent domain for private gain."

$8 Billion Project

Keystone XL has been in the planning stages for nearly 10 years. The conduit would carry heavy crude from Canada's oil sands region in Alberta to a terminal more than 1,100 miles away in Steele City, Neb., where it would connect with an already existing network leading to Gulf Coast refineries.

Labor unions are backing the $8 billion project for its promise of jobs.

TransCanada and President Donald Trump have promoted the project as one that will provide employment and boost the state's economy. Nebraska will benefit from as many as 4,500 jobs during the two-year construction period, and $12 million in property tax revenues, according to the Calgary-based company.

Environmental groups sued over its original path through the state because it would have traversed Nebraska's environmentally sensitive Sand Hills region. That route was soon abandoned for one charted by the state's now-former governor, Dave Heineman, and TransCanada, provoking lawsuits contending only the commission could approve its path.

While the pipeline company ultimately agreed to apply to the Public Service Commission, the Obama administration rejected TransCanada's request for permission to cross the U.S.-Canada border, effectively killing the project until Trump revived it earlier this year.

Despite the delays, during which crude oil prices have tumbled, TransCanada maintains that the pipeline still has commercial support.

Eminent Domain

Some landowners who fought the previous pipeline battle have returned for this one. The commission allowed 94 landowners to intervene in the hearing without limitations, ruling in March that they "have real property interests that will be directly impacted" by the pipeline's route.

Kleeb, alongside groups such as the Sierra Club and 350.org, have been working with landowners, highlighting the issue of eminent domain. They argue that it's unnecessary and unfair to take private property for the pipeline using eminent domain, particularly given certain liability provisions the company is putting into landowner easements. TransCanada says 91 percent of landowners in the state have agreed to allow the project on their land.

David Domina, a lawyer for landowners, questioned TransCanada executive Tony Palmer during Monday's hearing about the pipeline's complex corporate ownership structure. Palmer said he's the president of an intermediate entity called TransCanada Keystone General Partner LLC, which holds less than 1 percent of the company seeking the permit. Domina also questioned Palmer on who bears responsibility for maintenance or removal should the conduit become obsolete.

TransCanada still hasn't made a final decision on whether to push ahead with the Keystone XL project. Domina asked Palmer whether that meant the company would use the commission's ruling to "make better investment decisions?"

"No sir," Palmer replied. Asked if selling the route was an option if the commission approves the application but TransCanada scraps the project, he said, "I don't think that I could fulsomely respond with a yes or no answer."

Nuclear Regulator Moves to Restart Yucca Mountain Review

Posted August 08, 2017, 02:30 P.M. ET

By Jennifer A. Dlouhy

The Nuclear Regulatory Commission ordered staff to gather information tied to a review of the Energy Department's proposal to build a radioactive waste repository at Nevada's Yucca Mountain.

NRC directed staff to gather input and share information with the public regarding the possible reconstitution of a database of nearly 4 million documents tied to the Yucca Mountain application. NRC allotted $110,000 from the Nuclear Waste Fund for the work.

Chairman Kristine Svinicki and Commissioner Stephen Burns voted in favor, while Commissioner Jeff Baran voted against. Baran said in written comments that information gathering is based on a potentially faulty assumption that Congress will appropriate funds for the Yucca Mountain site.

"We should not presume that Congress will take this step in fiscal year 2018," Baran said.

Svinicki said the activities would develop the agency's readiness in case Congress appropriates money for Yucca in fiscal 2018.

Warren Buffett Likes Solar, But Not the Price Tag

Posted August 08, 2017, 9:23 A.M. ET

By Brian Eckhouse and Noah Buhayar

Warren Buffett has called global warming a "major problem" and put his company's money where his mouth is, spending billions to develop solar and wind power, yet he's no hero to some renewable energy proponents.

Their beef: They say the utility arm of Berkshire Hathaway Inc., his conglomerate, has been trying to undermine an almost 40-year-old law intended in part to promote the growth of cleaner energy. Berkshire, they say, is effectively stifling solar projects to protect utilities it owns, such as PacifiCorp, based in Portland, Ore.

"I'm sympathetic to reasons that the law is difficult for utilities, but PacifiCorp speaks out of both sides of its mouth," says David Brown, co-founder of solar developer Obsidian Renewables LLC in Lake Oswego, Ore.

Berkshire Hathaway Energy says it's not so simple. The company, which owns several utilities using conventional and renewable power sources, is the second-largest owner of clean-energy assets in the U.S. But along with other utilities, it argues that the law is outdated, often raises costs for its customers, and forces utilities to buy more electricity than needed.

The law is called the Public Utility Regulatory Policies Act, or PURPA. Congress enacted it after the 1970s OPEC oil embargo to draw new players into the utility-dominated business of generating power. It required some utilities to buy power from certain power providers if doing so was less expensive than building new plants themselves. The idea was to boost the then-emerging natural gas industry—and perhaps spur renewables including solar.

Prices Locked In

The act worked—too well, from the standpoint of the utilities. As solar panel prices plunged in recent years, developers deluged utilities with projects to sell them power. Utilities complain the law is producing a surplus of power. Moreover, utilities say the contracts with developers, whose terms are generally set by state utilities regulators, often lock them in for years at high prices that don't necessarily reflect the current market.

"Why should our customers be saddled with billions and billions of dollars of above-market prices?" asks Kathy Steckelberg, vice president for government relations at the Edison Electric Institute, which represents U.S. investor-owned electric companies.

"The fact that renewables are increasing in our market we don't see as a problem," Steckelberg says. Utilities would rather build or buy solar and wind farms themselves so they can pass on the development cost to ratepayers, rather than pay outsiders for the power. Yet under PURPA, they

often can't refuse an eligible deal.

Solar developers have proposed plans to generate about 3.5 gigawatts of power in Berkshire Hathaway's territories, the second most among regulated utilities in the U.S., according to Bloomberg New Energy Finance.

A spokeswoman for Berkshire's utilities unit wrote in a statement that PURPA "is no longer the key driver for renewable energy development." She cited rising corporate demand for renewables, falling costs, and government initiatives, such as state and federal tax incentives.

Utility Seeks Price Cut

In Wyoming, the company's Rocky Mountain Power, a division of PacifiCorp, is seeking a 40 percent cut to what it must pay small PURPA-eligible projects. PacifiCorp, which serves 1.8 million customers throughout the western U.S., has estimated the long-term contracts will cost consumers $1.1 billion above market prices in the 10 years through 2025.

In Oregon, PacifiCorp asked regulators to reduce the size of any renewable deal it's forced to take, as well as the length of the contract during which it must buy power. The utility won a partial victory last year: Regulators said certain facilities of up to 3 megawatts would qualify, down from a threshold of 10 megawatts, but left the required contract term at 20 years.

"There's no project that I can imagine that I would do for PacifiCorp," says Brown, whose Obsidian has developed multiple solar farms that provide power to the utility. "The prices are too low, and they say they don't have any interest or need for renewable energy."

States including Idaho and Montana have sided with the utilities by reducing the length of power-purchase contracts. In Idaho's case, the term went to 2 years from 20, according to EnerKnol, a research firm. Contracts of such short duration make it almost impossible to get financing for new projects, solar developers say.

Long-term contracts are important for renewable providers because lenders prefer companies that can project a steady cash flow for many years.

"You cannot raise capital against a two-year contract," says Matthew McGovern, chief executive officer of Santa Monica, Calif.-based Cypress Creek Renewables LLC, one of the most active PURPA developers. "Utilities are now saying, 'Well, why not?' They know the answer."

Utilities may have a friend in President Donald Trump, who's said climate change is a hoax and who's keen to tip the scale from renewables to coal and other fossil fuels. Trump is in a position to reshape the Federal Energy Regulatory Commission, an agency with some authority over PURPA.

Then there's Congress, where some members are eager to strip away much of PURPA. Berkshire Hathaway Energy has proposed altering the law by, among other things, making it so utilities wouldn't be obligated to buy power from PURPA projects when states determine the extra electricity isn't needed. Its Rocky Mountain Power unit recently announced a plan to invest an additional $3.5 billion in wind generation and transmission lines to bring the energy to customers.

Solar companies are resisting the changes. Many utilities are saying, " 'we need to take this back,' " says Adam Foodman, chief operating officer of solar developer O2 Energies Inc. "But that's not in the interest of the public."

China Nails Down New Environmental Guidelines for Construction

Posted August 08, 2017, 10:30 A.M. ET

By Michael Standaert

China's State Council has amended regulations on construction projects' requirements for the first time since 1998, a move it hopes will spur more environmental protection.

The simplified policy, which will take effect on Oct. 1, is being made to align with updates to the 2015 Environmental Protection Law and the 2016 Environmental Impact Assessment Law, as well as the forthcoming Environmental Tax Law in 2018 and a pollutant discharge licensing system being developed that puts the onus on companies to self-monitor and self-report their emissions.

The updated policy removes several duplications related to environmental impact assessment (EIA) procedures, putting more legal responsibility directly with construction companies and operators of completed projects. The updated construction guidelines increase penalties on builders who fail to get proper assessments, as well as those failing to or fraudulently reporting emissions after the project is completed.

Central government authorities have been working to reduce corruption and fraudulent activity related to the EIA system as well as penalize faked or under-reported emissions. This has included new qualifications and certifications for companies that conduct assessments as well as orders from the Supreme People's Court for courts to push for criminal prosecutions of those falsifying emissions.

"Under the previous regulation, punishment for illegal acts was too soft," Li Min, an official from the environmental engineering assessment center of the Ministry of Environmental Protection, said in an Aug. 2 commentary on the State Council Legislative Affairs office website. "Due to the low legal cost, implementation [of the policy] was not in place, resulting in construction projects that did not get assessment before starting construction."

Fines Increased

Under the old system, Li said, a company that started construction before an EIA was conducted would be ordered to get the assessment and pay a maximum fine of 100,000 yuan ($15,000).

Now, under the updated rules, if a builder does not get the proper EIA the project could be permanently halted, with fines ranging from 1 percent to 5 percent of the expected investment cost, or no less than 100,000 yuan ($15,000) to as high as 2 million yuan ($300,000). Executives of the company could be liable for fines between 50,000 yuan to 200,000 yuan ($7,500 to $30,000).

The updated guidelines also include specific reasons that environmental authorities could block pending construction projects when reviewing the environmental impact assessment. They include if the project location, scale, and layout do not conform to environmental protection laws and regulations as well as area development plans and if a project is in an area that has not met environmental quality standards or regional emissions targets.

"These tools for not approving projects will be the law, and environmental protection departments can take advantage of this effective weapon," Liu Lei, an official from the environmental engineering assessment center of the Ministry of Environmental Protection, stated in separate commentary on the State Council Legislative Affairs office website on Aug. 2.

Post-construction requirements for reporting emissions and other environmental issues will largely fall under the environmental tax and the pollutant licensing system, both which are still in the process of being rolled out.

Under the new rules, projects will have to have their monitoring systems and any technology that reduces emissions checked for compliance by local environmental authorities before final approval for full production.

Removed from the old requirement is a limit of three months to get checks on environmental protection technology [emissions reduction and monitoring technology, for example] during trial production, when companies could start some production to see if there were any issues they needed to address before going to full production. Now facilities will have to have that technology approved before starting any production.

According to a brief by Chen Guoqiang of the Sunshine Law Firm in Hangzhou published Aug. 2, this change could cause problems because it may be necessary for some facilities to "work out the bugs" before going to full production.

Chen said builders need to focus on getting acceptance from environmental authorities and not commit fraud in the process, otherwise both the company and executives could "face a large amount of fines." Bloomberg BNA attempts to ask Chen for an interview were unsuccessful.

Builders will need to pay for the environmental impact statements, but will not be charged for the technical assessment by the government after they submit the EIAs, company environmental impact reports, and other required forms.

Bloomberg BNA attempts to get comment from several major construction companies were unsuccessful.

Gas Sellers Sidestep China State Giants to Ride Demand Surge

Posted August 08, 2017, 10:08 A.M. ET

By Bloomberg News

China's independent energy firms are seeking to circumvent its state-backed giants as they cash in on swelling natural gas use, buoyed by President Xi Jinping's drive for cleaner fuels and nimbler companies.

New import facilities developed by firms including Guanghui Energy Co. and ENN Group offer direct access to cheap liquefied natural gas and cut their reliance on supply and infrastructure controlled by the the country's national oil companies. That may help new players tap China's booming gas demand, up 15 percent in the first half of the year.

"The key thing about having your own terminal is that you can take advantage of potentially lower pricing in the market," said Neil Beveridge, an analyst at Sanford C. Bernstein & Co. in Hong Kong.

"Also, it's very difficult to get supply through the infrastructure of the Chinese oil majors because the access rules and regulations are not terribly transparent and not terribly well enforced."

Smaller gas distributors and importers have found an opening as Xi's government seeks alternatives to coal and encourages private competition in the energy sector. They're poised to follow a similar trend in the oil industry, where independent refiners known as "teapots" have been allowed greater freedom to import crude, helping push China ahead of the U.S. this year as the world's biggest importer.

Guanghuai Energy last month received the second LNG cargo at its Qidong terminal, about 100 kilometers (62 miles) north of Shanghai. At least three more terminals are under construction or proposed including a port by ENN Group that's scheduled to start next year. Guangzhou Development Group Inc. has proposed a new import terminal, as has China Huadian Corp., one of the nation's biggest power generators, according to Bloomberg New Energy Finance.

New private ports enhance the bargaining power for distributors, which will lower downstream sales prices and boost China's consumption, ENN Energy Holdings Ltd., the listed unit of ENN Group, said in an emailed response to questions. It declined to comment specifically on the Zhoushan LNG terminal owned by its parent, which didn't respond to a separate request for comment.

Xinjiang-based Guanghui, which was one of the first non-state companies to receive a license to import crude, plans to allow third parties to deliver and store LNG at the Qidong site, chief engineer Xue Wenting said last month. The terminal's annual capacity will be expanded to 3 million metric tons by 2019 from 650,000 tons now, he said.

Jovo Energy Co., which was the first private Chinese company to begin importing LNG, began operating its Dongguan facility in Guangdong in 2012. The company also stores and sells liquefied petroleum gas and has an oil and chemicals business, according to its website.

China, which is forecast to more than double LNG purchases by 2022, has more than a dozen import terminals owned by its three state energy giants, which buy most of their cargoes on long-term contracts. But given the current global gas glut, new buyers can pick up cheaper shipments on the spot market, where analysts at SCI International estimate costs are about 50 percent less than average rates under the country's existing term contracts.

"Those companies can get cheaper LNG prices from the spot market on a more flexible basis and they can meet demand from their widespread distribution networks," said Maggie Kuang, an analyst with BNEF in Singapore.

China's LNG demand will expand by 5 million to 6 million tons annually over the next few years and private investors may account for about 20 percent of that growth, according to Michal Meidan, an analyst with Energy Aspects Ltd. in London. Bernstein's Beveridge estimates that share to be less than 10 percent of the 60 million tons of LNG he forecasts the country will be importing annually by the end of the decade.

China's national oil companies account for about 92 percent of the country's long-term contracts and "still firmly dominate the LNG import market," said BNEF analyst Nannan Kou. While Guanghui Energy has been buying spot LNG, it's seeking to sign long-term contracts with suppliers, including Malaysia's Petroliam Nasional Bhd, chief engineer Xue said.

The Chinese government is encouraging private capital to help construct LNG receiving facilities and pipelines, according to guidelines published last month by the country's National Development

and Reform Commission. China's top economic planner also said LNG import capacity and natural gas pipeline length will more than double in the 10 years to 2025.

Opening Up

"This is part of the government's efforts to open up the sector to non-state actors and increase efficiencies through greater competition," said Meidan at Energy Aspects.

China National Offshore Oil Corp. and China National Petroleum Corp., the country's first and second-largest LNG importers, didn't respond to calls seeking comment. A spokesman for China Petrochemical Corp., known as Sinopec Group, said Monday he couldn't immediately respond to questions.

LNG imports in June hit the highest on record for that month, in line with the country's booming demand, offering a boost for gas distributors. China Gas Holdings Ltd. has gained 85 percent this year while ENN Energy has climbed 69 percent. That compares with a 27 percent gain for the benchmark Hong Kong Hang Seng Index.

The Chinese government has set a goal of getting as much as 10 percent of its energy from gas by 2020 and 15 percent by 2030, up from 6 percent in 2015. To meet these goals, demand will grow by an average of 15 percent annually between 2016 and 2020, according to Macquarie Group Ltd.

Enough Supply?

The country's natural gas production, which is dominated by CNPC and Sinopec Group, rose 8 percent in the first half of 2017 compared to the same period a year ago. Meanwhile, imports have jumped 21 percent in the first seven months of the year, according to data released Tuesday.

Fast-growing supply may be needed, as Sinopec Group has already flagged a possible "big" increase in gas demand this coming winter compared to last year, particularly in the country's north, Shanghai Securities News reported Tuesday, citing a company meeting.

Even after independent gas distributors build LNG facilities, they're often still reliant on pipeline networks operated by the state-backed giants, according to Bernstein's Beveridge.

"It's still all about access with the majors" for an independent distributor, he said. "There are still more regulatory rules that are needed, so these companies are very much pioneers."

China Importing Less Coal Amid New Import Rules

Posted August 08, 2017, 8:38 A.M. ET

By Bloomberg News

China's coal imports in July declined to the lowest in more than a year as a new import rule may have delayed some shipments.

Imports by the world's largest energy user dropped 13 percent from the previous month to the equivalent of 627,742 metric tons a day, according to Bloomberg calculations based on data from the General Administration of Customs on Aug. 8. That's the least since May 2016.

The nation started to ban coal shipments from July 1 at ports that were set up through approvals by provincial authorities. Some imports have been diverted to enter China through ports approved under the authority of the State Council, which may have created delays, according to Deng Shun, an analyst with GF Futures Co.

"Coal demand was very robust last month, but the shipment volumes reported by customs could have been affected by the new import rule," Deng said before the data were released.

On a monthly basis, China's coal imports were 19.46 million tons in July, according to the data released Aug. 8. They totaled 152.71 million tons during the first seven months of the year, up 18 percent from the same period a year earlier.

Imports also declined as China's coal production rose in June to the highest since November 2015 after the government lifted restrictions on output to boost supplies amid higher demand.

VW Offers Incentives In Germany for Trade In of Dirty Diesels

Posted August 08, 2017, 9:37 A.M. ET

By Christoph Rauwald

Volkswagen AG's namesake brand and its upscale sister marque Audi are offering as much as 10,000 euros ($11,800) per car in incentives in Germany to trade in older diesel models for new ones that spew out fewer emissions as political pressure to fight pollution intensifies ahead of general elections.

The incentives depend on which model is purchased and the offer is open for owners of cars from rival manufacturers, VW and Audi said Aug. 8 in an emailed statements.

"Volkswagen is convinced that clean and efficient diesel engines with modern emission-reduction systems are an indispensable engine technology to reach CO2 emissions targets," while the manufacturer will still "strongly support" the shift to electric cars, Juergen Stackmann, head of the VW brand, said in the division's statement. VW's incentives start at 2,000 euros for the purchase of a new Up! city car and reach 10,000 euros for a Touareg sport utility vehicle.

The Wolfsburg, Germany-based automaker is still struggling to draw a line under the diesel-emissions scandal that erupted almost two years ago and triggered the worldwide recall of some 11 million cars with rigged software. Volkswagen Chief Executive Officer Matthias Mueller last week confirmed the manufacturer is offering software fixes for as many as 4 million diesel cars in Germany across all of the group's nameplates, including about 2.5 million VW-brand cars that were part of a mandatory recall.

Demand for cars with diesel engines is declining in several European markets as regulators stepped up scrutiny of emission rules to improve air quality. Environmental advocacy group Deutsche Umwelthilfe, a fierce critic of diesel cars, last month won a case at a Stuttgart administrative court

seeking broad diesel bans in the hometown of VW's German peer Daimler AG.

The trade-in offers are valid through the end of the year. Volkswagen's commercial-van division and Czech unit Skoda also said they're providing incentives.

European Oil Producer Considers Bet on Electric Car Boom

Posted August 08, 2017, 8:24 A.M. ET

By Francois de Beaupuy

The boss of Europe's second-largest oil and gas producer is considering whether to double down on its $1.1 billion purchase of battery maker Saft by betting on an electric-car boom.

Total SA Chief Executive Officer Patrick Pouyanne said in May that 12 months of owning Saft had helped him understand the case for gigafactories -- the giant lithium-ion battery plants being pioneered by Elon Musk's Tesla Inc. While Pouyanne views Saft as the company's "spearhead in electricity storage," he's so far stopped short of saying Total would get into the battery business for cars.

A mass auto market for power packs would offer Total a hedge against a looming peak in oil demand as the U.K. and France ban sales of diesel- and gasoline-fueled vehicles from 2040. Despite that attraction, the industry is getting more crowded and, according to Canaccord Genuity, Pouyanne may seek partners to leverage Saft's expertise as a niche maker of high-tech batteries for planes, satellites and military vehicles.

"Of all the battery applications, this is the one that's going to be the biggest," said Colin McKerracher, head of advanced-transport analysis at Bloomberg New Energy Finance in London. "The flipside of that is that it's going to become increasingly commoditized and very, very competitive."

The significance of the burgeoning industry isn't lost on oil majors. Royal Dutch Shell Plc, whose CEO Ben Van Beurden last month said his next car will be electric, plans to spend as much as $1 billion a year on its New Energies division as the transition toward renewable power and electric cars accelerates. The Shell boss sees demand for liquids peaking in "the early 2030s."

"Electric vehicles are progressing quickly these days, notably as urban vehicles," Pouyanne said in Aix-en-Provence on July 7. "Which is why we've decided to install charging stations in our network, because we know there will be an evolution, and that we've bought a battery maker called Saft."

Electric Potential

The emergence of light electric vehicles in large urban areas will become a reality in the next 20 years, a Total spokesman wrote in an email. "We are convinced that the use of Saft's high-performance batteries will be key for a reduction of CO2 emissions by 40 percent by 2030," he said.

With most major automakers planning plug-in models by the middle of the next decade, demand for lithium-ion batteries for electric vehicles will rise more than 60-fold by 2030 to 1,300 gigawatts-hours, according to a July report from Bloomberg New Energy Finance. Electric cars will outsell

fossil-fuel powered vehicles within two decades as battery prices plunge, and displace about 8 million barrels a day of oil production by 2040, BNEF said.

That will progressively dent the filling-station business of Total and its peers.

"It could be that in 15 years, the only fuels that you can sell in those stations are heavy truck diesel," said Alex Brooks, an analyst at Canaccord. "They have to have some way of responding."

Total's solar-panel subsidiary, SunPower Corp., demonstrates the challenges of finding a response in a rapidly evolving industry. While installation of solar farms has grown rapidly, competition from Chinese manufacturers has squeezed margins. Batteries for electric vehicles may follow a similar path as production volumes soar with investment in more gigafactories.

To adapt, Pouyanne last year created a division tying up the company's gas, renewables and power businesses, harnessing offerings spanning solar panels and batteries to gas and electricity distribution to households and businesses.

In its November magazine, Saft said it's looking for "joint opportunities" with SunPower "to develop the role of batteries in the intermittency" of renewables. Saft already supplies large batteries to utilities, grid operators and oil producers, as well as backup energy-storage systems for solar and wind farms.

Investment Strategy

When the French government announced plans on July 6 to end the sale of gasoline- and diesel-powered vehicles by 2040 in a bid to become a carbon-neutral nation, it also said it will support investment in batteries for electric cars.

"What you need is scale and tolerance for low margins, at least in the short term, as everyone jostles for position," said BNEF's McKerracher. "That's kind of the big risk, and in my view, probably why Saft may end up sticking with some of the higher-value applications that it's already involved in."

To limit its investment, Total may choose to license Saft's technology to carmakers and auto suppliers, or partner with them to share the cost of a megaplant, according to Canaccord analyst Brooks.

"If Total announced tomorrow plans to put down $10 billion to build a factory, I think investors would hate it, because people would say: 'you don't know anything about it, this is not your business,"' said Brooks. "You can be the guy who licenses the chemistry without having to put down a huge amount of the capital for the build. Let Daimler do that."

Egypt Moves to End State Monopoly of Natural Gas Market

Posted August 08, 2017, 8:52 A.M. ET

By Salma El Wardany, Mirette Magdy and Tamim Elyan

Egypt is opening the door to private participation in its natural gas sector, moving to end the state's

monopoly as it pushes ahead with reforms meant to encourage investment and revive the economy.

A new law signed by President Abdel-Fattah El-Sisi sets up a natural gas regulatory authority charged with licensing and devising a plan to open the gas market to competition. It also allows for the eventual import of natural gas by private companies, a move that could help end supply shortages that have hampered businesses.

The measure, which had been more than two years in the making, is the government's latest push to spur investment in an economy that has struggled to revive since the 2011 uprising against President Hosni Mubarak. Over the past year, authorities have instituted sweeping reforms, backed by the International Monetary Fund, that have included floating the currency, sharp subsidy cuts and enacting legislation aimed at drawing in sorely needed foreign money.

The new legislation also advances Egypt's objective to achieve energy self-sufficiency by 2019, largely through eventual output from the giant Zohr natural gas field.

The law would allow the private sector to directly ship, transport, store, market and trade natural gas using the pipeline and network infrastructure. Its executive regulations are to be issued within six months of the legislation's enactment, according to the Official Gazette.

"This law effectively relieves the government from the burden of providing for the rapidly growing natural-gas consumption and turns it into a regulator," said Radwa El-Swaify, head of research at Cairo-based Pharos Holding. "It's all part of the same direction of having freer markets in Egypt."

In July, the government said it will stop subsidizing bread flour and raised household electricity prices by as much as 42 percent, just a week after it increased fuel prices.

The move to liberalize the gas market will bring in greater transparency and flexibility, said Haitham Abdul Moneim, investor relations manager at Egypt Kuwait Holding, which partially owns and manages fertilizer producer AlexFert. "This will give us more options for sources of gas and maybe better prices," he said.

Daily Environment Report for EPA

To: Jackson, Ryan[jackson.ryan@epa.gov]
From: POLITICO
Sent: Mon 8/7/2017 4:02:50 PM
Subject: POLITICO SPECIAL REPORT: Trump's TPP trade pullout roils rural America

In moves that strike hard at President Donald Trump's rural base, the 11 other nations that participated in the now-defunct Trans-Pacific Partnership are pursuing 27 separate negotiations aimed at undercutting U.S. exporters, according to a POLITICO analysis.

The TPP, which Trump scuttled immediately after taking office, was a suspect deal to many factory workers. But for already struggling farmers, it was a chance to erase the punishing tariffs that prevented them from selling more beef, pork and dairy to such massive importers as Japan and Vietnam.

Now, POLITICO reports, the United States is already losing market share in exports of some agricultural products, while top competitors like the EU and Australia are looking forward to enormous cost advantages. Meanwhile, Trump has been slow to develop a trade strategy of his own. That has farming communities like Wright County, Iowa, which backed Trump by a 2-1 margin, reconsidering their faith in the president.

In Sudden Reversal, EPA Withdraws Plan To Delay Ozone Designations

In a sudden reversal, EPA Administrator Scott Pruitt has withdrawn his decision to delay by one year agency designations for whether areas are attaining strict Obama-era ozone air quality standards, saying that "information gaps" justifying the delay no longer appear to be as extensive as initially believed and that EPA might be able to issue the designations this year.

DOJ, EPA Revising Pending Deals To Comply With Sessions' Funding Ban

EPA and the Justice Department (DOJ) are revising a series of pending settlement agreements to ensure they comply with Attorney General Jeff Sessions' recent memo barring legal settlements from including payments to third parties, lawyers involved in the talks say.

Environmentalists Urge Court To Reject Methane NSPS En Banc Petitions

Environmentalists and their state allies are urging an appellate court to reject separate petitions filed by oil and gas industry groups and their state supporters that asked the court to reconsider its ruling that vacated EPA's administrative pause of its methane standards for new equipment, arguing that the ruling was correctly decided and that critics do not raise any compelling reasons for full court review.

Biofuels Group Warns EPA Not To Weaken RFS With 'Reset,' Import Limits

Biofuels supporters are warning EPA not to "gut" its renewable fuel standard (RFS) program in its upcoming rule to "reset" statutory blending targets for renewable and alternative fuels, and also cautioning against creating any extra barriers to biofuel imports as its crafts its final version of RFS targets for the 2018 compliance year.

Environmentalists Seek Formal EPA Rule On Coal Ash Permit Programs

Environmentalists in a recent meeting with White House and EPA officials urged the agency to craft a formal rule on how it will review states' coal ash disposal permit programs to ensure they comply with EPA's ash waste rule, saying draft permit

guidance under White House review is not enough to guarantee states' policies will be adequate.

Utility's Appeal May Set Precedent On CWA Liability For Coal Ash Disposal

A Virginia power company is again appealing a closely watched Clean Water Act (CWA) suit over coal ash disposal, hoping to win a precedential ruling that would avert any CWA liability for groundwater contamination from ash sites, even as environmentalists have begun a fresh case in the same circuit over alleged groundwater harms.

EPA Retains Reliance On Audits In RMP Pacts Despite Doubts Over Rule

EPA's latest proposed settlement with a company for alleged violations of the Risk Management Plan (RMP) facility safety program includes strict mandates for independent audits to prevent future violations, suggesting the agency will retain reliance on audits in such pacts despite delaying an Obama-era rule to mandate audits as part of RMP.

Subject: EPW postpones votes on EPA, NRC, FHWA picks

By Anthony Adragna

10/17/2017 07:25 PM EDT

The Senate Environment and Public Works Committee has postponed votes that had been scheduled for Wednesday on the nominations of various EPA, NRC and federal highway picks.

No reason was provided and the committee didn't respond to requests for comment.

The uncertain fate of Bill Wehrum's selection to run EPA's air office may be partially to blame for the delay. Sen. Joni Ernst pointedly declined to state she'd vote in support of his nomination even after Administrator Scott Pruitt's efforts this afternoon to reassure corn-state senators about how he'd implement the Renewable Fuel Standard. With just an an 11-10 majority on the panel, Republicans could afford no defections.

Other nominations now delayed: Michael Dourson's to be EPA chemicals chief; David Ross' to head the EPA water office; Matthew Leopold's to be EPA general counsel; Jeff Baran's re-nomination to the NRC and Paul Trombino's selection to be administrator of the FHWA.

WHAT'S NEXT: The committee said the hearing is postponed "until further notice."

Subject: Morning Energy: Another ANWR wrinkle in tax revamp battle — Murray bashes oil giants as fossil fuel 'enemies' — Pruitt promises new WOTUS rule by mid-2018

By Anthony Adragna | 12/01/2017 05:42 AM EDT

With help from Alex Guillén and Eric Wolff

ANOTHER TAX BILL WARNING OVER ANWR? Even as Senate Republicans scrambled Thursday evening to rewrite their tax package H.R. 1 (115), a small bloc of House Republicans objected to including ANWR drilling in the package — adding a new potential complication for the bill's passage once the chambers head to conference. A dozen House Republicans, six of whom voted for their chamber's bill previously, sent a letter to their party's leaders raising "concerns with any proposal that would implement an oil and gas leasing program" in ANWR though they stopped short of threatening to pull their support for the bill if it was not removed, Pro's Nick Juliano reports.

GOP Reps. Dave Reichert, Brian Fitzpatrick, Carlos Curbelo, Ryan Costello, Pat Meehan and Mark Sanford all backed the tax package on the floor, but are now expressing unease with the ANWR provision, along with six colleagues who opposed the initial bill over issues such as the state and local tax deduction. Remember Speaker Paul Ryan can only afford 10 additional defections from the original November vote tally for the final package to pass, meaning the small bloc holds some juice in the negotiations.

Other former Republican leaders oppose: A group of seven former Republican officials, including the first EPA Administrator William Ruckelshaus and former Interior Deputy Secretary Lynn Scarlett, sent their own letter to congressional leaders warning there's "simply no need to reverse protections" for ANWR and that fiscal projections for revenue are "highly speculative." They added that tacking the provision into the package would "complicate passage of important and vitally needed tax reform."

ICYMI, Senate Republicans tweaked drilling language in their bill to propose selling more oil from the Strategic Petroleum Reserve. What's interesting is the lack of criticism from Republicans who previously been outspoken against such efforts. (EPW Chairman John Barrasso said in 2012 tapping the SPR is "for emergencies — not political disasters.") Sen. Bill Cassidy summed up the party's thinking to ME: "I'm okay with that, because obviously the Strategic Petroleum Reserve is about energy security, and if ANWR is developed that is far more important to energy security than two days of SPR."

WELCOME TO DECEMBER! I'm your host Anthony Adragna, and the State Energy & Environmental Impact Center's Chris Moyer correctly identified Michelle Lujan Grisham as the niece of former Interior Secretary Manuel Lujan now running for office. For today: Which senator once ran the public schools of his state's largest city? Send your tips, energy gossip and comments to aadragna@politico.com, or follow us on Twitter @AnthonyAdragna, @Morning_Energy and @POLITICOPro.

Legislative Compass - Preferred Pricing for 2017: Test out POLITICO Pro's powerful, easy-to-use tool that simplifies federal and state legislative tracking. Get started.

MURRAY LABELS OIL GIANTS 'ENEMIES' OF FOSSIL FUELS: Three of the major oil and gas corporations are "enemies" of fossil fuels because of their past advocacy for climate action, including a carbon tax, coal executive Robert Murray said Thursday at a conference hosted by the Heritage Foundation and the Texas Public Policy Foundation. Prompted by comments from TPPF's Brooke Rollins calling their carbon tax advocacy "so disingenuous," Murray declared BP, Shell and Exxon Mobil "our enemies," citing politics and shareholders. "They're not doing our grandchildren justice, those three companies. The other oil and gas companies, they realize that once our enemies get rid of coal, they're next," Murray said. "But those three companies are all about politics and shareholders and I don't buy those products." Oil and gas executive Bud Brigham agreed: "It's cronyism that they chose to have a seat at the table with the government and collusion with special interests a la Elon Musk, etc. It's very disappointing."

Murray math: The coal magnate dropped some eyebrow-raising stats during his appearance, including that he has met with EPA Administrator Scott Pruitt a whopping seven times so far this year. Murray also said he has received 71 death threats, "some serious," although he did not specify over what period those were received.

MORE THAN A LITTLE SHAVE: During his swing to Utah next Monday, President Donald Trump is expected to cut the 1.353-million-acre Bears Ears National Monument down to about 201,400 acres and break it into two new monuments called Indian Creek National Monument and Shash Jaa National Monument, Pro's Esther Whieldon reports, citing proclamations . He'll also divide the existing Grand Staircase-Escalante monument into three parts — Grand Staircase National Monument, Kaiparowits National Monument and the Escalante Canyons National Monument. The action is certain to set off a fierce legal battle almost immediately.

House Natural Resources Chairman Rob Bishop welcomed the move and pledged to attend the ceremony. "The president has stood against prior abuses of executive power and his administration has demonstrated a commitment to work in concert with local communities to protect unique public antiquities and objects the right way," he said in a statement. But Sen. Tom Udall, joined by Native American and environmental groups, will discuss what they're calling an "illegal abuse of power" during an 11 a.m. telephone press conference today.

ZINKE HEADS TO LOUISIANA: This Saturday Interior Secretary Ryan Zinke heads to Louisiana for events on coastal restoration and the state's plan for addressing it along with Sen. John Neely Kennedy, Cassidy and Rep. Garret Graves. They'll participate in events in Baton Rouge, Thibodaux, and Ama, La.

But faces ads in Washington: The Western Values Project is out with a six-figure ad this

morning on Fox News and up digitally in Utah urging Trump to reject Zinke's recommendations on national monuments. "One Cabinet member in Washington has become one embarrassment after another for President Trump," it starts. The final line: "Don't let this wannabe cowboy embarrass you once again."

LAST CALL! Today's your last chance to weigh in Interior's vows to redo sage grouse conservation plans. Advocates, including the Audubon Society and the National Wildlife Federation, say they've submitted at least 163,000 already in support of the existing plans. And a group of fish, wildlife and natural resources professionals urged Interior to ensure any changes made to sage grouse management plans are backed up by appropriate science.

PRUITT PROMISES FINAL WOTUS BY MID-2018: Pruitt is due to make remarks to farmers and biofuels groups today in Nevada, Iowa, today fresh off his agency's biofuels decision on Thursday and a swing through Kentucky. During a speech to the Kentucky Farm Bureau Thursday, Pruitt promised a final replacement to the Waters of the U.S. regulation by mid-2018 that he said would focus on "navigability," according to video posted by WHAS. He also met with Kentucky Gov. Matt Bevin.

On his relationship with Trump: "It is a blessing to serve him and my desire each and every day is to bless him as he makes decisions."

GREENS DEMAND DOURSON DOCS: American Oversight and the Environmental Working Group are beginning a joint investigation this morning into EPA chemicals office nominee Michael Dourson's early work at the agency prior to his Senate confirmation. They're sending out six FOIA requests seeking copies of his communication with senior political staff; ethics and recusal documentation; calendar and telephone logs; records of political appointees discussions about Dourson; contacts with outside groups like Koch Industries and DuPont; and interactions with anyone helping Dourson on his confirmation. "Michael Dourson has been at the EPA for more than a month, and if he's been using his position to help his old clients in the chemical industry, the public needs to know before the Senate votes on his confirmation," Austin Evers, executive director of American Oversight, said. Reminder: Dourson appears to be short the votes needed for Senate confirmation.

FROM FARM TO CAR: EPA issued its rule Thursday making official the Renewable Fuel Standard requirements for 2018 and 2019. Cellulosic ethanol got a 50 million gallon increase because, EPA said in the rule, the agency received updated data that suggested greater production capacity. The requirement is still lower than it was this year.

Biodiesel doesn't lose: Biodiesel producers wished for a larger target, but EPA also abandoned its October threat to make deep cuts. EPA had said that it was concerned about import tariffs, feedstock problems, and the expiration of a biodiesel tax credit crimping supply, and so it wanted to make big reductions. The agency is still concerned about those forces, but, it said, "We find it unnecessary to resolve whether to adopt such interpretations at this point in time because under any approach we would find exercise of these waiver authorities not appropriate based on the record before us."

QUICK SENATE ACTION ON BROWNFIELDS EYED: The House passed legislation H.R. 3017 (115) reauthorizing EPA's Brownfields program Thursday afternoon and Sen. Jim Inhofe said he thought it could pass by unanimous consent in the Senate in the near future. "There's no one opposed to it that I know of," he told reporters. The bill cleared the House by an overwhelming 409-8 tally with eight Republicans voting no.

CRITICISM OF PUERTO RICO CONTRACTS: Two former Obama administration officials are out with an op-ed this morning in POLITICO urging the Trump administration to stop its practice of awarding massive reconstruction contracts in Puerto Rico to single companies, such as Whitefish Energy. And that comes as the top Homeland Security Democrat Claire McCaskill sent a letter to FEMA asking questions about why it awarded $30 million in contracts to a newly-formed Florida company that was unable in the end to complete the work on the hurricane-ravaged island.

WEST VIRGINIA'S SENATORS ON BLANKENSHIP BID: Even as convicted coal baron Don Blankenship released his first ad in his Senate bid, his possible opponent Sen. Joe Manchin didn't seem perturbed by his entry "I'd just say, 'jump in, the water's fine," he told ME. Republican Sen. Shelley Moore Capito told ME she expected a lively primary campaign and added: "I was surprised and I said, 'It's a free country.'"

MAIL CALL! DO YOU REMEMBER? Top House Energy and Commerce Democrat Frank Pallone sent a letter to Chairman Greg Walden demanding oversight hearings and investigations into the use of private planes by Trump Cabinet officials. "It is critical that we ensure there are effective Agency controls that exist to prevent the risk of fraud, waste, and abuse related to leadership and staff travel," he wrote. Both Perry and Pruitt used non-commercial aircraft, and their agencies fall under the committee's jurisdiction.

INHOFE ON ENDANGERMENT FINDING: NOW OR NEVER: Though it hasn't come up in his conversations with Pruitt, Inhofe wants his fellow Oklahoman to make a push to overturn the endangerment finding now. "If there's a chance of getting it done, I don't see a downside," he told reporters. "I would recommend he do that."

Inhofe spoke with Pruitt on Tuesday and said he was upbeat. "He's warding off the harassment, the opposition, the death threats and these things," Inhofe said. "He's just real happy in his job."

LOOKING FOR WEEKEND PLANS? Hundreds of faith leaders, environmental activists, native tribes, business owners and others gather on Saturday to encircle the Virginia State Capitol on Saturday in protest of the Atlantic Coast and Mountain Valley pipelines. More information here.

TAKE A GLANCE! Resources for the Future released a study Thursday examining multiple potential alternative versions of Perry's proposed grid resiliency rule and their corresponding impacts to human health, the environment, consumers' cost of electricity and power plant owners' profits. Read it here.

Republicans rewriting tax bill — with fight pushed into Friday Back

By Seung Min Kim and Colin Wilhelm | 11/30/2017 10:59 AM EDT

Senate Republicans are still scrambling to win over enough votes to pass their massive tax code overhaul, with major changes to the bill still up in the air and debate pushed into Friday.

Senate Majority Leader Mitch McConnell (R-Ky.) said the next vote in the tax debate will come at 11 a.m. Friday, as work continues behind the scenes to win over skeptical deficit hawks and other swing votes.

Multiple GOP senators leaving the chamber after a dramatic late afternoon vote said a key proposal for deficit hawks — a trigger to raise tax rates if sufficient economic growth did not materialize — would not pass procedural muster and would need to find something else to satisfy the bloc of deficit hawk holdouts, led by Sen. Bob Corker (R-Tenn.).

"It doesn't look like the trigger is going to work, according to the parliamentarian," Senate Majority Whip John Cornyn (R-Texas) said. "So we have an alternative, frankly: a tax increase we don't want to do to try to address Sen. Corker's concerns."

Corker told reporters: "My understanding is, that the parliamentarian has ruled against it so they're just going to automatically put [tax increases] in, period." Corker and Sen. Jeff Flake (R-Ariz.) said the revenue raised with tax increases — which senators say would kick in six years after the enactment of the tax legislation — would total about $350 billion, although Cornyn suggested that figure may need to go higher.

Late Thursday, Republicans huddled with leadership and tax policy staff to work on a solution.

Sen. Thom Tillis (R-N.C.), who supports the current package, estimated that Republicans needed to find an additional $370 billion to $400 billion within their package to placate concerns about increased deficits.

"What we're trying to do right now is get to the point where nobody's going to get exactly what they want but enough for us to get the bill passed," he told reporters.

The sudden need to regroup came after extended drama on the Senate floor Thursday during an otherwise mundane procedural vote, when Corker, Flake and Ron Johnson (R-Wis.) initially withheld their support on a vote to move forward with the bill. Ultimately they aligned with their party, but it suggested real concerns remained, including friction among Republicans over whether to stick to the 20 percent corporate tax rate rate insisted on by the White House.

Johnson withheld his vote during the standoff in exchange for votes on his amendments, including one that would further increase a tax deduction for pass-through businesses to around 25 percent.

The legislation would slash the corporate tax rate and lower rates for many, though not all, individuals. Senate Republicans have said their plan would boost the economy but not by nearly as much as some lawmakers hope, a new official analysis shows.

The nonpartisan Joint Committee on Taxation said Thursday that the GOP plan would fall well short of covering its $1.5 trillion cost through additional economic growth; it predicted $407 billion in additional revenue would come in by boosting the economy by 0.8 percent over the next decade.

That would mean a $1 trillion deficit increase, which is problematic for lawmakers like Corker, who has said he would vote against a tax bill that increased the deficit. A Senate Finance Committee aide noted that the analysis was "incomplete" since the bill text has yet to be finalized.

Democrats have blasted Republicans for rushing the bill to the floor while considering significant eleventh-hour changes to the sprawling tax code rewrite.

"This is tax, one of the most complicated issues before us," Senate Minority Leader Chuck Schumer said on the floor Thursday. "These changes and the way the majority leader is handling this make it impossible for any independent analyst to get a good look at the bill and how it would impact our country."

Yet, Sen. John McCain, who gave Republicans a boost earlier in the day when he broke his long silence and said he would back the legislation, signaled he was satisfied with the process, noting the bill went through "a thorough mark-up in the Senate Finance Committee."

The Arizona Republican, who helped tank the party's Obamacare repeal efforts earlier this year, had said going through a regular legislative process was one of his major concerns.

But it was clear Senate Republicans still have myriad issues to resolve in order to lock down at least 50 votes to ensure final passage of the tax bill on the floor. Republicans are using powerful budget procedures to evade a Democratic filibuster.

Other key GOP votes such as Corker, Flake and Susan Collins of Maine have yet to commit to the bill, for varying reasons. And Johnson and Steve Daines of Montana are trying to secure even more generous treatment of small businesses after extracting a boost in an earlier round of negotiations.

Collins plans to offer a half-dozen amendments, including one that would hike the proposed corporate tax rate of 20 percent to restore a deduction for up to $10,000 for property taxes. She is among a handful of Republican senators who say they are open to raising the proposed corporate rate in order to fund other tax provisions in the bill.

The moderate senator is also seeking to extract some health care assurances because the current tax bill repeals Obamacare's requirement that everyone carry insurance or pay a penalty. She has pushed for two separate health care bills — one to stabilize the markets and another to protect pre-existing conditions and use high-risk pools — to be grafted to a short-term spending bill that would need to pass before government funding expires Dec. 8.

Conservatives in the House Freedom Caucus, a group of about 40 Republicans that frequently buck their party's leadership, rejected the notion of supporting those health care bills.

Members of the group also said they opposed amendments that would raise the proposed corporate income tax rate above 20 percent, and bristled at the idea of a delayed cut, which the Senate's bill does largely due to budgetary rules.

"It's a great strategy if you're looking to put the Democrats in the majority and give them credit for what we did," Rep. Louie Gohmert (R-Texas) said of the Senate's proposed one-year delay to a corporate tax cut.

Brian Faler, Bernie Becker and Elana Schor contributed to this report.

ANWR drilling in tax bill draws opposition from a dozen House Republicans Back

By Nick Juliano | 11/30/2017 06:33 PM EDT

A dozen House Republicans raised concerns today about a rider in the Senate tax bill that would allow drilling in the Arctic National Wildlife Refuge.

The lawmakers did not mention the tax bill by name in their letter, and they stopped short of promising to pull their support if ANWR drilling is included. But they said they had "concerns with any proposal that would implement an oil and gas leasing program in the Refuge" and questioned whether new drilling there was necessary.

"Further, the resources beneath the Refuge's Coastal Plain simply are not necessary for our nation's energy independence," wrote Reps. Brian Fitzpatrick, Dave Reichert and 10 of their GOP colleagues.

Six of the 12 lawmakers already voted against the House tax bill earlier this month, citing objections such as its elimination of the state and local tax deduction.

Opening ANWR is a priority for Sen. Lisa Murkowski, a key swing vote in the upper chamber, which hopes to pass its version of the bill as soon as this week.

GOP tweaks Arctic drilling language to bump up revenue Back

By Sarah Ferris | 11/30/2017 11:51 AM EDT

Senate Republicans have reworked language on Arctic drilling in their tax bill to further boost revenue, hoping to resolve a procedural hiccup before the impending passage vote.

Senate Budget Committee leaders have tweaked provisions that would authorize drilling in the Arctic National Wildlife Refuge, altering the language in a way they believe will comply with so-called Byrd rule requirements, a GOP committee aide confirmed today.

The budget panel had expected to raise $1 billion over a decade by opening up ANWR for drilling. But a report from the CBO, shared internally with budget staffers, estimated it would fall short by about $366 million, according to a Senate Democratic aide.

The GOP's revised drilling language would propose selling more oil from the Strategic Petroleum Reserve, potentially producing hundreds of millions of dollars in additional revenue, the aide said.

If approved by the Senate parliamentarian today, the new language will be formally added before the high-stakes Senate floor vote on the tax plan, H.R. 1 (115).

The fate of the provision — championed by swing vote Sen. Lisa Murkowski (R-Alaska) — was called into question Wednesday after a warning from the parliamentarian.

Each part of the GOP's tax plan must comply with a complex set of budget reconciliation rules that allow the legislation to avoid a Democratic filibuster.

Documents show Trump set to shrink Bears Ears, Grand Staircase monuments Back

By Esther Whieldon | 11/30/2017 04:35 PM EDT

President Donald Trump will shrink Utah's Bears Ears National Monument by 85 percent and Grand Staircase-Escalante National Monument by about 41 percent, according to copies of the proclamations and maps obtained by POLITICO.

Trump is expected to travel to Utah on Monday to make the announcement about the monuments that were established by former presidents Barack Obama and Bill Clinton, and which Utah lawmakers and conservative groups have complained were created over their objections. Trump has called Obama's creation of Bears Ears in the waning days of his presidency an "egregious abuse of federal power."

Both of the Utah monuments contain fossil fuel resources and Trump's move is sure to touch off a legal battle over the president's authority to dramatically alter his predecessors' actions under the Antiquities Act, which environmental groups view as one of the nation's bedrock conservation laws.

Trump's proclamations, which were first reported by The Washington Post, would cut the 1.353-million-acre Bears Ears down to about 201,400 acres and break it into two new monuments called Indian Creek National Monument and Shash Jaa National Monument. In addition to oil and gas resources, the area also holds uranium deposits.

Trump would divvy the Grand Staircase-Escalante monument into three parts — Grand Staircase National Monument, Kaiparowits National Monument and the Escalante Canyons National Monument — ending protections over swatches of areas high in mineral resources. The land will

remain under federal control.

The newly drawn monuments are "confined to the smallest area compatible with the proper care and management of objects," the proclamations state.

The move will be welcomed by Utah's congressional delegation and other Republican lawmakers who had accused Obama of federal overreach by creating monuments despite local opposition and using the Antiquities Act to head off commercial activity. Obama created dozens of land and marine monuments, protecting more than 5.7 million acres — the most any president has set aside under the century-old Antiquities Act.

Trump's expected order is the latest move in his effort to roll back Obama's regulations and federal decisions that he has said hinder the economy and fossil fuel development.

But Trump's order on the Bears Ears monument, which was created to protect thousands of sensitive archaeological sites, is certain to spark a court fight with tribes and conservation groups that have complained the Native American ruins there were being damaged and would be threatened by oil and gas development in the area.

Environmental groups and tribal organizations are planning a protest at the Utah state capitol this weekend over Trump's planned visit.

Democrats have criticized Interior Secretary Ryan Zinke's review of more than two dozen monuments for being conducted in secrecy, and they have chided Zinke for not releasing copies of his full report to the White House. Senate Minority Whip Dick Durbin had put holds on four of Trump's Interior nominees in order to force Zinke to brief him on the monument plans. He lifted two of those holds after a meeting with Zinke.

Rob Bishop's House Natural Resources Committee in October reported out a bill, H.R. 3390, that would amend the Antiquities Act to more clearly define a president's authority to change monuments. Previous legislative attempts by the Utah delegation to curb federal monuments have failed.

The White House and Interior Department did not immediately respond to requests for comment.

Subject: California grid emerges from solar eclipse unscathed

By Esther Whieldon

08/21/2017 03:53 PM EDT

The California grid survived today's total solar eclipse without a hitch, California Independent System Operator officials said.

About 3,000 megawatts to 3,500 megawatts of solar generation stopped producing power during the eclipse, and the grid operator was able to cover that loss with hydropower and natural gas power supplies, Eric Schmitt, ISO vice president of operations, told reporters.

The grid operator had expected to lose up to 4,600 megawatts of utility scale solar during the eclipse and about 1,300 megawatts of residential rooftop solar.

Schmitt said months of planning had enabled the grid operator to accommodate the solar event.

"We didn't have any major challenges on the system, even minor challenges," he said. "We're very pleased with how smooth it went. All the resources performed the way they were supposed to perform."

Electricity prices were normal, peaking in the low $20s per megawatt-hour. But as the eclipse abated, they then went negative — meaning generators would need to pay to ship their power — as the solar power plants began to come online, Schmitt said.

WHAT'S NEXT: The ISO expects to release more details about how the grid performed during the solar eclipse, such as how much battery storage was used and how much rooftop solar went offline, at a later time.

WATER
Water Infrastructure Finance Authority
Arizona WATER

Proposed rule of the Water Infrastructure Finance Authority (WIFA) amends regulations under R18-15-101 through -701 (nonconsecutive) and amends and renumbers regulations under R18-15-402 through -408 to reflect that governance of the authority and its related funds and programs are now under the Arizona Finance Authority. The rule also revises eligibility criteria for the Clean Water Revolving Fund to allow WIFA to provide assistance to private and nonprofit entities for certain types of projects, in response to changes to the Clean Water Act. A hearing is scheduled for Nov. 6, 2017, in Phoenix. Comments are due Nov. 7, 2017. Contact: Trish Incognito; WIFA; 602-364-1310; pincognito@azwifa.gov

AIR
Mandatory Reporting of Greenhouse Gas Emissions
California AIR

Final rule of the Air Resources Board amends regulations under 17 CCR 95101 through 95157 (nonconsecutive) and Appendices A and B and adopts regulations under 22 CCR 95160, 95161, 95162, and 95163 regarding mandatory reporting of greenhouse gas emissions. The rule clarifies procedures for changing calculation methods, revises reporting and verification cessation criteria, and clarifies recordkeeping and retention times. The rule also updates global warming potential values to be used beginning with 2021 data reported in 2022, requires facilities to

provide a facility schematic diagram indicating fuel flows and metering locations as part of monitoring plans, and updates calibration requirements for differential pressure devices at refineries. In addition, the rule revises reporting requirements for liquefied petroleum gas and natural gas importers and processing plants, electric generators, petroleum and natural gas systems, and biomethane transporters. Finally, the rule addresses emissions from imported electricity under the Energy Imbalance Market, revises the verification deadline, and requires product data reporting. The rule is effective Jan. 1, 2018. Contact: Bradley Bechtold; ARB; 916-322-6533; bradleybechtold@arb.ca.gov

COASTAL ZONE
General Permits for Activities Seaward of the Coastal Construction Control Line
Florida COASTAL ZONE

Notice of the Department of Environmental Protection, Division of Beaches and Coastal Systems, announces a workshop on July 19, 2017, proposed amendments to regulations under FAC 62B-34.010 through .090 (nonconsecutive) regarding general permits for activities seaward of the coastal construction control line. The rule adds general permits for swimming pools associated with single-family homes, dune restoration, and minor reconstruction of existing coastal armoring. The rule also clarifies siting criteria for major structures, revises the application fee schedule to include general permits, and adds general conditions applicable to all general permits concerning beach walkovers and sand fencing. In addition, the rule adds a definition for "registered professional" and a new general permit for certain minor structures. The workshop

also will include discussion on a concurrent proposed rule under FAC 62B-33 regarding coastal construction and excavation permits. The workshop is scheduled for Oct. 9, 2017, in Tallahassee and via webinar. Contact: Nicole Todd; DEP; 850-245-7535; Nicole.Todd@dep.state.fl.us

Regulatory Update

COASTAL ZONE
General Permits for Coastal Construction and Excavation
Florida COASTAL ZONE

Notice announces the intention of the Department of Environmental Protection, Division of Beaches and Coastal Systems, to amend regulations under FAC 62B-33.002 through .024 (nonconsecutive) regarding permits for construction seaward of the coastal construction control line and 50-foot setback. The rule provides exemptions from permitting for certain minor activities, deletes obsolete references to the Florida Building Code, and establishes criteria for fill material. The rule also clarifies criteria for siting of major and minor structures, establishes criteria for rebuilt pipelines and ocean outfalls crossing the beach, and clarifies requirements for geotechnical data required in the application process. In addition, the rule removes the requirement to submit multiple copies of certain documents to the department, revises fee calculations, eliminates the permit fee for exemption determinations and permit transfers, reduces the permit fee for reissued permits, and provides for electronic submission of applications and related documents. Finally, the rule provides success criteria for site revegetation, removes a requirement for construction progress reports, and clarifies the methodology used to establish the 30-year erosion projection line. A workshop is scheduled for Oct. 9, 2017, in Tallahassee and via webinar. A comment due date is not specified. Contact: Nicole Todd; DEP; 850-245-7535; Nicole.Todd@dep.state.fl.us

Regulatory Update

Oklahoma

AIR
Air Pollution Control Permits/Gasoline Dispensing Facilities
Oklahoma AIR

Proposed rule of the Department of Environmental Quality amends regulations under OAC 252:100-2-3, -7-1.1, -7-2, and -8-35; adopts regulations under OAC 252:100-7-60.7; and revokes and readopts regulations under OAC 252:100, Appendix Q, regarding permits for minor facilities and major sources. The rule adds a new permit-by-rule for facilities that are obligated to obtain a permit due to the presence of a gasoline dispensing facility or facility with an emergency engine subject to a federal standard. The rule also defines "gasoline dispensing facilities" and exempts from permit requirements facilities with less than 100,000 gallons of monthly throughput. In addition, the rule updates and incorporates by reference federal regulations, including the national emission standards for hazardous air pollutants and new source performance standards, as of June 30, 2017. Hearings are scheduled for Oct. 18 and Nov. 7, 2017, in Oklahoma City and Tahlequah, respectively. Comments are due Oct. 16, 2017. Contact: Melanie Foster; DEQ; 405-702-

WATER
Chesapeake/State Water Control Law Enforcement Action
Virginia WATER

Notice of the Department of Environmental Quality, State Water Control Board, announces a proposed consent order with Elling Enterprises Inc., doing business as Baldwin Auto Disposal, for alleged State Water Control Law violations at its automobile salvage yard facility in Chesapeake. The alleged violations include noncompliance with monitoring and stormwater pollution prevention plan requirements of its permit for discharge of stormwater associated with industrial activity at the facility. The order requires payment of a $5,175 civil penalty and performance of actions specified in a schedule of compliance. Comments are due Oct. 18, 2017. Subject: POLITICO's Morning Transportation, presented by American Public Transportation Association: Trump's budget requests land with a THUD — Winter is coming — (Self-)driving the day

By Stephanie Beasley and Lauren Gardner | 07/28/2017 10:00 AM EDT

With help from Brianna Gurciullo and Tanya Snyder

TRUMP'S BUDGET REQUESTS LAND WITH A THUD: The Senate Appropriations Committee on Thursday approved its fiscal 2018 spending bill for all things transportation. In doing so, Congress dismissed President Donald Trump's requests to get rid of federal funding for Essential Air Service and Amtrak's long-distance routes, and phase out the Capital Investment Grant program. The House's spending bill, which was approved by committee last week, also shoots down those proposals, but it would cut off federal funding for TIGER grants as Trump requested.

No love for Gateway: Unlike the House's legislation, the Senate version doesn't throw a chunk of grant money at projects like the ones that make up the Gateway program. Instead, the Senate Appropriations Committee just says in its report that it "encourages Amtrak to use funding provided to continue the Northeast Corridor Gateway Project."

You would now be free to move up your PFCs: As airports expected, the Senate bill would bump up the Passenger Facility Charge cap from $4.50 to $8.50 at the point of origin. The House's bill contains no such increase, and airlines are sure to loudly oppose the provision.

Got trucks? The Senate committee also adopted amendments offered by Sens. John Hoeven (R-N.D.) and Jeanne Shaheen (D-N.H.) related to exemptions for their states from federal limits on truck weight. "My amendment would not put heavier trucks on New Hampshire's roads," Shaheen said during the markup. "It would simply fix an error that has come to light that the Federal Highway Administration has raised concerns about." Read Hoeven's amendment here and Shaheen's here.

SMH: Senate appropriators said in their bill report that the panel "strongly disagrees with the administration's assertion that providing federal dollars for infrastructure has created, 'an unhealthy dynamic in which state and local governments delay projects in the hope of receiving federal funds.'" The committee quoted from a fact sheet that the White House released about Trump's infrastructure vision. Appropriators also think it's "troubling" that the president's budget "assumes that after fiscal year 2020, Highway Trust Fund outlays will be at levels that are supported with existing tax receipts," which would lead to a $95 billion drop in outlays from fiscal 2021 to 2027. "The administration's approach is dangerously close to support for devolution of federal funding provided by the Highway Trust Fund, an idea the committee strongly opposes," they said.

WINTER IS COMING: Does that mean an infrastructure bill is, too? It's still early (congressional leaders are only just starting to pivot toward priority No. 2 of the Trump

administration's policy agenda, which is of course a tax code overhaul), but a small group of senators were invited to the White House on Thursday to discuss just that. "The ball is starting to roll," Sen. Jim Inhofe gleefully told our Lauren Gardner. GOP Sens. Deb Fischer of Nebraska and Roger Wicker of Mississippi were also on hand at the meeting with DJ Gribbin, one of Trump's infrastructure advisers, and Reed Cordish, assistant to the president for intergovernmental and technology initiatives.

Not quite there yet: Inhofe characterized the confab as a general discussion to assess lawmakers' priorities and compare how they line up with the administration's. While he wouldn't get into the thorny issue of how to cover the $1 trillion price tag the administration is shooting for, Inhofe did say he would be talking with EPW Committee Democrats during the health care "vote-a-rama" Thursday to get their input on a package. "They are just as anxious to get into an infrastructure bill as I am," said Inhofe, who was sporting a snazzy orthopedic sandal Thursday just like your MT co-author. (The Oklahoma Republican, fortunately, didn't break anything. Leave that to me, folks.)

AND THEN THERE'S THE HOUSE FAA BILL: House Transportation Chairman Bill Shuster acknowledged Thursday what we had long expected: his FAA reauthorization bill, H.R. 2997 (115), won't get any floor time until September, if ever. Meanwhile, the Senate's FAA bill is just as much in limbo with its controversial changes to the 1,500-hour co-pilot training rule. An extension is all but assured now, folks.

IT'S FRIDAY: Thanks for tuning in to POLITICO's Morning Transportation, your daily tipsheet on all things trains, planes, automobiles and ports. Lauren and Steph are sailing the MT boat into the weekend, so please send along tips, feedback and lyrics to lgardner@politico.com or @Gardner_LM and sbeasley@politico.com or @Steph_Beasley. (And send birthday wishes to our Tanya Snyder at tsnyder@politico.com or @TSnyderDC while you're at it.)

"So grab your friends/Get the train comin' through/Climb on board/Where you leave's up to you" (h/t APTA's Mantill Williams)

GET LISTENING: Follow MT's playlist on Spotify. What better way to start your day than with tunes (picked by us and readers) that are all about flying, driving, commuting and sailing?

(SELF-)DRIVING THE DAY: The House Energy and Commerce Committee on Thursday unanimously approved Congress' first bill, H.R. 3388 (115) , to deal with driverless cars. In the week since a subcommittee marked up a draft bill that was still full of placeholder text, Democrats and Republicans worked out significant compromises in an act of bipartisanship that, these days, could almost bring you to tears. One of those compromises accepted the Republican cap of 100,000 exemptions per year per manufacturer from old-school safety standards - but layered on some Democrat conditions, like ramping up to 100,000 over the course of several years, with DOT rulemakings in between and public reporting of crash data. (Carmakers don't love that part, by the way.)

States of play: Another big wrinkle the committee ironed out involved the latitude states and cities have to come up with their own rules for self-driving cars. Industry wants one consistent

standard nationwide, but governors and mayors want to be able to weigh in, and they worry that NHTSA is too lax (and too understaffed) to be an effective enforcer. The agreement maintains traditional divisions between state and federal responsibilities but eliminated some ambiguities in order to carve out a little more space for state action. The bill also requires manufacturers to sign off on a vehicle safety assessment that NHTSA designed but left optional in its guidance.

Hurry up and wait: Members and staff worked at breakneck speed over the past couple of weeks to get to a deal - and it's now going to sit on the shelf till September since the House heads out today for a monthlong recess (barring Senate action on the health care bill, but that's a whole 'nother Pro vertical). Meanwhile, Sen. Gary Peters (D-Mich.) hinted strongly this week that the upper chamber's driverless car bill would be released imminently, but we haven't seen it yet. Tanya's got more for Pros.

DELANEY 2020? Longtime infrastructure bank advocate Rep. John Delaney (D-Md.) is contemplating a 2020 presidential run. Former MT scribe Heather Caygle and Kevin Robillard write that Delaney is "seriously considering" a plan where he would skip challenging GOP Gov. Larry Hogan and instead aim straight for the White House. Democrats in the state say they expect he will announce his plans today in a Washington Post op-ed. Delaney has established a reputation among infrastructure groups because of his various proposals to establish public-private partnerships for highway projects, but he is largely unknown outside of those circles. So this could be a very long shot.

** **A message from American Public Transportation Association:** Public transportation is a vital part of an integrated transportation network that drives our economy forward, creating 50,000 jobs for every $1 billion invested. Without public transit, America simply can't move forward. And in order to improve our public transportation systems, states and localities need continued federal investment. Learn more at APTA.com/InvestNow. **

NOT SO FAST: House Democrats said DOT's plan to prioritize consideration of projects that would require minimal federal funding when it hands out $1.5 billion in INFRA (formerly FASTLANE) grants "does not align with the impetus of the program" created by President Barack Obama, POLITICO's Mary Lee reports. Thirteen Democrats, including Transportation Committee ranking member Peter DeFazio (D-Ore.), signed off on a letter sent to Transportation Secretary Elaine Chao urging her against altering the program before the agency distributes fiscal 2017 grants for highway and freight projects.

ALMOST THERE: FMCSA is working faster to bring high-risk carriers into compliance by tackling the cases that need immediate intervention first, but the agency isn't effectively keeping track of compliance review results or making sure that the quality-assurance tools used by its inspectors are actually effective, according to an audit report from DOT's Office of Inspector General. The report was requested by Sen.Dick Durbin (D-Ill.) following a fatal commercial truck crash on an Illinois highway in 2014. FMCSA previously flagged the carrier as high-risk but had not conducted an investigation.

METRO BOARD SHAKE-UP: DOT's two new appointees to the WMATA board of directors made their debut Thursday at the group's last meeting for the summer. Neither David Horner nor

Steve McMillin would opine on whether they believe the federal government should help cover Metro's expenses, a major question that Congress has yet to tackle outside of the $150 million that's been authorized annually for the system's capital expenses through fiscal 2019. But the appointees - both of whom served in the George W. Bush administration - said they're eager to apply the Trump administration's infrastructure principles to their roles, though McMillin noted they don't have specific "marching orders" they're expected to fulfill. "Their policies, our policies, concerning infrastructure are bold, they've innovative," Horner said. "They recognize that the status quo doesn't cut it any longer, and we need to shake things up in order to deliver better service to the riding public."

MT MAILBAG: The Owner-Operator Independent Drivers Association wrote a letter to FMCSA encouraging the agency to work with lawmakers to delay implementation of a congressional mandate for truckers to use electronic logging devices despite the American Trucking Associations urging FMCSA to do the opposite. "Despite being the self-proclaimed 'most authoritative voice in the trucking industry,' ATA by no means represents the hundreds of thousands of crucial owner-operators and independent drivers working within our industry," Todd Spencer, OOIDA's executive vice president, wrote to Deputy FMCSA Administrator Daphne Jefferson. Separately, the group signed on to a letter to Rep. Brian Babin (R-Texas) in support of legislation that would extend the deadline for the ELD mandate.

ARRIVALS AND DEPARTURES: Lauren Huston will be leaving her position as press secretary and digital director at the Senate Commerce Committee to pursue a J.D. at Catholic University. Huston will be replaced by Brianna Manzelli, a former member of the RNC press team.

THE AUTOBAHN:

- "Cuomo on Trump's infrastructure plan: 'Where is it?'" POLITICO.

- "The boycott that wasn't: How United weathered a media firestorm." The New York Times.

- "Robert Moses and the decline of the NYC subway system." Curbed NY.

- "GE to cut 575 jobs at century-old locomotive plant." Bloomberg.

- "Demand overseas keeps Mustang on top despite lower U.S. sales." The Associated Press.

- "TSA gains popular following on Instagram." CBS News.

- "Candidate for DHS job withdraws because of transgender ban." POLITICO.

THE COUNTDOWN: DOT appropriations run out in 64 days. The FAA reauthorization expires in 64 days. Highway and transit policy is up for renewal in 1,160 days.

**** A message from American Public Transportation Association:** Our nation's public transit systems do more than carry Americans to work-they're a critical part of an integrated

transportation network that drives our economy forward. That's why states and localities have partnered with the federal government for more than 35 years to repair and expand services. But President Trump's budget would eliminate funding for vital public transportation projects-and put 800,000 jobs at risk, including more than 500,000 construction-related jobs. Communities can't improve public transportation alone. To protect our future, we need continued federal investment in public transportation. Congress: Fully fund the FAST Act, and include public transportation in any infrastructure bill. Visit APTA.com/InvestNow to learn more. **

August 16, 2017

Today on Climate Beat . . .

. . . we went overseas, noting that a manufacturer group is asking the Department of Energy to issue a moratorium on exporting liquified natural gas (LNG) to countries that do not have a free-trade agreement with the United States, after a court rejected environmentalists' challenge to an LNG export terminal over climate concerns.

Playing the numbers game, one group estimates that a court's vacatur of Obama EPA limits on hydrofluorocarbons (HFCs) could allow more than 3.6 billion metric tons of greenhouse gas emissions by 2050 that would have been avoided under the regulations.

And on the science front, our daily news roundup looked at the "broad power" that the White House has to undercut a major federal climate science report that is required to be published next year.

Trump's UN Diplomat Pledges No Interference in Climate Study

Posted August 08, 2017, 03:15 P.M. ET

By Dean Scott

The Trump administration won't interfere in a broad climate study focusing on how rising sea level, increasing temperatures, and other climate impacts are already affecting the U.S., the president's United Nations ambassador pledged today.

"I haven't seen the report, but I don't see any reason why they wouldn't" back the study, Nikki Haley, U.S. Ambassador to the U.N., said on NBC's "Today" show. Haley pushed back against reports suggesting scientists are worried Trump will torpedo the draft report—known as the Fourth National Climate Assessment and slated for completion in late 2018—given Trump's June withdrawal from the Paris climate pact.

"First of all … just because we pulled out of the Paris accord doesn't mean we don't believe in climate protection," Haley said.

The report, compiled by the U.S. Global Change Research Program, is required under a 1990 law to be provided to Congress. One draft portion of the report, known as the climate science special report, said even "stronger evidence" has emerged of "continuing, rapid, human-caused warming of the global atmosphere and ocean" since the last report in 2014.

Tax Breaks Powered Wind Energy Growth in 2016

Posted August 08, 2017, 02:06 P.M. ET

By Rebecca Kern

Wind energy installations in the U.S. continued to grow in 2016 thanks in part to the production tax credit that went into effect in late 2015, the Energy Department said in reports out today.

"A combination of federal subsidies, state mandates, and technological advancements continue to help drive new wind capacity additions," Daniel Simmons, acting assistant secretary at the Energy Department's Office of Energy Efficiency and Renewable Energy, said in a Aug. 8 statement.

The Energy Department's 2016 Wind Technologies Market Report found the U.S. wind industry added 8,203 megawatts of new wind power capacity, or 27 percent of total capacity additions, in 2016.

This continues the growth of new installations that included 8,598 megawatts of new wind capacity in 2015, which made up even more of total U.S. capacity additions—40 percent—in that year.

Congress passed the production tax credit in December 2015, encouraging new wind installation through phased-down tax credits that last until 2019. The tax credits have helped spur new wind installations, with 102,000 wind energy jobs in 2016, up 32 percent from 2015, according to the report.

The report notes, however, that forecasts from 2021-2025 show a downturn in expected new wind energy capacity installations as the production tax credit phases out.

The Energy Department also released offshore wind and distributed wind market reports documenting growth in these areas as well.

Keystone XL's Path Up for Grabs as Nebraska Commission Weighs In

Posted August 08, 2017, 11:40 A.M. ET

By Andrew Harris

The future of TransCanada Corp.'s Keystone XL pipeline could hinge on whether a Nebraska commission believes the project is in the public's interest or is a private land grab as property owners claim.

More than 90 percent of TransCanada's preferred 270-mile route through the state would cut across privately owned land, as would an alternate route, company project manager Paul Fuhrer testified Aug. 7 during the first day of a hearing in Lincoln, Neb.

To gain approval for one of its proposed paths, Keystone lawyers will need to convince the Public Service Commission--made up of four Republicans and one Democrat--and overcome vehement opposition from dozens of landowners, environmental conservation groups, and Native American tribes.

The elected commission, created under the state's constitution, began hearing testimony in what is scheduled to be a week-long hearing. Much of the Aug. 7 hearing was dominated by testimony from company executives on the pipeline's maintenance details, including responsibility for cleanup, restoration, and removal once the conduit reaches its life expectancy.

A ruling from the panel is due no later than Nov. 23. Whether the pipeline gets built, however, may ultimately rest upon what the state's seven-member Supreme Court decides, as the loser is likely to appeal.

"The pipeline is not in the public interest," activist Jane Kleeb, president of the environmental advocacy group Bold Alliance who was elected last year as the state's Democratic Party chair, said in an interview prior to the Aug. 7 hearing. "This will be a private, foreign corporation that would be using eminent domain for private gain."

$8 Billion Project

Keystone XL has been in the planning stages for nearly 10 years. The conduit would carry heavy crude from Canada's oil sands region in Alberta to a terminal more than 1,100 miles away in Steele City, Neb., where it would connect with an already existing network leading to Gulf Coast refineries.

Labor unions are backing the $8 billion project for its promise of jobs.

TransCanada and President Donald Trump have promoted the project as one that will provide employment and boost the state's economy. Nebraska will benefit from as many as 4,500 jobs during the two-year construction period, and $12 million in property tax revenues, according to the Calgary-based company.

Environmental groups sued over its original path through the state because it would have traversed Nebraska's environmentally sensitive Sand Hills region. That route was soon abandoned for one charted by the state's now-former governor, Dave Heineman, and TransCanada, provoking lawsuits contending only the commission could approve its path.

While the pipeline company ultimately agreed to apply to the Public Service Commission, the Obama administration rejected TransCanada's request for permission to cross the U.S.-Canada border, effectively killing the project until Trump revived it earlier this year.

Despite the delays, during which crude oil prices have tumbled, TransCanada maintains that the pipeline still has commercial support.

Eminent Domain

Some landowners who fought the previous pipeline battle have returned for this one. The commission allowed 94 landowners to intervene in the hearing without limitations, ruling in March that they "have real property interests that will be directly impacted" by the pipeline's route.

Kleeb, alongside groups such as the Sierra Club and 350.org, have been working with landowners, highlighting the issue of eminent domain. They argue that it's unnecessary and unfair to take private property for the pipeline using eminent domain, particularly given certain liability provisions the company is putting into landowner easements. TransCanada says 91 percent of landowners in the state have agreed to allow the project on their land.

David Domina, a lawyer for landowners, questioned TransCanada executive Tony Palmer during Monday's hearing about the pipeline's complex corporate ownership structure. Palmer said he's the president of an intermediate entity called TransCanada Keystone General Partner LLC, which holds less than 1 percent of the company seeking the permit. Domina also questioned Palmer on who bears responsibility for maintenance or removal should the conduit become obsolete.

TransCanada still hasn't made a final decision on whether to push ahead with the Keystone XL project. Domina asked Palmer whether that meant the company would use the commission's ruling to "make better investment decisions?"

"No sir," Palmer replied. Asked if selling the route was an option if the commission approves the application but TransCanada scraps the project, he said, "I don't think that I could fulsomely respond with a yes or no answer."

Warren Buffett Likes Solar, But Not the Price Tag

Posted August 08, 2017, 9:23 A.M. ET

By Brian Eckhouse and Noah Buhayar

Warren Buffett has called global warming a "major problem" and put his company's money where his mouth is, spending billions to develop solar and wind power, yet he's no hero to some renewable energy proponents.

Their beef: They say the utility arm of Berkshire Hathaway Inc., his conglomerate, has been trying to undermine an almost 40-year-old law intended in part to promote the growth of cleaner energy. Berkshire, they say, is effectively stifling solar projects to protect utilities it owns, such as PacifiCorp, based in Portland, Ore.

"I'm sympathetic to reasons that the law is difficult for utilities, but PacifiCorp speaks out of both sides of its mouth," says David Brown, co-founder of solar developer Obsidian Renewables LLC in Lake Oswego, Ore.

Berkshire Hathaway Energy says it's not so simple. The company, which owns several utilities using conventional and renewable power sources, is the second-largest owner of clean-energy assets in the U.S. But along with other utilities, it argues that the law is outdated, often raises costs for its customers, and forces utilities to buy more electricity than needed.

The law is called the Public Utility Regulatory Policies Act, or PURPA. Congress enacted it after the 1970s OPEC oil embargo to draw new players into the utility-dominated business of generating power. It required some utilities to buy power from certain power providers if doing so was less expensive than building new plants themselves. The idea was to boost the then-emerging natural gas industry—and perhaps spur renewables including solar.

Prices Locked In

The act worked—too well, from the standpoint of the utilities. As solar panel prices plunged in recent years, developers deluged utilities with projects to sell them power. Utilities complain the law is producing a surplus of power. Moreover, utilities say the contracts with developers, whose terms are generally set by state utilities regulators, often lock them in for years at high prices that don't necessarily reflect the current market.

"Why should our customers be saddled with billions and billions of dollars of above-market prices?" asks Kathy Steckelberg, vice president for government relations at the Edison Electric Institute, which represents U.S. investor-owned electric companies.

"The fact that renewables are increasing in our market we don't see as a problem," Steckelberg says. Utilities would rather build or buy solar and wind farms themselves so they can pass on the development cost to ratepayers, rather than pay outsiders for the power. Yet under PURPA, they often can't refuse an eligible deal.

Solar developers have proposed plans to generate about 3.5 gigawatts of power in Berkshire Hathaway's territories, the second most among regulated utilities in the U.S., according to Bloomberg New Energy Finance.

A spokeswoman for Berkshire's utilities unit wrote in a statement that PURPA "is no longer the key driver for renewable energy development." She cited rising corporate demand for renewables, falling costs, and government initiatives, such as state and federal tax incentives.

Utility Seeks Price Cut

In Wyoming, the company's Rocky Mountain Power, a division of PacifiCorp, is seeking a 40 percent cut to what it must pay small PURPA-eligible projects. PacifiCorp, which serves 1.8 million customers throughout the western U.S., has estimated the long-term contracts will cost consumers $1.1 billion above market prices in the 10 years through 2025.

In Oregon, PacifiCorp asked regulators to reduce the size of any renewable deal it's forced to take, as well as the length of the contract during which it must buy power. The utility won a partial victory last year: Regulators said certain facilities of up to 3 megawatts would qualify, down from a threshold of 10 megawatts, but left the required contract term at 20 years.

"There's no project that I can imagine that I would do for PacifiCorp," says Brown, whose Obsidian has developed multiple solar farms that provide power to the utility. "The prices are too low, and they say they don't have any interest or need for renewable energy."

States including Idaho and Montana have sided with the utilities by reducing the length of power-purchase contracts. In Idaho's case, the term went to 2 years from 20, according to EnerKnol, a research firm. Contracts of such short duration make it almost impossible to get financing for new projects, solar developers say.

Long-term contracts are important for renewable providers because lenders prefer companies that can project a steady cash flow for many years.

"You cannot raise capital against a two-year contract," says Matthew McGovern, chief executive officer of Santa Monica, Calif.-based Cypress Creek Renewables LLC, one of the most active PURPA developers. "Utilities are now saying, 'Well, why not?' They know the answer."

Utilities may have a friend in President Donald Trump, who's said climate change is a hoax and who's keen to tip the scale from renewables to coal and other fossil fuels. Trump is in a position to reshape the Federal Energy Regulatory Commission, an agency with some authority over PURPA.

Then there's Congress, where some members are eager to strip away much of PURPA. Berkshire Hathaway Energy has proposed altering the law by, among other things, making it so utilities wouldn't be obligated to buy power from PURPA projects when states determine the extra electricity isn't needed. Its Rocky Mountain Power unit recently announced a plan to invest an additional $3.5 billion in wind generation and transmission lines to bring the energy to customers.

Solar companies are resisting the changes. Many utilities are saying, " 'we need to take this back,' " says Adam Foodman, chief operating officer of solar developer O2 Energies Inc. "But that's not in the interest of the public."

Gas Sellers Sidestep China State Giants to Ride Demand Surge

Posted August 08, 2017, 10:08 A.M. ET

By Bloomberg News

China's independent energy firms are seeking to circumvent its state-backed giants as they cash in on swelling natural gas use, buoyed by President Xi Jinping's drive for cleaner fuels and nimbler companies.

New import facilities developed by firms including Guanghui Energy Co. and ENN Group offer direct access to cheap liquefied natural gas and cut their reliance on supply and infrastructure controlled by the the country's national oil companies. That may help new players tap China's booming gas demand, up 15 percent in the first half of the year.

"The key thing about having your own terminal is that you can take advantage of potentially lower pricing in the market," said Neil Beveridge, an analyst at Sanford C. Bernstein & Co. in Hong Kong. "Also, it's very difficult to get supply through the infrastructure of the Chinese oil majors because the access rules and regulations are not terribly transparent and not terribly well enforced."

Smaller gas distributors and importers have found an opening as Xi's government seeks alternatives to coal and encourages private competition in the energy sector. They're poised to follow a similar trend in the oil industry, where independent refiners known as "teapots" have been allowed greater freedom to import crude, helping push China ahead of the U.S. this year as the world's biggest importer.

Guanghuai Energy last month received the second LNG cargo at its Qidong terminal, about 100 kilometers (62 miles) north of Shanghai. At least three more terminals are under construction or proposed including a port by ENN Group that's scheduled to start next year. Guangzhou Development Group Inc. has proposed a new import terminal, as has China Huadian Corp., one of the nation's biggest power generators, according to Bloomberg New Energy Finance.

New private ports enhance the bargaining power for distributors, which will lower downstream sales prices and boost China's consumption, ENN Energy Holdings Ltd., the listed unit of ENN Group, said in an emailed response to questions. It declined to comment specifically on the Zhoushan LNG terminal owned by its parent, which didn't respond to a separate request for comment.

Xinjiang-based Guanghui, which was one of the first non-state companies to receive a license to import crude, plans to allow third parties to deliver and store LNG at the Qidong site, chief engineer Xue Wenting said last month. The terminal's annual capacity will be expanded to 3 million metric tons by 2019 from 650,000 tons now, he said.

Jovo Energy Co., which was the first private Chinese company to begin importing LNG, began operating its Dongguan facility in Guangdong in 2012. The company also stores and sells liquefied petroleum gas and has an oil and chemicals business, according to its website.

China, which is forecast to more than double LNG purchases by 2022, has more than a dozen import terminals owned by its three state energy giants, which buy most of their cargoes on long-term contracts. But given the current global gas glut, new buyers can pick up cheaper shipments on the spot market, where analysts at SCI International estimate costs are about 50 percent less than average rates under the country's existing term contracts.

"Those companies can get cheaper LNG prices from the spot market on a more flexible basis and they can meet demand from their widespread distribution networks," said Maggie Kuang, an analyst with BNEF in Singapore.

China's LNG demand will expand by 5 million to 6 million tons annually over the next few years and private investors may account for about 20 percent of that growth, according to Michal Meidan, an analyst with Energy Aspects Ltd. in London. Bernstein's Beveridge estimates that share to be less than 10 percent of the 60 million tons of LNG he forecasts the country will be importing annually by the end of the decade.

China's national oil companies account for about 92 percent of the country's long-term contracts and "still firmly dominate the LNG import market," said BNEF analyst Nannan Kou. While Guanghui Energy has been buying spot LNG, it's seeking to sign long-term contracts with suppliers, including Malaysia's Petroliam Nasional Bhd, chief engineer Xue said.

The Chinese government is encouraging private capital to help construct LNG receiving facilities and pipelines, according to guidelines published last month by the country's National Development and Reform Commission. China's top economic planner also said LNG import capacity and natural gas pipeline length will more than double in the 10 years to 2025.

Opening Up

"This is part of the government's efforts to open up the sector to non-state actors and increase efficiencies through greater competition," said Meidan at Energy Aspects.

China National Offshore Oil Corp. and China National Petroleum Corp., the country's first and second-largest LNG importers, didn't respond to calls seeking comment. A spokesman for China Petrochemical Corp., known as Sinopec Group, said Monday he couldn't immediately respond to questions.

LNG imports in June hit the highest on record for that month, in line with the country's booming demand, offering a boost for gas distributors. China Gas Holdings Ltd. has gained 85 percent this year while ENN Energy has climbed 69 percent. That compares with a 27 percent gain for the benchmark Hong Kong Hang Seng Index.

The Chinese government has set a goal of getting as much as 10 percent of its energy from gas by 2020 and 15 percent by 2030, up from 6 percent in 2015. To meet these goals, demand will grow by an average of 15 percent annually between 2016 and 2020, according to Macquarie Group Ltd.

Enough Supply?

The country's natural gas production, which is dominated by CNPC and Sinopec Group, rose 8 percent in the first half of 2017 compared to the same period a year ago. Meanwhile, imports have jumped 21 percent in the first seven months of the year, according to data released Tuesday.

Fast-growing supply may be needed, as Sinopec Group has already flagged a possible "big" increase in gas demand this coming winter compared to last year, particularly in the country's north, Shanghai Securities News reported Tuesday, citing a company meeting.

Even after independent gas distributors build LNG facilities, they're often still reliant on pipeline

networks operated by the state-backed giants, according to Bernstein's Beveridge.

"It's still all about access with the majors" for an independent distributor, he said. "There are still more regulatory rules that are needed, so these companies are very much pioneers."

China Importing Less Coal Amid New Import Rules

Posted August 08, 2017, 8:38 A.M. ET

By Bloomberg News

China's coal imports in July declined to the lowest in more than a year as a new import rule may have delayed some shipments.

Imports by the world's largest energy user dropped 13 percent from the previous month to the equivalent of 627,742 metric tons a day, according to Bloomberg calculations based on data from the General Administration of Customs on Aug. 8. That's the least since May 2016.

The nation started to ban coal shipments from July 1 at ports that were set up through approvals by provincial authorities. Some imports have been diverted to enter China through ports approved under the authority of the State Council, which may have created delays, according to Deng Shun, an analyst with GF Futures Co.

"Coal demand was very robust last month, but the shipment volumes reported by customs could have been affected by the new import rule," Deng said before the data were released.

On a monthly basis, China's coal imports were 19.46 million tons in July, according to the data released Aug. 8. They totaled 152.71 million tons during the first seven months of the year, up 18 percent from the same period a year earlier.

Imports also declined as China's coal production rose in June to the highest since November 2015 after the government lifted restrictions on output to boost supplies amid higher demand.

Egypt Moves to End State Monopoly of Natural Gas Market

Posted August 08, 2017, 8:52 A.M. ET

By Salma El Wardany, Mirette Magdy and Tamim Elyan

Egypt is opening the door to private participation in its natural gas sector, moving to end the state's monopoly as it pushes ahead with reforms meant to encourage investment and revive the economy.

A new law signed by President Abdel-Fattah El-Sisi sets up a natural gas regulatory authority charged with licensing and devising a plan to open the gas market to competition. It also allows for the eventual import of natural gas by private companies, a move that could help end supply

shortages that have hampered businesses.

The measure, which had been more than two years in the making, is the government's latest push to spur investment in an economy that has struggled to revive since the 2011 uprising against President Hosni Mubarak. Over the past year, authorities have instituted sweeping reforms, backed by the International Monetary Fund, that have included floating the currency, sharp subsidy cuts and enacting legislation aimed at drawing in sorely needed foreign money.

The new legislation also advances Egypt's objective to achieve energy self-sufficiency by 2019, largely through eventual output from the giant Zohr natural gas field.

The law would allow the private sector to directly ship, transport, store, market and trade natural gas using the pipeline and network infrastructure. Its executive regulations are to be issued within six months of the legislation's enactment, according to the Official Gazette.

"This law effectively relieves the government from the burden of providing for the rapidly growing natural-gas consumption and turns it into a regulator," said Radwa El-Swaify, head of research at Cairo-based Pharos Holding. "It's all part of the same direction of having freer markets in Egypt."

In July, the government said it will stop subsidizing bread flour and raised household electricity prices by as much as 42 percent, just a week after it increased fuel prices.

The move to liberalize the gas market will bring in greater transparency and flexibility, said Haitham Abdul Moneim, investor relations manager at Egypt Kuwait Holding, which partially owns and manages fertilizer producer AlexFert. "This will give us more options for sources of gas and maybe better prices," he said.

Driving the Day

Good Wednesday morning. BREAKING: "Scott Brown: US ambassador to New Zealand investigated over inappropriate comments: Complaints against Brown, who was Donald Trump's first ambassadorial appointment after coming into office, surfaced after a trip to Samoa," by The Guardian's Eleanor Ainge Roy in Dunedin, New Zealand: "Brown told New Zealand media on Wednesday he wanted to address 'innuendo and rumour' about his visit to Samoa in July to celebrate 50 years of the peace corps in the country.

"Brown -- speaking with his wife, Gail Huff, by his side -- confirmed he was the subject of an official administration inquiry by the US state department, which sent investigators to Wellington to look into what took place on the trip. Brown said the official complaints related to comments he had made at a party in the Samoan capital, Apia, where he told attendees they looked 'beautiful' and could make hundreds of dollars working in the hospitality industry in the US. Brown and Huff said they had 'no idea' the comments would be regarded as offensive.

"'I was told by my people that you're not Scott Brown from New Hampshire any more, you're an ambassador, and you have to be culturally aware of different cultures and sensitivities,' Brown said. 'We are in a different culture: even though we all speak English, sometimes when we say one thing it means the complete different thing.'" http://bit.ly/2yLFQ3P

BACK IN THE U.S., THE 30K-FOOT VIEW, from WaPo's Bob Costa, Phil Rucker and Sean Sullivan: "A pair of Republican senators sounded an alarm Tuesday about President Trump's fitness for office and warned that his actions were degrading and dangerous to the country - an extraordinary breach that threatens his legislative agenda

and further escalates the civil war tearing apart the Republican Party." http://wapo.st/2zO2rwC

AN AMAZING QUOTE IN AN AMAZING MOMENT: Sen. Jeff Flake's (R-Ariz.) floor speech yesterday afternoon in the Capitol grabbed all the attention (***video:*** http://bit.ly/2yIzIvB ... ***transcript:*** http://bit.ly/2h6mEpR). But this quote from the Arizona Republican, in many ways, is even more stunning.

-- CLIP AND SAVE: "[Flake] told The Arizona Republic ahead of his announcement that he had become convinced 'there may not be a place for a Republican like me in the current Republican climate or the current Republican Party.' ... 'Here's the bottom line: The path that I would have to travel to get the Republican nomination is a path I'm not willing to take, and that I can't in good conscience take,' ... 'It would require me to believe in positions I don't hold on such issues as trade and immigration, and it would require me to condone behavior that I cannot condone.'" http://bit.ly/2gGP8cR

FLAKE is saying the political environment is so toxic that it is unconscionable what he would have to do to win. That's the first time we've heard anything like that.

SEUNG MIN KIM and **BURGESS EVERETT** interviewed Flake last week, and asked him about rumors he would resign. "Well, if I weren't planning to run I think I wouldn't be having fundraisers every day and making calls. I had Marco Rubio in last week, we have Condi Rice in Thursday, coming into town. Doesn't sound like a campaign winding down."

-- SPOTTED: FLAKE walking into Joe's Seafood, a Washington hotspot near the White House, last night. He headed directly upstairs.

FLAKE WAPO OP-ED, "Enough": "There is a sickness in our system -- and it is contagious. How many more disgraceful public feuds with Gold Star families can we witness in silence before we ourselves are disgraced? How many more times will we see moral ambiguity in the face of shocking bigotry and shrug it off? How many more childish insults do we need to see hurled at a hostile foreign power before we acknowledge the senseless danger of it? How much more damage to our democracy and to the institutions of American liberty do we need to witness in silence before we count ourselves as complicit in that damage?" http://wapo.st/2yOKAYB

THE BIG PICTURE -- "Trump purges his critics, but the cost could be steep," by Alex Isenstadt: "President Donald Trump is squeezing out his enemies in the Republican Party - diminishing the power of the GOP establishment and reshaping his party in his own image. With the looming exits of Arizona Sen. Jeff Flake and Tennessee Sen. Bob Corker, come 2019 Trump will have rid himself of his two most outspoken Republican detractors. What happens in the meantime -- Corker and Flake demonstrated Tuesday they are fully emboldened now to take on the president without fear of consequences - could determine the success or failure of the GOP-controlled Congress through the 2018 midterms.

"But in the short-term, there is no question: Trump, and his former strategist and now-Breitbart chief Steve Bannon, are winning. The casualty list of Trump critics is bleeding over to the House, where a swelling group of anti-Trump lawmakers from the mainstream wing of the GOP -- including Washington Rep. Dave Reichert, Pennsylvania Rep. Charlie Dent, and Florida Rep. Ileana Ros-Lehtinen -- are ditching their reelection plans. While the circumstances of each departure are unique, the end result is the same. With other establishment-aligned members of Congress eyeing the exits, the president's backers are envisioning 2018 as an opportunity for Trump to steamroll the party establishment, much as he did in 2016." http://politi.co/2yQOy2M

THE LEGISLATIVE AND POLITICAL REALITIES ...

-- INDEPENDENT-MINDED CONSERVATIVES ARE OUT. Sens. Bob Corker (R-Tenn.) and Jeff Flake (R-Ariz.) are retiring. Here's a dose of reality: these two men do not have to worry about immediate political and electoral considerations. That could be very dangerous for Trump.

-- THE BIG QUESTION SENATE REPUBLICAN LEADERSHIP IS ASKING: WILL THE MIC DROPPING SPREAD? What will other Republican senators take away from Flake's mic drop moment? Will this be the start of more senators willing to break with Trump and potentially stymie the entire GOP agenda? Or, will it be business as usual as Republicans concerned with their own self-preservation try to cobble together legislative victories on taxes and DREAMers, while keeping government open before facing the electorate in 2018.

A SIGN OF HOW MUCH THINGS HAVE CHANGED: Flake has been among the most conservative Republicans in Congress for years. He votes with the president the vast majority of the time. He sailed into the Senate in 2012, clearing his primary with 69 percent of the vote, and winning the general election by three points. Most expected him to go unchallenged by Republicans for years. But people involved in the race tell us Flake's support completely disappeared after he released his book, "Conscience of a Conservative: A Rejection of Destructive Politics and a Return to Principle." Republicans say they and Flake, himself, knew he was going to lose.

WHAT'S NEXT -- THE POLITICS: Republican operatives quickly pivoted to figuring out who can beat Kelli Ward, Steve Bannon's favored candidate, in a primary. Ward has been branded an unhinged conspiracy theorist by many Republicans. Top prospects include Arizona Rep. Martha McSally; former Arizona Rep. Matt Salmon, who retired from politics in 2016; and state treasurer Jeff DeWit, who has said he won't run for reelection in 2018. The NRSC will lead recruitment, but GOP outside groups, including Senate Leadership Fund has already begun touching base with benefactors in Arizona to take their temperature on possible Flake alternatives.

-- FROM THE ARIZONA REPUBLIC: "Other names being talked up as possible contenders included former U.S. Rep. Matt Salmon, R-Ariz.; former U.S. Rep. John

Shadegg, R-Ariz.; Jay Heiler, a member of the Arizona Board of Regents; former Arizona Republican Party Chairman Robert Graham; and Maricopa County Attorney Bill Montgomery." http://bit.ly/2y34joe

****** **A message from Chevron:** Advanced technology is helping us find safer ways to deliver energy. We're piloting a program that uses drones to monitor tanks and pipelines. Watch the video: http://politi.co/2zKhpnk ******

A TRULY REMARKABLE WORLD -- IN JUST ONE DAY, Sen. Bob Corker (R-Tenn.), the chairman of the Foreign Relations Committee, told CNN's Manu Raju (a POLITICO alum) the president has "great difficulty with the truth," and "world leaders are very aware that much of what he says is untrue." He said he was not a role model for children, he would not support him in the next election and he is "debasing" the nation. And that wasn't even the most momentous event of the day. (Big kudos to Manu, who showed how he's one of the best reporters in Washington.)

SPEAKING OF TRUMP -- NEW POLITICO/MORNING CONSULT POLL: "Poll: Voters see Trump as reckless, not honest," by Steven Shepard: "Reckless. Thin-skinned. Not honest. Not compassionate. Not stable. Those aren't just the extraordinary, harsh judgments of President Donald Trump by two retiring, Republican senators on Tuesday - they are also shared by majorities of voters in a new POLITICO/Morning Consult poll. Voters' negative views of Trump's character aren't new. They date back to last year's presidential campaign. And Trump's overall approval rating in the new survey - 42 percent approve, 53 percent disapprove - is roughly unchanged over the past few months.

"More than three-quarters of Republican voters, 77 percent, approve of the job Trump is doing as president. Indeed, on most of the character questions in this week's POLITICO/Morning Consult poll, majorities of GOP voters side with Trump, even as the broader pool of voters takes a more critical view. The new survey was conducted before Sens. Bob Corker (R-Tenn.) and Jeff Flake (R-Ariz.) sharply criticized Trump on Tuesday for his persona conduct as president.

"Still, after a week in which Trump has sparred with the wife and family of an Army sergeant killed in action and been denounced by two high-profile senators in his own party, Trump's negative scores on these questions raise questions about his ability to overcome voter perceptions and turn his presidency around." http://politi.co/2zOLOAX

SCOOP -- THE WHITE HOUSE has asked agencies to begin assessing their long-term hurricane rebuilding and recovery needs, and expects Congress to pass a **THIRD** disaster spending bill before the year is out. The price tag: in the tens of billions, the administration says. Remember: the Senate cleared a $36.5 billion disaster spending bill yesterday! Here's the catch: this time, OMB wants Congress to provide spending offsets as part of the disaster relief bill -- a sign that spending billions of dollars constantly is getting expensive, and perhaps politically exhausting. That's going to make this next phase of the process a lot harder.

BREAKING LATE LAST NIGHT -- "Wall Street wins big as Senate votes to roll back regulation allowing consumers to sue their banks," by WaPo's Renae Merle: "Vice President Pence cast a tie-breaking vote late Tuesday to block new regulations allowing U.S. consumers to sue their banks, handing Wall Street and other big financial institutions their biggest victory since President Trump's election." http://wapo.st/2xlyaUg

TRUMP is traveling to Dallas today and will be briefed on hurricane recovery efforts. He will also participate in an RNC roundtable and speak at a fundraiser. **IVANKA TRUMP** will be on Capitol Hill meeting with Senate Republicans and hold an event to push the child tax credit as part of tax reform.

AP BULLETIN: "Sheriff's spokesman: 2 killed on Grambling State campus": "A sheriff's spokesman says a student and his friend were fatally shot at Grambling State University [in northern Louisiana] after an altercation that began in a dorm room, and the shooter fled the scene." http://bit.ly/2i2OUt7

DACA DEAL, PART II? -- "Paul Ryan Tells Conservatives DACA Will Be Part Of Spending Deal," by HuffPo's Matt Fuller and Elise Foley: "House Speaker Paul Ryan (R-Wis.) privately conceded to a group of House conservatives on Tuesday that he plans to include a legislative fix for undocumented immigrants who came to the United States as children in a year-end spending deal.

"Asked if he envisioned a December omnibus spending bill including Cost Sharing Reductions for Obamacare or some sort of solution for the Deferred Action for Childhood Arrivals (DACA) program, Ryan told leaders of the Republican Study Committee that he didn't believe CSR payments would be part of the deal with Democrats, but that DACA would. 'He did talk about the fact that that would be good if we could get ahead of that as opposed to being reactionary,' RSC Chairman Mark Walker (R-N.C.) told HuffPost Tuesday night." http://bit.ly/2yI9l8Y

-- REPUBLICANS have signaled that they would like to find a way forward on DACA before the end of the year. Multiple Democrats, including vocal immigration reform proponent Rep. Luis Gutierrez (D-Ill.), told us Democrats should withhold their votes on a spending bill if it doesn't include DREAMers legislation. "It's not like we want to close the government, actually we want to keep it open," Gutierrez told us. Calling it a defining moment for Democrats, Gutierrez said Democrats shouldn't "throw the DREAMers under the bus a second time when it is clear that the only way to pass that budget is with Democrats."

BIG NEWS -- "Clinton campaign, DNC paid for research that led to Russia dossier," by WaPo's Adam Entous, Devlin Barrett and Ros Helderman: "The Hillary Clinton campaign and the [DNC] helped fund research that resulted in a now-famous dossier containing allegations about President Trump's connections to Russia and possible coordination between his campaign and the Kremlin, people familiar with the

matter said. Marc E. Elias, a lawyer representing the Clinton campaign and the DNC, retained Fusion GPS, a Washington firm, to conduct the research. After that, Fusion GPS hired dossier author Christopher Steele ... Elias and his law firm, Perkins Coie, retained the company in April 2016 on behalf of the Clinton campaign and the DNC. Before that agreement, Fusion GPS's research into Trump was funded by an unknown Republican client during the GOP primary." http://wapo.st/2yMSkJY

-- @maggieNYT: "Folks involved in funding this lied about it, and with sanctimony, for a year".

ON THE WORLD STAGE -- "Under Trump plan, refugees from 11 countries face additional U.S. barriers," by Reuters' Yeganeh Torbati and Mica Rosenberg: "The Trump administration will temporarily delay processing of most refugees from 11 countries identified as high-risk, while resuming refugee admissions for other countries, government officials said on Tuesday. Most of the affected countries are in the Middle East and Africa, according to documents seen by Reuters. The administration also will place on hold a program that allows for family reunification for some refugees resettled in the United States, according to a Trump administration memo seen by Reuters and sent to Congress on Tuesday. The resettling of so-called following-to-join refugees will resume, according to the memo, once screening 'enhancements have been implemented.'" http://reut.rs/2gHUK6G

W.H. REVOLVING DOOR -- "Priebus says he will rejoin his Wisconsin law firm," by Josh Dawsey: "Former White House chief of staff Reince Priebus is rejoining his former law firm and signing with the Washington Speakers Bureau, he told POLITICO Tuesday. Priebus ... will return to Wisconsin-based Michael Best and Friedrich LLP as president and chief strategist. He worked there before leaving for the RNC. He will lead the firm's government affairs group, consulting for corporate clients, but Priebus said he will not do any lobbying work and doesn't plan to register as a lobbyist. Priebus also said he won't work for foreign governments.

"He says he sees his role as helping clients understand how to make progress with Trump, on Capitol Hill and in government agencies - all people and places he was intimately intertwined with until this summer. ... Additionally, Priebus will give paid speeches on Trump, Capitol Hill and politics in Washington ahead of the 2018 election - and already has events lined up in New York and London, after traveling to South Korea last week for a dinner. He declined to say what his speaking fee is." http://politi.co/2lfN0Kr

2018 WATCH -- "Moore forms fundraising pact with national GOP," by Gabe Debenedetti: "Roy Moore has campaigned as Mr. Anti-Establishment. Now, he and the establishment are starting to link up. The Alabama Republican's Senate campaign on Tuesday signed a joint fundraising agreement with the [RNC], [NRSC] and the Alabama Republican Party, according to a filing with the Federal Election Commission. ... Moore has pledged to oppose Senate Majority Leader Mitch McConnell, among other things. But the fundraising pact is a formal behind-the-scenes step by the establishment to

support Moore, after unsuccessfully spending millions to defeat him in Alabama's primary." http://politi.co/2gCrDOx

IMPORTANT READING -- "Senior military officials sanctioned for more than 500 cases of serious misconduct," by USA Today's Tom Vanden Brook: "Since 2013, military investigators have documented at least 500 cases of serious misconduct among its generals, admirals and senior civilians, almost half of those instances involving personal or ethical lapses, a USA TODAY investigation has found.

"Many cases involve sex scandals, including a promiscuous Army general who led a swinging lifestyle, another who lived rent-free in the home of a defense contractor after his affair fell apart and another who is under investigation for sending steamy Facebook messages to the wife of an enlisted soldier on his post. Yet despite the widespread abuses, the Pentagon does no trend analysis to determine whether the problem is worsening, nor does it regularly announce punishments for generals and admirals - all public figures, USA TODAY has found. Senior officers found to have been involved in adulterous relationships, a violation of the military's code of justice, have been reassigned with no public notice and allowed to retire quietly, in some cases with full honors." https://usat.ly/2z75lzH

THE JUICE ...

-- JEREMY ADLER, formerly of America Rising Squared and Marco Rubio's presidential campaign, is joining Speaker Paul Ryan's political operation as communications director. He starts Nov. 1.

-- FIRST IN PLAYBOOK: AL FRANKEN and **SARAH SILVERMAN** discuss the 2016 DNC Convention and introduce the next episode of her show, "I Love You, America." http://bit.ly/2lemH7H

--LATE NIGHT BEST -- STEPHEN COLBERT interviewed **JAKE TAPPER** last night -- Tapper told him: "Sen. Jeff Flake today said that there's going to be a reckoning. People are going to look back at this year and say what were you doing? It's not McCarthyism, but it's something else, all the indecency and all these lies. What did you do during that time? It's something I think about all the time as an interviewer and as a broadcaster. It's important. There aren't two sides when it comes to the truth. There's one side: the truth." ***10-min. video*** http://bit.ly/2yJn13S

BEN WHITE talks to **SENATE MINORITY LEADER CHUCK SCHUMER** in the latest "POLITICO Money" podcast: **"Schumer takes hard line with Trump on taxes":** "Chuck Schumer has shown he's willing to cut deals with President Donald Trump. But the Senate minority leader says Democrats will take a hard-line approach with the White House on taxes - and everything else -- until Trump's GOP-only approach hits a dead end.

"'There is a path forward, but only after this tax bill fails,' Schumer says in a new 'POLITICO Money' podcast to be released Wednesday. 'The hard right, which cares so much about just reducing taxes, has a stranglehold on the Republican Party right now. And I don't think they'll give it up unless this bill fails.' While Schumer has an odd-couple friendship of sorts with Trump, the Senate Democratic leader says it's a purely transactional relationship. 'I think he likes to talk to me because I'm a New Yorker,' Schumer said in the interview in his Manhattan office. 'We're both direct. We're both blunt. I tell him what I think.'" http://politi.co/2gHBAxU ... ***Listen to the full podcast*** http://bit.ly/2zNUGqF

WSJ: "Former Trump Campaign Chairman Paul Manafort Faces Another Money-Laundering Probe," by Erica Orden and Nicole Hong: "The Manhattan U.S. attorney's office is pursuing an investigation into possible money laundering by Paul Manafort, said three people familiar with the matter, adding to the federal and state probes concerning the former Trump campaign chairman. The investigation by the U.S. attorney for the Southern District of New York is being conducted in collaboration with a probe by special counsel Robert Mueller into Mr. Manafort and possible money laundering." http://on.wsj.com/2z56O9w

IVANKA ABROAD - "Ivanka Trump Japan-bound for speech," by CNN's Betsy Klein: "Ivanka Trump is heading to Japan next week, where she will deliver a speech at the invitation of Japanese Prime Minister Shinzo Abe. On Friday, November 3, the first daughter and adviser to President Donald Trump will discuss women's participation in the economy and women's entrepreneurship at the World Assembly for Women 2017, according to a White House official. The annual conference is hosted by the government of Japan and is part of Abe's efforts to create a 'society where women shine,' according to the Japanese Ministry of Foreign Affairs' website." http://cnn.it/2yRtY2t

BEYOND THE BELTWAY -- "Sought by U.S. Marshals, Rivera pops up in Fla. Capitol, chats with legislators," by Marc Caputo and Matt Dixon in Tallahassee: "The U.S. Marshals say they can't find former Miami Rep. David Rivera to serve him with a Federal Election Commission lawsuit tied to a campaign finance conspiracy that led to two criminal convictions. But all the feds have to do is be in the state Capitol on Tuesday, where the scandal-plagued Republican was admitted to the Florida Senate floor to rub elbows with former colleagues ... Asked if he knew the marshals were looking for him ... Rivera expressed ignorance of the FEC lawsuit. 'I don't know what you're talking about.'" http://politi.co/2h6u24z

****** **A message from Chevron:** Advanced technology is helping us find better and

MEDIAWATCH -- "Leon Wieseltier acknowledges 'misdeeds' with female colleagues," by Michael Calderone: "A company backed by Laurene Powell Jobs, the philanthropist and widow of Steve Jobs, severed ties with former New Republic literary editor Leon Wieseltier after learning of 'past inappropriate workplace conduct,' the company said in a statement. Wieseltier, who commandeered the back-of-book at the New Republic for three decades, was to helm a new journal for Emerson Collective, which is backed by Powell Jobs, who recently agreed to acquire the majority of The Atlantic magazine. The first issue of the magazine, Idea, was expected to run this month. The staff, which included veteran editor and literary critic Adam Kirsch, has been let go.

"Wieseltier ... acknowledged that he engaged in behavior with female colleagues that left them feeling 'demeaned,' and offered an apology. 'For my offenses against some of my colleagues in the past I offer a shaken apology and ask for their forgiveness,' Wieseltier said in a statement. 'The women with whom I worked are smart and good people. I am ashamed to know that I made any of them feel demeaned and disrespected. I assure them that I will not waste this reckoning.' 'And I am profoundly sorry to my extraordinary collaborators at the journal we began together that the misdeeds of my past have made it impossible to go forward.'" http://politi.co/2y5rKs3

--"Laura Ingraham Is Ready to Rev Up Fox News ," by NYT's Mike Grynbaum in Scottsdale, Ariz.: "Laura Ingraham landed here in a private jet and climbed into a waiting S.U.V., accompanied by her personal assistant, a publicist, and a single piece of luggage. ... She was on her way to speak at a fund-raiser for Kelli Ward ... Next week, Ms. Ingraham, 53, will take over one of the most coveted slots on cable television: 10 p.m. on Fox News. ... Fox News hosts are not usually allowed to stump for candidates, but Ms. Ingraham was granted an exception because her show had not yet begun. ... In law school at the University of Virginia, she drove a Honda hatchback with the license plate 'FARRGHT.'" http://nyti.ms/2i3ncfX

--"Bill O'Reilly Dropped by Talent Agency After $32M Settlement Reveal," by the Hollywood Reporter's Marisa Guthrie and Jeremy Barr: UTA "on Monday evening informed the former Fox News host that it would no longer be representing him when his agreement with the company expires at the end of the year. ... 'Bill has already lined up new representation,' O'Reilly's representative, Mark Fabiani, said Tuesday in a statement to THR. Fabiani would not reveal which agency has signed O'Reilly." http://bit.ly/2yLSaAU

--"Bloomberg has opened a huge new Norman Foster-designed HQ in London," by Business Insider's Sam Shead: "Bloomberg has opened a new £1 billion European headquarters in London with enough space for over 4,000 staff. The 1.1 million sq ft site - based in two buildings joined by bridges - is located between the Bank of England and

St Paul's Cathedral in London's famous Square Mile. ... The office was opened by Bloomberg's billionaire founder and CEO, Michael Bloomberg, on Tuesday." ***With 18 pix on one page*** http://read.bi/2gH1OQL

Subject: Trump judge assigned challenge to EPA water rule delay

By Alex Guillén

12/04/2017 04:01 PM EDT

Environmentalists' lawsuit seeking to end EPA's delay of a regulation limiting power plants' toxic wastewater discharge has been assigned to a judge newly placed on the bench by President Donald Trump.

The suit was reassigned today from Judge Ketanji Brown Jackson, an Obama appointee, to Judge Dabney L. Friedrich, who was confirmed by the Senate last week by a vote of 97-3.

Green groups filed the lawsuit in May after EPA stayed certain requirements under the rule, known as the steam electric effluent limitations guidelines. But in September, EPA finalized a delay of certain implementation deadlines as it works to reconsider those parts of the rule, and the agency argues that means this lawsuit should be dismissed as moot since the stay was ended.

EPA and environmentalists have been trading briefs on the matter in the months since.

Friedrich was a former White House attorney under George W. Bush and was formerly an aide to Sen. Orrin Hatch. From 2006 to 2016, she served on the U.S. Sentencing Commission, which creates sentencing guidelines for federal courts.

WHAT'S NEXT: Friedrich will have to determine whether to dismiss the suit, but will likely need time to get up to speed on the case.

[redacted]

Dear Ryan,

[redacted]

Register today! Space is quickly running out for the POLITICO Pro Policy Summit, a daylong event giving attendees a unique opportunity to interact with fellow policy experts and decision makers from around Washington, D.C. The program will feature keynote speakers and breakout sessions focused on policy-specific discussion topics.

[redacted]

Reserve My Spot

[redacted]

Program Speakers – Sneak Peek:

[redacted]

Drew Altman, President and CEO, Henry J. Kaiser Family Foundation	Rep. Lamar Smith (R-Texas), Chairman, House Committee on Science, Space and Technology
Steve Beshear, Former Governor of Kentucky; author, "People Over Politics"	George Whitesides, CEO, Virgin Galactic and The Spaceship Company
Frank Pallone, Jr. (D-N.J.), Ranking Member, House Committee on Energy and Commerce	Rep. Richard Neal (D-Mass.), Ranking Member, House Committee on Ways and Means
Marilyn Tavenner, President & CEO, America's Health Insurance Plans	Gigi Sohn, fellow, Georgetown Law Institute for Technology & Policy; Former Counselor to the Chairman, FCC
John Krafcik, CEO, Waymo	Rep. Ro Khanna (D-Calif.)
Rep. Adam Schiff (D-Calif.), Ranking Member, House Permanent Select Committee on Intelligence	Steve Gunderson, President & CEO, Career Education Colleges and Universities
Dan Sena, Executive Director,	Scott Gottlieb, M.D., Commissioner,

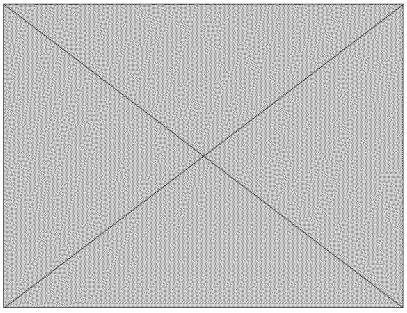
Democratic Congressional Campaign Committee

Food and Drug Administration

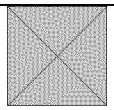
Sen. Thom Tillis (R-N.C.)

Mayor Nan Whaley, Dayton, Ohio

POLITICO Pro Policy Summit Details:



Date:	Sept. 14, 2017
Location:	Omni Shoreham Hotel 2500 Calvert St. NW Washington, D.C. 20008



Please note: Attendance at the POLITICO Pro Policy Summit is limited exclusively to current POLITICO Pro customers at the director-level and above. Space is limited, so reserve your seat today!

This invitation is non-transferable.

Subject: Morning Media: Tackling harassment at home — Vice fires three — Lauer speaks — Zucker weighs in — Mercer funded O'Keefe — Who owns LA Weekly?

By Michael Calderone | 12/01/2017 05:34 AM EDT

DEAN BAQUET AND MARTY BARON'S NEWSPAPERS have doggedly pursued allegations of sexual harassment against influential men in media and entertainment. The New York Times has tackled Harvey Weinstein, Bill O'Reilly, Louis C.K., and most recently Matt Lauer. The Washington Post broke scandals involving Charlie Rose and Mike Oreskes. But as the pair shared a stage Thursday during Business Insider's Ignition conference, Columbia University's Emily Bell asked about how they're drawing lines in their own newsrooms when it comes to allegations of sexual harassment.

- "You're not just editors here, you're newsroom leaders." Bell reminded the longtime friends and rivals. Baron said the Post's legal and human resources departments provide guidance on such matters, but acknowledged that they're still figuring things out. "These cases are not all the same," Baron said. "There are levels of severity. Anything is severe, but there are levels of severity, and different circumstances in each one. And I think that we have to look at every case individually."

- One case the Times is looking at now involves Glenn Thrush, the White House reporter who the paper suspended on Nov. 20 after a Vox report describing allegations of inappropriate behavior toward younger female journalists. While Times staffers I've spoken to agree Thrush exercised poor judgment, there's debate inside the paper as to whether he deserves to lose his job over alleged incidents that occurred outside the newsroom and didn't involve women he directly supervised. Baquet didn't specifically address Thrush's case, but described how he's approaching the issue more broadly.

- "I don't think we yet know where the line is, except for the obvious cases," Baquet said. "Harvey Weinstein's on such a far end. But I think there were no lines for so long that this wrenching debate the country's in, this wrenching discussion, is obviously significantly more healthy than the lack of discussion before. But I think it's hard. It's going to be tricky to figure out where the lines are going to be. We're all going to have to take case by case."

Good morning and welcome to Morning Media. And there will surely be more cases in others newsrooms, so if top editors aren't considering how they'll proceed, they should be. Please send tips to mcalderone@politico.com and @mlcalderone. Jason Schwartz (@JasonSchwartz) and Daniel Lippman (@dlippman) contributed to the newsletter. Archives. Subscribe.

VICE FIRES THREE: Vice's "toxic" culture came under scrutiny in a recent Daily Beast piece and there is a rumored New York Times exposé in the works. But the company also has been conducting its own sexual harassment investigation and announced Thursday night that three employees were fired. "The conduct of these employees ranged from verbal and sexual harassment to other behavior that is inconsistent with our policies, our values, and the way in

which we believe colleagues should work together," Vice chief human resources officer Susan Tohyama wrote in a memo first reported by CNN.

NBC's SHIFTING STATEMENTS ON MATT LAUER DRAW SCRUTINY: Jason Schwartz and I report: Employees at NBC News especially noted the wording shift from "in 20 years" to "current NBC News management," according to a network staffer. [NBC News chief Andy] Lack's current tenure at NBC News began in 2015, though he had previously headed the news division from 1993 to 2001. The tweak raised questions over whether NBC brass was suggesting that past executives may have heard of inappropriate behavior.

- At least one, CNN president and former "Today" executive producer Jeff Zucker, addressed the issue on Thursday. At Business Insider's Ignition conference, he denied any knowledge of bad behavior by Lauer. "No one ever brought to me, or to my knowledge, there was never, there was never a complaint about Matt," Zucker said. "There was never a suggestion of that kind of deviant, predatory behavior. Not even a whisper of it, nothing like that."

MATT LAUER BROKE HIS SILENCE on Thursday after being fired for "inappropriate sexual behavior." He apologizing for the "pain I have caused others by words and actions" and said he realized "the depth of the damage and disappointment I have left behind at home and at NBC." Still, Lauer is reportedly seeking a $30 million payout from the network.

WATCH: Melissa Francis, the Fox Business host and former CNBC anchor, recalled to Tucker Carlson on Thursday night how a friend was sexually assaulted at NBC, but did not come forward out of fear management wouldn't do anything about it and potential damage to her career. Francis said sexual harassment is "not an NBC problem" and "not a Fox problem," but is pervasive across the big TV networks.

AMONG THE 'TODAY' SHOW FAITHFUL: CNN's Tom Kludt stopped by the plaza on the morning after Lauer's exit: "Before the show, the crowd gathered outside the studios had been briefed by a producer who asked them to refrain from waving and holding signs during what she said would be 'serious news' at the top of the broadcast ... Thursday's broadcast attracted 'Today' show diehards, many of whom admitted they were disappointed that they wouldn't see Lauer. But virtually everyone who spoke to CNNMoney said they were troubled by his alleged behavior, and applauded NBC for its action."

LISTEN: Playbook's Anna Palmer and Jake Sherman stopped by CJR's "The Kicker" podcast.

ROBERT MERCER FUNDED JAMES O'KEEFE GROUP: The billionaire Breitbart backer has also given money to Project Veritas, the conservative activist group now in the news for its bungled Washington Post sting, BuzzFeed's Joseph Bernstein and Kendall Taggart report. "'Gravitas Maximus LLC' - a Mercer investment vehicle through which he also funded the conservative outlet Breitbart - gave $25,000 to Project Veritas, according to a nonpublic portion of a 2012 tax form," they write. "The family's involvement has not previously been made public."

HOW TO COVER POLITICAL EXTREMISM: I asked Monday if the New York Times

needs a dedicated beat reporter covering white nationalism in light of the controversy over a soft-focus profile of a Nazi sympathizer and as some outlets, like BuzzFeed, have reporters deeply immersed in the fascism festering online. BuzzFeed's Charlie Warzel expressed concern with the Times' approach in a CJR interview. "When an institution like the Times shows that it's struggling to catch up with the rest of us, that makes people nervous and angry," he said. "We're in this period of flux right now, but we've got to treat this like covering any other extremist group. Just because they're on the internet doesn't mean they're less real."

- Meanwhile, Baquet also responded at the Ignition conference to criticism of the Nazi next door story, calling it "the most ridiculous overreaction." Baquet said he thought the story could've more clearly told the reader that "if you think neo-Nazis are guys who live in the hills of Alabama smoking pipes, in fact, it's more complicated than that" but "just as insidious." However. Baquet suggested the pushback was overblown, singling out academic critics "who have never actually done much journalism."

"WHO OWNS LA WEEKLY?" wrote Keith Plocek on Wednesday in the LA Weekly. In a move reminiscent of Sheldon Adelson's stealth purchase of the Las Vegas Review-Journal, the new owner of the weekly paper still haven't revealed themselves. The Society of Professional Journalists called Thursday for whomever is behind Semanal LLC, the company recently acquiring LA Weekly, to reveal themselves. "In an era of rampant misinformation and distrust, it's especially important that we do not allow the owners and backers of news organizations to remain a mystery," said Andrew Seaman, SPJ's ethics committee chairperson. "We cannot allow this to become the norm."

REVOLVING DOOR

Mike Federle, who has served as Forbes Media's President and COO, has been named CEO. Outgoing CEO **Mike Perlis** will serve as Vice Chairman and Strategic Advisor to management and the Board.

Alex Thompson, politics and policy editor at Vice News, will move to Washington to cover the Trump era as the outlet's first full-time staff writer in the capital.

Elyse Perlmutter-Gumbiner and **Freddie Tunnard** have been named White House producers at NBC News.

EXTRAS

- Jack Shafer asks, "Is it ever OK for journalists to lie?"

- Matthew Felling argues that the #MeToo movement deserves to be Time's "Person of the Year."

- Why Twitter didn't delete anti-Muslim tweets that the president recklessly retweeted.

- And Walmart has stopped selling a shirt with instructions on how to lynch journalists.

KICKER

"I'm not going to try to get into the mind of Donald Trump because I don't think there's a whole lot of space there. I think he's a kook. I think he's crazy. I think he's unfit for office." -- *Senator Lindsey Graham on Fox News on Feb. 17, 2016.*

"You know what concerns me about the American press is this endless, endless attempt to label the guy as some kind of kook, not fit to be president." -- Senator *Lindsey Graham on CNN on Thursday.*

Accounting
Pipelines Might Face New Burdens From Easement Rule Proposal
Pipeline companies might have major paperwork headaches if proposed changes to accounting for land easements go through.

Climate Regulation
Clean Power Plan's Legal Fight Continues Amid Repeal Efforts
The EPA's proposal to ax the Obama administration's plan to cut carbon emissions from the power sector hasn't silenced the legal back-and-forth over the regulation's merits.

Energy
Energy Transfer Beats Bid to Turn Off Dakota Access Pipeline
Energy Transfer Partners LP's controversial $3.8 billion Dakota Access Pipeline can keep pumping crude oil for now while its environmental impact is reviewed, a federal judge ruled, sparing the company tens of millions of dollars in costs.

Energy
Merkel Faces Coal Insurrection Over Phaseout Date of Fossil Fuel
Germany's power, mining and chemical workers warned Chancellor Angela Merkel against embracing a phaseout date for coal under a new government.

Energy
Mexico Energy Skeptical Presidential Candidate Will Undo Reforms
Mexico's power suppliers are convinced that Andres Manuel Lopez Obrador, the left-wing presidential candidate who's pledged to roll back the nation's energy reforms, won't be able to deliver on his promises.

Energy
NAFTA Negotiators to Tackle Energy Issues During Friday Meeting
NAFTA negotiators are gathering in Washington for their fourth round of talks to update the trade deal, and energy is on the agenda -- if only for two hours.

Energy

Pro-Coal Energy Rule Opposition Grows as Deadline Nears

Action on an Energy Department proposal that would prop up coal and nuclear plants is moving forward quickly after opponents—including renewable, gas and oil industry groups—were denied additional time to weigh in on a plan they said could distort the wholesale energy markets.

Energy

Smoke Alarm Efficiency Exemption Clears House

Smoke alarms, security systems, and other safety devices would remain exempt from energy efficiency standards as part of a bill headed to President Donald Trump's desk after sailing through the House easily today.

Energy

U.K. Floats Nuclear Safeguards Bill for Post-Brexit Period

The U.K. published draft legislation to create a domestic nuclear safeguards system that will replace provisions under the European Union's Euratom treaty once Britain has left the bloc.

Energy

U.K. to Boost Low-Pollution Energy Supplies as It Limits Bills

The U.K. government on Oct. 12 will move to boost energy supplies while ratcheting back pollution and limiting upward pressure on customer bills.

Oil & Gas

BNP Paribas to Halt Shale, Oil Sands Financing

BNP Paribas SA pledged to stop financing shale and oil sands projects, expanding earlier commitments in support of global efforts to tackle climate change.

Oil & Gas

DTE, Enbridge Gas Line, Energy Transfer Project Approved

DTE Energy and Enbridge Inc. gained approval from federal regulators to start construction of the $2 billion Nexus natural gas line in the Midwest, with certain exceptions, according to an Oct. 11 filing.

Oil & Gas

Stops on New England Gas Orders Made Prices Rise, Group Says

Power companies' approach to booking space on U.S. natural gas pipelines is becoming the latest flash point in the debate over whether to build more of the links in the historically constrained Northeast.

Oil Spills

Rail Safety Targeted in Fuel Transport Study on Shale Boom

Routes used to ship crude oil, natural gas, and ethanol by rail need better and more frequent inspections, according to a report by a national science group that also urged added training for local first responders.

Renewable Energy

Killing Obama's Power Plan Hasn't Stopped the Renewable Boom Yet

For a look at what the death of the Clean Power Plan means for renewable energy, consider this: Since President Donald Trump signed the order to roll back the emissions-curbing rule, almost $30 billion has been spent on solar and wind projects.

Renewable Energy

Wind and Solar's Future Depends on Taxes, Not Clean Power Plan

The Trump administration's decision to end the Clean Power Plan may be deeply symbolic, but the battle that matters most for renewable energy will be over taxes.

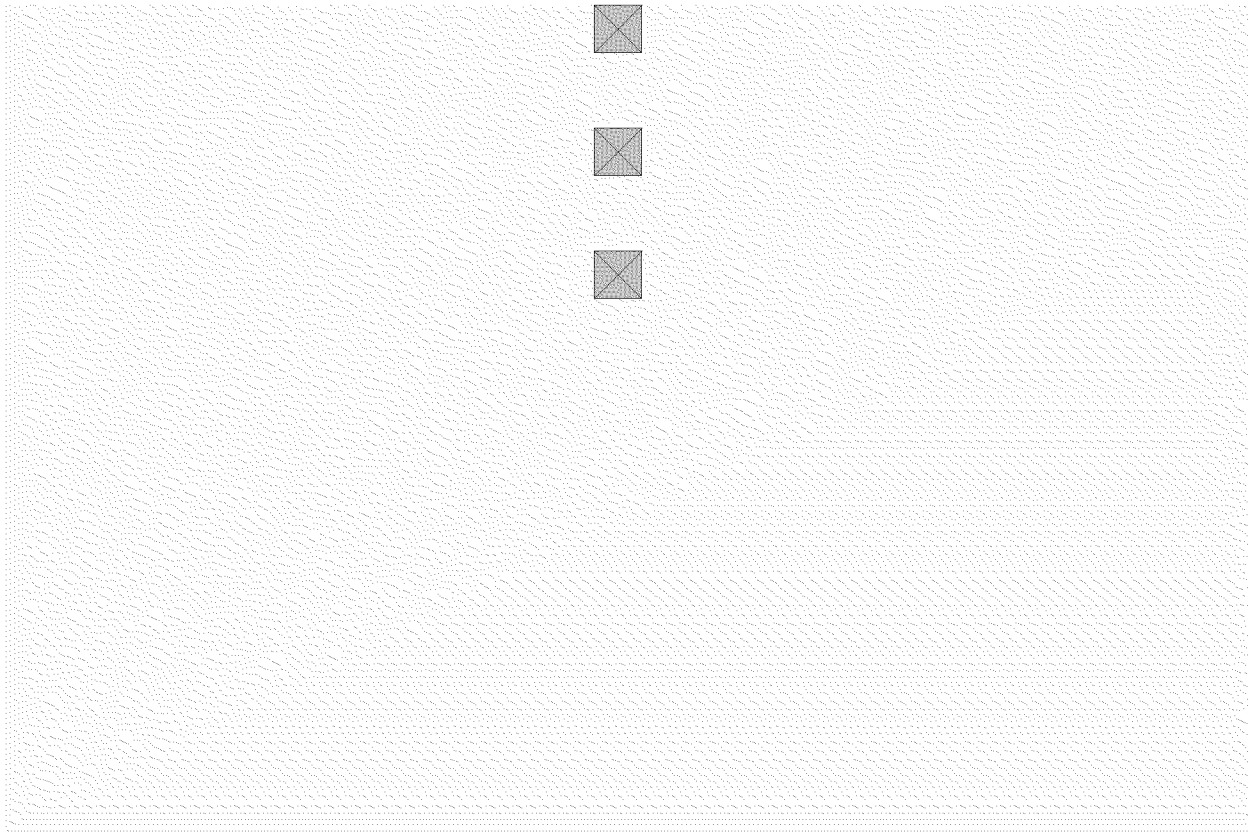
Vehicle Fuels

10,000 Electric Cars Highlight Steep Path to India's Ambitions

Prime Minister Narendra Modi has kicked off India's race to turn all new passenger car sales electric by 2030. The largest order has gone to a company that hasn't commercially started producing the vehicles.

Vehicle Fuels

Driverless Cars Give Engineers a Fuel Economy Headache



Judging from General Motors Co.'s test cars and Elon Musk's predictions, the world is headed toward a future that's both driverless and all-electric. In reality, autonomy and battery power could end up being at odds.

California Regions

AIR
Definitions
California Regions AIR

Proposed rule of the Mojave Desert Air Quality Management District would amend regulations under Rule 102 to update definitions. The rule would align definitions with concurrent proposals to update reasonably available control technology state implementation plan requirements concerning gasoline transfer and dispensing, organic liquid loading, storage of organic liquids, wood products coating operations, boilers and process heaters, and Portland cement kilns. A hearing is scheduled for Jan. 22, 2018, in Victorville. Comments are due Jan. 18, 2018. Contact: Tracy Walters; Mojave Desert AQMD; 760-245-1661

—State Publication Date: 11/28/2017.

Regulatory Update

AIR
Wood Products Coating Operations
California Regions AIR

Proposed rule of the Mojave Desert Air Quality Management District would amend regulations under Rule 1114 regarding volatile organic compound (VOC) emissions from wood products coating operations. The rule would update requirements to reflect current federal reasonably available control technology and to satisfy a state requirement regarding local control measures for particulate matter. The rule would add to the list of application methods and separate stripper VOC limits from those for surface preparation and cleanup, add cleaning methods, and reduce the surface preparation and cleanup VOC limit to 25 grams per liter. The rule also would increase capture and control device efficiency to 90 percent and add a requirement for operation and maintenance plans. In addition, the rule would add recordkeeping requirements, revise definitions, and add and relocate referenced test methods. A hearing is scheduled for Jan. 22, 2018, in Victorville. Comments are due Jan. 18, 2018. Contact: Tracy Walters; Mojave Desert AQMD; 760-245-1661

—State Publication Date: 11/20/2017.

Regulatory Update

WATER
NPDES General Permit/Limited Threat Discharges to Surface Water
California Regions WATER

Notice of the Central Valley Regional Water Quality Control Board announces additional proposed amendments to an Oct. 14, 2016, final order (R5-2016-0076) that revised the National Pollutant Discharge Elimination System (NPDES) general permit and waste discharge requirements for limited threat discharges to surface water. The final order addressed discharges of treated or untreated groundwater from cleanup sites, wastewater from superchlorination projects, and other limited threat wastewaters to surface waters and revised permit eligibility requirements to allow usage by low-threat dischargers and hard rock mines. The order also established new discharge tiers and specified effluent limitations and monitoring and reporting requirements for permittees. The original proposed amendments would authorize the executive director to waive the salinity evaluation and minimization plan requirement, add effluent and receiving water temperature limitations, clarify screening levels for iron and manganese, and remove the requirement to submit acute whole effluent toxicity data with notice of intent applications for Tier 2 discharges. The additional amendments now being proposed address discharges of treated groundwater from petroleum fuel pollution remediation projects. A hearing is scheduled for Feb. 1-2, 2018, in Rancho Cordova. Comments are due Jan. 2, 2018. Contact: Jim Marshall; Central Valley RWQCB; 916-464-4772; james.marshall@waterboards.ca.gov

—State Publication Date: 11/30/2017.

OIL AND GAS INDUSTRY
Illinois Oil and Gas Act/Well Permitting
Illinois OIL AND GAS INDUSTRY

Proposed rule of the Department of Natural Resources would amend regulations under 62 IAC 240 regarding well spacing, transfer, permitting, and temporary abandonment requirements under the Oil and Gas Act. The rule would streamline the well transfer system, reduce paperwork required for transfers, and change the spacing of wells to increase flexibility in siting wells without requiring hearings. The rule also would clarify provisions regarding permitting and temporary abandonment. Comments are due Jan. 15, 2018. Contact: John Heidinger; DNR; 217-557-6379

OCCUPATIONAL SAFETY AND HEALTH
Licensing of Crane Operators
New Jersey OCCUPATIONAL SAFETY AND HEALTH

Final rule of the Department of Labor and Workforce Development, Division of Public Safety and Occupational Safety and Health, readopts with amendments regulations under NJAC 12:121 concerning licensing of crane operators. The rule specifies that an application for renewal must be submitted at least 45 days prior to the permit's expiration date, updates the definition of "approved," and replaces outdated agency titles. The rule also removes obsolete provisions concerning the Crane Operators License Advisory Board and license expiration and renewal. The rule is effective Dec. 4, 2017. Regulatory Update

AIR
Particulate Matter Standards
Ohio AIR

Notice of the Ohio EPA announces changes to a June 5, 2017, proposed rule to amend regulations under OAC 3745-17 concerning standards for particulate matter. The rule would remove facilities and emission units that have been permanently shutdown and add an additional compliance option for certain facilities, including utilities, that are required to use a continuous opacity monitor to comply with visible emissions requirements. The rule also would add definitions to reflect exemptions for residential wood burning appliances and pellet stoves. The rule will be submitted to the EPA as a revision to the state implementation plan. The changes remove proposed revisions to the definition of "salvageable material" that would have specified that such material is intended for reuse or restoration. SOLID WASTE
Construction and Demolition Debris
Ohio SOLID WASTE

Notice of the Ohio EPA announces changes to an Oct. 16, 2017, proposed rule to amend regulations under OAC 3745-400 regarding financial assurance requirements for construction and demolition debris facilities. The rule would allow the owner or operator of a facility to demonstrate that a cost estimate is based on the cost for a third party to conduct closure and post-closure care activities. The rule also would address extension of the post-closure care period, provide for evaluation of orders every five years, and allow owners or operators to request termination of orders. In addition, the rule would eliminate provisions concerning the five-year transition period ending January 2018 provided for owners and operators to fund an increase in the amount of their financial assurance. The changes clarify provisions for requests to terminate an order extending the post-closure care period. Contact: Michelle Mountjoy; OEPA, Division of Materials and Waste Management; 614-728-5372; michelle.mountjoy@epa.ohio.gov

Regulatory Update

RADIATION
Radiation Machine Registration Fees
Washington RADIATION

Notice of the Department of Health announces the withdrawal of an Oct. 18, 2017, notice of intent to amend regulations under WAC 246-224 and -254 regarding radiation machine facility registration fees. The rule would have allowed the department to remove the exception to the per tube fee for registrants with multiple facilities on a contiguous site under one administrative

control and a single business license with at least two full-time radiation safety personnel. The rule also would have eliminated the "flat" facility base fee for such registrants and instead established a fee per tube for every X-ray machine. In addition, the rule would have clarified the definition of "facility" and added a definition of "contiguous." The agency has determined that additional sections may need to be revised and has issued a new proposed rulemaking notice concurrently. The withdrawal is dated Nov. 21, 2017. Contact: Michelle Austin; DOH; 360-236-3250; michelle.austin@doh.wa.gov

Daily Environment Report for EPA

To: Jackson, Ryan[jackson.ryan@epa.gov]
From: Morning Energy
Sent: Fri 11/3/2017 2:03:53 PM
Subject: POLITICO's Morning Energy: Murray benefits big league under Perry grid plan — Oil's big tax bill win — FERC back at full strength after Senate confirmations — Lamar Smith announces retirement

By Anthony Adragna | 11/03/2017 10:00 AM EDT

With help from Ben Lefebvre, Darius Dixon, Nick Juliano and Esther Whieldon

ONE REALLY BIG FAN OF PERRY'S PUSH: Energy Secretary Rick Perry's push to require power markets to cover the costs to run coal and nuclear plants that are being squeezed economically has earned a powerful supporter in President Donald Trump's orbit in the form of coal magnate Bob Murray, Pro's Darius Dixon and Eric Wolff report. The proposal, which must be approved by FERC, would be mostly limited to plants in a stretch of the Midwest and Northeast where Murray's mining company, Murray Energy, is the predominant supplier. One stretch of the Rust Belt and Appalachia, overseen by an electricity market called the PJM Interconnection, accounts for roughly 44 percent of Murray's sales and Perry's rule was "certainly targeted at the PJM region," said Andy Ott, CEO of PJM.

An unlikely group of allies that includes environmental groups, the natural gas, wind and solar industries and the American Petroleum Institute has vocally opposed Perry's plan. "Customers get less than nothing while a few companies and their investors get a whole lot of something," Nora Mead Brownell, a Republican former electricity regulator, said of Perry's plan. "Money that gets spent there doesn't get invested in doing what you really need to do, which is upgrading the grid." Perry argues his proposal is an effort to ensure that the power network can withstand threats like terrorist attacks or severe weather.

Among the nation's roughly 280,000 megawatts of coal-fired power, Perry's rule is tightly written to affect only about 40,000 megawatts, according to POLITICO's analysis. Murray Energy acknowledged in written comments it has a "vital and critical interest" in whether the plan flies. "Given the current threats to those resources, Murray Energy, along with other coal producers and related industries ... is threatened with bankruptcy and significant economic harm if those resources are forced out of the market by unreasonable and unsupportable market pricing mechanisms," it wrote. Since Trump's swearing-in, Murray has made personal pleas for help in face-to-face meetings with Trump and DOE officials, including Perry and Brian McCormack, Perry's chief of staff.

WELCOME TO FRIDAY! I'm your host Anthony Adragna, and your state attorneys general turned senators are: Luther Strange, Sheldon Whitehouse, Tom Udall, John Cornyn, Kamala Harris, Heidi Heitkamp, Richard Blumenthal and Catherine Cortez Masto. For today: It was 60 years ago that the Russians sent the first animal into space. What was she and what was her name? Send your tips, energy gossip and comments to aadragna@politico.com, or follow us on Twitter @AnthonyAdragna, @Morning_Energy and @POLITICOPro.

FOR YOUR AFTERNOON RADAR: Three major scientific reports acknowledging manmade climate change are expected to be released today by the Trump administration, Pro's Emily

Holden reports. They include: two volumes of the National Climate Assessment and a draft of the State of the Carbon Cycle Report. The documents will go against numerous public statements by Trump Cabinet officials refusing to accept mainstream climate science.

OIL'S TAX WIN: Along with keeping most of their existing incentives, multinational oil companies won a new tax break that would cost the government nearly $3.9 billion over the next decade in the latest GOP tax proposal. The House bill's elimination of a tax on "foreign base company oil related income" received relatively little attention in the initial flurry of tax-bill coverage Thursday, and it caught even some seasoned policy-watchers off guard. The tax typically applies to income from refineries, pipelines and other assets near multinational oil companies' overseas operations, according to a research note from ClearView Energy Partners. The industry has long complained that it is being treated unfairly compared to other types of industries, such as manufacturing. "FBCORI surprised us, but it appears to reinforce the pro-fossil bent of House Republican leadership," ClearView analysts wrote Thursday night.

Two thumbs up: The oil industry also loves the 20 percent corporate rate outlined in the proposal and is happy to see no changes to two provisions that favor its high-capital, low-operating-cost business model (the intangible drilling cost deduction and well depletion allowance, for those paying attention at home). Meanwhile, a pair of credits/deductions the House plan does jettison won't shave too much off the bottom line for most companies, industry folks tell ME. In a statement, API President Jack Gerard said "significant proposals, like lowering the corporate tax rate and strong cost-recovery provisions, will help ensure that our tax system is smart, fair and pro-growth to benefit American consumers, businesses, and the economy."

Horse-trading ahead: Release of the House bill is a starting point for tough negotiations in the weeks and months to come, in which energy provisions will, admittedly, play a relatively minor role. One House idea already encountering headwinds from the upper chamber is the proposal to slash the value of the production tax credit. "The wind energy production tax credit is already being phased out under a compromise brokered in 2015. It shouldn't be re-opened," Sen. Chuck Grassley said in a statement. "I'm working within the Senate Finance Committee to see that the commitment made to a multi-year phase-out remains intact."

FULL HOUSE: For the first time in more than two years, when Phil Moeller left the agency, FERC is on the path to having all five leadership seats filed again. Kevin McIntyre, President Donald Trump's pick to lead the agency, and Democratic commissioner Rich Glick, were confirmed Thursday afternoon. The pair still need to be officially sworn in to seal the deal, but they're both locals so we expect them to take the oath pretty soon. McIntyre and Glick have terms running through 2023 and 2022, respectively.

The hot potato: FERC Chairman Neil Chatterjee passes the baton. During Kentucky native's brief tenure in the agency's center seat, Perry lobbed - as former FERC Chairman Pat Wood has called it - "a scud missile of the NOPR" at regulators, directing them to act on a controversial plan to prop up coal and nuclear power plants. FERC is taking reply comments through Tuesday, and the agency is expected to stick to the Dec. 11 deadline to take some "final action." Given the particularly political lens FERC has been seen through over the past few months, FERC World

will also be trying to read between the lines of McIntyre's staffing decisions and how he addresses the agency's independence.

Filling out DOE: The Senate sent Perry a few extra hands to run the Energy Department. Paul Dabbar and Mark Menezes were confirmed as undersecretaries of science and energy, respectively. Steven Winberg, Trump's pick to lead the agency's fossil energy office, also got a thumbs-up from lawmakers.

Attractions yet to come: William Wehrum's nomination to run EPA's air office may get a Senate floor vote as soon as next week after Senate Majority Leader Mitch McConnell filed cloture Thursday, Pro's Alex Guillén reports.

Oh, and: Trump announced late Thursday his nomination of Linda Capuano, a fellow at Rice University's Baker Institute for Public Policy's Center for Energy Studies, to run the Energy Information Administration. She's previously been a vice president at both Marathon Oil Co. and Advanced Energy Industries. Biography here.

SCIENCE CHAIRMAN CALLS IT QUITS: Noting his House Science chairmanship runs out next year, Lamar Smith announced his retirement Thursday. Since ascending to the top of the science panel in 2013, the controversial Texan has tussled with academics, scientific organizations and government regulators, with Obama-era figures from the National Science Foundation, EPA and DOE among those who ended up in his crosshairs. The vocal climate science skeptic undermined the Obama administration's efforts to address climate change and elevated the minority of scientists who question that human activity drives the problem to equal footing as others. Pro's Darius Dixon has more here.

Smith's take: "The time is the right time. No regrets. Well, I should quote Frank Sinatra in 'My Way' where he said 'regrets I have a few but too few to mention,'" he told reporters.

Science organizations and green groups welcome his exit: Andrew Rosenberg with the Union of Concerned Scientists expressed hope his exit would allow the science community to rebuild its relationship with Congress. "I hope that the next representative to serve as chair will return this committee to its intended purpose-strengthening America's scientific enterprise, providing thoughtful and constructive oversight of federal policy and protecting the health and safety of the people Congress is supposed to serve," he said.

Who might the next chairman be? Current Vice Chairman Frank Lucas didn't rule out a bid to succeed Smith but noted Financial Services Chairman Jeb Hensarling is also departing Congress. "Life's all about options, right?" he quipped to reporters.

IT'S LAW: Trump signed into law legislation S. 190 (115) that exempts certain equipment that needs to remain on at all times from energy use restrictions for an additional six years.

STOP ME IF YOU'VE HEARD THIS BEFORE: Two corn-state Republican EPW senators - Deb Fischer and Joni Ernst - are publicly undecided about Kathleen Hartnett White's nomination to run the White House Council on Environmental Quality after meeting with her over past

critical comments toward the Renewable Fuel Standard. "I am withholding judgement right now," Fischer told reporters Thursday. A spokeswoman for Ernst said she plans to ask additional questions on White's views at her Nov. 8 confirmation hearing. Remember: Just one Republican defection sinks a nomination in the tightly divided EPW panel.

What has White said about the RFS? She has been far more vocally opposed than even Bill Wehrum, whose selection to run the air office was briefly delayed over the issue. Back in July 2013, she wrote: "It is time to repeal the renewable fuel standard - not to expand or entrench this market distortion." White also wrote its importance to the Iowa presidential caucuses explains the durability of the "counterproductive and ethically dubious" RFS in her book. She's repeatedly argued biofuels are creating a "global food crisis" and urged Congress to end the program's "destructive food-as-fuel folly."

Fears of a repeat from some: Jim Inhofe told ME "there's reason to suspect" the bloc of biofuels backers might withhold support for White over her RFS stance and called their efforts to impede the Wehrum nomination "a little extreme." But Chairman John Barrasso, as always, projected confidence when asked if he worried they'd derail the confirmation process: "I'm committed to the president's nominees and we're going to go ahead with the hearing next week."

WITH SOME HELP FROM HIS FRIENDS: In the 24 hours before he sent his hotly anticipated national monument report to the White House, Interior Secretary Ryan Zinke called just one non-GOP lawmaker - Maine Independent Sen. Angus King, Pro's Esther Whieldon reports, citing copies of Zinke's August and September calendars. Among those he called on Aug. 23 were Sens. Orrin Hatch, Dean Heller and Murkowski, Reps. Rob Bishop and Greg Walden, and the Republican governors of Utah, Maine and New Mexico.

Speaking of which, six green groups are suing Interior and the White House Council on Environmental Quality for copies of Zinke's national monuments report and related review records. The suit, filed Thursday by Earthjustice on behalf of the Sierra Club, Natural Resources Defense Council, The Wilderness Society and three other groups, say the agency has not responded to their public records requests.

MORE QUESTIONS ON WHITEFISH: Senate Homeland Security ranking member Claire McCaskill released a set of letters to FEMA, the Army Corps of Engineers and Whitefish Energy seeking additional information on the now-cancelled grid restoration contract. Among other things, she alleges the Puerto Rican utility may have already used FEMA funds to pay Whitefish, notes the Army Corps also considered using the tiny Montana-based company and questions a similar $200 million contract with Oklahoma-based Cobra Acquisitions.

9/11 invoked in EPA's Puerto Rican response: New York Rep. Jerry Nadler slammed EPA's assurances that drinking water around Superfund sites in Puerto Rico is safe to drink as "eerily similar" to the agency's response following the 9/11 terrorist attacks. "This is exactly what we got from EPA after 9/11... and thousands of people are sick and hundreds of people are dead because [air quality levels] weren't fine. And that's why I'm skeptical," he said. Video here.

MAIL CALL! GET SERIOUS ABOUT TRANSPORTATION-RELATED EMISSIONS:

The New England Power Generators Association, along with several environmental and science groups, asked four governors - Massachusetts' Charlie Baker, Connecticut's Dan Malloy, Rhode Island's Gina Raimondo and Vermont's Phi Scott - to develop and implement a "regional, market-based policy" to address greenhouse gas emissions from the transportation sector. Letter link here.

Waiver please? Pennsylvania Gov. Tom Wolf asked Pruitt in a letter Thursday to waiver RFS volume requirements. "I request that you reduce the 2017 and 2018 volumes to a level that avoids the severe economic harm experienced by the Northeast region of the United States as a result of the high costs of purchasing RINs to comply with the RFS," he wrote.

Higher park fees? Please no! Ninety House Democrats, led by Arizona's Tom O'Halleran, sent Zinke a letter Thursday urging him not to follow through with plans to raise entrance fees to 17 national parks. "Raising the entrance fees to these popular destinations will make our public lands inaccessible to hardworking families, and it will devastate tribal and rural economies that support tourism," they wrote.

NEW SCIENTIST WHISTLEBLOWER HOTLINE LAUNCHED: 314 Action invited 36,638 government scientists at EPA, NASA and the National Science Foundation to anonymously report examples of science being undermined. Website with more information here.

PRICE SHOCKER! Resources for the Future released a study Thursday finding releases from the Strategic Petroleum Reserve can have substantial effects on oil prices and spreads. Link here.

POINTS FOR HONESTY: Via Rolling Stone's Matt Laslo: "I don't think frankly that you need an EPA period," Rep. Liz Cheney tells me... "98% of the environmental regulation being done effectively at the state level that's where it ought to be," Cheney continued

WHO'S GRAMIN': Jack Gerard, the president and chief executive of the American Petroleum Institute, has joined Instagram, which the association says makes him the first head of a Washington trade group who's active on the platform. You can check out his Instas of children and the Oval Office here (h/t POLITICO Influence).

Subject: Murphy wins New Jersey governor race

By POLITICO Pro Staff

11/07/2017 08:11 PM EDT

Democrat Phil Murphy has won New Jersey's governor's race, defeating Republican Lt. Gov. Kim Guadagno, according to three news networks (ABC, CNN and NBC) that called the race based on exit polling.

No votes have been reported yet in the race between Murphy, a former executive at Goldman Sachs, and Guadagno. The polls closed at 8 p.m.

Murphy held a wide lead in public polling, and unpopular Republican Gov. Chris Christie proved to be a big drag on his former running mate.

Leading the News

Chemicals
Democrats See TSCA as Achilles' Heal for Trump Chemical Nominee
Some Senate Democrats are trying to cast doubt on President Trump's pick to head the EPA chemical safety office by appealing to Republican fears that the nominee won't aggressively implement a bipartisan chemical reform law.

Chemicals
States Struggle to Set Standards for Hundreds of Toxics
Several Northeastern state governments are feverishly working to find and clean up two emerging chemicals considered toxic that have contaminated water and soil around the country, but toxicologists say states are missing hundreds more that are related with unknown health risks.

Energy
Coal Power Generators Lukewarm on Grid Plan That Aims to Help Them
Dynegy Inc., and some other coal power generators are poised to profit from Energy Secretary Rick Perry's plan to change power market rules, but that doesn't mean they have thrown their full support behind it.

Energy
Energy Bid to Support Coal, Nuke Plants Called Illegal
An Energy Department proposal aimed at subsidizing coal and nuclear plants would violate the Federal Power Act and the Administrative Procedure Act, regional grid operators, a group of 10 state attorneys general, and legal experts say.

Regulatory Policy
House Passes Bill Targeting Environmental Settlements
A House-passed bill that would end a Justice Department practice of entering into settlements that steer funds to third-party groups faces an uncertain future in the Senate.

News

Agriculture
Broader Crop Insurance, Conservation Are Coalition's Goals for Farm Bill
Expanding crop insurance to cover all types of farms, boosting access to land for new farmers, and conserving farmland shape the National Sustainable Agriculture Coalition's policy agenda for the upcoming farm bill.

Agriculture
Organic Fertilizers Seek Even Playing Field in European Markets
Fertilizers produced from organic or recycled materials in the European Union would be treated similarly to those derived from potash and other extracted minerals under a plan backed by lawmakers Oct. 24.

Air Pollution
EPA Transportation Pollution Guidance Stands, Court Says
States will continue to use the EPA's guidance, updated in 2015, to measure particulate pollution caused by building federally-funded highways after a federal appellate court dismissed challenges from environmental groups.

Air Pollution
Poles Told Not to Burn Garbage as Another Winter of Smog Looms
Poland is hoping a media campaign will help it clean up the European Union's most polluted cities.

Biofuels
Agriculture Companies Could See EU Biofuel Market Phased Out
Bunge Limited, Cargill Inc. and other companies in the European Union that produce biofuels from feed and food crops would eventually lose a major share of their market under a draft European Parliament plan to phase out the least sustainable biofuels after 2030.

Biofuels
Argentine, Indonesian Biodiesel Face U.S. Dumping Penalty
The U.S. moved to impose more import duties on biodiesel from Argentina and Indonesia, after finding the fuel is being sold below fair market value.

Biofuels
In Washington Clash of Industries, King Corn Trounces Big Oil
Farm-state interests just conquered Big Oil in a fight over biofuels, proving that in Donald Trump's Washington, King Corn still reigns.

Chemicals
Chemours' Chemical Actions Spur N.C. to Retain Wastewater Permit
The Chemours Co. can keep its wastewater discharge permit for its facility in Fayetteville, N.C., because of work the company has done to address contamination involving a substitute for the widely used chemical perfluorooctanoic acid (PFOA), state regulators say.

Climate Policy
Incoming New Zealand Government Plans for New Climate Law
New Zealand Prime Minister-elect Jacinda Ardern will introduce a new greenhouse gas

reduction law and establish an independent climate commission after taking office this week, signaling a tougher stance on climate change.

Climate Policy
Trump's 'Beautiful' Clean Coal Push Spills into Asia
President Donald Trump's friendly stance toward coal is bubbling over into Asia, albeit in a cleaner version of the fuel, according to a Japan-based energy think-tank.

Energy
King Coal Reign Has a Ways to Go in at Least One Corner of World
Southeast Asia isn't ready to quit coal just yet.

Energy
Millennium Sues Washington State, Alleges Anti-Coal Bias
Millennium Bulk Terminals sued Washington state's ecology department Oct. 24, asserting the agency's "animus" toward coal led it to deny a water-quality permit for what would be the nation's largest coal-export gateway to Asia.

Energy
One Rare Thing to Watch for in Quarterly Coal Earnings: A Profit
After years of bleeding cash and a painful string of bankruptcies, U.S. coal miners are poised to do something rare—enjoy an earnings season.

Energy
Republicans Vow to Examine Puerto Rico's Electricity Contract
House Republicans say they will examine how a tiny two-year-old Montana company won the $300 million contract to lead the rebuilding of Puerto Rico's hurricane-ravaged electric grid.

Mergers and Acquisitions
Nufarm Buys Syngenta Europe Crop Chemicals for $490 Million
Nufarm Ltd. agreed to pay $490 million for a group of crop-protection assets owned by Syngenta SA and Adama Agricultural Solutions Ltd. in the biggest acquisition by the Australian company.

Oil & Gas
Fuel Tankers Could Be Limited on Hudson River Under N.Y. Bill
Petroleum tankers could be prohibited from entering or anchoring on certain parts of the Hudson River, under a bill (A. 6825) signed by New York Gov. Andrew M. Cuomo (D).

Oil Spills
Oil Barge Company to Pay Millions More for Massachusetts Spill
An oceangoing oil barge company's legal deal with state and federal officials to restore bird populations that had plummeted following a large Massachusetts oil spill took 14 years to work out.

Pesticides
European Parliament Calls for Glyphosate Phaseout Ahead of Vote
The European Union should reauthorize the use of glyphosate for a limited period before phasing it out, according to a nonbinding resolution European Parliament lawmakers adopted one day before a key regulatory committee vote on the world's most widely used herbicide.

Pesticides

Registration Delays Expected as China Launches Pesticide Regime

DuPont and other companies that want to manufacture or import pesticides in China are bracing for delays after the country launched a new testing and registration regime.

Renewable Energy

Developers Plan Wind Farms Off Jersey Shore as Christie Era Ends

After years of being sidelined by New Jersey Governor Chris Christie, wind farm developers are dusting off plans for massive offshore turbines that may someday generate more electricity than a nuclear reactor.

Sustainability

World's Biggest Companies Are Getting Greener, Nonprofit Says

A growing number of the world's biggest companies are setting greenhouse-gas targets in line with global efforts to curb global warming to below 2 degrees Celsius.

Toxic Chemicals

Dow, BASF Beat Kasowitz Firm's Whistleblower Claims

BASF, Dow Chemical, Covestro LLC and Huntsman International have beaten federal whistleblower claims alleging that they failed to report chemical dangers (United States ex rel. Kasowitz Benson Torres LLP v. BASF Corp., 2017 BL 378811, D.D.C., No. 16-2269, 10/23/17).

Toxic Torts

Government Off the Hook for Army Base Pollution

A proposed class of residents alleging improper chemical disposal at a Frederick, Md., Army base contaminated their groundwater can't sue the government, an appeals court affirmed Oct. 20 (Pieper v. United States, 4th Cir., No. 16-2035, unpublished 10/20/17).

Driving the Day

Good Thursday morning. THE KELLY REGIME. CUE THE REPUBLICAN APPLAUSE, via Josh Dawsey: "When new White House chief of staff John Kelly huddled with senior staff on his first day at work, he outlined a key problem in President Donald Trump's White House that he planned to fix: Bad information getting into the president's hands. Kelly told the staff that information needed to flow through him -- whether on paper or in briefings -- because the president would make better decisions if given good information. ...

"'John Kelly knows the challenges he is facing,' said Leon Panetta, a former chief of staff to President Bill Clinton who spoke to Kelly after he took the job. 'He's not going to just stand to the side and watch the White House fall apart piece by piece.'" http://politi.co/2u1mODq

-- AP'S JONATHAN LEMIRE: "Trump's new top aide assures Sessions his job is safe": "New White House chief of staff John Kelly, in one of his first acts in his new post, called Attorney General Jeff Sessions to reassure him that his position was safe despite the recent onslaught of criticism he has taken from President Donald Trump. Kelly called Sessions on Saturday to stress that the White House was supportive of his work and wanted him to continue his job, according to two people familiar with the call. ... Kelly, who was appointed to the post the day before, described the president as still miffed at Sessions but did not plan to fire him or hope he would resign." http://bit.ly/2wnqOir

-- ONE THING REPUBLICANS ARE WORRIED ABOUT is the growing narrative that John Kelly is going to change everything in the White House. Yes, he is certainly doing

things more traditionally. He's reaching out to former chiefs of staff and Hill leaders like Nancy Pelosi and Paul Ryan. And the president appears to be following Kelly's lead. But that doesn't mean that Trump is going to change overnight. For now, Kelly is adhering to James Baker's advice, via Peter Baker: the job is more about "of staff" than "chief."

TRUMP'S WASHINGTON -- NYT A1, "Trump Supports Plan to Cut Legal Immigration by Half," by Peter Baker: "President Trump embraced a proposal on Wednesday to slash legal immigration to the United States in half within a decade by sharply curtailing the ability of American citizens and legal residents to bring family members into the country. The plan would enact the most far-reaching changes to the system of legal immigration in decades and represents the president's latest effort to stem the flow of newcomers to the United States. Since taking office, he has barred many visitors from select Muslim-majority countries, limited the influx of refugees, increased immigration arrests and pressed to build a wall along the southern border. ...

"In throwing his weight behind a bill, Mr. Trump added one more long-odds priority to a legislative agenda already packed with them in the wake of the defeat of legislation to repeal and replace President Barack Obama's health care program. The president has already vowed to overhaul the tax code and rebuild the nation's roads, airports and other infrastructure." http://nyti.ms/2umAZm0

CLEANING HOUSE -- "McMaster dismisses another Flynn hire from National Security Council," by Eliana Johnson, Nahal Toosi and Ali Watkins: "National Security Adviser H.R. McMaster has pushed out a top White House intelligence aide who earlier this year secretly shared information with a Republican lawmaker investigating ties between the Trump campaign and Russia. The dismissal of Ezra Cohen-Watnick, confirmed by the White House, is the latest in a string of NSC staff members removed at the behest of McMaster, who has steadily shed aides that had been brought on by his short-lived predecessor Michael Flynn.

"Cohen-Watnick, 31, was one of the few remaining aides in the organization hired by Flynn, who was fired in February. Since his arrival McMaster has had a hand in steadily cleaning out several of Flynn's marquee hires - three of them in the past three weeks. ... A source familiar with the situation told POLITICO on Wednesday that Cohen-Watnick had recently begun planning on leaving the NSC and talked with Kushner and top NSC official Dina Powell, and they agreed to help him find a spot elsewhere in the administration." http://politi.co/2w94z0g ... ***July 23 Atlantic profile, "The Man McMaster Couldn't Fire," by Rosie Gray*** http://theatln.tc/2uORWtl

-- ROSIE GRAY in The Atlantic, "An NSC Staffer Is Forced Out Over a Controversial Memo": "A top official of the National Security Council was fired last month after arguing in a memo that President Trump is under sustained attack from subversive forces both within and outside the government who are deploying Maoist tactics to defeat President Trump's nationalist agenda. ... Rich Higgins, a former Pentagon official who served in the NSC's strategic-planning office as a director for strategic planning, was let go on July 21. Higgins's memo describes supposed domestic

and international threats to Trump's presidency, including globalists, bankers, the 'deep state,' and Islamists. The memo characterizes the Russia story as a plot to sabotage Trump's nationalist agenda. It asserts that globalists and Islamists are seeking to destroy America." http://theatln.tc/2w8UO2e

MORE SHAKEUPS COMING? -- NBC NEWS' CAROL LEE (in her NBC debut) and **COURTNEY KUBE: "Trump Says U.S. 'Losing' Afghan War in Tense Meeting With Generals":** "President Donald Trump has become increasingly frustrated with his advisers tasked with crafting a new U.S. strategy in Afghanistan and recently suggested firing the war's top military commander during a tense meeting at the White House, according to senior administration officials. During the July 19 meeting, Trump repeatedly suggested that Defense Secretary James Mattis and Chairman of the Joint Chiefs of Staff Gen. Joseph Dunford replace Gen. John Nicholson, the commander of U.S. forces in Afghanistan, because he is not winning the war, the officials said. Trump has not met Nicholson, and the Pentagon has been considering extending his time in Afghanistan.

"Over nearly two hours in the situation room, according to the officials, Trump complained about NATO allies, inquired about the United States getting a piece of [Afghanistan's] mineral wealth and repeatedly said the top U.S. general there should be fired. He also startled the room with a story that seemed to compare their advice to that of a paid consultant who cost a tony New York restaurateur profits by offering bad advice. ...

"Trump's national security team has been trying for months to come up with a new strategy he can approve. Those advisers are set to meet again to discuss the issue on Thursday at the White House. The president is not currently scheduled to attend the meeting, though one official said that could change. ... At one point the president directed his frustration at Mattis, saying Trump had given the military authority months ago to make advances in Afghanistan and yet the U.S. was continuing to lose ground, the officials said. ... One official said Trump pointed to maps showing the Taliban gaining ground, and that Mattis responded to the president by saying the U.S. is losing because it doesn't have the strategy it needs." http://nbcnews.to/2w7VjJH

TRUMP'S THURSDAY -- PRESIDENT TRUMP will hold a rally in Huntington, W.Va., the second time in two weeks where he has taken his message on the road.

-- SETTING THE RECORD STRAIGHT: @realDonaldTrump at 9:29 p.m.: "I love the White House, one of the most beautiful buildings (homes) I have ever seen. But Fake News said I called it a dump - TOTALLY UNTRUE".

****** **A message from Morgan Stanley**: Bond Markets Caffeinate: Investors bought into Starbucks' sustainability bond-the latest to support ethical, sustainable supply chains-demonstrating a growing trend. Read more. ******

FOR THE HISTORY BOOKS -- "Here Is Anthony Scaramucci's 'Communications

Plan' From Before He Was Fired," by BuzzFeed's Charlie Warzel: "Internally, the memo indicates that Scaramucci planned to 'professionalize' the comms team. 'For example,' he wrote, 'no WH communication staffer goes home without returning all calls, emails, and texts. People may not like our answers-but they should always be treated professionally and respectfully (obviously, this starts with the new Director of Communications).' ... Scaramucci - who in his first days on the job repeatedly went on TV to threaten firings of White House staffers, and publicly accused then-chief of staff Reince Priebus of being the primary source of White House leaks - also called for staff to be more civil and humble. 'Make it clear that horn tooting and denigrating colleagues is unacceptable,' the memo reads. ...

"The memo ends with a personal to-do list, in which Scaramucci lays out a series of meetings he planned to have with incoming chief of staff Gen. John Kelly and other members of the White House staff, including Steve Bannon ('I want his insight and help. He presumably has an opinion on how Comms can operate more effectively,' the memo says.) Also included is a list of mainstream media reporters he planned to meet with, including the New York Times' Maggie Haberman and The New Yorker's Ryan Lizza." ***With the full memo*** http://bzfd.it/2wnkwz6

-- FROM MOOCH'S PLAN: "Comms need to humanize POTUS and burnish his image. For example, POTUS is the best golfer to serve as President. Perhaps, we embrace it with a national online lottery to play a round of golf with him....or a charity auction. POTUS has a funny and irreverent side which was shared with the electorate during the campaign ... People are fascinated by the lives of their Presidents and the operation of the White House. POTUS is the greatest TV star in history. Comms should produce video content that constructively operates as 'The President Donald J. Trump' show."

HAPPENING TOMORROW! -- "Scaramucci to hold online event Friday," by CNN's Chris Cuomo and Sophie Tatum: "Following his departure from the White House after less than 11 days as communications director, Scaramucci will be hosting an online event on Friday where he will address the American people directly. Scaramucci said this daytime event -- which will be broadcast on various live platforms with help from former Fox News co-president Bill Shine -- will give him the opportunity to reach and communicate with the President's base. ... As for what's next after Friday's event, Scaramucci plans to go dark until after Labor Day, when he will announce his next venture after he evaluates his various media and finance-related opportunities." http://cnn.it/2uY1QIk

SPICER'S SWAN SONG -- "Spicer savors his last days in the White House," by Tara Palmeri: "Sean Spicer has been floating around the White House since he announced his resignation almost two weeks ago, dipping in and out of his office, attending meetings on tax reform and popping up for public ceremonies like Gen. John Kelly's swearing in as chief of staff and a medal of honor ceremony for a Vietnam veteran. On Tuesday night, Spicer was seen giving his family a tour of the White House grounds. He's posted nostalgic pictures on Instagram, like one of the first family taking off from the lawn on Marine One, with the caption: 'This will never get old.' ...

"In the wake of Scaramucci's departure, Spicer - who committed to staying several weeks to ensure an orderly transition in the press office - briefly considered staying on at the White House to help with Trump's effort to pass a major tax reform, a policy issue that Spicer had engaged with since stepping back from regular briefings in the last month. But he made it clear to his colleagues by late afternoon on Tuesday that he does not plan to stay on in the White House beyond August." http://politi.co/2w9B1zI ... ***Spicer's Instapic*** http://bit.ly/2umCro9

CAPITOL HILL V. THE WHITE HOUSE, PART INFINITY: "Congress readies Round 2 with Trump on Russia: Language in key defense bills would make the administration revive a type of missile banned by a 1987 treaty," by Bryan Bender: "Congress is moving to force the Pentagon to violate a nuclear arms treaty with Russia -- in yet another effort to box in President Donald Trump on relations with Moscow. Language in key defense bills in both the House and Senate would require the military to begin developing medium-range missiles banned by a 1987 treaty that Ronald Reagan negotiated with Soviet leader Mikhail Gorbachev during the twilight years of the Cold War.

"Supporters say the move is necessary because Russian President Vladimir Putin has violated the pact. But opponents fear it could increase the chances of a nuclear confrontation at a time when relations between the two nations are at a post-Cold War low. The legislation is also likely to stir up new friction between lawmakers and Trump, who has already accused Congress of illegally meddling in his dealings with Russia. Trump blasted Congress on Wednesday for including 'clearly unconstitutional provisions' in a bipartisan bill imposing new sanctions on Putin's regime -- legislation he said he nonetheless signed 'for the sake of national unity.'" http://politi.co/2u5Nnvf

-- COALITION BUILDING -- NYT's Rick Gladstone: "Joined by three Western allies, the United States on Wednesday escalated pressure on Iran over its space launch last week, saying the act disregarded a United Nations Security Council resolution on the use of missiles and was 'threatening and provocative.' In a letter to the Security Council and Secretary General António Guterres, Ambassador Nikki R. Haley of the United States and envoys from Britain, France and Germany said the Iranian missile that carried a satellite into orbit was 'inherently capable of delivering a nuclear warhead.'" http://nyti.ms/2ulHaXl

THE LATEST ON HEALTH CARE ... -- "Lawyers, lawmakers leave Trump administration in limbo on Obamacare subsidies," by Josh Dawsey and Jen Haberkorn: "President Donald Trump has told advisers repeatedly he wants to end Obamacare cost-sharing subsidies that are crucial to the marketplaces continuing to work, and he has publicly said it would make sense to blow up the system, put the blame on the Democrats and force a negotiation. But after the inability of Republicans in Congress to repeal and replace the law, the White House is not expected to immediately end the subsidies, officials said, even as Trump stews in the legislative defeat. And they could remain in place indefinitely, some officials said.

"The administration has slowed a decision to hear from lawyers, who are studying how the payments could be ended and what legal liabilities the administration could face if the payments stop, according to administration officials. Lawyers and some administration officials have raised questions about ending the payments but are expected to offer an analysis later in August, West Wing officials said. One official said the analysis could arrive as soon as next week. A different official said the White House was in no hurry and wanted to consider all factors before making a decision. Another payment is due approximately Aug. 22." http://politi.co/2uYSn3M

-- JEN HABERKORN and ADAM CANCRYN: "New bipartisan Obamacare push faces steep climb": http://politi.co/2faLUgD

BIG ANNIE KARNI SCOOP -- "Zuckerberg hires former Clinton pollster Joel Benenson": "Facebook CEO Mark Zuckerberg and his wife, Priscilla Chan, have hired Democratic pollster Joel Benenson, a former top adviser to President Barack Obama and the chief strategist to Hillary Clinton's failed 2016 presidential campaign, as a consultant, according to a person familiar with the hire.

"Benenson's company, Benenson Strategy Group, will be conducting research for the ChanZuckerberg Initiative, the couple's philanthropy. The organization -- whose mission statement, according to its website, is 'advancing human potential and promoting equality' -- is endowed with the couple's Facebook fortune. Zuckerberg and Chan have vowed to give away 99 percent of their Facebook shares, worth an estimated $45 billion, to charity. Bringing on Benenson is the latest sign that they're pushing their philanthropic work more heavily into the political and policy world." http://politi.co/2wn4zsV

IMPORTANT INTERNATIONAL READ -- NOGA TARNOPOLSKY in the **LA TIMES: "Relations between Israel and Jordan have become 'very dangerous'":** "Relations between Israel and Jordan, neighboring states that signed a peace treaty in 1994, have hit rock bottom after twin decisions by the Israeli government that have been widely seen as an affront to Jordan's King Abdullah II. The first was Israel's order, since rescinded, to install metal detectors at the Noble Sanctuary, the Muslim name for the disputed plateau in Jerusalem's Old City that holds the Al Aqsa Mosque and gold Dome of the Rock. Although Israel backed down, the decision was seen as a slap to Jordan, which is the legal custodian of the site. The other involved Israel's response to a deadly incident in the Jordanian capital, Amman, in which an Israeli Embassy guard killed two Jordanians, a 17-year-old delivery boy and an orthopedic surgeon. ...

"Before any summit could be planned, Israel and Jordan narrowly avoided yet another collision. As relations between the two countries deteriorated, two flamboyant parliamentarians -- one from Israel, one from Jordan -- fought via their Twitter feeds. Eventually, Jordanian Yehiya Saoud challenged the Israeli, Oren Hazan, a member of Netanyahu's Likud Party, to a duel in the Judean desert at 10 a.m. Wednesday. Hazan, a former pimp who gained an extra measure of fame when he crashed Donald Trump's

arrival ceremony in Tel Aviv last May to snag a selfie with the president, accepted. Gleeful online anticipation followed Hazan's progress toward the Allenby Bridge border post until someone in Netanyahu's office got wind of the scheme and sharply ordered Hazan back home." http://lat.ms/2v0wXl7

-- THIS GIVES JARED KUSHNER another problem to deal with. Israel and Jordan's relationship has long been crucial in maintaining relative calm in the Middle East. Jordan is the protectorate for the al Aqsa mosque in Jerusalem's Old City, for example. If they aren't getting along, then a complex plan with other Middle Eastern and Gulf nations to strike a peace accord between Israel and the Palestinians is nothing more than a pipe dream.

COMING ATTRACTIONS -- "GOP clash looms over raising the debt ceiling," by Seung Min Kim and Rachael Bade: "Republican congressional leaders are quietly preparing to pass a "clean" debt ceiling increase, according to multiple senior GOP sources - setting the stage for a high-risk showdown with rank-and-file Republicans this fall. Trump administration officials, led by Treasury Secretary Steven Mnuchin, are imploring Congress to raise the $19.8 trillion debt limit with no strings attached by the end of September. And Senate Majority Leader Mitch McConnell and Speaker Paul Ryan - well aware they need Democrats to pass any debt bill through the Senate - are on board, albeit begrudgingly so.

"But beyond the leadership, there are few Republican takers, at least so far. GOP lawmakers in both chambers of Congress are calling for any debt ceiling hike to be accompanied by spending cuts or fiscal reforms - the same demand they made repeatedly during Barack Obama's two terms. That means McConnell (R-Ky.) and Ryan (R-Wis.) will have to rely on Democrats and enough moderate Republicans to help them avert a financial catastrophe by Sept. 29, the day Treasury exhausts its borrowing authority and the very last day for Congress to act." http://politi.co/2u2TVGK

-- AP: "Bipartisan Senate bill aims to protect special counsel's job": "Two members of the Senate Judiciary Committee are moving to protect Special Counsel Robert Mueller's job, putting forth new legislation that aims to ensure the integrity of current and future independent investigations. Republican Sen. Thom Tillis of North Carolina and Democratic Sen. Chris Coons of Delaware plan to introduce the legislation Thursday. The bill would allow any special counsel for the Department of Justice to challenge his or her removal in court, with a review by a three-judge panel within 14 days of the challenge. The bill would be retroactive to May 17, 2017 - the day Mueller was appointed by Deputy Attorney General Rod Rosenstein to investigate Russian meddling in the 2016 election and possible ties to Donald Trump's campaign." http://nydn.us/2fbmhfD

THE JUICE ...

FIRST IN PLAYBOOK: WILL ALLISON TO ARIZONA FOR SEN. JEFF FLAKE'S REELECTION -- Will Allison is heading back to the campaign trail to run the comms

operation for Flake's reelection bid. Allison was press secretary for Sen. Ron Johnson's (R-Wis.) successful re-election bid in 2016. He has also worked for the North Carolina Republican Party when Sen. Thom Tillis (R-N.C.) won in 2014. In the House, Allison has worked for Tom Price and Paul Ryan. **FLAKE** is in a food fight, of sorts, with the Trump administration. He published a book sharply critical of the White House, and the administration responded by saying Flake would be serving his constituents better if he more focused on governing and not attacking the president. Allison's role was in the works before the tiff between Flake and the White House.

--SPOTTED: Sen. Ted Cruz (R-Texas) and John Bolton having dinner last night at Capital Grille.

HOT VIDEO: STEPHEN MILLER VS. JIM ACOSTA -- @jayrosen_nyu: "Hard to find a better clip for White House press corps as objets d'hate. Let it run and you will see what I mean." ***7-min. video*** http://bit.ly/2f9OhjP

Playbook Reads

PHOTO DU JOUR: CNN senior White House correspondent Jim Acosta waits to be called on by senior adviser Stephen Miller at a press briefing Aug. 2. | Chip Somodevilla/Getty Images

DOJ WATCH -- "DOJ: Affirmative action case a limited one," by Michael Stratford: "An internal Justice Department posting seeking lawyers for 'investigations and possible litigation' relating to university affirmative action policies was a call for volunteers to work on a single complaint filed by Asian-American groups accusing Harvard University of racial bias in admissions, not a sweeping policy change, a department spokeswoman said Wednesday. The internal document, described in a New York Times report on Tuesday evening, set off a torrent of speculation - and concern from many civil rights and higher education groups - that the Trump administration was preparing to sue universities over their affirmative action policies.

"'The posting sought volunteers to investigate one administrative complaint filed by a coalition of 64 Asian-American associations in May 2015 that the prior Administration left unresolved,' Justice Department spokeswoman Sarah Isgur Flores said in a statement. 'The complaint alleges racial discrimination against Asian Americans in a university's admissions policy and practices.'" http://politi.co/2u6aFRQ

-- BOSTON GLOBE: "The majority of Harvard's incoming class is nonwhite," by Deirdre Fernandes: "For the first time in Harvard University's history, the majority of students accepted into the incoming freshman class are not white, a milestone for an institution that prides itself on educating future presidents, CEOs, and world leaders." http://bit.ly/2vrR4uK

BANNON BEAT -- "A Vatican Shot Across the Bow for Hard-Line U.S. Catholics," by NYT's Jason Horowitz in Vatican City: "Two close associates of Pope Francis have accused American Catholic ultraconservatives of making an alliance of 'hate' with evangelical Christians to back President Trump, further alienating a group already out of the Vatican's good graces. The authors, writing in a Vatican-vetted journal, singled out Stephen K. Bannon, Mr. Trump's chief strategist, as a 'supporter of an apocalyptic geopolitics' that has stymied action against climate change and exploited fears of migrants and Muslims with calls for 'walls and purifying deportations.' The article warns that conservative American Catholics have strayed dangerously into the deepening political polarization in the United States.

"The writers even declare that the worldview of American evangelical and hard-line Catholics, which is based on a literal interpretation of the Bible, is 'not too far apart' from jihadists. It is not clear if the article, appearing in La Civiltà Cattolica, received the pope's direct blessing, but it was extraordinary coming from a journal that carries the Holy See's seal of approval. There has apparently been no reprimand from the pope, who is not shy about disciplining dissenters, and La Civiltà Cattolica's editor has promoted the article nearly every day since it was published in July. ... Mr. Bannon, a former altar boy who once articulated his worldview to a Vatican conference, wrote in a brief email that the pope's associates 'lit me up.'" http://nyti.ms/2u2l2lg

-- "Trump Keeps His Conservative Movement Allies Closest," by NYT's Jeremy W. Peters: "Every Friday afternoon the White House sends an email to movement leaders called 'The Trumpet,' which lists the latest events and achievements that conservatives might find of interest and asks for their help in promoting the president's policies. 'Please publicly push for tax reform that is simpler and fairer, that provides middle-class tax relief,' one email implored last month. There are small Oval Office gatherings, dinners with the president at the White House, regular strategy sessions with his senior staff, meetings with Vice President Mike Pence in his office and at his Naval Observatory residence." http://nyti.ms/2umll9Z

FOR STEPHEN MILLER -- "Trump plan to hire 15,000 border and immigration personnel isn't justified, federal watchdog says," by WaPo's Lisa Rein: "A report released this week by the DHS inspector general concludes that based on its rigorous screening requirement for law enforcement jobs and the relatively high rate of attrition among Border Patrol agents, Homeland Security would have to vet 750,000 applicants to find 5,000 qualified personnel. In addition, to hire the 10,000 Immigration and Customs Enforcement agents the president called for in executive orders he issued in his first days in office, a pool of 500,000 candidates would need to apply, auditors found. The report calls into question whether DHS officials even need 15,000 new hires to target undocumented immigrants. Agency leaders have done such poor planning for what their workforce should look like, with an understaffed, poorly trained human resources operation, that they cannot justify thousands of new employees, the report says." http://wapo.st/2vryZg6

INSIDE THE ROOM -- NYT A1, "Under Trump, a Hollowed-Out Force in Syria Quickly Lost C.I.A. Backing," by Mark Mazzetti, Adam Goldman and Mike Schmidt: "The end came quickly for one of the costliest covert action programs in the history of the C.I.A. During a White House briefing early last month, the C.I.A. director, Mike Pompeo, recommended to President Trump that he shut down a four-year-old effort to arm and train Syrian rebels. The president swiftly ended the program.

"The rebel army was by then a shell, hollowed out by more than a year of bombing by Russian planes and confined to ever-shrinking patches of Syria that government troops had not reconquered. Critics in Congress had complained for years about the costs -- more than $1 billion over the life of the program -- and reports that some of the C.I.A.-supplied weapons had ended up in the hands of a rebel group tied to Al Qaeda further sapped political support for the program.

"While critics of Mr. Trump have argued that he ended the program to curry favor with President Vladimir V. Putin of Russia, there were in fact dim views of the effort in both the Trump and Obama White Houses -- a rare confluence of opinion on national security policy." http://nyti.ms/2vuMJaY

Strong investor interest demonstrated the extent to which institutional bond buyers support social and environmentally responsible behavior by corporations. Read more from Morgan Stanley. ******

DEPT. OF YA CAN'T MAKE IT UP! -- "Sources: Michael Grimm eyes return to Congress," by NY1's Grace Rauh: "For months now, there has been talk that Michael Grimm would try to get back into politics. But in recent days, he seems to be more definitive about his plans.

"Sources told NY1 that Grimm is beginning to let a small number of political leaders on Staten Island know that he intends to run for Congress. Any campaign would be a challenge for someone in Grimm's position; he spent seven months in federal prison for tax fraud, and he was released in May of 2016. Grimm also made headlines for threatening a NY1 reporter, Michael Scotto, with physical violence in 2014, saying he would throw Scotto off a balcony and break him in half while they spoke at the Capitol in Washington.

"I spoke with Grimm on Wednesday afternoon and he insisted he has not made any decisions yet on his political future. But he did say that there are people who would like to see him run, and he said he plans to return to public office one day." http://bit.ly/2v16gNd

-- JOHN BRESNAHAN and Jake started hearing murmurs of this Wednesday afternoon, and began making calls about it. There is truth to it, and it's clear that GOP leaders in Washington don't want to see a sitting member get a primary challenge.

Especially by Grimm, who spent years in prison and threatened to throw a reporter off a balcony. Remember, this district is only slightly Republican. It was held by Democrat Michael McMahon from 2009 to 2011. (McMahon is now the county district attorney.) GOP-on-GOP fighting is obviously not good for the party.

-- ONE MORE, YA CAN'T MAKE IT UP: "Marc Kasowitz, Trump Lawyer, Also Represents a Russian Bank," by NYT's Andrew Kramer in Moscow. http://nyti.ms/2uYb1bl

-- FLASHBACK -- BuzzFeed, March 23, "Trump's Longtime Lawyer Is Defending Russia's Biggest Bank," by Anthony Cormier, Jeremy Singer-Vine and John Templon: http://bzfd.it/2uY3ee0

HMM -- "Trump nominee Sam Clovis blasted progressives as 'race traders' and 'race traitors' in old blog posts," by CNN's Andrew Kaczynski and Paul LeBlanc: "Sam Clovis, President Donald Trump's nominee to be the Department of Agriculture's chief scientist, maintained a now-defunct blog for years in which he accused progressives of 'enslaving' minorities, called black leaders 'race traders,' and labeled former President Barack Obama a 'Maoist' with 'communist' roots." http://cnn.it/2hpzrGp

HOLLYWOODLAND - "HBO Security Contractor: Hackers Stole 'Thousands of Internal Documents,'" by Variety's Janko Roettgers: "The HBO hack may have been worse than the initial leaks of a few unaired TV show episodes suggested. ... The disclosure came as part of a DMCA take-down notice sent to Google Tuesday to force the search engine to take down links to the leaked files. The take-down notice also detailed that the hackers did away with 'masses of copyrighted items including documents, images, videos and sound.' ... The hackers appear to have also leaked personal information of a senior HBO executive." http://bit.ly/2wnuEYA

MEDIAWATCH -- "Confusion, anger inside Fox News over lack of answers in network's Seth Rich probe," by CNN's Oliver Darcy: "According to half a dozen people spread throughout Fox News ... all this has left employees at the network wondering what is going on with the investigation -- and why there has not been an announcement either of disciplinary action or a finding that there was no wrongdoing. 'People need to start getting canned over the [Seth Rich] thing,' an employee told CNN. ... [E]mployees recognize the secretive nature that has characterized the probe into the Rich story, and lack of disciplinary action, seems to fit into the normal operating procedures for Fox News." http://cnnmon.ie/2hq7Kxe

-- LEWANDOWSKI AND BOSSIE'S UPCOMING BOOK - Per Hadas Gold in Morning Media: "Last year Ken Vogel and I reported that Lewandowski had a $1.2-million offer from HarperCollins to write a book chronicling his time running Trump's presidential campaign, but the publishing giant backed away from the deal amid concerns about Lewandowski's nondisclosure agreement. The tentative title then, which Lewandowski denied he was shopping around: 'Let Trump be Trump' [with the subtitle: 'The Inside Story of His Rise to the Presidency']. That's the same title of the book to be released in

December by Lewandowski and former campaign aide David Bossie." ***Pre-order -- $27 on Amazon*** http://amzn.to/2faPs28

SPOTTED: former national security adviser Susan Rice last night at Red Hen in DC having dinner at a window table ... Merrick Garland at a screening of "Dunkirk" at the Smithsonian Air and Space Museum ... Sen. Susan Collins (R-Maine) dining with friends last night at Tosca, where she was "greeted by spontaneous applause and emotional words of support. ... Total strangers in the restaurant. People approached her - shyly - to thank her for her courage. Everything stopped in the restaurant as she exited. Then people burst into applause," per our tipster.

SPOTTED last night at Capital Grille at a new private quarterly dinner series hosted by Michael Hardaway to bring together senior Hill staffers of both parties, admin officials and lobbyists: Lance Williams, lobbyist for BP and an Obama Treasury alum, Kyle McEneaney of the World Bank and Chris Randle, LD for Rep. Hakeem Jeffries (D-N.Y.).

TRANSITIONS -- Amy Shepard has joined the Good Food Institute as general counsel and director of finance. She is an alum of the SEC, Freddie Mac, and the Air Conditioning, Heating, and Refrigeration Institute. ... **Joe Ellis** has been named VP and head of U.S. government affairs at BP. Since January 2014, he has been the head of state and local government affairs for the energy giant. ... **Lauren Sinclair** has started as media manager at the start up think tank the Social Progress Imperative. She most recently was director of social media at Ogilvy.

WELCOME TO THE WORLD - Joe Brettell, manager of external engagement at Apache Corporation and a FleishmanHillard and CRC alum, and **Erica Brettell,** who helps spearhead anti-domestic abuse non-profit Lindsay's Light, email friends and family: "We are pleased and proud to announce the arrival of Caleb James Brettell, born [Wednesday] at 1:45 p.m. with measurements of 7lbs 13oz, 19 inches long. As we determined names, Caleb has been the first choice of his oldest brother from the beginning. This past weekend, Parker, still not certain he'd made the case, hand drew a multi-page book, 'Welcome baby Caleb', an original work that gave the new kid an introduction to all people and animals in the house. It was a closing message that would have made any political ad maker proud. ... We are blessed, happy, pleased...and tired." One of the Brettells' first congratulatory calls came from Erica's former boss, Sen. Jim Inhofe (R-Okla.). ***Instapics*** http://bit.ly/2hqVvke ... http://bit.ly/2faNILZ

BIRTHWEEK (was yesterday): Kristin Carvell Hardwick, head of comms for Gas Power Systems at GE Power ... Gigi B. Sohn, fellow at the Open Society Foundations and an FCC alum

BIRTHDAY OF THE DAY: Jacob Weisberg, chairman and editor-in-chief of the Slate

Group. **How he got his start in journalism:** "I spent the summer before college at The Washington Monthly working on a story about potholes. Charlie Peters would send the interns out for quarts of Miller and explain to us how government really worked." Read his Playbook Plus Q&A: http://politi.co/2u6WZWo

BIRTHDAYS: Joe McLean, president of the Crockett Policy Institute ... Josh Cherwin is 4-0 (baby girl tip: Stella) ... Politico's Nick Juliano and Rachana Pradhan ... The Parkinson twins: ABC News' John Parkinson and Scott Parkinson, executive director of the Republican Study Committee ... ABC News' Ben Siegel (h/ts Arlette Saenz) ... WaPo's Gene Park ... Charles Dharapak, AP deputy news director for production and presentation in the Asia-Pacific based in Bangkok and former WH photographer (h/ts Ben Chang and Peter Watkins) ... Allison Haley ... Rick Murphy, partner at Forbes Tate Partners (h/t Liz Johnson) ... Michael Frazier ... Addison Smith, partner at Sphere Consulting ... Emily Goldberg, Politico's newest web producer (h/t Zach Montellaro) ... Jordan Burke, Uber's head of market and consumer research ... Claire Olszewski ... Julia Fahl ... Bradley Brooks, Reuters Brazil chief correspondent ... Jennifer Swanson ... Ann Davison, director at PricewaterhouseCoopers Public Sector (h/ts Jon Haber) ... Tom Freedman, president of Freedman Consulting, LLC ... NPR's Joe Ruiz ... Josh Greenman, op-ed editor at the N.Y. Daily News, is 44 ... Ken Nahigian is 46 ... Sen. Chris Murphy (D-CT) is 44 ... former Sen. Roland Burris (D-Ill.) is 8-0 ... Jeff Dressler, national security adviser for House Majority Leader Kevin McCarthy ...

... James Wegmann, the indomitable spox for Sen. Sasse who raises the Jolly Roger even when the Pirates lose (h/t Matt Lloyd) ... Tom Qualtere, comms director for Rep. Mike Kelly (R-Pa.) (h/t Dan Swartz) ... former Puerto Rico Gov. Alejandro Javier Garcia Padilla ... Ed Carberry ... Alex Mackler ... Allison Abner ... Jonathan Young ... Karin Walser ... Erikka Knuti ... Graham MacGillivray of C-SPAN ... Andrew Craft of Fox News ... Alberto Pimienta ... Roger Kodat ... Ryan Mackenzie ... Robin Joy Robinson ... Jessica Ennis, senior director of Bravo Group, Inc. ... Drew Brophy ... Brian Kateman ... Matt Compton ... Kenneth Grubbs ... Vicki Cram ... Katie Todd Reilly ... Walter Bishop ... Matthew Foldi is 21 ... City Journal editor Brian Anderson ... Aaron Lewis ... Michael Hilder ... Laura Schneider ... Joe Peyronnin ... Nancy E. Smith ... Krista Lane ... Doug Burnett ... Doug Haddow ... Tom Parker (h/ts Teresa Vilmain)

****** **A message from Morgan Stanley** : Major global companies like Starbucks are increasingly focused on the sustainability of their supply chain. Why? Because issues like the sourcing of coffee and its environmental footprint are increasingly meaningful to its customers. Starbucks' sustainability bonds ($500 million in 2016 and ¥85billion this year) create a financial virtual cycle: What's good for coffee growers is good for Starbucks; what's good for Starbucks is good for investors; what's good for investors is good for 1 million people in coffee communities around the world. Innovation in the bond market provides companies with opportunities to identify ways to drive sustainability throughout the business and engage with investors who are interested in supporting those efforts. Read more from Morgan Stanley. ******

Summaries

AIR
New Jersey SIP/Regional Haze
AIR

Proposed rule of the EPA would approve a revision to the New Jersey SIP for regional haze. The revision includes a five-year progress report toward reasonable progress goals (RPGs) for regional haze and a determination of adequacy of the existing regional haze SIP. The progress report specifies that the state has implemented the necessary measures and that visibility in federal Class I areas affected by the state's emissions is improving and meets the applicable RPGs for 2018. Comments are due Aug. 31, 2017. Contact: Robert Kelly; EPA, Air Programs Branch; 212-637-4249; kelly.bob@epa.gov. Citations: 40 CFR 52

Regulatory Update

FOOD SAFETY
Modernization of Poultry Slaughter Inspection
FOOD SAFETY

Notice of the Food Safety and Inspection Service announces the submission of a continuing information collection request to the OMB concerning the modernization of poultry slaughter inspection to address standard operating procedures or other prerequisite programs and written procedures. The collection addresses maintenance of programs for prevention of contamination of carcasses and parts by enteric pathogens and by fecal matter throughout the entire slaughter and dressing operation, including microbial test results, documentation of prevention of carcasses afflicted with septicemia and toxemia from entering a chiller, and records that document that the products resulting from slaughter operations meet the definition of ready-to-cook poultry. The collection also addresses requirements for establishments to submit annual attestation of maintenance of a program to monitor and document work-related conditions of establishment workers. Comments are due Aug. 31, 2017. Contact: Gina Kouba; FSIS, Office of Policy and Program Development; 202-720-5627

GENERAL ENVIRONMENT AND SAFETY
Mariana Islands/Training and Testing Study Area
GENERAL ENVIRONMENT AND SAFETY

Notice announces the intention of the Department of the Navy to prepare a supplemental environmental impact statement/overseas environmental impact statement for the Mariana Islands Training and Testing Study Area. A prior EIS (80 FR 46252; 08/04/2015) assessed the impact of military readiness activities on the study area, composed of the existing Mariana Islands Range Complex (MIRC), areas on the high seas to the north and west of the MIRC, a transit corridor between the MIRC and the Hawaii Range Complex, and Apra Harbor and select Navy pierside and harbor locations. The current supplemental EIS will assess ongoing and future military readiness activities conducted at sea and on Farallon de Medinilla within the study area beyond 2020. The current EIS also will incorporate new information available after the release of the 2015 EIS, including an updated acoustic effects model, updated marine mammal density data, and other best available science. Comments are due Sept. 15, 2017. Contact: Department of the Navy, Naval Facilities Engineering Command Pacific; 808-472-1007

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Oregon/Calf Copeland Restoration Project
GENERAL ENVIRONMENT AND SAFETY

Notice announces the intention of the U.S. Forest Service to prepare an environmental impact statement regarding the Calf Copeland Restoration Project in the Umpqua and Diamond Lake districts of the Umpqua National Forest in Oregon. The project would use timber harvest, noncommercial thinning, and prescribed fire to reduce stem densities and improve the fuel profiles in plantations and in older stands with sugar pine or ponderosa pine. The project also

would place shaded fuel breaks along roads to help manage wildlife to reduce the risk of stand replacement fire in the remaining late-successional and old-growth stands. In addition, the project would provide log placement in lower Calf Creek to improve stream conditions, restore two wetlands, and possibly decommission or close roads to improve watershed conditions. The issuance of a draft EIS is scheduled for December 2018, and the issuance of a final EIS is scheduled for July 2019. Comments are due Aug. 31, 2017. Contact: Richard Helliwell; USFS; 541-957-3337; rhelliwell@fs.fed.us

GENERAL ENVIRONMENT AND SAFETY
Oregon/Wallowa Lake County Service District Hydro Station Project
GENERAL ENVIRONMENT AND SAFETY

Notice of FERC announces receipt of an application by Wallowa Resources Community Solutions Inc., of Enterprise, Ore., to construct the Wallowa Lake County Service District Hydro Station Project, a qualifying conduit hydropower facility near Joseph, Ore. The project would consist of a new 20 kilowatt impulse turbine and induction generator and a 13-by-14-foot powerhouse. The project would be located along the existing State Park Spring municipal water pipeline and have an estimated annual generating capacity of 149,000 kilowatt-hours. Motions to intervene are due Aug. 24, 2017. Comments are due Sept. 8, 2017. Contact: Christopher Chaney; FERC; 202-502-6778; Christopher.Chaney@ferc.gov

82 FR 35773 (08/01/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Texas/Kinder Morgan US, Mexico Border Natural Gas Facilities
GENERAL ENVIRONMENT AND SAFETY

Notice of FERC announces the filing of an application by Kinder Morgan Border Pipeline, of Houston, to amend its current authorization under Natural Gas Act Section 3 and presidential permit to increase the design capacity of the company's border facilities from approximately 300 million cubic feet per day (MMcf/d) to 450 MMcf/d. FERC will complete an environmental assessment or issue a notice of schedule for environmental review by Oct. 23, 2017. Comments are due Aug. 15, 2017. Contact: FERC, Office of External Affairs; 866-208-3676; FERCOnlineSupport@ferc.gov

82 FR 35770 (08/01/2017)

Regulatory Update

GENERAL ENVIRONMENT AND SAFETY
Wisconsin/Cross-Media Electronic Reporting
GENERAL ENVIRONMENT AND SAFETY

Notice of the EPA announces approval of a request from Wisconsin concerning cross-media electronic reporting requirements. The approval authorizes the state to revise its EPA-authorized

programs to allow electronic reporting as part of its programs regarding state implementation plans, NESHAPs, operating permit programs, NPDES permitting, drinking water, underground injection control, hazardous waste, underground storage tanks, general pretreatment standards, and state sludge management programs. The drinking water rule approval is effective Aug. 31, 2017, if no hearing requests are received by that date. The remaining approvals are effective Aug. 1, 2017. TRUMP'S EPA: Agency at a crossroads -- Complete coverage

September 19, 2017

Latest News

Facing Uncertainty, SAB Invites Pruitt To Discuss 'Ongoing Future Role'

Fearing the Trump administration may decide to sidestep seeking its advice, EPA's Science Advisory Board (SAB) is making the case to Administrator Scott Pruitt to continue using the board, inviting him to attend an upcoming meeting to share his views of the panel's future role while reminding him of some of SAB's past reviews.

NRC Raises Jurisdictional Questions Over EPA Uranium Groundwater Rule

Nuclear Regulatory Commission (NRC) staff says EPA's re-proposed groundwater protection rule for uranium in-situ recovery (ISR) mining reaches beyond the agency's jurisdictional authorities, by encroaching on NRC's authorities to regulate the activity and applying the wrong statutory authority in an attempt to protect potential future groundwater uses.

EPA Sidesteps State Request For Update On ESA Pesticide Framework

EPA is sidestepping calls from state regulators who are pressing the agency on whether it will meet a year-end court deadline for completing the first three consultations under a new federal framework for assessing pesticides' risks to endangered species after industry groups earlier this year urged the agency to scrap the process, calling it overly conservative and unrealistic.

Trump Officials See Budget Gain, Rule Reforms, Speeding DOE Cleanups

Trump administration officials say plans to increase funds for the Energy Department's (DOE) massive cleanup program by almost $500 million next year, as well as eased regulatory requirements, will allow them to speed cleanups, a change from the prior administration which warned of a significant gap between regulatory mandates and available funds.

Long Delay Expected For EPA Action On Low-NOx Heavy-Duty Truck Rule

EPA is expected to take a long delay before officials begin developing an ultra-low nitrogen oxide (NOx) standard for heavy-duty trucks, which the agency late last year

agreed to pursue in response to a petition by California and other state clean air agencies as well as environmental groups.

Subject: Bishop: 'Silly' to delay sportsmen's package over silencer provision

By Anthony Adragna

10/03/2017 02:26 PM EDT

House Natural Resources Chairman Rob Bishop told reporters today it would be "silly" to remove provisions in a broad sportsmen's package, H.R. 3668 (115), loosening restrictions on purchasing gun silencers even after the nation's worst shooting massacre in modern history.

"The suppressor part actually helps people," he said. "To remove it, you're not helping anybody out. That would be silly to do that."

He added: "If that's a hang up, that's sad that that's a hang up."

GOP sources previously told POLITICO the Las Vegas shooting would derail consideration of the Sportsmen's Heritage and Recreational Enhancement Act at least in the short term.

Bishop said he'd been told by leadership the legislation would get a floor vote "soon," but said he'd never been given a specific date. But the Utah Republican said he hadn't spoken to them about the matter this week.

"To get a floor vote for things, I would strip naked if I had to," he said.

WHAT'S NEXT: Republican sources have previously indicated the SHARE Act is unlikely to get a floor vote in the near future.

Subject: POLITICO's Morning Transportation: New drone pilot program takes off — Problem Solvers hold out hope for an infrastructure solution in tax plan — Tax plan treads lightly on commuter tax benefit

By Tanya Snyder | 11/03/2017 10:00 AM EDT

With help from Stephanie Beasley and Brianna Gurciullo

TAKING OFF: DOT rolled out its new drone pilot program Thursday, putting a draft notice in the Federal Register that outlines how to apply. The final notice will go up next week. The roll-out shindig, featuring drone industry members, public officials and others, was at DOT headquarters, with speakers including: FAA Deputy Administrator Dan Elwell, FAA Administrator Michael Huerta, New Mexico Gov. Susana Martinez, Sen. John Hoeven (R-N.D.), Rep. Jeff Denham (R-Calif.), AUVSI President and CEO Brian Wynne, Florida Power & Light's David Herlong, Deputy U.S. Chief Technology Officer Michael Kratsios and Transportation Secretary Elaine Chao.

Tl;dr: Huerta said the best applications "will have a well-defined framework for federal and non-federal entities in managing drone flights" and will "have a strong industry partner on board to help explore innovative operations that the FAA currently restricts, like flights beyond visual line of sight, flights at night or flights over people." DOT will pick at least five communities once all applications are in.

THANK GOD IT'S FRIDAY: Thanks for tuning in to POLITICO's Morning Transportation, your daily tipsheet on all things trains, planes, automobiles and ports. Tanya has her bike helmet on and is ready to roll, so be sure to send her your tips, well wishes and random thoughts: tsnyder@politico.com or @TSnyderDC.

"New York City, Old St. Joe, Albuquerque, New Mexico / This old rig is humming and rolling and she's doing fine / If somebody wants to know what's become of this so and so / Tell em' I'm somewhere looking for the end of that long white line." (h/t Ben Lefebvre)

GET LISTENING: Follow MT's playlist on Spotify. What better way to start your day than with songs (picked by us and readers) that are all about flying, driving, commuting and sailing?

TIME CRUNCH? After the Federal Register drone pilot document officially publishes, governments will have 20 days to send in a "notice of intent," or else they won't be able to apply to be in the program this time around.

Workin' hard: In the wake of this year's hurricanes, the FAA "worked overtime to process more than 300 authorizations for drone use in the search, rescue and delivery efforts," Chao said.

And it's worth mentioning: Denham told Chao during his remarks that he and his colleagues "look forward to working with you" on a long-term FAA bill, "as well as this huge infrastructure package that is coming very, very soon."

HOPE SPRINGS ETERNAL: The White House invited members of the infrastructure working group of the Congressional Problem Solvers Caucus over Thursday, following a meeting the group had with Gary Cohn last week. According to one of the attendees, lawmakers renewed their call to combine an infrastructure package with a tax overhaul, even in the face of administration resistance. Rep. Elizabeth Esty (D-Conn.) said she still thinks it could happen - and that it could help turn the tax package from a partisan food fight into a unifying cause with overwhelming support.

IS THERE SOMETHING IN THAT BIG BLACK BAG FOR ME? The GOP tax overhaul plan introduced Thursday would remove a key incentive for employers to offer commuter tax benefits. While employers would still be allowed to either give employees untaxed transportation money as a fringe benefit or to deduct it as pre-tax income from their paychecks, the businesses themselves would not be able to write off the expense. The cap for the transit and parking subsidies (or pre-tax contributions) would still each be $260 per month for 2018. Several well-positioned urban Republicans, including Reps. Pete King of New York, Barbara Comstock of Virginia and Mike Bishop of Michigan, worked hard to keep the benefit.

And... The legislation would also nix private activity bonds. That provision is likely to irk localities that use them for infrastructure upgrades.

THAT NEW SCANNER TECH: TSA has awarded a $4 million contract to Analogic Corporation to develop new 3D baggage scanners. Analogic gets 12 months to develop prototypes of computed tomography scanners with 3D imaging and "advanced threat detection algorithms" for airport security checkpoints. The scanners will be provided to TSA with a two-year warranty. "We are honored to receive this contract, which represents the next step toward CT technology taking a predominant place at airport checkpoints to improve security, airport efficiency and passenger satisfaction," Analogic President and CEO Fred Parks said in a statement.

CBO SCORES SENATE TSA BILL: The Congressional Budget Office released a score for the Senate Commerce Committee-approved TSA reauthorization bill, S. 1872 (115) . CBO estimated that it would cost $16 billion to implement the three-year bill, which would not increase direct spending or affect revenues. The Senate bill would renew TSA authorities for the first time in its history and authorize a total of $24 billion in spending. It includes several provisions aimed at improving airport security including mandates for TSA to expand the PreCheck program, increase its use of bomb-sniffing dogs and to more rapidly deploy new screening technologies.

AIR TRAVEL FROM MIDDLE EAST STILL DRAGGING: Airline traffic between Middle Eastern countries and the United States has not bounced back from the cumulative impact of the Trump administration's bans on in-flight electronics and travel from certain Middle Eastern countries, despite the electronics ban being lifted over the summer, according to the latest International Air Transport Association industry report . The group noted that the 3.7 percent increase in demand Middle East carriers saw in September was the slowest rate of increase since February 2009. "Traffic between the region and the U.S. has fallen for six consecutive months

through August," IATA said.

CALLING FOR BOLLARDS: In the wake of Tuesday's terrorist attack in which a man drove a truck into a bike lane, New York political leaders called for more traffic barriers to separate bike lanes and pedestrian walkways from vehicle traffic. Ydanis Rodriguez, chairman of the City Council's transportation committee, is promoting hit bill requiring the city DOT to install bollards around schools, pedestrian plazas, and high-fatality intersections, reports Conor Skelding. Sen. Kirsten Gillibrand (D-N.Y.) introduced a similar bill in the U.S. Senate on Wednesday. Law or no law, the city started installing dozens of jersey barriers throughout the city on Thursday.

HOUSE BILL WOULD REVIVE TSA AIR CARGO DIVISION: Rep. Bennie Thompson (D-Miss.) introduced legislation, H.R. 4176 (115) , on Thursday that would direct TSA to establish an office for air cargo security and set up a pilot program to expand its use of 3D cargo scanners, among other items. Industry groups such as the Cargo Airline Association and the Airforwarders Association have been pressing TSA to consolidate its air cargo staff into one division, as it had previously, and raised the issue during a House Homeland Security Committee hearing back in July. Thompson, who is the top Democrat on the committee, said in a statement that "the threat of a terrorist attack using air cargo on passenger planes is very real and should not be understated".

TRYING TO KEEP UP: At the drone event, Chao also mentioned self-driving vehicles, saying DOT is starting to revise the guidelines that it published two months ago. "This technology also has tremendous potential to reduce highway fatalities and provide greater mobility for under-served communities, such as the elderly and the disabled," Chao said. "So work is advancing quickly on all these fronts. In fact, it's advancing so quickly that an updated version is already in the works for 'A Vision for Safety 3.0.' And that's how fast technology is changing."

Not driving alone: Finch Fulton, who's deputy assistant secretary for transportation policy at DOT, said at a separate event Thursday that the next iteration of the guidance will include other modes, per Eno's Greg Rogers.

SLICE OF PI: Jeff Bezos' spaceflight company, Blue Origin, has followed lobbyist William Stiers to Maynard Cooper & Gale, where Stiers moved after 20 years with Balch & Bingham. (h/t Politico Influence)

SHIFTING GEARS: The Railway Supply Institute has scrambled its Board of Directors roster after the passing last month of Dan O'Neal, who was set to become vice chair. Now Jason Connell will become the secretary-treasurer, taking the place of Bob Hulick, who will become board vice chair. Jack Isselmann will also serve on the board.

THE AUTOBAHN:

- Amazon to start package delivery by drone - in India. The Economic Times.

- "Etihad pares back U.S. service after split with American Airlines." The Wall Street Journal.

- DOT adviser Jim Ray fills in infrastructure plan details in Tampa. Florida Politics.

- "New Tesla autopilot functions are coming in 'the next several months.'" Futurism.

- "Los Angeles, Long Beach port officials adopt new clean air plan." Press-Telegram.

- "'Keep on riding.' Bicyclists pedal on after deadly terror attack on America's busiest bike path." The Washington Post.

Subject: Breaking News: Murphy wins New Jersey governor's race

Democrat Phil Murphy has won New Jersey's governor's race, defeating Republican Lt. Gov. Kim Guadagno, according to three news networks (ABC, CNN, and NBC) that called the race based on exit polling.

No votes have been reported yet in the race between Murphy, a former executive at Goldman Sachs, and Guadagno. The polls closed at 8 p.m. Murphy held a wide lead in public polling, and unpopular Republican Gov. Chris Christie proved to be a major drag on his former running mate.

Subject: Greens sue EPA over missed ozone designation deadline

By Alex Guillén

12/04/2017 03:04 PM EDT

Ten environmental and public health groups today sued EPA for missing a key deadline to implement the 2015 ozone standard.

EPA faced a statutory deadline on Oct. 1 to say which parts of the U.S. were meeting the new ozone standard. Administrator Scott Pruitt said over the summer that he would delay that decision by one year, although he reversed course after several lawsuits were filed. EPA last month issued designations for 85 percent of all U.S. counties which it said met the standard or did not have enough information to decide.

But the agency has remained silent on the remaining 15 percent of the nation, which includes many of the urban and downwind regions that face the worst smog pollution. Any area deemed in "nonattainment" will have to write a plan to reduce ozone-related pollution, and EPA's delay also puts off any requirement for those areas to act.

A coalition of Democratic attorneys general is also expected to sue EPA soon.

EPA has faced similar lawsuits after delaying designations under previous standards — such as the 2010 sulfur dioxide rule, for which environmental groups negotiated a consent decree with the Obama administration that set a series of designation deadlines lasting through 2020.

It's unclear whether a similar deal can be reached here. Pruitt recently issued a directive barring EPA from agreeing to such consent decrees. If EPA resists negotiations, the court may set its own timeline for the agency to act.

WHAT'S NEXT: The environmentalists' suit was filed in the U.S. District Court for Northern California. EPA has not indicated when it may act on the remaining designations.

Subject: Morning Media: Scaramucci to reemerge on Friday -- Brady room brawl -- Fox in talks with Ion media to operate more local stations

By Hadas Gold | 08/03/2017 06:15 AM EDT

With Alex Weprin and Cristiano Lima

BILL SHINE IS TEAMING UP WITH ANTHONY SCARAMUCCI. According to CNN, "Scaramucci will be hosting an online event on Friday where he will address the American people directly. Scaramucci said this daytime event -- which will be broadcast on various live platforms with help from former Fox News co-president Bill Shine -- will give him the opportunity to reach and communicate with the President's base."

Shine is personally close to Scaramucci, and was rumored to be in line for a White House job after he dined with the president, first lady, Scaramucci, Sean Hannity and other Fox News hosts at the White House just last week. Now that Scaramucci is out, it's not clear if that possibility is still in the cards. But Shine, ousted from Fox in May, has found at least one thing to keep him occupied.

--Mike Cernovich and BuzzFeed News acquired and published Scaramucci's "communications plan" for the White House before he was fired by President Trump. The draft memo, which the former Wall Street financier had planned to send out to staff, discussed common priorities for a political communications team, like getting ahead of the news cycle and filling the "content void." But Scaramucci, whose tenure was quickly enveloped in controversy following his explosive interview with The New Yorker where he ripped into Reince Priebus and Steve Bannon, also stressed the importance of "[making] it clear that horn tooting and denigrating colleagues is unacceptable." "The Mooch," as he's widely-known, also discussed the need to "foster better working relationships" with the mainstream media, while repeating his talking points about cracking down on White House leaks. Read their reports here.

--Scaramucci still sees a future for himself in politics, Business Insider's Linette Lopez reports , "especially now that he thinks President Trump owes him a favor for his role in getting rid of former White House Chief of Staff Reince Priebus. This is obviously a gamble, but it's completely in character." Lopez, who has known and reported on Scaramucci for years, goes deep in the profile, exploring who Scaramucci is, where he comes from and why he attached himself to Trump. She also reports that the sale of his firm SkyBridge Capital is still happening, valued at just under $200 million.

Good morning and welcome to Morning Media! "BRADY ROOM BRAWL" -- that's what The New York Times' Michael Grynbaum called

yesterday's' fireworks-filled briefing with White House senior advisor Stephen Miller about new plans to curb legal immigration. First it was with Times correspondent Glenn Thrush, who asked what research backed up the policy proposal. Miller tried to argue at one point about using common sense as Thrush kept pushing him about statistics studies, leading to Miller lashing out at Thrush saying "maybe we'll make a carve-out in the bill that says the New York Times can hire all the low-skilled, less-paid workers they want from other countries and see how you feel then about low-wage substitution."

Next up was CNN's Jim Acosta, who recited a portion of "The New Colossus," the poem engraved on the pedestal of the Statue of Liberty, and asked about the requirement that an immigrant know English before moving to the U.S. Miller and Acosta argued about what year the poem was added to the Statue of Liberty, before returning to the language issue, with Acosta saying many immigrants learn the language later in life. "Are we just going to bring in people from Great Britain and Australia?" he asked rhetorically.

That's when Miller dropped the money quote: "Jim, I can honestly say I am shocked at your statement that you think that only people from Great Britain and Australia would know English," Miller responded. "Actually, it reveals your cosmopolitan bias to a shocking degree."

More from my colleague Nolan McCaskill here.

-- Keep in mind that it's likely President Donald Trump and his base *loved* watching this. Curbing immigration is Trump's core issue and today's announcement and briefing, was lapped up by Trump's cheerleaders (just check out Ann Coulter's twitter feed). So while reporters might hem and haw about how Miller acted in the briefing room, remember who the true intended audience likely is.

TRUMP LAUNCHES 'REAL NEWS' ON HIS FACEBOOK PAGE, hosted by his daughter-in-law Lara Trump, the series on Facebook launched on Sunday said "Want to know what President Trump did this week? Watch here for REAL news!"

Lara Trump, who formerly worked for "Inside Edition" appears as the video's host in front of a Trump campaign background. In TV-anchor style she offers positive updates about the administration, and notes she'll be back every week. As of Thursday morning Sunday's video has 2.1 million views. More from BuzzFeed here.

FOX IS IN TALKS TO OPERATE LOCAL TV STATIONS WITH ION MEDIA, "potentially paving the way for Fox to dump Sinclair as an affiliate partner," Bloomberg reports. "Closely held Ion would contribute its more than 60 independent stations to the joint venture, while Fox would throw in its 28 local stations, which include big markets such as New York and Los Angeles. As part of the deal, Fox would consider switching its affiliation to Ion from Sinclair for 26 stations that are up for renewal this year."

--Sinclair executives told shareholders on its quarterly earnings call that local news needs *more* consolidation. "Right now there are three to five local players, and to us that doesn't make sense," CEO Chris Ripley said Wednesday during the call, adding that consolidating news

operations would lead to "significant savings." The company also said that it expects its acquisition of Tribune Media to close this year.

DAILY MAIL, HUFFPOST LEAD THE PACK IN JULY FACEBOOK ENGAGEMENT FOR NEWS OUTLETS via Cristiano Lima: New rankings by NewsWhip Analytics place The Daily Mail, BoredPanda, HuffPost and CNN at the top of the class for total engagement by news publishers on the social media network last month. All three outlets cleared the 20 million threshold for Facebook interactions in July, followed closely by NBC, The New York Times, BuzzFeed and Fox News. It is the first time The Mail has led the rankings, which the analytics group attributed to the organization's re-energized "focus on the US market." Breitbart is also in the top 15, just behind the Washington Post. See the full rankings here.

DONALD TRUMP THREATENED TO SUE THE PRODUCERS OF SYFY's SHARKNADO for not casting him as the president, according to The Hollywood Reporter. The filmmakers originally wanted to cast Sarah Palin as president in the third installment of the absurd film series, but when that didn't work out they turned to Trump who accepted the role. A contract was sent, but was followed by silence from the Trump camp. Turns out he was actually planning his very real campaign for president. When the producers decided to move forward with their back up, businessman Mark Cuban, Trump was furious. "[W]e immediately heard from Trump's lawyer," Sharknado studio head David Latt said. "He basically said, 'How *dare* you? Donald *wanted* to do this. We're going to *sue you!* We're going to shut the entire show down!' "

COREY LEWANDOWSKI AND DAVID BOSSIE'S BOOK GETS THE TITLE IT WAS ALWAYS GOING TO HAVE: 'LET TRUMP BE TRUMP.' Last year Ken Vogel and I reported that Lewandowski had a $1.2-million offer from HarperCollins to write a book chronicling his time running Trump's presidential campaign, but the publishing giant backed away from the deal amid concerns about Lewandowski's nondisclosure agreement. The tentative title then, which Lewandowski denied he was shopping around: "Let Trump be Trump." That's the same title of the book to be released in December by Lewandowski and former campaign aide David Bossie.

THE U.S. PRESS FREEDOM TRACKER, WHICH LAUNCHED Wednesday, is the latest collaborative online tool to track violations of press freedom. A joint effort by the Committee to Protect Journalists, the Freedom of the Press Foundation and numerous other press freedom groups, with the help of our former colleague Peter Sterne, the tracker will monitor and document instances of "arrests of journalists," "equipment searches and seizures," "physical attacks on journalists" and "border stops of journalists" in an attempt to shed light on efforts to undermine the freedom of the press. Inspired and funded in part by then-GOP candidate Greg Gianforte's body slam of Guardian reporter Ben Jacobs, and his ensuing $50,000 donation to the CPJ, the group tells WIRED it hopes the database will serve as a tool in the battle against threats to freedom of the press.

Driving the Day

Happy weekend. UPDATE: As we told you earlier this week, **PRESIDENT TRUMP** is meeting with **MITCH MCCONNELL** next week. That meeting is scheduled for Monday, as of now. And the topic is the fall legislative agenda.

TRUMP has left the White House with Lindsey Graham, per pooler Chris Johnson of the Washington Blade. Johnson said golf clubs were being loaded into the motorcade.

ATTENTION REPUBLICAN MEMBERS OF CONGRESS: -- WSJ's Mike Bender, Siobhan Hughes and Kristina Peterson: "The president also has urged voters to oust lawmakers who don't support his tax overhaul plan this year; he phoned his former chief strategist, Steve Bannon, to offer encouragement after Mr. Bannon appeared on Fox News on Monday vowing to unseat sitting Republicans who don't actively support the president's agenda, said two people familiar with the call." http://on.wsj.com/2g9ZePm

DONALD TRUMP, OR BARACK OBAMA?, by **PETER BAKER** on A1 of the Saturday Times: "The president was frustrated. Lawmakers were not passing what he wanted. They were 'obstructionists,' he complained. So he took out his pen, signed his name to an order and took action on his own. 'We're taking a little different route than we had hoped because getting Congress - they forgot what their pledges were,' he said.

"The chief executive attacking Congress was President Trump , but his words might have been spoken by President Barack Obama. Mr. Trump has concluded that he cannot wait for a polarized Congress to act, so he is turning to executive power to accomplish what lawmakers will not, in this case erasing the legacy of the Obama years." http://nyti.ms/2iboysE

NOT THE MESSAGE THEY'RE LOOKING TO SEND -- "Mnuchin Says Estate Tax Repeal Will Help 'Rich People' Most," by NYT's Alan Rappeport: "President Trump and Republican leaders have positioned a proposed repeal of the estate tax as a way to help farmers, ranchers and small business owners. But on Friday, Steven Mnuchin, the Treasury secretary, offered a significant concession about who would benefit the most if the so-called death tax disappears: the rich.

"Speaking at the Institute for International Finance conference , Mr. Mnuchin said the estate tax should be eliminated for both philosophical and economic reasons. He said that many taxpayers give the government half their income during their lives and that they should not have to give away a big chunk when they die - even if their families are wealthy.

"'Obviously, the estate tax, I will concede, disproportionately helps rich people,' Mr. Mnuchin said of the administration's proposal to repeal the measure. Mr. Mnuchin's comments contrasted starkly with his boss, President Trump, who pilloried the estate tax in a speech in Indiana last month by saying it is a drag on the working class." http://nyti.ms/2gFeynK

QUOTES OF THE DAY ...

-- JACKSON DIEHL in WaPo, "Bob Corker on Trump's biggest problem: The 'castration' of Rex Tillerson": "'You cannot publicly castrate your own secretary of state without giving yourself that binary choice,' Corker told me in a phone interview Friday. 'The tweets -- yes, you raise tension in the region [and] it's very irresponsible. But it's the first part' -- the 'castration' of Tillerson - 'that I am most exercised about.'"

-- ANOTHER NOTEWORTHY BITE: "'Now that the [World War III suggestion] is out there, [Trump] will do everything in his power to prove that it is not true,' he told me. If so, the senator from Tennessee will have achieved his purpose." http://wapo.st/2xFkVSI

-- SEN. TED CRUZ at the Koch brothers' event in New York, per the WaPo: "Republicans could face a 'Watergate-level blowout' in the midterm elections if they don't make major legislative strides on taxes and health care, invoking the political scandal that brought down Richard Nixon's presidency and set back the GOP considerably in subsequent elections. 'If tax reform crashes and burns, if [on] Obamacare, nothing happens, we could face a bloodbath,' said Cruz, who spoke in a moderated discussion." http://wapo.st/2ynCFRA

WHAT DONALD TRUMP WILL NOT LIKE TO READ -- "NFL not seeking mandate for players to stand during anthem," by Reuters' Frank Pingue: "The NFL said on Friday it has no plans to mandate players stand for the U.S. national anthem, but will rather present a possible solution on how to end the controversial protests when it meets with team owners next week." http://bit.ly/2gEmohH

WHAT AMERICA IS WAKING UP TO -- NAPA VALLEY REGISTER: **"GLIMMER OF**

HOPE AMID DESTRUCTION" http://bit.ly/2ghwAzE ... **PALM BEACH POST,** (with photo of Paul Ryan in San Juan): "Puerto Rico's quagmire blamed on bureaucracy" http://bit.ly/2ibeu2G ... **DALLAS MORNING NEWS:** "Premiums could soar for millions" http://bit.ly/2yoHTg7

HEARTBREAKING -- FROM CALIFORNIA -- "Families Scour Burnt Ruins for Missing in California," by WSJ's Erin Ailworth, Alejandro Lazo, Ian Lovett and Zusha Elinson in Santa Rosa, California: "Family members looking for clues are sifting through the rubble of homes in neighborhoods flattened by fire. They have showed up at evacuation shelters, posted desperate notes on Facebook and filed missing-person reports with the sheriff's office. Investigators comb burned-out homes with dogs trained to locate cadavers and other human remains. More than 1,300 missing-person reports have been filed in Sonoma County alone since the start of the fires -- and more than 1,000 have ended with happy news so far. But ... [f]or now, many families remain in limbo." http://on.wsj.com/2ynPJ9v

-- "Wine Country fire: Huddled in pool amid blaze, wife dies in husband's arms," by San Francisco Chronicle's Erin Allay: "As fire raged all around them and smoke choked their lungs, Carmen and Armando Berriz had no choice but to cling to one another while immersed in a swimming pool behind their rented house on the north edge of Santa Rosa. They held on through the long hours of the night, until the flames that had destroyed the house on the forested cul-de-sac finally began to recede, until the heat was no longer unbearable. And just before daybreak, just as the worst of the inferno had passed, Carmen Berriz stopped breathing. She died in the arms of her husband of 55 years." http://bit.ly/2ie2WMt

--THE LATEST: "Firefighters carve lines around N. Calif. wildfires as death toll goes to 35," by San Francisco Chronicle's Peter Fimrite, Kimberly Veklerov and Jenna Lyons: "Signs of progress cheered battle-weary firefighters Friday after their multipronged attack using helicopters, air tankers and hand crews significantly corralled the deadly fires spreading across Northern California. Firebreaks are now encircling nearly half of each of the two biggest fires in the Wine Country as crews shield the cities of Napa, Calistoga, Geyserville, Sonoma and Santa Rosa.

"The progress was tempered by a rising death toll and new estimates of the destruction: Thirty-five were known to be dead and 5,700 structures destroyed as of Friday night. Two of the fires in California have been contained and five others burned into each other, combining forces. There are now 17 fires burning statewide, including 15 in Northern California, which have blackened 222,000 acres, or about 330 square miles." http://bit.ly/2gjKDod

****** **A message from Chevron:** Advanced technology is helping us find safer ways to deliver energy. We're piloting a program that uses drones to monitor tanks and pipelines. Watch the video: http://politi.co/2yv61yq ******

THE BIG PICTURE -- "In a sudden flurry, Trump looks to deliver for his voters," by

Reuters' Jim Oliphant: "For the moment, U.S. President Donald Trump is going it alone. After weeks of seeing his agenda imperiled by Republican divisions and infighting among his aides, Trump has been a whirl of activity this week, reasserting his campaign priorities and trying to deliver wins for his fervent but frustrated base of supporters.

"Trump took steps to dramatically undercut the Obamacare health system, sent notice he was willing to scuttle the nuclear deal with Iran, moved to roll back coal-plant limits, and again demanded a wall along the Mexican border. And on social media the Republican president appeared to relish his feuds with the news media, senior Republicans in Congress, and National Football League players who have protested during the national anthem.

"In a sense, it was the vintage, freewheeling Trump: throwing red meat to his voter base, following his gut, and haranguing his critics. But by the end of the week, he had made more progress in undoing the policy accomplishments of his Democratic predecessor, Barack Obama, than he had in some time." http://reut.rs/2yJJ3Uq

ON THE PRESIDENT'S MIND -- at 7:18 a.m.: "Health Insurance stocks, which have gone through the roof during the ObamaCare years, plunged yesterday after I ended their Dems windfall!" ... **at 7:27 a.m.:** "Very proud of my Executive Order which will allow greatly expanded access and far lower costs for HealthCare. Millions of people benefit!"

MORE HEALTH CARE FIGHTS LOOMING -- "Trump's Obamacare attack heralds new health-care battles on Capitol Hill," by WaPo's Mike DeBonis and Ed O'Keefe: "President Trump's decision Thursday to cut off crucial health-care subsidies has once again revived the long-running debate over the Affordable Care Act, increasing the potential for a government shutdown in December and making the issue central in next year's midterm elections. ...

"Trump and Republican allies defended the move as removing a giveaway for insurance companies, and they blame rising premiums on fundamental flaws in then-President Barack Obama's signature health-care reform law. But Democrats called it an act of sabotage against the ACA for which the GOP will be held responsible at the polls.

"The dispute sets the stage for another wave of political battles over the nation's health-care system, as Republican lawmakers will need to decide whether to authorize the subsidies through legislation as well as whether to once again attempt a broader repeal of the ACA, popularly known as Obamacare. Democrats could also use a Dec. 8 appropriations deadline to threaten a government shutdown if the subsidies are not restored." http://wapo.st/2ymdX3U

-- BLOOMBERG'S SAHIL KAPUR (@sahilkapur): "As a pure policy matter ending CSRs is the rare example of a lose-lose-lose. Raises the deficit & increases premiums to insure fewer people."

BUSINESS BURST -- FT: "Saudi Aramco considers shelving international IPO," by

Anjli Raval in London, James Fontanella-Khan and Arash Massoudi in New York and Simeon Kerr in Dubai: "Saudi Aramco is considering shelving plans for an international listing in favour of a private share sale to the world's biggest sovereign wealth funds and institutional investors. Talks about a private sale to foreign governments including China and other investors have gathered pace in recent weeks, according to five people familiar with the initial public offering preparations, amid growing concerns about the feasibility of an international listing. The Saudi state oil company has struggled to select a suitable international venue for its shares, as New York and London have vied for what has been billed as the largest ever flotation." http://on.ft.com/2yitAd7

-- MOELIS, the investment bank where Eric Cantor works, was advising the Aramco on its IPO, according to reports earlier this year.

SPOTTED IN SEOUL -- Chad O'Carroll (@chadocl): "'We need to give death to old crazy man @realDonaldTrump' - North Korea flyer I just found in Downtown Seoul" -- ***pic*** http://bit.ly/2xGSmEE

ELIANA JOHNSON: "Nikki Haley was Trump's Iran whisperer": "At a mid-day meeting in the Oval Office in late July, U.N. ambassador Nikki Haley came to President Donald Trump with an offer. Trump had grudgingly declared Tehran in compliance with the 2015 Iran nuclear deal earlier in the month, at the urging of Secretary of State Rex Tillerson and Secretary of Defense James Mattis. Trump hated the deal. But the two men pushed him to certify it, arguing in part that he lacked a strong case for declaring Iran in violation. A refusal to do so would have looked rash, they said, convincing Trump sign off for another 90 days.

"Haley, in that July meeting, which also included National Security Adviser H.R. McMaster and Vice President Mike Pence, asked the president to let her make the case for decertification. 'Let me lay a foundation for it,' she said, according a source familiar with the proceedings. The president agreed. Haley would become the administration's most vocal public proponent of decertification -- and Trump's favorite internal voice on Iran -- further boosting her standing with the president at a time when she is seen as a potential successor to Tillerson, whose tense relationship with Trump has burst into the open in recent days.

"A month after her talk with Trump, Haley flew to Vienna to visit the headquarters of the International Atomic Energy Association, where she pressed officials about Iranian compliance with the deal. ... While many of the president's cabinet members, aides, and advisers work to restrain his impulses, when it came to Iran deal Haley did the opposite-channeling what many Democrats and even some Republicans consider the president's destructive instincts into policy. ... One White House official described the escalating tensions between Tillerson and Haley as reaching 'World War III' proportions." http://politi.co/2xEJomr

THE RUSSIA PROBE ...

-- **"Mueller's team interviewed Priebus on Friday:** 'He was happy to answer all of their questions,' the former White House chief of staff's lawyer said," by Josh Dawsey and Annie Karni. http://politi.co/2giO7HO

-- **"Manafort Had $60 Million Relationship With a Russian Oligarch,"** by NBC News' Aggelos Petropoulos and Richard Engel in London: "An NBC News investigation reveals that $26 million changed hands in the form of a loan between a company linked to Manafort and the oligarch, Oleg Deripaska, a billionaire with close ties to the Kremlin. The loan brings the total of their known business dealings to around $60 million over the past decade, according to financial documents filed in Cyprus and the Cayman Islands. ...

"Manafort's spokesman, Jason Maloni, declined to give specific answers about the loans, but released a statement to NBC News saying, in part, 'Mr. Manafort is not indebted to former clients today, nor was he at the time he began working for the Trump campaign.' He later revised the statement, removing that sentence entirely. It now reads: 'Recent news reports indicate Mr. Manafort was under surveillance before he joined the campaign and after he left the campaign. He has called for the U.S. Government to release any intercepts involving him and non-Americans in hopes of finally putting an end to these wild conspiracy theories. Mr. Manafort did not collude with the Russian government.'" http://nbcnews.to/2gFyxTF

--**"FBI document cache sheds light on inner workings of Russia's U.S. news (and propaganda) network,"** by Yahoo News' Hunter Walker and Michael Isikoff: "On Jan. 23, 2017, the day he started as a Washington correspondent for Sputnik, Andrew Feinberg was emailed a copy of a 'style guide' that laid out the organization's mission. The 103-page handbook for publications of Sputnik's Kremlin-owned parent company, Rossiya Segodnya, made it clear that traditional journalistic neutrality was not the company's mandate. Instead, Sputnik reporters were told they should provide readers 'with a Russian viewpoint' on issues and 'maintain allegiance' to the country." https://yhoo.it/2yk6mRr

FLORIDA MAN -- "David Rivera evades U.S. Marshals," by Matt Dixon in Tallahassee: "While former congressman David Rivera runs for the Florida House, he is also running from the U.S. Marshals Service. The U.S. Marshals have attempted to serve the Miami Republican with a summons tied to a Federal Election Commission lawsuit since July, but have been unable to find him. He's also running for an open 2018 Florida House seat." http://politi.co/2xEJz11

HILLARY TO MORNINGSIDE HEIGHTS? -- "Hillary Clinton in talks with Columbia University to take on professor role," by N.Y. Daily News' Nancy Dillon: "The former U.S. Secretary of State and presidential nominee is in talks with Columbia University to take on a formal role at the Ivy League -- and potentially house her archives there, multiple sources told the Daily News. One option under discussion is an esteemed 'University Professor' role that would allow Clinton to lecture across a range of schools and departments without the requirement of a strict course load ... A former law professor, Clinton could maintain the vaunted but vague role indefinitely or decide at a later date she wants to settle at Columbia's celebrated law school or maybe the School of International and Public Affairs." http://nydn.us/2z83O8t

PLAYBOOK METRO SECTION -- "Late Justice Antonin Scalia's Virginia Home Sells for $1.4M in Off-Market Deal," by Realtor.com's Lisa Gordon: "The six-bedroom, five-bathroom home in McLean -- just a couple of stoplights and a bridge over the Potomac from Washington, DC -- was sold in July, according to Fairfax County property records. The home ... [is] a brick Colonial with four white pillars in the front and windows with black shutters. Sitting on 1.45 wooded acres, the 3,807-square-foot home has a circular driveway and is shaded by old-growth trees." ***With two pix of the house*** http://bit.ly/2znwyLt

BOB WEINSTEIN SPEAKS -- HOLLYWOOD REPORTER: "Bob, who worked mostly in Los Angeles while Harvey presided over TWC's New York offices, says he's barely spoken to his brother over the past five years. 'I could not take his cheating, his lying and also his attitude toward everyone,' he says. While he says he knew his brother was unfaithful to wife Georgina Chapman, Bob insists he had no idea about 'the type of predator that he was' and is sickened by Harvey's seeming lack of remorse. 'I have a brother that's indefensible and crazy,' says Bob, adding, 'I want him to get the justice that he deserves.'" http://bit.ly/2hGnLvT

HOLLYWOODLAND -- "Weinstein Co. Exploring Sale or Shutdown," by WSJ's Ben Fritz and Erich Schwartzel: "Weinstein Co. is exploring a sale or shutdown and is unlikely to continue as an independent entity, a person close to the company said. The film and television studio's board of directors and other people close to the company have been approached by possible buyers." http://on.wsj.com/2zntmPF

--"Why Are More American Teenagers Than Ever Suffering From Severe Anxiety?" by Benoit Denizen-Lewis in the cover story of tomorrow's N.Y. Times Magazine: "Parents, therapists and schools are struggling to figure out whether helping anxious teenagers means protecting them or pushing them to face their fears." http://nyti.ms/2kPaYw3

--"Walden Wasn't Thoreau's Masterpiece," by Andrea Wulf in November's Atlantic: "In his 2-million-word journal, the transcendentalist discovered how to balance poetic wonder and scientific rigor as he explored the natural world." http://theatln.tc/2kKzZsc (h/t ALDaily.com)

--"Birth of a White Supremacist," by Andrew Marantz in The New Yorker: "Mike Enoch's transformation from leftist contrarian to nationalist shock jock." http://bit.ly/2gzvBri

--"How Ether Transformed Surgery from a Race against the Clock," by Lindsey Fitzharris in Scientific American's Oct. issue: "It took all of 28 seconds for Liston to remove Churchill's right leg, during which time the patient neither stirred nor cried out. When the man awoke a few minutes later, he reportedly asked when the surgery would begin and was answered by the sight of his elevated stump, much to the amusement of the spectators who sat astounded. The age of agony was nearing its end." http://bit.ly/2g5a1KM (h/t TheBrowser.com)

--"Russia's House of Shadows," by Joshua Yaffa in The New Yorker: "My apartment building was made to house the first generation of Soviet élite. Instead, it was where the revolution went to die." http://bit.ly/2yj4vhF

--"'Our minds can be hijacked': the tech insiders who fear a smartphone dystopia," by Paul Lewis in The Guardian: "Google, Twitter and Facebook workers who helped make technology so addictive are disconnecting themselves from the internet. Paul Lewis reports on the Silicon Valley refuseniks alarmed by a race for human attention." http://bit.ly/2yfCENH

--"A Life on the Line: Cecilia Lam," by Vivian Ho in San Francisco Chronicle - per Longform.org's description: "Eight calls to 911. Three visits by five police officers. One woman's senseless death." http://bit.ly/2ygmSCj

--"Doomsday Pattern: Life in the pre-apocalypse," by Elisa Gabbert in Real Life Magazine: During the spring of 1945, "General Curtis LeMay had been firebombing Japan with napalm, a highly flammable and 'sticky' mixture of gasoline and gelling agents. Almost a million people in 60 cities were 'scorched, boiled, and baked to death,' in LeMay's own words, in these napalm raids. It must have been hard to believe that the A-bomb could be dramatically more deadly - so what would it accomplish?" http://bit.ly/2gA3kkL

--"The Prophet of Germany's New Right," by James Angelos in the N.Y. Times Magazine: "From a tiny village in the country's rural east, a leading nationalist intellectual builds a vision for the future of his movement across Europe." http://nyti.ms/2z2tOSs

--"1491," by Charles Mann, author of "1491: New Revelations of the Americas Before Columbus," in the Atlantic's March 2002 issue: "Before it became the New World, the Western Hemisphere was vastly more populous and sophisticated than has been thought-an altogether more salubrious place to live at the time than, say, Europe. New evidence of both the extent of the population and its agricultural advancement leads to a remarkable conjecture: the Amazon rain forest may be largely a human artifact." http://theatln.tc/2gzDMnl ... ***$12.17 on Amazon*** http://amzn.to/2kSfY39

--"They thought they were going to rehab. They ended up in chicken plants," by Amy Julia Harris and Shoshana Walter in Reveal - per Longform.org's description: "An Oklahoma rehab center puts defendants to grueling, dangerous work in a chicken processing plant. They receive neither pay nor treatment for their addictions." http://bit.ly/2ycoajX

VALLEY TALK -- "Microsoft built tree houses for its employees," by The Verge's Thuy Ong: "The tree houses are a part of Microsoft's 'outdoor districts' which are connected to buildings around its Redmond campus. They feature weatherproof benches, hatches that hide electricity sockets, rustproof rocking chairs, a fireplace, wood canopies, and an outdoor Wi-Fi network. There are ramps built in for those who need them. If you get hungry, there's also an indoor cafeteria that's extended outside and a barbecue restaurant built into a shipping container." http://bit.ly/2wVCpWk

MEDIAWATCH - "The Times Issues Social Media Guidelines for the Newsroom": "Maggie Haberman says: 'Before you post, ask yourself: Is this something that needs to be said, is it something that needs to be said by you, and is it something that needs to be said by you right now? If you answer no to any of the three, it's best not to rush ahead.'" http://nyti.ms/2kOyzNo

-- "Fox Business Network rides politics and punch to ratings success in fight with CNBC," by USA Today's Mike Snider: "The network, which celebrates its 10th anniversary next week, touts robust Nielsen data showing it has won the business daytime slot - from the time the stock market opens at 9:30 until 5 p.m. ET (an hour after its close) - beating CNBC over the past four quarters. ... CNBC still wins across the 24-hour viewing period, the 6 a.m.-11 p.m. segment and the 8 p.m-11 p.m. period, according to data from Nielsen, which does not capture out-of-home viewers who might see CNBC during the business day in the workplace." https://usat.ly/2gF8ADm

OBAMA ALUMNI - Evan Medeiros has been named the Cling family distinguished fellow in U.S.-China studies at the Walsh School of Foreign Service at Georgetown. He most recently was President Obama's senior director for Asian affairs at the NSC and special assistant to the president.

DOUG HEYE was inducted into his high school Hall of Fame on Friday. He was in the class of 1990 at Bishop McGuinness High School in Winston-Salem, N.C. ***Pics*** http://bit.ly/2ykkrP1 ... http://bit.ly/2z6vZEE ... http://bit.ly/2yne7rt

BIRTHDAYS OF THE DAY: Robert Costa, national political reporter for the Washington Post, moderator of PBS's "Washington Week," and a political analyst for NBC News and MSNBC -- Costa and Hallie Jackson were on the same debate team in high school. **How he got his start in journalism:** "I started reporting while I was a student at Pennsbury High School in suburban Philadelphia. I wrote about rock music for the regional newspaper, the Bucks County Courier Times, and I was a news and sports reporter for PHS-TV, the student television station." **Read his Playbook Plus Q&A:** http://politi.co/2g9w6I2

-- Eli Lehrer, president of R Street. **How he got started in politics:** "I played Bill Clinton in my high school's mock election. I won. I was also involved with the left-wing activist group on my college campus. I didn't become a conservative until I was already in Washington." **Q&A:** http://politi.co/2xGNQWA

BIRTHDAYS: Michael Feldman ... Cody Keenan ... Norm Ornstein is 69 ... former White House counsel John W. Dean III is 79 ... Dukes Wooters (hat tip: Ken Vogel) ... Lorie Slass ... Ira Shapiro ... Melissa Maxfield ... Tucker Foote, SVP and head of North America public policy and global trade for MasterCard (h/ts Jon Haber) ... Politico's Erin Aulov ... Catherine Loper ... Jill McAfee ... Brian Hart ... Marc Dunkelman ... Leigh Farris, VP in the office of the chairman at Goldman Sachs ... Marco Acevedo ... Rep.

Suzanne Bonamici (D-Ore.) is 63 ... J.C. Derrick ... Nick Stanley ... TNR's Emily Atkin ... David Lehrer ... Jack Fitzpatrick, a reporter at BGOV and an alum of National Journal and Morning Consult (h/t Zach Montellaro) ...

... Robbie Myers is 31 ... John Hanlon ... Zeenat Rahman ... Collin Burton ... Chris May ... Boston Globe's Victoria McGrane (h/t Annie Linskey) ... Warren Hendriks ... Daniel Castro ... Dave Leichtman, a Democratic advisor for Microsoft's Campaign Tech Services ... Eve Lieberman, COS for Rep. Jared Polis (D-Colo.) ... Jada Bromberg ... Lauren Lyster ... Sydney Lee Simons ... Jason Epstein ... Brian Bond ... Richard Skinner ... David Wallace ... Michele Curtis ... Cavalry's Anang Mittal ... Saul Pink ... Jerry Ceppos, former VP of news at Knight Ridder, is 71 (h/t Carl Lavin)

THE SHOWS, by @MattMackowiak, filing from Dallas:

--CNN's "Fareed Zakaria GPS": Hillary Clinton

--"Fox News Sunday": Sen. Bill Cassidy (R-La.) ... National Security Adviser Lt. Gen. H.R. McMaster ... Sen. Chris Murphy (D-Conn.). Panel: Karl Rove, Marie Harf, Mike Needham and Jerry Seib (substitute host: Fox News' James Rosen)

--CNN's "State of the Union": Secretary of State Rex Tillerson ... Sen. Susan Collins (R-Maine). Panel: David Urban, Neera Tanden, Bill Kristol and Rep. Robin Kelly (D-Ill.)

--CBS's "Face the Nation": Secretary of State Rex Tillerson ... Sen. Lindsey Graham (R-S.C.) ... Israeli Prime Minister Benjamin Netanyahu. Panel: Molly Ball, Jonah Goldberg and David Ignatius ... Retired astronaut Capt. Scott Kelly

-- NBC's "Meet the Press": U.S. Ambassador to the U.N. Nikki Haley ... Ohio Gov. John Kasich. Panel: Dan Balz, Kasie Hunt, Heather McGhee and Kim Strassel

--ABC's "This Week": Nikki Haley ... House Minority Leader Nancy Pelosi (D-Calif.) ... Sen. Susan Collins (R-Maine). Panel: Mary Bruce, Katrina vanden Heuvel, Van Jones, Matt Schlapp and Charlie Sykes

--Fox News' "Sunday Morning Futures": Treasury Secretary Steven Mnuchin ... Joe Lieberman ... Rep. Ed Royce (R-Calif.) ... Sebastian Gorka. Panel: Ed Rollins and Lee Carter

--Fox News' "MediaBuzz": Laura Ingraham ... Guy Benson ... Bustle.com director of research Jessica Tarlov ... Erin McPike ... The Hollywood Reporter's Matthew Belloni ... Will Leitch

-- CNN's "Inside Politics" with John King: Panel: Abby Phillip, Michael Bender, Eliana Johnson and Manu Raju

--CNN's "Reliable Sources": FCC commissioner Jessica Rosenworcel, former FCC

chair Tom Wheeler, former commissioner Michael Copps. Panel: Jennifer Rubin and Freedom of the Press Foundation executive director Trevor Timm ... Bob Schieffer ... Janice Min ... The New York Times' Jodi Kantor ... Howard Schultz

--Univision's "Al Punto": Nuevo Leon, Mexico Governor Jaime "El Bronco" Rodriguez ... Puerto Rico Governor Ricardo Rosselló ... Rep. Luis Gutièrrez (D-Ill.) ... actress Kate Del Castillo ... Univision Deportes' Enrique "El Perro" Bermúdez

--C-SPAN: "The Communicators": Cryptotronix founder Josh Datko ... SensePost COO Daniel Cuthbert ... SensePost head of training Sam Hunter ... Invincea Labs Cyber Research scientist and trainer Melissa Kilby ... **"Newsmakers":** Rep. Rob Bishop (R-Utah), questioned by The Washington Post's Juliet Eilperin and The Hill's Scott Wong ... **"Q&A":** Biographer and Amherst College's William Taubman (Gorbachev: His Life and Times")

Subject: Court rejects effort to revive Pruitt's methane rule stay

By Alex Guillén

08/10/2017 05:05 PM EDT

The full D.C. Circuit Court of Appeals today by a vote of 8-3 rejected attempts to revive EPA Administrator Scott Pruitt's 90-day stay of the methane rule for new oil and gas wells.

A three-judge panel last month said Pruitt's stay was unlawful, and the full court later reinstated the methane rule. Today, it said it will not grant the en banc appeal requests made by industry groups and Republican state officials. The Trump administration itself did not seek an appeal.

The rejection effectively ends any further appeal efforts; seeking Supreme Court review would take more time than would be left on the stay, which would have expired Aug. 31. However, Pruitt is likely to have a longer-term stay in place soon.

Three of the circuit's 11 active judges voted to hear the appeal: Karen LeCraft Henderson, Janice Rogers Brown and Brett Kavanaugh. All three are Republican appointees.

WHAT'S NEXT: The public comment period on Pruitt's proposed stay that would last through 2019 closed on Wednesday. That longer-term stay could be in place in a matter of weeks.

Subject: BREAKING NEWS: Senate will not vote on tax bill tonight

Senate Republicans' work on their massive tax overhaul will continue into Friday, as senators continue trying to win over skeptical deficit hawks and other hold-outs.

Senate Majority Leader Mitch McConnell (R-Ky.) said the next vote in the tax debate will come at 11 a.m. Friday.

California

AIR
Air Resources Board/Climate Change
California AIR

Final rule of the Air Resources Board adopts regulations under 17 CCR 95665 through 95677 and Appendices A, B, and C to set forth greenhouse gas emission standards for crude oil and natural gas facilities. The rule sets forth requirements for the collection and use of methane and associated gases from uncontrolled oil and water separators, well stimulation circulation tanks, specified centrifugal compressors, storage tanks, or replacement of higher emitting "wet seals" with lower emitting "dry seals." The rule also establishes requirements for leak detection and repair for idle and active components and enhanced monitoring for underground natural gas storage facilities, including leak detection, ambient air monitoring, and optical gas imaging. In addition, the rule sets forth methane emission standards for large reciprocating compressors, other large compressor components and smaller compressors. Finally, the rule sets forth standards for the use of "no bleed" pneumatic pumps and "no bleed" continuous bleed pneumatic devices with limited exemptions and restrictions on intermittent bleed pneumatic devices and reporting requirements for liquids unloading and well casing vents. The rule is effective Oct. 1, 2017. Contact: Trini Balcazar; ARB; 916-445-9564

Regulatory Update

COASTAL ZONE
Coastal Development Permits Issued by Coastal Commissions
California COASTAL ZONE

Final rule of the California Coastal Commission amends regulations under 14 CCR 13055 regarding coastal development permits. The rule increases fees for permit applications and other filings by 16.7 percent over the 2008 base year to reflect an increase in the consumer price index. The rule is effective July 1, 2017. Regulatory Update

MINING
Mining and Geology/Surface Mine Inspectors
California MINING

Proposed rule of the Department of Conservation, Division of Mine Reclamation, adopts regulations under 14 CCR 3504.6 concerning the establishment of a training program for surface mine inspectors. The rule incorporates a guidance document that provides instructions and recommendations to surface mine inspectors performing inspections, including specifying the types of professionals authorized to conduct an inspection, lead agency responsibilities, inspection scheduling recommendations, requirements for inspection preparation and follow up, and filing requirements. The rule is being proposed due to a new statutory requirement that all mine inspections be conducted by an inspector who has on file with the lead agency and the department a certificate of completion of an inspection training workshop on or after July 1, 2020. Hearing requests are due Aug. 25, 2017. Comments are due Sept. 11, 2017. Contact: Paul Fry; Department of Conservation, Division of Mine Reclamation; 916-324-0681; Paul.Fry@conservation.ca.gov

Regulatory Update

OCCUPATIONAL SAFETY AND HEALTH
General Industry Safety Orders/Benzyl Chloride
California OCCUPATIONAL SAFETY AND HEALTH

Proposed rule of the Department of Industrial Relations, Occupational Safety and Health Standards Board, amends regulations under 8 CCR 5155 to reduce the permissible exposure limit for benzyl chloride to an eight-hour time weighted average of 0.03 parts per million. A hearing is scheduled for Sept. 14, 2017, in Walnut Creek. Comments are due Sept. 14, 2017. Contact: Marley Hart; DIR, Occupational Safety and Health Standards Board; 916-274-5721

—California Regulatory Notice Register (07/28/2017)

Regulatory Update

SOLID WASTE
Secondary Material Processing Facilities and Operations
California SOLID WASTE

Proposed rule of the Department of Resources Recycling and Recovery amends regulations under 14 CCR 17400 through 17410.4 (nonconsecutive) and 18100 through 18105.11 to set forth minimum operating standards for secondary material processing facilities and operations. The rule also places the facilities within the enforcement agency notification tier and registration permit tier. The rule creates an efficient permitting path for recycling centers that handle residual waste exceeding allowable levels and that would otherwise be required to obtain a full solid waste facility permit. A hearing is scheduled for Sept. 12, 2017, in Sacramento. Comments are due Sept. 11, 2017. Contact: Martin Perez; DRRR, Compliance and Mitigation Division; 916-323-0834; transfer.processing.regs@calrecycle.ca.gov

EPA Chief: Under Trump, Agency Is Like Never Before

Alex Stuckey
October 20, 2017
http://www.houstonchronicle.com/news/houston-texas/houston/article/EPA-chief-Under-Trump-agency-is-like-never-12292376.php

Environmental Protection Agency Chief Scott Pruitt gave a succinct message to oil and gas industry leaders Thursday night: The Trump administration's agency will be nothing like the last.

President Donald Trump and his cabinet members are "focused on results and that's been the primary focus of my first months at the EPA," Pruitt said. "We're establishing metrics and benchmarks and performance standards in key areas of what we do."

Pruitt spoke Thursday night during the Texas Oil and Gas Association's annual Lone Star Energy Forum in The Woodlands, answering questions for about 30 minutes from the association's president, Todd Staples.

As an example of quick action, he pointed to the San Jacinto Waste Pits. After years of waiting for the area to be cleaned up, Pruitt said, he came in mid-September and promised an answer by Oct. 14. On Oct. 11, the EPA approved a plan to permanently remove tons of toxics from the waste pits.

'Getting back to basics'

Prior to his discussion Thursday night, Pruitt said he met with community members and environmental advocates about the San Jacinto Waste Pits. He said they were thanking him for acting quickly.

"We're getting back to basics, focused on our core mission, focused on results," he said.

Earlier in the day, about a dozen environmental advocates gathered at the old Brady's Landing restaurant to protest Pruitt's appearance at the association's meeting. Pruitt, they said, should take a "toxic tour" of their neighborhoods, rather than speak to oil and gas leaders.

During Thursday's talk, Pruitt talked about working with Trump - whom he called a courageous man of action - as well as his plans to act faster on Superfund site and permitting decisions.

Staples questioned Pruitt about the clean power plan, which Pruitt decided to withdraw earlier this month. Pruitt said he believed the last administration used it to start a war on coal or fossil fuels.

"I don't believe it's the role of the EPA to pick winners and losers," he said. "I don't think it's the role of the EPA to say here's what you should choose … they should use all forms of electricity … based upon what? Stability and costs."

Pruitt said the agency is evaluating its options to replace the plan under current law, but cannot do anything Congress has not already authorized it to do.

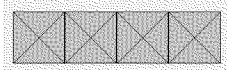
"Our job is to follow the law, we can't make it up," he said. "That was novel to the last administration, it's fundamental to this administration."

This has caused regulatory and financial uncertainty both in the energy and health care sectors, he said.

"The greatest impact on the low percentage of growth is regulatory uncertainty because you have regulators acting in ways that's untethered to statute," he said.

Partnerships sought

He also noted his agency's commitment to a transparent rule-making process that involves the public and not the courts. Pruitt also spoke about the importance of partnership between all environmental stakeholders, including the energy industry.



…

He noted energy industry leaders care about the water they drink and the air they breathe.

"Are there bad actors out there? Absolutely," he said. "We're going to prosecute bad actors, but we shouldn't start by saying (certain people) don't care about these issues. You do."

Driving the Day

Good Tuesday morning. AMAZING SPLIT SCREEN TODAY. PRESIDENT DONALD TRUMP and **VP MIKE PENCE** are in New York at the U.N. General Assembly. **WASHINGTON** is completely and totally focused on Graham-Cassidy, the final gasp of an Obamacare repeal.

TRUMP ON THE WORLD STAGE -- POTUS SPEAKS TODAY IN TURTLE BAY -- "Trump, the 'America First' president, goes to the UN," by AP's Jonathan Lemire: "Elected on the nationalist slogan 'America first,' President Donald Trump will use his debut address to the U.N. General Assembly to argue that individual nations should act in their own self-interest, yet rally together when faced with a common threat such as North Korea.

"Trump, who has warned of 'fire and fury' if North Korea does not back down, was expected to argue Tuesday that the dangers posed by Kim Jung Un's pursuit of a nuclear weapons program should unite all nations. And he planned to issue not just warnings to North Korea but also rebukes to states that have enabled Pyongyang, though it was unclear if he would criticize China by name.

"Addressing the General Assembly is a milestone moment for any president, but one particularly significant for Trump, a relative newcomer to foreign policy who has at times rattled the international community with his unpredictability. He has pulled the Unites States out of multinational agreements, considered shrinking the U.S. military footprint in the world and deployed bombastic language on North Korea that has been criticized by other world leaders." http://bit.ly/2fgKQbx

-- ALL TODAY: Pence meets at 9:30 a.m. with the E.U.'s High Representative Federica

Mogherini before shuttling back to Washington for the Senate GOP lunch to push Congress to pass Obamacare repeal and replace legislation. He then turns around and goes back to New York for a diplomatic reception hosted by Trump and the first lady. Pence was scheduled to be in New York all day for U.N. business.

THE ZOOM OUT, HEALTH CARE EDITION -- BURGESS EVERETT and **JEN HABERKORN:** "Senate Republicans' last-gasp Obamacare repeal effort is gaining steam, with key senators who tanked the last push in July signaling new openness to the latest attempt and GOP leaders growing increasingly bullish.

"While the proposal written by Sens. Lindsey Graham (R-S.C.) and Bill Cassidy (R-La.) remains short of 50 votes, it also has just one hard 'no' vote, from Kentucky Sen. Rand Paul, and another expected 'no' in Sen. Susan Collins of Maine. Three 'no' votes would kill the bill, but in an encouraging sign for repeal proponents, no one is stepping forward yet to deliver that final nail.

"Instead, wavering senators remain on the sidelines . Conservative Sen. Mike Lee of Utah is warming to the legislation, which would turn federal health care funding into block grants for states and eliminate Obamacare's coverage mandate, while Alaska Sen. Lisa Murkowski is undecided. ... A Republican senator who has spoken to GOP leaders said Murkowski is likely the bellwether. This senator said that GOP leaders believe other undecided senators will support the bill if it is put on the floor and that McConnell has begun whipping the bill because he 'realizes that there's life out there.' 'We are one vote away from doing this thing,' the senator insisted." http://politi.co/2jGzxe0

-- WE HEAR: HHS Secretary Tom Price and CMS Administrator Seema Verma are also going to huddle with Senate Republicans today.

-- BEHIND THE SCENES LAST NIGHT: Cassidy met with the leadership last night. Senate Republican leaders began whipping the bill on the Senate floor.

TIME IS SHORT: The Senate's ability to pass the bill using a simple majority expires on Sept. 30 -- 11 days from now. Generally speaking, the same people have the same problems with this bill that they had with the last. This time, there's a true deadline. Does that end date change the dynamics enough?

BIGGEST LINGERING QUESTIONS ...

-- THE HOLDOUTS. The key votes are, obviously, **SENS. JOHN MCCAIN (R-ARIZ.)** and **LISA MURKOWSKI (R-ALASKA).** They have both been cagey about where they stand. McCain has said he wants to ensure the bill goes through regular order -- Senate Republicans have scheduled two hearings next week. Not regular order, of course, but it's something. McCain to CNN: "We've had nine months. That's my answer. We've had nine months to get it done and we haven't. Is it my problem now that we only have a week? It's not my problem." http://cnn.it/2xNkKEv Murkowski has said she's worried

both about process and how much money Alaska will get to help cover more people and pay for premiums.

-- THE C.B.O. The Congressional Budget Office -- the official budget scorekeeper -- will only be able to provide a "a preliminary assessment of the Graham-Cassidy bill by early next week." But it will not have data on how the bill affects the deficit, insurance coverage or premiums. So, senators are being asked to vote blindly on the legislation, which could be tricky.

-- KENNEDY'S CATCH. Sen. John Kennedy (R-La.) takes a different view, and says if Congress gives a bunch of money and authority to states, some big blue states are going to set up single payer systems. http://washex.am/2w45vmh

-- REGIONAL CONCERNS. OK, let's assume this gets out of the Senate. Some regional issues will bubble up in the House. Big states like New York do not fare well under the Graham-Cassidy bill. The margin for error in the House is roughly 22 votes.

THE STARK POLITICAL REALITY -- This is the last chance to do something. That could prompt people to pony up and vote for the bill, but at the same time, you can't say you voted for the bill with the hopes that the other chamber will improve it. There is already talk about using next year's reconciliation to improve the health care system -- but that would screw up any plans on tax reform.

-- THE POST: "New push to replace Obamacare reflects high stakes for Republicans" http://wapo.st/2wDayJQ ... **NYT: "Obamacare Repeal, Thought Dead in July, May Be Revived in Senate"** http://nyti.ms/2wtKp56

-- BEHIND THE SCENES --CNN'S MANU RAJU: "Trump privately tries to mend fences with Senate Republicans" http://cnn.it/2f6ElnV

TRUMP'S TUESDAY -- In addition to his address to the general assembly, **TRUMP** is meeting with U.N. Secretary General António Guterres and the amir of Qatar.

FIRST IN PLAYBOOK -- FORBES put Donald Trump on its upcoming 100th anniversary issue, which celebrates the "100 Greatest Living Business Minds." http://politi.co/2f6NTPI ... ***"Trump: The Early Tweets (1982-2000)"*** http://politi.co/2xuJ11h ... ***"Trump: The Art of the Spiel"*** http://politi.co/2fgpCKD

BULLETIN -- at 5:21 a.m.: "MIAMI (AP) - Hurricane Maria regains extreme dangerous Category 5 storm strength, after brief drop in intensity."

2018 WATCH -- "Political campaigns prep for battle with hackers," by Daniel Strauss and Scott Bland: "The political world is officially obsessed with cybersecurity in 2017 - especially the Democrats burned by the hacking of their committees and operatives during the 2016 election. Much of the Democratic Party's permanent apparatus has already changed its day-to-day operations as a result, while beginning

the slow process of persuading its decentralized, startup-like campaign ecosystem to follow suit.

"House Democrats' top strategists have urged consultants working on their campaigns to start using Wickr, the end-to-end encrypted messaging app used inside the DCCC - but the consulting community has been slow to give up email and embrace the program, say three Democratic consultants involved in House races. Security measures vary widely from race to race, leaving many still vulnerable to hacking, and members of both parties say they are seeking centralized clearinghouses of anti-hacking information and services." http://politi.co/2xertEk

-- THE CHAMBER OF COMMERCE disclosed $372,045 in mail and media in support of Sen. Luther Strange in Alabama.

****** **A message from UC Davis:** The future looks bright thanks to next-generation, energy-efficient lighting developed at the UC Davis California Lighting Technology Center. With the potential to significantly reduce the nation's lighting energy use and greenhouse gas emissions, the CTLC is just one way we're supporting sustainability on a global scale. Learn more at 21stcentury.ucdavis.edu. ******

WHAT STEVEN MNUCHIN IS READING -- "Senate Republicans Consider a Trillion-Dollar-Plus Tax Cut for Budget," by WSJ's Rich Rubin and Siobhan Hughes: "Senate Republicans are considering writing a budget that would allow for up to $1.5 trillion in tax cuts over the next decade, said people familiar with the discussions. Budget talks are continuing and no final decision has been reached yet. A budget that creates fiscal room for a $1.5 trillion tax cut, if adopted, would then be followed by a tax bill that would specify rate cuts and other policy changes that don't exceed that figure. Calling for a tax cut in the budget would let Republicans lower tax rates while making fewer tough decisions on what tax breaks to eliminate to help pay for the cuts. ...

"With this latest turn in budget talks, Republicans are gradually shifting away from an earlier stance some took in favor of a tax plan that fully paid for itself in the first decade. Budget Committee member Mike Crapo (R., Idaho) said on Monday that the tax cut should be 'as big as we can get.' The budget is an essential first step to the major tax bill Republicans want to pass this year. If the House and Senate agree on a budget, they can fast-track a tax bill through the Senate on a simple-majority vote through a process known as reconciliation, rather than seek a bigger 60-vote majority that would require support from Democrats." http://on.wsj.com/2xtokTt

NOW YOU TELL US -- "Sean Spicer Says He Regrets Berating Reporters Over Inauguration Crowds," by NYT's Glenn Thrush and Dave Itzkoff: "In an interview on Monday morning, Mr. Spicer said he now regrets one of his most infamous moments as press secretary: his decision to charge into the White House briefing room in January and criticize accurate news reports that President Barack Obama's inauguration crowd was bigger than President Trump's. 'Of course I do, absolutely,' Mr. Spicer said. ... As Mr. Spicer prepared to return to Washington, he was asked if he was worried that Mr.

Trump would take offense over the skit, which many viewers saw as lampooning the president's preoccupation with the size of his inauguration crowd. 'I certainly hope not,' Mr. Spicer said after a brief pause. 'This was an attempt to poke a little fun at myself and add a little bit of levity to the event.'" http://nyti.ms/2xaFZ2p

AT FOGGY BOTTOM -- "State Department Tightens Rules for Visas to U.S.," by NYT's Gardiner Harris: "In a cable to American embassies around the world, Secretary of State Rex W. Tillerson wrote that visitors who require a visa before entering the United States must then follow through on their stated plans for at least three months. If in that period they do something they failed to mention in an interview with a consular official - such as marry an American citizen, go to school or get a job - it will be presumed that they have deliberately lied. That would make it difficult, if not impossible, for them to renew a visa, get a new one or change their status. ... Under previous rules, a change in plans was deemed to be misrepresentation only for the first month after arrival in the United States." http://nyti.ms/2fwTzmS

MUELLER WATCH -- "With a Picked Lock and a Threatened Indictment, Mueller's Inquiry Sets a Tone," by NYT's Sharon LaFraniere, Matt Apuzzo and Adam Goldman: "Paul J. Manafort was in bed early one morning in July when federal agents bearing a search warrant picked the lock on his front door and raided his Virginia home. They took binders stuffed with documents and copied his computer files, looking for evidence that Mr. Manafort, President Trump's former campaign chairman, set up secret offshore bank accounts. They even photographed the expensive suits in his closet. The special counsel, Robert S. Mueller III, then followed the house search with a warning: His prosecutors told Mr. Manafort they planned to indict him, said two people close to the investigation." http://nyti.ms/2hc4vtx

-- CNN: "Exclusive: U.S. government wiretapped former Trump campaign chairman," by Evan Perez, Shimon Prokupecz and Pam Brown: "U.S. investigators wiretapped former Trump campaign chairman Paul Manafort under secret court orders before and after the election, sources tell CNN, an extraordinary step involving a high-ranking campaign official now at the center of the Russia meddling probe. Some of the intelligence collected includes communications that sparked concerns among investigators that Manafort had encouraged the Russians to help with the campaign ... Two of these sources, however, cautioned that the evidence is not conclusive. ... The surveillance was discontinued at some point last year for lack of evidence ...

"The FBI then restarted the surveillance after obtaining a new FISA warrant that extended at least into early this year. The conversations between Manafort and Trump continued after the President took office, long after the FBI investigation into Manafort was publicly known ... They went on until lawyers for the President and Manafort insisted that they stop. ... It's unclear whether Trump himself was picked up on the surveillance." http://cnn.it/2xjiQdr

-- "Haley's former chief of staff to join Trump's legal team," by Eliana Johnson: "President Donald Trump has added another lawyer to his legal team as FBI special

counsel Robert Mueller prepares to interview a slate of senior White House aides. Steven Groves, who until last month served as chief of staff to U.N. ambassador Nikki Haley, will serve as deputy to White House special counsel Ty Cobb, who is managing the response to Mueller's investigation into Russian meddling into the 2016 election. White House press secretary Sarah Huckabee Sanders confirmed Groves' hire on Monday. ... Before joining the administration, Groves worked as a senior fellow at the Heritage Foundation, a conservative think tank, and as senior counsel to the Senate's permanent subcommittee on investigations, investigated the U.N.'s oil-for-food scandal." http://politi.co/2hf2Csz

-- **"More Than Seven Lawyers Working On Michael Flynn's Defense Team,"** by BuzzFeed's Chris Geidner: "The fees will 'certainly be into the seven figures,' according to [a] source." http://bzfd.it/2yayd5B

CLINTON SPEAKS -- "Clinton urges government workers not to quit their posts," by Gabe Debenedetti: "Hillary Clinton on Monday urged federal employees who disagree with the Trump administration to stay in their jobs if they can, condemning what she called the 'disregard, even contempt, among many in this administration about what federal workers know and what they've done, and the advice they can give.' The 2016 Democratic presidential nominee, speaking at Warner Theatre in Washington in the first speaking event of the national tour for her new book, urged government workers to 'stick it out, stick it out, because the tide has to turn.'" http://politi.co/2xilFeJ

SPEAKING OF CLINTON: "Feinstein and Biden slam Trump's golf ball retweet," by Brent D. Griffiths: "'Every one of us should be offended by the vindictive and candidly dangerous messages the president sends that demean not only Secretary Clinton, but all women,' Sen. Dianne Feinstein (D-Calif.) said in a blistering statement. Feinstein, a four-term incumbent, concluded that it was time for the president to 'grow up and do your job.' ... Hours after Feinstein issued her statement, former Vice President Joe Biden chided Trump on Twitter, writing that it was long past time for the president to stop using social media in such a manner. 'Enough,' he tweeted. 'This has to stop. Our children are watching.'" http://politi.co/2fxbbyU

DACA POLITICS -- S.F. CHRONICLE -- "Protesters shut down Pelosi news conference on DACA: 'All of us or none of us,'" by Evan Sernoffsky: "Chanting pro-immigrant slogans -- 'All of us or none of us,' 'Democrats deport' and 'We are not a bargaining chip' - more than 60 young people overwhelmed a news conference that House Minority Leader Nancy Pelosi had organized Monday on her home turf in San Francisco to urge passage of the Dream Act to protect immigrants who were brought to the country as children. After nearly an hour of boisterous chanting by protesters who described themselves as 'undocumented youth,' Pelosi and fellow House Democrats Barbara Lee of Oakland and Jared Huffman of San Rafael packed up and left as the carefully orchestrated event fell into disarray. ...

"Pelosi eventually walked outside to briefly address reporters before leaving. 'This group today is saying don't do the Dream Act unless you do comprehensive immigration

reform,' she said. 'Well, we all want to do comprehensive immigration reform. ... I understand their frustration -- I'm excited by it as a matter of fact -- but the fact is, they're completely wrong.'" http://bit.ly/2ybyOnr

--@nbcbayarea: "'You're a liar!:' 'Dreamers' confront Pelosi over negotiations with Trump over DACA" -- ***25-second video*** http://bit.ly/2wrXtYJ

THE JUICE ...

-- "MORNING JOE" is celebrating its 10-year anniversary this morning. In the 7 a.m. hour, guests include Bill de Blasio, Chris Christie and Michael Bloomberg. In the 8 a.m. hour, Tony Blair and Sen. Claire McCaskill (D-Mo.) will join. Sen. John McCain (R-Ariz.) will also make an appearance. The show also flew two fans who won their Twitter sweepstakes from Utah to see the show.

-- BREAKING -- HOLLYWOOD REPORTER -- "CBS Wins Bidding Showdown for Australia's Network Ten": "Creditors of embattled Australian free-to-air broadcaster Network Ten overwhelmingly voted in favor of a takeover bid for the company by CBS Corp. on Tuesday. Led by Ten staff, the acceptance of CBS' $32 million ... offer to unsecured creditors also saw creditors reject a counter offer of $44 million from Ten shareholders Lachlan Murdoch and Bruce Gordon. The pair had failed on Monday in a bid to get the local Supreme Court to stop Tuesday's meeting." http://bit.ly/2wsZt2C

BREAKING LAST NIGHT -- HAARETZ'S BARAK RAVID: "Prime Minister Benjamin Netanyahu met with Egyptian President Abdel-Fattah al-Sissi on Monday night in New York. This was the first public meeting between the two leaders since al-Sissi took office. The Prime Minister's office said that Netanyahu spoke with al-Sissi for about an hour and a half about regional issues. Al-Sissi expressed his desire to support regional and Israeli-Palestinian regional peace efforts." http://bit.ly/2xdIhv8

FIRST FAMILY -- " Donald Trump Jr. Gives Up Secret Service Protection, Seeking Privacy," by NYT's Nick Fandos and Maggie Haberman: "Donald Trump Jr., the president's eldest son, has elected to forgo protection by the Secret Service, according to a senior administration official. The agency ceased protecting Mr. Trump, who lives in New York City and is an executive at the Trump Organization, last week. Mr. Trump, an avid camper and hunter, is said to be seeking more privacy than he can expect with a

contingent of agents accompanying him everywhere. It was not immediately clear whether the decision applied to his family; he and his wife, Vanessa, have five children. ... But giving up protection of even the younger Mr. Trump alone will provide relief for the Secret Service, which has had its work force and resources strained by the size and lifestyle of the Trump family." http://nyti.ms/2ymrlNP

ISAAC DOVERE talks to **SEN. JEFF MERKLEY (D-ORE.)** for the latest "Off Message" podcast: "Almost no one knows who he is, but Jeff Merkley thinks there's a spot for him on the left flank of the 2020 Democratic primary-whether or not Bernie Sanders and Elizabeth Warren run. He's already beaten Warren to Iowa, and spent more time in Des Moines this month than Sanders has since last year's caucuses.

"'If I believe that something matters, I'll throw myself into it, and I'm OK losing. But when you throw yourself in with that attitude, and you're all about teamwork, sometimes you win,' Merkley said, recounting a career that's already taken him through a surprise election as a state representative in Oregon to being picked as speaker of the statehouse to beating a popular incumbent to get to the Senate in 2008. 'I'm willing to take on battles that I feel are important.'

"He already has down the coyness of a politician who spends a weekend in Iowa and pretends he's shocked to hear people thinking he has presidential ambitions. 'I knew it would create some rumors, and obviously I guess I was right,' Merkley said. When I noted that he was obviously fine with that, he shot back, 'I was right about that.'" http://politi.co/2ybxkcR

FEC WATCH -- "How the FEC Turned a Blind Eye to Foreign Meddling: For years, my fellow FEC commissioners refused to apply campaign finance rules to the internet. Now Russia is running amok on Facebook," by Ann Ravel in POLITICO Magazine: "[P]olicymakers for years have ignored or outright opposed the need to hold the internet advertising industry to the same standards the country has already agreed on for television and radio. Our campaign finance rules are outdated for the internet age, and rules on the books aren't enforced. ...

"I warned that Vladimir Putin could meddle in our elections nearly three years ago, as vice chair of the [FEC] ... Our vulnerabilities seemed obvious: The FEC's antiquated policies refer to fax machines and teletypes, but barely mention modern technological phenomena like social media, YouTube and bots. The inadequacy of the FEC's current regulations makes it practically impossible for both regulators and citizens to determine if the funding for a political advertisement online came from a domestic source or an enemy abroad." http://politi.co/2xdj18u

BUSINESS BURST -- "Equifax Is Said to Suffer a Hack Earlier Than the Date Disclosed," by Bloomberg's Michael Riley, Anita Sharpe and Jordan Robertson: "Equifax Inc. learned about a major breach of its computer systems in March -- almost five months before the date it has publicly disclosed, according to three people familiar with the situation. In a statement, the company said the March breach was not related to the hack that exposed the personal and financial data on 143 million U.S. consumers, but one of the people said the breaches involve the same intruders. ... Equifax hired the security firm Mandiant on both occasions and may have believed it had the initial breach under control, only to have to bring the investigators back when it detected suspicious activity again on July 29, two of the people said." https://bloom.bg/2xunOEN

MEDIAWATCH -- "Fox News Guest Says Rape Allegation Blacklisted Her," by NYT's Emily Steel: "Fox News, which for more than a year has dealt with the fallout from an embarrassing sexual harassment scandal, was sued on Monday by the political commentator Scottie Nell Hughes, who claimed that she had been raped by the longtime anchor Charles Payne and was then retaliated against by the network after she came forward with her allegation.

"Mr. Payne, the host of 'Making Money' on Fox Business, returned to the air this month after the network suspended him in July pending an investigation into his conduct. Upon his return, the network said that it had completed the investigation, which began after Ms. Hughes took her allegations to the network in late June. Mr. Payne's lawyer, Jonathan N. Halpern, said in a statement on Monday that his client 'vehemently denies any wrongdoing and will defend himself vigorously against this baseless complaint.'" http://nyti.ms/2xemgwj

-- "A Casualty of Trump's War with CNN is Back in the Game," by Vanity Fair's Joe Pompeo: Thomas "Frank now has a new job covering national security and counterintelligence for BuzzFeed, which he landed after applying through a link he saw on Facebook. He will start on October 2 as the Web site's first full-time reporter on that beat. ... Frank, 54, is a seasoned reporter with 16 years in Washington and four stints in Iraq under his belt. Prior to joining CNN earlier this year, he spent more than a decade at USA Today, where he was a 2012 Pulitzer finalist." http://bit.ly/2f6qMF1

AIR
Consolidation of Definitions
California Regions AIR

Final rule of the Mojave Desert Air Quality Management District amends regulations under Rule 102 to relocate common definitions contained in the district rulebook into one rule to ensure consistency. The rule also revises definitions to address amendments to Rules 1158 and 1162 regarding reasonably available control technology state implementation plan updates for electric generating facilities and polyester resin operations. The rule will be submitted to the U.S. EPA as a revision to the state implementation plan. The rule is effective June 12, 2017. Contact: Tracy Walters; Mojave Desert AQMD; 760-245-1661

Regulatory Update

AIR
Electric Power Generating Facilities
California Regions AIR

Final rule of the Mojave Desert Air Quality Management District amends regulations under Rule 1158 regarding electric power generating facilities to align emissions requirements with federal reasonably available control technology requirements. The rule reduces allowable nitrogen oxides (NOx) emissions limits, establishes separate limits for low use facilities, and adds an efficiency factor for combined-cycle turbines. The rule also revises exemptions and updates monitoring, recordkeeping, and test methods. In addition, the rule sets forth an aggregated annual NOx emission cap effective after June 26, 2017. The rule will be submitted to the California Air Resources Board and the U.S. EPA as a revision to the state implementation plan. The rule is effective June 26, 2017. Contact: Chris Anderson; Mojave Desert AQMD; 760-245-1661

Regulatory Update

AIR
Fees
California Regions AIR

Final rule of the Mojave Desert Air Quality Management District amends regulations under Rules 301, 302, and 303 to increase permit, hearing board, and various other fees by 2 percent. The rule also removes duplicative definitions. The rule is effective Jan. 1, 2018. Contact: Jean Bracy; Mojave Desert AQMD; 760-245-1661; jbracy@mdaqmd.ca.gov

—California RegionsRegulations (06/27/2017)

Regulatory Update

AIR
Fees
California Regions AIR

Final rule of the Monterey Bay Air Resources District amends regulations under Rules 300, 301, 306, 308, and 310 and adopts regulations under Rule 110 to increase permit fees by 5 percent. The rule also reduces late penalties and adds various source category specific fees based on the permit type rather than billable emissions. In addition, the rule revises requirements for payment of asbestos national emission standards for hazardous air pollutants fees and adds a new fee category for certain demolition or renovation activities. Finally, the rule establishes a requirement for applicants for a permit to operate to defend and indemnify the district in the event of a legal challenge relating to the issuance of the permit. The indemnification rule is effective June 21, 2017, and the fee rules are effective July 1, 2017. Contact: Amy Clymo; MBARD; 831-647-9411; aclymo@mbard.org

Regulatory Update

AIR
Marine and Pleasure Craft Coating Operations
California Regions AIR

Final rule of the Mojave Desert Air Quality Management District amends regulations under Rule 1106 regarding volatile organic compound (VOC) reasonably available control technology requirements for marine and pleasure craft coating operations subject to U.S. control technique guidelines. The rule updates definitions for specialty coating categories, reflects the application of the requirements to both marine and pleasure craft coatings, and increases requirements for overall control efficiency to 90 percent. The rule also updates work practice standards and reduces maximum permissible VOC content of surface preparation materials to 25 grams per liter unless cleaning operations can be performed within air pollution control equipment with a capture efficiency of at least 90 percent. The rule will be submitted to the U.S. EPA as a revision to the state implementation plan. The rule is effective Oct. 24, 2016. Contact: Tracy Walters; Mojave Desert AQMD; 760-245-1661; twalters@mdaqmd.ca.gov

Regulatory Update

AIR

Motor Vehicle Assembly Coating Operations

California Regions AIR

Final rule of the Antelope Valley Air Quality Management District adopts regulations under Rule 1151.1 to establish volatile organic compound emissions limits for motor vehicle assembly coating operations. The rule sets forth limits for coatings applied to new motor vehicles, light-duty trucks, and heavier vehicles and other parts that are coated along with these body or body parts during the vehicle assembly process and associated solvent cleaning activities. The rule also sets forth solvent disposal and storage requirements, recordkeeping requirements, and test methods and requires operators to develop work practice plans. The rule will be submitted to the U.S. EPA as a revision to the ozone state implementation plan. The rule is effective June 20, 2017. AIR

New Source Review/Prevention of Significant Deterioration

California Regions AIR

Final rule of the Mojave Desert Air Quality Management District amends regulations under Rules 1300, 1302, and 1320 and adopts regulations under Rule 1600 regarding new source review (NSR) and prevention of significant deterioration. The rule incorporates federal requirements for new and modified major stationary sources, revises notice requirements for minor source permitting activities, and allows the district to request enhanced NSR designation to allow various permitting activities to be performed concurrently. The rule also clarifies provisions, revises citations, and makes technical corrections to conform to federal requirements. In addition, the rule specifies that visibility provisions apply to major modifications to facilities within 63 miles of a Class I federal area, and allows the submission of specified NSR and PSD documents to be combined with documents provided in conjunction with Title V operating permit requirements. The rule will be submitted to the U.S. EPA as a revision to the SIP. The rule is effective Aug. 22, 2016. Contact: Karen Nowak; Mojave Desert AQMD; 760-245-1661; k2nowak@mdaqmd.ca.gov

AIR

Organic Solvent Degreasing Operations

California Regions AIR

Final rule of the Mojave Desert Air Quality Management District amends regulations under Rule 1104 regarding organic solvent degreasing operations. The rule updates reasonably available control technology (RACT) requirements for sources subject to EPA control techniques guidelines to address the 2015 RACT State Implementation Plan (SIP) Analysis commitment for the 2008 ozone national ambient air quality standards. The rule updates the definition of "volatile

organic compound (VOC)" to reflect the district's tert-butyl acetate policy and clarifies that the rule is not applicable to janitorial supplies used for cleaning offices, bathrooms, or similar areas. The rule also limits VOC content to 25 grams per liter for cleaning or surface preparation, specifies a composite vapor pressure limit in lieu of the VOC content limit, and adds a capture and control efficiency for control equipment of 90 percent. In addition, the rule sets forth cleaning methods, incorporates work practices into the operating requirements, provides exemptions concerning solvent cleaning operations, and updates test methods. The rule will be submitted to the U.S. EPA as a revision to the SIP. The rule is effective March 27, 2017. Contact: Tracy Walters; Mojave Desert AQMD; 760-245-1661; twalters@mdaqmd.ca.gov

AIR
Polyester Resin Operations
California Regions AIR

Notice of the Mojave Desert Air Quality Management District announces changes to and an additional hearing on a proposed rule to amend regulations under Rule 1162 regarding polyester resin operations. The hearing is intended to address substantive comments from the U.S. EPA. The rule aligns reasonably available control technology (RACT) requirements with federal RACT. The rule adds requirements for volatile organic compounds emissions, control device efficiency, organic solvent cleaning, and work practices. The rule also addresses fiberglass boat manufacturing operations and establishes exemptions for certain solvent cleaning applications. In addition, the rule updates definitions, recordkeeping requirements, test methods, and monomer limits for corrosion resistant resin. If adopted, the rule will be submitted to the California Air Resources Board and the U.S. EPA as a revision to the ozone state implementation plan. The hearing is scheduled for Aug. 28, 2017, in Victorville. A comment due date is not specified. Contact: Tracy Walters; Mojave Desert AQMD; 760-245-1661

Subject: EPA extends public comment period for WOTUS repeal

By Annie Snider

08/16/2017 04:05 PM EDT

EPA is giving the public another month to comment on its move to repeal the Obama administration's Waters of the U.S. rule.

The agency announced today that it will extend the public comment period by 30 days, giving environmental groups, industry advocates and the public until Sept. 27 to weigh on its proposed rule to repeal the Obama-era regulation.

Supporters of the Obama rule, which increases the number of streams and wetlands that receive automatic federal protection, had criticized the length of time the Trump administration gave for public comment. The repeal rule was originally opened for 30 days of comment, although it was public for about a month before the comment period formally opened. The original Obama rule, also called the Clean Water Rule, was open for more than 200 days. Issues raised through the public comment process help lay the groundwork for future legal challenges.

EPA Administrator Scott Pruitt has pushed to swiftly repeal the contentious regulation and draft his own rewrite defining which marshes, bogs and creeks are subject to regulation under the Clean Water Act.

WHAT'S NEXT: Comments on the Trump administration's rule to repeal the WOTUS regulation are due by Sept. 27.

Appropriations

House to Hurry Through $36.5 Billion in Hurricane, Wildfire Aid

The House will fast-track a $36.5 billion disaster aid package to help areas devastated by recent hurricanes and wildfires. House Republican leaders plan to bring the aid package to the floor Oct. 12 under expedited procedures that won't allow amendments, and to pass it after a quick debate. The bill would provide federal relief for Puerto Rico and other storm-ravaged areas, as well as aid for states affected by wildfires like California.

Reuters

Instead of cutting immigration in half, let's increase it

James Pethokoukis | AEIdeas

President Trump is supporting an immigration bill from Republican Senators Tom Cotton (R-AR) and David Perdue (R-GA) that would replace, as The New York Times explains, "a system that favors family ties in deciding who can legally move to the United States with one based on skills and employability." But the end result, according to a Cotton aide, would be to cut immigration to America in half. Given what problems confront the US economy today, isn't that off point?

Twenty20

New research confirms: No crisis for today's retirees

Andrew G. Biggs | Forbes

"There's nothing so classy as a policy wonk reveling in vindication. And I'm nothing if not classy," writes Andrew Biggs. "But there's a bigger purpose to be served." Biggs is referring to an argument he made in 2014 about the ballyhooed "retirement crisis," explaining that once you correct for poor measurement of retirement incomes, retirees are a lot better off than you think. A new study with access to confidential IRS data backs up the claim.

Driving the Day

Good Friday morning. BULLETIN: "TOKYO (AP) -- Toyota and Mazda say they will set up a $1.6 billion joint-venture plant in the U.S., creating 4,000 jobs."

-- @realDonaldTrump at 6:02 a.m.: "Toyota & Mazda to build a new $1.6B plant here in the U.S.A. and create 4K new American jobs. A great investment in American manufacturing!"

THE REAL TIMELINE -- SPEAKER PAUL RYAN told the Wisconsin State Journal that he "plans to introduce a tax overhaul bill in September with the goal of passing it through the House by the end of the year." No October deadline. Ryan also said if the House doesn't do its job "we will depress turnout" in 2018. http://bit.ly/2fdWlzW

WHAT EVERYONE IS TALKING ABOUT -- "Special Counsel Robert Mueller Impanels Washington Grand Jury in Russia Probe," by WSJ's Del Quentin Wilber and Byron Tau: "Special Counsel Robert Mueller has impaneled a grand jury in Washington to investigate Russia's interference in the 2016 elections, a sign that his inquiry is growing in intensity and entering a new phase, according to people familiar with the matter. The grand jury, which began its work in recent weeks, signals that Mr. Mueller's inquiry will likely continue for months. ... Ty Cobb, special counsel to the president, said he wasn't aware that Mr. Mueller had started using a new grand jury. 'Grand jury matters are typically secret,' Mr. Cobb said. 'The White House favors anything that accelerates the conclusion of his work fairly. ... The White House is committed to fully cooperating with Mr. Mueller.'" http://on.wsj.com/2ua1HTD

REUTERS -- "Grand jury issues subpoenas in connection with Trump Jr., Russian

lawyer meeting: sources," by Karen Freifeld and John Walcott: "A grand jury has issued subpoenas in connection with a June 2016 meeting that included President Donald Trump's son, his son-in-law and a Russian lawyer, two sources told Reuters on Thursday, signaling an investigation is gathering pace into suspected Russian meddling in the 2016 U.S. election. The sources added that U.S. Special Counsel Robert Mueller had convened the grand jury investigation in Washington to help examine allegations of Russian interference in the vote." http://reut.rs/2fbO6V3

-- "One year into the FBI's Russia investigation, Mueller is on the Trump money trail," by CNN's Evan Perez, Pamela Brown and Shimon Prokupecz: "Federal investigators exploring whether Donald Trump's campaign colluded with Russian spies have seized on Trump and his associates' financial ties to Russia as one of the most fertile avenues for moving their probe forward, according to people familiar with the investigation. The web of financial ties could offer a more concrete path toward potential prosecution than the broader and murkier questions of collusion in the 2016 campaign, these sources said. ...

"CNN has learned some of the investigators involved in the probe are buying liability insurance out of concern they could become targets of lawsuits from those who are being investigated, according to one of the people familiar with the probe. The Justice Department covers legal fees for employees sued in the course of their duties, but some of the lawyers want extra protection." http://cnn.it/2v4ktJ1

TRUMP RESPONDS -- "Trump rallies his base against Russia investigation," by Matt Nussbaum in Huntington, West Virginia: "President Donald Trump used a campaign-style rally Thursday night to level a sustained attack on the investigation into Russian meddling in last year's election, just hours after news broke that special counsel Robert Mueller had tapped a grand jury as part of the wide-ranging probe. Calling the investigation 'fake' and 'demeaning,' he said it was both a Democratic excuse for the election loss and a distraction from what Trump contends are the more serious crimes of his 2016 opponent, Hillary Clinton.

"The adoring crowd here responded by reprising a hallmark of the campaign, chanting, 'Lock her up!' ... 'We didn't win because of Russia -- we won because of you, that I can tell you,' Trump said, continuing the riff. 'Have you seen any Russians in West Virginia or Ohio or Pennsylvania? Are there any Russians here tonight?'" http://politi.co/2u6asKo

-- "West Virginia Democratic governor switches to GOP," by Matt Nussbaum, Gabe Debenedetti, Kevin Robillard and Daniel Strauss: "West Virginia Gov. Jim Justice announced a party switch Thursday evening in a surprise appearance with President Donald Trump in Huntington, West Virginia. 'Today, I will tell you, with lots of prayers and lots of thinking, I can't help you anymore being a Democrat governor,' Justice said. 'So tomorrow, I will be changing my registration to Republican.' ... Justice, who seldom worked with other Democrats, recently spent a well-publicized day hunting with Donald Trump Jr. - a familiar political optic in a largely rural state with a strong hunting tradition.

But his move still blindsided his old party, which is now left with control of just 15 governor mansions." http://politi.co/2uq4seu

WHERE THINGS STAND ON CAPITOL HILL ...

REPUBLICANS looking to find a path forward on a short-term government funding bill and raising the debt ceiling when they come back in September have begun discussing combining the two must-pass pieces of legislation. Both the debt ceiling and government funding bills will need Democrats to pass. They are likely to try to extend the debt ceiling and government funding to December. If they combine them it would allow leadership to try to strike a deal. **EXPECT** this strategy to inflame conservative members who are unlikely to be appeased by the argument that the real fight is in December.

JUST TO CLEAR THINGS UP -- OMB DIRECTOR MICK MULVANEY told reporters yesterday at a brown-bag lunch that "Steve Mnuchin speaks for the administration when it comes to -- on the debt ceiling. We've heard that out of the President's mouth, and I respect that, in fact that's the right way to do it. I've got budget, Mnuchin's got debt ceiling, and Cohen's got tax ... so there is no infighting within the administration about the debt ceiling."

-- "Republicans leave town with no clear path on Obamacare," by Jen Haberkorn and Paul Demko: "Senate leaders want to just drop the issue altogether. Conservatives say they're still fighting for repeal. Moderates want to launch a bipartisan effort to fix the shaky Obamacare system. The reality is that, after seven years of unity on repealing Obamacare, Republicans are rudderless on how to talk about or address the defining domestic policy issue of nearly the past decade for their party, and they have no clear plans despite holding all the levers of power in Washington. Now, they face a month away from the Capitol, answering to their home-state voters about their lack of progress." http://politi.co/2ht3bm3

REMEMBER THE STAY-IN-UNTIL-HEALTH-CARE-IS-DONE THING? -- @nielslesniewski: "At 7:01 p.m., the Senate has adjourned for August recess. No legislating until Sept. 5. Pro forma sessions will block recess appointments."

****** **A message from Morgan Stanley** : The Future of Energy: Looking at renewable energy's progress, is alternative energy really alternative anymore? Read more. ******

THE KELLY CHRONICLES -- NYT A1, "John Kelly Quickly Moves to Impose Military Discipline on White House," by Glenn Thrush, Mike Shear and Eileen Sullivan: "In his six months as Homeland Security secretary, John F. Kelly often described the White House as one of the most dysfunctional organizations he had ever seen, complained to colleagues and allies about its meddling, incompetence and recklessness, and was once so angry he briefly considered quitting. Now as President Trump's chief of staff, he is doing something about it -- with a suddenness and force that have upended the West Wing. Mr. Kelly cuts off rambling advisers midsentence. He

listens in on conversations between cabinet secretaries and the president. He has booted lingering staff members out of high-level meetings, and ordered the doors of the Oval Office closed to discourage strays. ...

"'Several times I've been on phone conversations with the president over the last couple of days and General Kelly has been on those conversations as well,' Mick Mulvaney, the director of the Office of Management and Budget, told reporters on Thursday when asked if Mr. Kelly was making a mark. The Trump White House is a judge-a-book-by-its-cover workplace, and staff members have been struck by Mr. Kelly's bearing: tall, stern and commanding a respect Mr. Priebus never did. People close to Mr. Kelly said they expected him to methodically assess his new staff before making more drastic changes -- and he has told people that he wants to improve morale before attacking the organizational chart." http://nyti.ms/2wcsdJn

-- "Kelly gives McMaster cover in West Wing battles: Trump's national security adviser has emerged as one of the most volatile personalities in White House," by Bryan Bender, Josh Dawsey and Nahal Toosi: "National security adviser H.R. McMaster, who has waged a pitched battle with other senior staff for control over policy and personnel on the National Security Council, is taking advantage of the shield offered by the arrival of his old military colleague John Kelly as White House chief of staff. Kelly told McMaster this week that he wanted him to remain as national security adviser, said two senior White House aides, and has encouraged him to make any staffing changes he deems necessary. ...
